PATRICIA S. LEE
CURRICULUM VITAE

QUALIFIED BY

Over 40 years of experience in reviewing and analyzing the assets of public utility companies in the electric, gas, telecommunications, and water and wastewater industries. Technical understanding of plant and equipment of telecommunications, electric, gas, and water and wastewater industries coupled with valuation, depreciation, and accounting knowledge of federal regulatory procedures and regulations.

PROFESSIONAL EXPERIENCE

03/2012 – Present

BCRI Inc. and Self

- Responsibilities include reviewing depreciation studies and basic data, and advising clients concerning recommended depreciation lives, net salvage values, resultant depreciation rates, reserve imbalances, and depreciation methods, procedures, and techniques.
- Specific regulatory experience providing expert testimony on depreciation matters includes:
  - For Chesapeake Utilities Corporation, providing expert consultation and support preparing the 2024 depreciation study for the Delaware Division. (Case No. 24-0906)
  - For Chesapeake Utilities Corporation, providing expert consultation and support preparing the 2023 depreciation studies for the Maryland Division, Sandpiper Energy, Inc., and Elkton Gas Company, and also for the consolidated company. (Case No. 9721)
  - For the Florida Public Utilities Consolidated Gas Divisions, provided expert consultation and support preparing the 2018 and 2023 depreciation studies filed with the Florida Public Service Commission.
  - For the Office of the Utilities Consumer Advocate of Alberta in the AltaLink Management Ltd. 2017 – 2018 General Tariff Application providing analysis, issue identification and support in negotiated settlement process. For the Office of the Utilities Consumer Advocate of Alberta in the ATCO Pipelines 2017 – 2018 General Rate Application providing joint written evidence. For the Office of the Utilities Consumer Advocate of Alberta in the AltaGas Utilities Inc. 2018 Depreciation Study providing joint written evidence. In the ATCO Pipelines 2019-2020 General Rate Application for the Office of the Utilities Consumer Advocate providing written testimony on depreciation related matters in conjunction with Patrick Bowman. For the Office of the Utilities Consumer Advocate of Alberta in the AltaLink Management Ltd. 2019 – 2021 General Tariff Application providing joint written evidence and oral testimony. For the Office of the Utilities Consumer Advocate of Alberta in the ATCO Electric Transmission 2020-2022 General Tariff Application providing joint written evidence. For the Office of the Utilities Consumer Advocate of Alberta in the AltaLink Management Ltd. 2022-2023 General Tariff Application providing joint written evidence.
  - For the Manitoba Industrial Power Users Group and The Coalition in the 2014/2015 and 2015/2016 Manitoba Hydro General Rate Application providing written and oral testimony.
  - For the Florida Public Utilities Electric Division, provided expert consultation and support preparing the company's depreciation study filed with the Florida Public Service Commission in 2015, 2019, and 2023 including in the agreement on appropriate life and salvage parameters, reserve position, and resultant depreciation rates.
  - For Industrial Customers of Newfoundland and Labrador Hydro in the 2012 Newfoundland and Labrador Hydro Depreciation Methodology Review providing written testimony and support in the negotiated agreement.

11/78 – 09/2011

FLORIDA PUBLIC SERVICE COMMISSION, Tallahassee, FL

Proficient in the application of principles of statistics, probability, engineering finance as related to the design of depreciation rates for utilities. Responsibilities included:

