Clerk and Commissioners:

We strongly oppose the private sewer application of Environmental Utilities – a for profit, privately owned company with little to no experience designing and installing a central sewer system on a sand barrier island. We have just experienced 2 “hundred year” storms – Ian and Milton- with no seepage or leaching from drain fields on this barrier island.

There has been no evidence of need for central sewer. Therefore, why would disrupting the entire ecological and environmental balance of this sensitive area make any sense at all? Why would placing undue, mandatory, and unaffordable for most families, financial burdens on residents even be considered? What is the responsibility of the county and the public utilities commission in this? Should more studies (which now show no need) be conducted at some date showing a need for central sewage how could the County abdicate its responsibility to address the situation and pass off its responsibilities to a private for profit company?

Once again, we thank you for your time and urge you to reject this Environmental Utilities application.

Sincerely,  
Bruno and Cheryl Klaus
