**Subject:** PROTESTING THE APPLICATION FOR WATER DOC # 20240011

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Hello. Please do NOT approve the water application for the Water Lily development, DOC # 20240011 on the corner of CR 13 and CR 214 in St. Johns County (St. Augustine area). We live here and depend upon our well water to cook, clean, and live. This is a rural area with many surrounding farms that also depend upon the ground water which is their source to grow and cultivate many, many vegetables including potatoes for Lays. The aquaculture of the bordering St. John's River has already been negatively affected and continues to diminish due to growth. There are no more manatee in the river up here, no more shrimp, no more sea grass, etc. An additional 3000 homes added to the homes already here plus the farms would continue to snuff out the environment.

In case you are not aware, St. Johns county's has already exploded with new homes, and with it came destruction and disregard of trees, plants, animals, traffic, current residents existing infrastructure and so on. St. Johns county is unrecognizable.

Lastly, the Water Lily development is for people 55 and older. The population is declining so I fail to see how anyone, including the builders would benefit from this mass construction.

Again, please do NOT approve this water application.

Thank you.

Regina Major