Technical

- Reviewed and analyzed depreciation rates and the capital recovery positions of Florida regulated utilities.
- Reviewed and analyzed the valuation of assets in a competitive market.
- Investigated and evaluated various valuation and depreciation methods and concepts, for example, age life, Equal Life Group, Fisher-Pry, net plant weighting, amortizations and capital recovery schedules.
- Developed use of engineering planning (short-term and long-range) as a tool in the determination of remaining life and/or capital recovery schedules.
- Determined the prudency of technologically driven change-outs of public utility assets.
- Assisted in the development of Commission rules regarding depreciation study requirements and review cycles for electric, gas, telecommunications and water and wastewater utilities.
- Investigated and developed Commission staff advisory guidelines regarding the allocation of overhead costs between capital and expense.
- Assisted in the development of Commission rules regarding stratification of depreciable plant for determination of life and salvage for gas, electric, and telecommunications companies.
- Assisted in the determination of the appropriate treatment for removal and disposal costs associated with gas service lines, nuclear decommissioning and dismantlement of fossil-fueled generating plants.
- Participated on the Tangible Personal Property Guidelines Industry/Government Task Force (Florida Department of Revenue), specifically with the development of the Life Expectancy Guidelines.
- Investigated issues arising with increasing competition in telecommunications and electric generation companies.
- Reviewed and analyzed cost studies for the purpose of determining unbundled network element prices and universal service cost levels for telecommunications companies as well as the appropriate nuclear decommissioning and fossil dismantlement annual accrual levels for electric companies.

Communication

- Prepared and presented oral and written Commission staff recommendations involving valuation and capital recovery matters in Commission depreciation and revenue rate proceedings.
- Served as Commission staff expert witness involving capital recovery matters.
- Served as member of the Comment Committee for the National Association of Regulatory Utility Commissioners (NARUC) Staff Subcommittee on Depreciation. Prepared comments for NARUC regarding various reports and orders issued by the Federal Communications Commission in the matter of simplification of the depreciation prescription process for telecommunications companies.
- Interfaced with staff of Federal agencies and other State Commissions, consulting firms, regulated and non-regulated companies and municipalities, and within the Commission.
- Presented depreciation accounting training at the 1993 - 1998 NARUC Annual Regulatory Studies Program - Michigan State University.
- Conducted depositions and cross examination of depreciation witnesses as a Class B Practitioner.
- Made oral presentations to the Society of Depreciation Professionals and the United States Telephone Association regarding various telecommunications, electric, and gas issues.
- Co-authored Public Utility Depreciation Practices, published August, 1996.
- Co-authored Florida Commission staff depreciation training manual.
- Conducted Commission in-house depreciation training.

EDUCATION

B.S., Mathematics, APPALACHIAN STATE UNIVERSITY - Boone, North Carolina, 1970

CHESAPEAKE UTILITIES CORPORATION

FLORIDA CITY GAS

Amended 2025 Depreciation Study

Florida City Gas ("FCG" or "Company") is a natural gas local distribution company providing sales and transportation of natural gas, and, since December 2023, is a wholly owned subsidiary of Chesapeake Utilities Corporation ("CUC")[1]. Prior to that, FCG was owned by Florida Power & Light Company. The Company currently serves 120,000 residential, commercial and industrial natural gas customers in eight counties, including Brevard, Broward, Hendry, Indian River, Martin, Miami-Dade, Palm Beach and St. Lucie. FCG's current authorized depreciation rates were approved in Order No. PSC-2023-0177-FOF-GU, issued June 9, 2023 in Docket No. 20220069-GU.

Rule 25-7.045(4)(a), Florida Administrative Code ("F.A.C.") requires regulated gas utilities to file a depreciation study "at least once every five years from the submission date of the previous study. . ." The submission date of the 2022 Depreciation Study was May 31, 2022. CUC's purchase of FCG has led to a review of FCG's depreciation rates and recovery position.

Depreciation rates should be revised when the need arises. A review of the January 1, 2025 plant investments, reserve, and account activity data indicate there is a need to revise rates now. An implementation date of January 1, 2025 is recommended for the revised depreciation rates set forth in the 2025 Depreciation Study ("2025 Study" or "Study"). All data and calculations provided in the Study support this recommended date.

