Comments:

TECO has asked for approve to increase base rate under the lies of reliability - yet they want to add a solar plant. Most of their customer sit without power after Milton and they think having it fixed by 10/17 is acceptable. We spend money every month out of our electric bill to "harden the grid" and for what? The storm wasn't a CAT5 and so many areas are without power but also saw no damage. 170+ call to 911 over fights for gas, 60+% of traffic lights out. No base rate should be approved based on the sheer incompetence shown by tecu executives!
