Subject: Tampa Electric proposed increase

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

I understand you are considering allowing Tampa Electric to increase their rates by 11%? Tampa Electric is proposing a \$445M increase over three years. These increases will be carried by the consumer while giving a break to the larger corporations. I understand the economy is hurting everyone, including the corporations that employ us, however by putting the burden on the consumer backs, you are not looking out for the everyday Joe.

How can an 11% even be considered when inflation is hitting us all like a hammer? Have you all lost touch with what is going on everyday?

I am voicing my opinion that their proposed increase is totally out of hand. I wrote to my senator Danny Burgess.

This hurts us all. Please consider this as you vote.