Since the October 3, 2025 Study filing, it was discovered that Accounts 3761, 3762, 3810, 3820, and 3850 had vintage balance discrepancies and/or hard-coded formula errors for some years. The amended 2025 Study workbook includes the following supporting schedules with corrections:

- **Schedule A: Schedule of Remaining Life Accrual Rates and Amortization** summarizes investments and reserves on January 1, 2025, proposed depreciation components and calculated life accruals and rates by account, function, and total plant.
- **Schedule B: Comparison of Current and Proposed Depreciation Components** compares the current and proposed depreciation components for each account. The components include average service life, age of surviving investments on January 1, 2025, curve shape[2], and average remaining life.

---

[1] FCG was a subsidiary of Florida Power & Light Company prior to December 2023.

[2] Curve shape (Iowa Curve, survivor curve, or mortality dispersion) – a graphical picture of the amount of property surviving at each age through the life of the property group. The graph plots the % surviving on the y-axis and the age on the x-axis. The survivor curve depicts the expected retirement distribution (or survival distribution) of plant in an account over time.

FPSC EXH NO. 3
ADMITTED

- **Schedule C: Comparison of Current and Proposed Depreciation Rates** compares the current and proposed depreciation rates as of January 1, 2025 for each account. The proposed rates are based on the January 1, 2025 reserve percentages restated after proposed reserve transfers, remaining lives, and net salvage factors.
- **Schedule D: Comparison of Annual Depreciation Expenses** compares the resultant expenses for each account between the current and proposed remaining life depreciation/amortization rates based on January 1, 2025 investments.
- **Schedule E: Comparison of Accumulated Book Reserve and Theoretical Reserve** compares the January 1, 2025 book reserve to the calculated theoretical reserve for each non-amortizable account based on the proposed depreciation rates and components.
- **Schedule E-1: Amortizable Plant Reserve Deficiency Amortization Calculation** compares the January 1, 2025 book reserve to the calculated theoretical reserve for each amortized account based on the proposed depreciation rates and components and provides the amortization of the reserve deficit associated with amortizable plant accounts.
- **Schedule E-2: Reserve Surplus Amortization Calculation** provides the amortization details for non-amortized plant accounts.
- **Schedule E-3: Proposed Reserve Transfers** provides the details for reallocation of reserve balances to eliminate negative reserves.
- **Schedule F: Aged Retirements** provides aged retirements for each account and year from 2021 through 2024 adjusted for any missed retirements.
- **Schedule F-1: Retirement Rates** provides retirement rates for each account and year from 2021 through 2024. Historical retirement rates are shown on Schedule P.
- **Schedule G: Plant in Service and Reserve Summaries** provides plant and reserve activity for each year 2021 through 2024. All study adjustments for investment and reserve were added to Schedule G 2024 and are detailed on Schedules J and K.
- **Schedule H: Office Furniture, Equipment, And Software Average Age Calculations** compiles office and computer investments as of January 1, 2025 and computes the average age calculations by proposed subaccounts:
    - 3910 - Office Furniture and Equipment - Office Eq.,
    - 3912 - Office Furniture and Equipment - Computer Hardware,
    - 3913 - Office furniture and equipment - Furniture, and
    - 3914 - Office Furniture and Equipment - Software.

  For consistency across all CUC business units and administrative ease, the subaccounts reflect the same subaccounts utilized by all CUC-Maryland's consolidated natural gas divisions[3] and CUC-Florida Public Utilities Company's consolidated natural gas division[4]. These subaccounts have been proposed for CUC-Delaware.[5]

---

[3] See Order No. 91242, issued July 24, 2024, in Case No. 9721, *Chesapeake Utilities Corporation, Sandpiper Energy, Inc. and Elkton Gas Company's Joint Petition for Approval of Changes in their Depreciation Rates.*

[4] Order No. PSC-2023-0103-FOF-GU, issued March 15, 2023, in Docket No. 20220067-GU, *In re: Petition for rate increase by Florida Public Utilities Company, Florida Division of Chesapeake Utilities Corporation, Florida Public Utilities Company - Fort Meade, and Florida Public Utilities Company – Indiantown Division.*

