**BY E-PORTAL**

Mr. Adam Teitzman  
Florida Public Service Commission  
2540 Shumard Oak Boulevard  
Tallahassee, FL 32399-0850

**Re: Docket No. 20250010-EI: Storm protection plan cost recovery clause.**

Dear Mr. Teitzman:

Attached for filing, please find the revised direct (true up) testimony of Brittnee Baker and Revised Exhibit BB-1 for Florida Public Utilities Company. This will replace Ms. Baker's testimony and exhibit BB-1 originally filed on April 4, 2025.

Thank you for your assistance with this filing. As always, please don't hesitate to let me know if you have any questions whatsoever.

Sincerely,

Beth Keating  
Gunster, Yoakley & Stewart, P.A.  
215 South Monroe St., Suite 601  
Tallahassee, FL 32301  
(850) 521-1706

1                                **BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION**

2                                Docket No. 20250010-EI: Storm Protection Plan Cost Recovery (SPPCRC)

3                                REVISED DIRECT TESTIMONY (TRUE UP) OF BRITTNEE BAKER

4    On behalf of

5    Florida Public Utilities Company (FPUC)

6    Filed: May 2, 2025

7        **Q.     Please state your name and business address.**

8        A.     My name is Brittnee Baker. My business address is 500 Energy Lane, Dover,  
9                Delaware 19901.

10      **Q.     By whom are you employed and in what capacity?**

11      A.     I am employed by Chesapeake Utilities Corporation as Regulatory Analyst III.  
12                Chesapeake Utilities Corporation is the parent company of Florida Public Utilities  
13                Company (“Company” or “FPUC”).

14      **Q.     Can you please provide a brief overview of your educational and employment  
15                background?**

16      A.     I received a Bachelor of Science degree in Accounting from Johnson & Wales  
17                University. I have been employed with Chesapeake Utilities since 2018. I was hired  
18                as a Staff Accountant in 2018 before moving into the regulatory department in 2024.  
19                This role includes regulatory analysis and filings before the Florida Public Service  
20                Commission (“FPSC” or “Commission”) for FPUC

21      **Q.     Have you testified before this Commission?**

22      A.     Yes, I have previously provided written, pre-filed testimony in the Company’s annual  
23                Fuel proceeding, Docket No. 20240001-EI and Final 2024 True-up Docket No.

1           20250001-EI.

2       **Q.   What is the purpose of your testimony in this docket?**

3       A.     The purpose of my testimony is to present the Company’s actual SPP costs and revised  
4           True-Up for the period January 2024 through December 2024.

5       **Q.   Is FPUC providing the required schedules with this filing?**

6       A.     Yes. Included with this filing is Revised Exhibit BB-1, which includes Forms 1A –  
7           through 9A and is co-sponsored by Company witness P. Mark Cutshaw, who prepared  
8           Form 8-A in this exhibit. These forms support the Company’s actual SPP program  
9           costs for the January 2024 through December 2024 period.

10      **Q.   Were the Forms filed by the Company completed by you or under your direct**  
11      **supervision?**

12      A.     Yes, they were completed by me, except for Form 8A, which was completed by  
13           witness Cutshaw, who will discuss details pertaining to the variances in SPPCRC  
14           program costs and a summary of the Company’s 2024 SPP accomplishments in his  
15           direct testimony.

16      **Q.   What were FPUC’s actual 2024 SPP costs?**

17      A.     FPUC incurred total costs of \$20,112,582, which consists of \$2,811,229 in operating  
18           and maintenance (“O&M”) expense and \$17,301,353 of capital investment for the  
19           period January 2024 through December 2024.

20      **Q.   Please state the actual end of period true-up amount for the SPPCRC for the**  
21      **period January 1, 2024 – December 31, 2024.**

22      A.     During January 2024 through December 2024, the final SPPCRC end of period true-  
23           up is an under-recovery of \$812,316 including interest, as detailed on Revised Exhibit

1 BB-1 page 1, Form 1A.

2 **Q. How does this amount compare with the estimated true-up amount, which was**  
3 **approved by the Commission in its December 2024 Final Order?**

4 A. As recognized in Order No. PSC-2024-0459-FOF-EI, in Docket No. 20240010-EI,  
5 FPUC anticipated an under-recovery of \$1,120,304, including interest, for the period  
6 January 2024 through December 2024.

7 **Q. What is the final remaining true-up amount estimated to be collected or refunded**  
8 **for the period January 2026 – December 2026?**

9 A. The SPPCRC final remaining true-up amount is an over-recovery of \$307,988 for the  
10 period ending 2024.

11 **Q. Please summarize the variance between the projected costs and the actual costs**  
12 **incurred for the 2024 period.**

13 A. Revised Exhibit BB-1 Page 4, Form 4A and Page 7, Form 6A detail the variances for  
14 both the O&M and Capital SPP Programs for the year. Witness Cutshaw provides  
15 variance explanations in his testimony.

