Hello commissioner,
My name is Chris Bingham and I have been living in the FishHawk area for the last 10 years. I grew up in Polk County and my wife was born and raised near Madison. We enjoy being Floridians. I say this to let you know that one of the decisions your committee just made is another of many new reasons why we are feeling like Florida is no longer the place for us. You just approved a rate increase for TECO residential customers effective this year yet decreased the rate for big corporations. I understand that you were appointed by Gov DeSantis and that he has great interest in making corporations great again but as a member of the committee I was curious why you chose to put a bigger burden on the backs of residents and less so on corporations. I'm not a lawyer and I'm sure there are nuances to these decisions that will affect people's finances, but I'm just curious why you think this is the best course of action. Also, if you're so inclined, I would love to know which corporations would stand to gain from this decision so I can try to patronize them now that they will likely be lowering their prices given the savings they will be receiving. I do love some trickle down economics. Anyway, thanks for listening.

Sincerely,
Dr Christopher Bingham MD