[5] See Rate Case filed August 12, 2024, in PSC Docket No. 24-0906, *In the Matter of the Application of Chesapeake Utilities Corporation for a General Increase in its Natural Gas Rates and for Approval of Certain Other Changes to its Natural Gas Tariff.*

FPSC EXH NO. 3
ADMITTED

- **Schedule I: Transportation Accounts Average Age Calculations** compiles transportation investments as of January 1, 2025, and computes the average age calculations by the proposed subaccounts:
  - 3921 - Transportation Equip. - Cars,
  - 3922 - Transportation Equip - Light to Medium Duty Trucks, SUVs, and Vans,
  - 3923 - Transportation Equip. - Heavy Duty Vehicles, and
  - 3924 - Transportation Equip. - Trailers.

  For consistency across all CUC business units and administrative ease, these subaccounts are the same ones approved for CUC's Maryland and Florida consolidated natural gas divisions and proposed for CUC-Delaware.
- **Schedule J: Average Age Calculations** summarizes the adjustments made to the 2025 Study for misclassified, missing, or unsupported investments and retirements and computes the January 1, 2025 average age of surviving investments for each account.
- **Schedule K: Reserve Adjustments** summarizes the adjustments made to the 2025 Study for misclassified, missing, or unsupported assets, retirements, and net salvage for each account.
- **Schedule L: Net Salvage Percentage Computation** provides net salvage activity from 2021 through 2024 adjusted to reflect corrections for missed or misclassified retirements and net salvage.
- **Schedule M: 2022 Study Reserve Surplus Calculation by Account** provides the 2022 Study reserve surplus calculation with allocation of the surplus amount authorized for use by account.
- **Schedule N: Cumulative Reserve Surplus Applied by Year** provides the amount of the applicable surplus utilized from 2023 to 2024.
- **Schedule O: Historical Plant 2004-2024** provides the historical plant data from 2004 to 2024 for each account, identifying annual additions, retirements, and Transfers/Adjustments.
- **Schedule P: Historical Retirement Rates 2004-2024** provided the historical retirement rates from 2004 to 2024 for each account on an annual, overall, and 5-year average.
- **Schedule Q: Historical Net Salvage Analysis 2004-2024** provides the historical net salvage activity from 2004 to 2024 for each account. Net salvage is expressed as a percentage of total retirements on both an annual and 3 year rolling average with the most 5-year average also provided.

During the course of this Study, it was discovered that some immaterial prior period adjustments needed to be made for additions discovered to have been recorded in a wrong account and retirements discovered to not have been recorded. All adjustments made to the Study are summarized by account on Schedule J and Schedule K of the workbook. These adjustments will be reviewed by the Company and flow through to Schedule G 2024, under the Adjustment column. For depreciation study purposes, the investments and reserves shown on Schedules A - E reflect these corrections.

FPSC EXH NO. 3
ADMITTED

Following the October 3, 2025 filing, additional corrections were necessitated when, during the course of developing discovery responses pertaining to vintages of certain assets (Accounts 3762, Mains- Steel, 3810, Meters, and 3820, Meter Installations and 3850, Industrial Measuring and Regulating Equipment), it became apparent that "hard-coded" or static formulas in the depreciation workbook itself contained errors for Plastic and Steel Mains Accounts 3761 and 3762. Correction of these errors resulted in changes to the average ages and average remaining lives for Accounts 3761, Mains – Plastic, 3762, Mains – Steel, 3810, Meters, 3820, Meter Installations, and 3850, Industrial Measuring and Regulating Equipment.

The retirement rate[6] for many FCG accounts is minimal, rendering statistical analysis results meaningless for life or salvage projections. These factors make it necessary to rely on prescribed life and salvage factors of other gas companies. Because FCG has a similar operating and regulatory environment to other gas utilities in Florida, as compared to those in other states, comparisons with life and salvage factors of other gas utilities in Florida are appropriate and reasonable. The estimated curve shapes for most accounts reflect the retirement rates and the range of lives and curve shapes used for other regulated gas utilities in Florida.

