Palm Island sewage system talks iv been reading I don't have all the information read
I do have land on the island

I'm concerned for the residents their

I understand port Charlotte was choice, but for reasons they are not been allowed.

My concern is this is a private island their is concerning about not having the money to bring this upfront and the people want port Charlotte to install

Iv built houses with septic many years now the cost does amount to what their asking approximately

Problem is that's not proper in my eyes to ask for money at front or bulk at once, their should be financing over years

Another thought is why are they charging people after the fact the people paid for it .

The residents really own the project after paying and should not pay fees or other choice the company puts in all the cost and charges for sewage after usage but only for amount that is used

That's not proper in my opinion especially it's a private island and the residents have the decisions who they want to use for installation and not to be forced.

Sincerely ,Dolores
