I would like to respectfully request that you vote to deny the petition of Environmental Utilities to install a low pressure sewage system on Little Gasparilla Island. Our family has owned property at 9810 and 9814 LGI for four generations. A low pressure system is not needed and, in fact, may very likely be more detrimental to the environment. Another concern is cost. What checks are in place to hold Environmental Utilities to the costs they project? The past 2 years have been tough. Homes have been lost, including ours at 9814, and most others severely damaged. Residents should not be required to pay an exorbitant amount of money for a system that is not needed while trying to rebuild after suffering through 3 hurricanes.

--

Sincerely,
Lelia C Gray