The aged retirement data and the average age distributions, along with the lives of the other Florida gas utilities, were used to determine if a revision to the average service life underlying the existing average remaining life for each account is needed. Also, a review of the existing survivor curve for each account was performed to determine if a modification is warranted based on the average age and actual or expected retirement experience. The average service life (projection life) and January 1, 2025 average ages for each account were used with the selected Iowa Curve life table[7] to determine the average remaining life.

For the General Plant accounts, this Study proposes new subaccounts for Account 3910, Office Furniture and Equipment, and Account 3920, Transportation Equipment, to be consistent across all CUC gas distribution business units.[8] Additionally, the amortization periods for the vintage group general plant amortizable accounts are proposed to be revised based on judgement, discussions with Company personnel, and consistent with those approved for CUC's Florida Public Utilities consolidated natural gas divisions, Maryland business units, and CUC-Delaware natural gas business unit.

RESERVE SURPLUS

---

[6] Retirement rate = retirements/exposures = [retirements during the year/ (end of year plant balance + retirements) x 100.
[7] The Life Tables used were obtained from GTE-INC. They can also be replicated form other sources. See Frank K. Wolf and W. Chester Fitch, *Depreciation Systems*, Iowa State University Press, 1992, p. 40 and Appendix 1, pp. 305-338; Robley Winfrey, *Bulletin 125: Statistical Analyses of Industrial Property Retirements*, 1935 as revised 1967, Iowa State University Engineering Publications and Communications Services, pp. 102-106; Robley Winfrey, *Bulletin 155: Depreciation of Group Properties*, 1942, Iowa State University Engineering Publications and Communications Services, pp. 124-127.

FPSC EXH NO. 3
ADMITTED

Rule 25-7.045(5)(d), Florida Administrative Code ("F.A.C.") requires that a depreciation study include a comparison of the calculated theoretical reserve[9] to the book reserve for each account. This comparison is provided in the attached workbook, Sch E and Sch E-1 p 2 AP Theo Res. The difference between the book reserve and the theoretical reserve is called a reserve imbalance, and can either be a deficit or a surplus.[10] A reserve surplus of $43,469 exists for the amortizable accounts as shown on Sch E-1 p 2 AP Theo Res. This surplus is the result of proposing new amortization periods that are uniform across all CUC natural gas distribution business units. A theoretical reserve analysis for all other FCG accounts is shown on Sch E and indicates a reserve surplus of $19,200,911. The net reserve surplus is $19,244,380. FCG proposes to amortize this net surplus over a period of two years. This will have the effect of reducing depreciation expenses for the amortization period resulting in the added benefit of delaying the expense of a rate proceeding now.

It is desirable for the depreciation book reserve to conform to the calculated theoretical reserve as closely as possible. Under the remaining life depreciation rate design, any reserve imbalance is corrected over the remaining life of the associated investment. If there is an implied reserve deficit, the remaining life rate will be higher to make up the under accrual in the future. Conversely, a reserve surplus will result in a lower depreciation rate as too much has been recovered to date and there is less to recover in the future.

The presence of a reserve imbalance indicates existence of an intergenerational inequity. The depreciation expenses of the past were based on life and net salvage factors now viewed to be too short. This misstatement should be corrected now to reduce the misstatement into the future. The quicker the imbalance is addressed the greater the likelihood that ratepayers who may have overpaid depreciation expense will have a chance of benefitting either through reserve transfers between accounts or an amortization. Allowing FCG to amortize its reserve imbalance over two years will result in a return to the matching principle as quickly as the Company is able to do so.

The Commission's policy with respect to reserve imbalances is to correct them as soon as possible without adversely impacting a company's ability to earn a fair and reasonable return as well as considering any negative impacts on the Company's financial integrity and ratepayers.[11] The Commission has also targeted overearnings in the past to book additional depreciation expense, thereby lowering reported earnings and bringing them in line with the allowed rate of return.