16 **Q. On Revised Exhibit BB-1 Page 5, Form 5A, do the costs associated with pole**  
17 **inspection and vegetation management include the amount that is already**  
18 **recovered through base rates?**

19 A. Yes, the costs for pole inspection and vegetation management reported on Form 5A  
20 represent the total amount spent by the Company on these projects, including the  
21 amount already recovered in base rates.

22 **Q. Did the Company make an adjustment to remove the costs included in base rates**  
23 **for vegetation management and distribution pole inspections from the SPPCRC**

1           **calculation to prevent double recovery?**

2       A.     On Revised Exhibit BB-1 Page 2, Form 2A, Line 4d, the Company reduced the  
3           SPPCRC revenue requirement by \$975,504 to reflect the costs associated with  
4           vegetation management of \$852,742 as well as \$122,762 for distribution pole  
5           inspection that are being recovered through base rates.

6       **Q.     What capital structure, components and cost rates did FPUC rely on to calculate**  
7           **the revenue requirement rate of return for the period January 2024 through**  
8           **December 2024?**

9       A.     As shown on Revised Exhibit BB-1, Page 34, Form 9A, the Company used the same  
10          capital structure, components, and cost rates that were approved in Docket No.  
11          20240010-EI to calculate the revenue requirement rate of return.

12      **Q.     Should FPUC's costs related to the SPPCRC incurred during the January 2024**  
13          **through December 2024 be approved?**

14      A.     Yes, they should be approved, since the costs incurred by the Company for inclusion  
15          in the SPPCRC were practical and directly related to the Company's Commission  
16          approved SPP.

17      **Q.     Does this conclude your testimony?**

18      A.     Yes.

**Notes:**

- (a ) The equity component for the period is 5.25% and is based upon the amount approved in Order No. PSC-2024-0459-FOF-EI . The gross up factor is 1.3395 and includes the federal tax rate of 21% and state tax rate of 5.5%.
- (b ) The debt component for the period is 1.4900% and is based on the most recent financial forecast.
- (c ) Depreciation groups for additions are accounts 364, 365 and 368 for Overhead Storm Hardening project estimates and their applicable rates are 2.9%, 2.1% and 2.3%, respectively.  
Depreciation groups for additions are accounts 366, 367 and 368 for Undergrounding project estimates and their applicable rates are 1.5%, 2.0% and 2.3%, respectively.
- (d ) Property tax rate of 2% was applied
- (e ) Excludes costs recovered in Base Rates

Storm Protection Plan Cost Recovery Clause  
Final True-Up  
**Prior Period: May through December 2024**

SPPCRC Form 8A  
Page 1 of 6  
**REVISED 05/01/2025**

**Project Description and Progress Report**

**Activity Title:** *Distribution Pole Inspection and Replacement*

**Description :** *This project involves the inspection and replacement of all distribution wood poles. The inspections are conducted throughout the system on an eight-year rotating cycle in alignment with FPSC Order No. PSC-06-0144. Extreme wind loading, as specified in rule 250C and figure 250-2(d) of the NESC, has been adopted for replacement poles that fail the inspection. The detailed description is included in section 3.4 of the FPUC Storm Protection Plan.*

**Accomplishments :**

**Progress Summary:** *The inspection portion of this program is ongoing and conducted on an eight-year rotating cycle. 2024 marked the completion of the second cycle. Pole replacements are demand based driven by the results of the inspections. During 2024 there were 73 poles identified as failing the inspection and 142 poles replaced or eliminated, reducing the backlog to 40 poles from the previously reported 72 poles.*

**Fiscal Expenditures:** *2024 project costs were \$1.13M compared to the previously projected amount of \$0.96M which represents a variance of \$0.17M over original projections. This variance is due in part to the continuation of reducing the backlog of pole replacements.*

**Projections:** *2025 will begin the third cycle of the eight-year inspection program. FPUC anticipates normalized pole failure and replacement volumes following backlog reduction acceleration conducted in 2024.*

**Project Description and Progress Report**

**Activity Title:** *Transmission System Inspection and Hardening*

**Description :** *This project involves the inspection of all transmission system structures and proactive replacement of wood transmission poles with concrete poles. These inspections are conducted throughout the system every six years. The inspections ensure that all transmission structures and other transmission line supporting equipment are structurally sound and firmly attached*

**Accomplishments :**

**Progress Summary:** *This is an ongoing program of which inspections occur every six-years. All structures are inspected during the same calendar year. Most recent inspection cycle occurred during 2024 with reports being issued in 2025. There were 12 wooden transmission poles replaced with concrete poles during 2024 as FPUC finalized designs, received materials and began replacing*

**Fiscal Expenditures:** *2024 project costs were \$1.62M compared to the previously projected amount of \$1.10M which represents a variance of \$0.52M over original projections. This variance is due to unanticipated work conditions related to traffic control and worksite limitations which increased the amount of auxiliary services required and overtime work. Workforce mobilization was required twice due to unforeseen geotechnical issues which increase cost as well.*

