Good morning,

We will be placing your comments below in consumer correspondence in Docket No. 20240032, and forwarding them to the Office of Consumer Assistance and Outreach.

Sincerely,

Brian Schultz

Commission Deputy Clerk II
Florida Public Service Commission

Subject: RE. Docket #20240032-SU

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Commissioner,

I am a resident on Palm Island and have been advised that your staff is recommending approval of My Boyer's sewer application.

I implore you to deny the application. I sat through each day of the hearing, assuming that the evidence must be overwhelmingly evident that there is no need to replace our specific tanks that work perfectly fine with a sewer system that is costly and has been proven to fail over and over.

Over 400 people showed up to let you know our opposition; a handful of people - mostly friends or relatives of Jack - were for it. What I heard was blatant lies from some of those who spoke for it. I promise you there was

NO poop floating around our island; if so my hand would be raised in support. Any septic that had a lid come off filled with sand. I heard no expert testimony that - wasn't paid for by Jack - that indicated a need.

If this application is approved, I am forced to believe there is no justification when it comes to the voice of the people who are most impacted by this decision. The County Commissioners, who supposedly support this, did not attend or present any input at the hearings. Why is that? Most likely because they know how unpopular it is and how it would impact their electability. I must assume their input was made behind closed doors which generates suspicion regarding what is really driving this decision.

If the decision is made to approve, then I expect a clear report on why. Please feel free to respond to my contact info below.

Thanking you in advance for making a fair decision that considers the people and the environment that we live in.