The National Association of Regulatory Commissioners ("NARUC") depreciation manual states that if a reserve imbalance is material, common methods for correcting the imbalance are either

---

[9] The theoretical reserve is determined from the proposed estimated remaining life of the group, the total life of the group, and the estimated net salvage. The formula is TR = 100-WLR(ARL)-NS.

[10] A reserve deficit or deficiency is when the book reserve is less than the calculated theoretical reserve. A reserve surplus exists when the book reserve is more than the theoretical reserve.

[11] Order No. PSC-01-2270-PAA-EI, issued November 19, 2001, in Docket No. 010699-EI, *In re: Request for approval of implementation date of January 1, 2002, for new depreciation rates for Marianna Electric Division by Florida Public Utilities*, p. 2.

FPSC EXH NO. 3
ADMITTED

through an amortization period over an abbreviated period of time or through the use of remaining life depreciation rates. NARUC does not quantify what constitutes a "material" imbalance.

FCG notes that the Commission has approved amortization of reserve imbalances over a shorter period than the remaining life.[12] Whether the imbalance is a deficiency or a surplus, the rate base is misstated and should be corrected. The remaining life depreciation rate self-adjusts and corrects any reserve imbalance over the remaining life of the associated plant. The Commission has addressed reserve imbalances through the use of reserve transfers or allocations within the same function. Reserve transfers are not a restatement of depreciation reserve, but rather a reallocation of the amount in the accounts. For example, FCG is proposing a reserve transfer from Account 3762, Steel Mains, to correct the negative reserve balance[13] in Account 3821, Meter Installations-ERT, Sch A and Sch E-3 of the attached workbook.

There are numerous cases where the Commission has approved amortization of reserve imbalances over a period shorter than the remaining life. A proposed amortization of the net reserve surplus is conceptually the same as prior Commission actions for Florida Power & Light Company ("FPL") and Florida Progress Energy ("PEF"). Order No. PSC-96-0461-FOF-EI[14] authorized FPL to record additional depreciation expenses to correct a reserve deficiency associated with FPL's nuclear production facilities, with any residual expense to be applied to other production facilities. In the PEF 2002 Rate Case Settlement Order,[15] PEF agreed to a credit to depreciation expense, essentially an annual amortization. In its 1997 depreciation study,[16] Florida Power Corporation ("FPC") was ordered to amortize the gain realized from the sale of a combustion turbine, to offset a reserve deficiency at a peaking plant. In the FPL 2005 Rate Case Settlement Order, FPL was authorized to

---

[12] As an example, see Order No. 010699-EI, issued November 19, 2001, *In re: Request for approval of implementation date of January 1, 2002, for new depreciation rates for Marianna Electric Division by Florida Public Utilities Company*, where the Commission stated its policy to recover imbalances "as fast possible, unless such recovery prevents the Company from earning a fair and reasonable return on its investments." Also, see Order No. PSC-10-0131-FOF-EI, issued March 5, 2010, in Docket No. 090079-EI *In re: Petition for increase in rates by Progress Energy Florida, Inc.;* Docket No. 090144-EI, *In re: Petition for limited proceeding to include Bartow repowering project in base rates, by Progress Energy Florida, Inc.;* and Docket No. 090145-EI, *In re: Petition for expedited approval of the deferral of pension expenses, authorization to charge storm hardening expenses to the storm damage reserve, and variance from or waiver of Rule 25-6.0143(1)(c), (d), and (f), F.A.C., by Progress Energy Florida, Inc*, pp. 45-52. See also, Order No. PSC-10-0153-FOF-EI in Docket Nos. 20080677-EI In re: Petition for increase in rates by Florida Power & Light Company and Docket No. 20090130-EI In re: 2009 depreciation and dismantlement study by Florida Power & Light Company, at page 87, determining that the reserve surplus should be amortized over 4 years.

[13] A negative reserve balance caused by plant retiring earlier than the related average service life creates a positive component in rate base upon which the Company earns a return until it is corrected.