**Projections:** *Material orders placed in 2024 are on track to arrive mid-2025 allowing for the continuation of construction activities necessary to replace 12 wooden transmission poles with concrete poles.*

REVISED 05/01/2025

**Project Description and Progress Report**

**Activity Title:** *Transmission and Distribution Vegetation Management*

**Description :** *This project involves the vegetation management activities conducted on the transmission and distribution facilities. The transmission system not containing distribution underbuilt, is monitored each year and vegetation management conducted as needed in order to provide for reliability of the relatively short line. The distribution system is set up on a four-year trim cycle for vegetation management activities. The detailed description is included in section 3.6 of the FPUC Storm Protection Plan.*

**Accomplishments :**

**Progress Summary:** *This is an ongoing program which will perform vegetation management activities on the transmission system as needed and on the distribution system on a four-year cycle. During 2024, vegetation management activities were performed on 151.20 miles of distribution and 1.71 miles of transmission line for a total 152.91 miles trimmed compared to a projected amount of 175.85 miles of distribution and 1.25 miles of transmission for a total of 177.10 miles trimmed. This reduction in mileage trimmed resulted in some modifications to the overall vegetation management contractor resources needed to improve efficiency*

**Fiscal Expenditures:** *2024 project costs were \$2.50M compared to the previously projected amount of \$2.59M which represents a variance of \$0.09M under original projections. Additional focus was placed on this program during 2024 which resulted in the minimal variance.*

**Projections:** *During 2025 FPUC is committed to improving the overall efficiency in order to achieve the four-year trim cycle mileage in the approved SPP.*

**REVISED 05/01/2025**

**Project Description and Progress Report**

**Activity Title:** *Overhead Feeder Hardening*

**Description :** *This project involves the hardening of overhead distribution feeders throughout the FPUC system. As part of the hardening of the overhead lines, each line segment is analyzed leveraging specialized software to ensure adherence to current NESC 250C extreme wind standards in place at the time of analysis. The detailed description is included in section 3.1 of the FPUC Storm Protection Plan.*

**Accomplishments :**

**Progress Summary:** *During 2024, designs for 18.82 miles and construction on 7.48 miles of Overhead Feeder Hardening were completed. Future year target identification was also performed in alignment with approved prioritization model.*

**Fiscal Expenditures:** *2024 project costs were \$7.32M compared to the previously projected amount of \$5.40M which represents a variance of \$1.92M over original projections. This variance is due in part to a continuation to work on the engineered projects in order to continue the ramp up in construction activities which were delayed in the early years of the SPP.*

**Projections:** *2025 will focus on the continuation of design and construction activities of feeders in both divisions in alignment with the prioritization model*

**Project Description and Progress Report**

**Activity Title:** *Overhead Lateral Hardening*

**Description :** *This project involves the hardening of multi-phase overhead distribution laterals throughout the FPUC system. As part of the hardening of the lateral overhead lines, each line segment is analyzed leveraging specialized software to ensure adherence to current NESC 250C extreme wind standards in place at the time of analysis. The detailed description is included in section 3.2 of the FPUC Storm Protection Plan.*

**Accomplishments :**

**Progress Summary:** *During 2024, designs for 12.6 miles and construction of 0.68 miles of Overhead Lateral Hardening were completed. Future year target identification was also performed in alignment with approved prioritization model*

**Fiscal Expenditures:** *2024 project costs were \$3.25M compared to the previously projected amount of \$2.30M which represents a variance of \$0.95M over original projections. This variance is due in part to a continuation to work on the engineered projects in order to continue the ramp up in construction activities which were delayed in the early years of the SPP.*

**Projections:** *2025 will focus on the finalization of construction of the Jasmine Phase 1 in NE FL and Cottondale Phase 2 in NW FL laterals and the design of additional lateral hardening jobs in both divisions*

**Project Description and Progress Report**

**Activity Title:** *Overhead Lateral Undergrounding*

**Description :** *This project involves the systematic undergrounding in place or relocation and undergrounding of the single phase overhead electric facilities, many of which are located in heavily vegetated areas, environmentally sensitive areas, or in areas where upgrading the overhead construction to NESC extreme wind standards is not practical or consistent with industry design standards. The detailed description is included in section 3.3 of the FPUC Storm Protection Plan*

**Accomplishments :**

**Progress Summary:** *During 2024, there were 13.49 miles designed and 1.20 miles constructed for the Overhead Lateral Undergrounding program. Future year target identification was also performed in alignment with approved prioritization model*

**Fiscal Expenditures:** *2024 project costs were \$4.30M compared to the previously projected amount of \$4.45M which represents a variance of \$0.15M under original projections. This small variance is due in part continued difficulty in completion of this type project due to customer interactions that sometimes delay the completion.*

**Projections:** *2025 will focus on the construction of the Jasmine and Bailey Road laterals. Construction for projects in NW FL will begin late second quarter in 2025 since materials and contractor acquisition has been completed.*