[14] Order No. PSC-96-0461-FOF-EI, issued April 2, 1996, in Docket No. 950359-EI, *In re: Petition to establish amortization schedule for nuclear generating units to address potential for stranded investment by Florida Power & Light Company.*

[16] Order No. PSC-98-1723-FOF-EI, issued December 18, 1998, in Docket No. 971570-EI, *In re: 1997 Depreciation Study by Florida Power Corporation.* (FPC 1997 Depreciation Order)

FPSC EXH NO. 3
ADMITTED

amortize an amount of its reserve surplus annually as a credit to depreciation expense and a debit to the bottom-line depreciation reserve over the term of the Settlement.

In sum, FCG has identified a reserve surplus of $19.2 million that it proposes to amortize over the years 2025 and 2026. This action allows a return to the matching principle and correction of intergenerational inequities. This will have the effect of reducing depreciation expenses for the amortization period with the added benefit of further delaying the expense of a rate proceeding.

The results of the amended 2025 Study are summarized below by function and are based on adjusted plant and restated reserve balances as of January 1, 2025.

Table 1 Summary of Depreciation Study Results

Function	Adjusted 1/1/25 Investment	Adjusted 1/1/25 Reserve	Proposed ASL	Proposed Rates	Proposed Annual Accruals	Current Annual Accruals	Change in Expense
Intangible Plant	$9,071,097	$1,582,461	18.6	5.4	$488,997	$523,730	($34,733)
Storage Plant	$60,013,891	$1,200,277	50.0	2.0	$1,200,278	$1,200,277	$1
Distribution Plant	$597,640,813	$167,437,000	58.0	2.3	$13,580,165	$14,285,359	($705,194)
General Plant	$29,975,107	$8,436,046	18.7	4.8	$1,448,313	$1,758,283	($309,970)
Total Depreciable Plant	**$696,700,908**	**$178,655,784**	**51.0**	**2.4**	**$16,717,752**	**$17,767,649**	**($1,049,897)**
		Reserve Surplus Amortization			($9,622,190)	$0	($9,622,190)
		Total Accruals with Reserve Surplus Amortization			**$7,095,562**	**$17,767,649**	**($10,672,087)**

The amended 2025 Study workbook includes plant and reserve balances as of January 1, 2025 (Schedules A and G 2024); aged retirements for each plant account for 2021-2024 (Schedule F); calculated average ages as of January 1, 2024 (Schedule J), with an aged Office Furniture and Equipment and vehicle listing (Schedules H and I). The Company uses its continuing property record ("CPR") system to develop average ages of surviving investments for each account (Schedules H, I, and J).

In sum, the proposed depreciation rates and general plant amortizations result in annual depreciation expenses of about $7.1 million, a net decrease of about $10.7 million compared to current depreciation rates inclusive of the proposed amortization of certain account reserve deficiencies and the proposed amortization of the total reserve surplus mentioned above.

Schedule D indicates that the decrease in depreciation expenses is found in the distribution plant accounts, mainly in Plastic Services, Account 3801, Meters, Account 3810, and Meters-ERT, Account 3812. These three accounts comprise 26% of the distribution investment and 23% of the total FCG's plant investment. The decrease in depreciation expenses for Plastic Services, Meters and Meters-ERTs are all due to inverse changes in life expectations.

Recognizing that the proposed average service life for each plant account represents an estimate of the future life expectancy of the associated investment, the proposed average remaining lives reflect rounding of lives greater than 20 years to the nearest year and rounding lives less than 20 years to the nearest tenth of a year. It is not considered necessary to be any more precise when dealing with estimates.

FPSC EXH NO. 3
ADMITTED

ACCOUNT ANALYSIS AND PROPOSALS

INTANGIBLE PLANT

FCG requests approval to establish the following Intangible Plant accounts and adopt amortization over the number of years specified below. Based on discussions with the Company, CUC would like to move towards uniform amortization periods for all intangible software applications that are shared by all business units across all of CUC. This will allow the Company to streamline business processes and reduce administrative burdens across all CUC business units. This study reviewed historical, current, and prospective intangible software information for all of CUC's natural gas business units to determine a reasonable amortization period for recovery of the software investments. To date, these accounts and amortization periods have been approved for CUC-Maryland's consolidated gas companies[17], CUC-Florida Public Utilities Company's consolidated electric division[18], CUC-Florida Public Utilities Company's consolidated natural gas division[19], and are currently proposed for CUC-Delaware natural gas division[20].

Account 3031 – Miscellaneous Intangible Plant - 15 Years - Software

The restated investment and reserve as of January 1, 2025 are $2,126,505 and $297,711, respectively, and represent a proposed reclassification of customized software from Account 30302 to Account 3031, Miscellaneous Intangible Plant. The specific software applications are: Business Case Authorization (BCA) Portal Enhancements, Cognizant Power BI Enhancements, Damage Prevention Program, and Gastar Gas Management System.

- BCA portal is used to populate new accounts and controls the data flow into several FCG databases. The costs of enhancing the system is included in this account. System portal enhancements added functionalities to allow more data details for new and existing customers and improved data flow/integration into other FCG systems.

- Cognizant Power BI Enhancements are custom analytical algorithms, operational metrics and dashboards created for Power BI to enhance the sharing of data between systems and processes that will assist with quality control measurement and efficiency improvements.

---

[17] See Order No. 91242, issued July 24, 2024, in Case No. 9721, *Chesapeake Utilities Corporation, Sandpiper Energy, Inc. and Elkton Gas Company's Joint Petition for Approval of Changes in their Depreciation Rates.*
[18] Order No. PSC-2023-0384-PAA-EI, issued December 21, 2023, in Docket No. 20230079-EI, *In re: Petition for approval of 2023 depreciation study by Florida Public Utilities Company.*
[19] Order No. PSC-2024-0366-PAA-GU, issued August 19, 2024, in Docket No. 20240060-GU, *In re: Petition for approval to establish new regulatory subaccounts, amortization rates, and reclassification of associated investment and reserve balances, by Florida Public Utilities Company.*
[20] Delaware Public Service Commission, Docket No. 24-0906, *In the matter of the application of Chesapeake Utilities Corporation for a general increase in its natural gas rates and for approval of certain other changes to its natural gas tariff,* filed August 12, 2024.

- Damage Prevention Program software is used to help prevent underground asset damage by providing field operatives with real-time, up-to-date facility locating and marking data.

- GASTAR is used to manage natural gas information from all points of the natural gas supply chain to streamline FCG's business process. It was specifically designed to provide all necessary data to the marketers (TPS) to transact and manage FCG's business within the rules of the current tariff. The integrated system is cloud-based and was placed into service in 2019.

Given these software applications were being amortized at 12 years, at the time of acquisition, FCG proposes a 15-year amortization period to align the amortization with all of CUC's other natural gas business units. An average age of 2.1 years results in a remaining amortization period of 12.9 years for the January 1, 2025 embedded net investment of 1,828,794.[21] For subsequent vintages, a 15-year amortization period equating to a 6.67 % depreciation/amortization rate is proposed.

Account 3032 – Miscellaneous Intangible Plant - 20 Years - CIS/ERP Systems

This account includes the cost of cloud-based software assets with an estimated life expectancy of 20 years. The restated investment and reserve as of January 1, 2025 are $6,944,592 and $1,284,750, respectively.

CUC is actively consolidating the different core business processes of its Delaware, Florida, and Maryland companies into single platforms that can be utilized by all business units. The new state-of-the-art Customer Information System ("CIS") was placed into service in 2024 and Enterprise Resource Planning ("ERP") system is expected to be operational in 2026. The allocated cost of the new CIS system is $1.1 million[22] and the ERP system is currently estimated to be $3.2 million[23].

The new CIS platform will be capable of providing enhanced accounting tools, cross-functional communication, data tracking and analyses, and other business processes in the areas of customer service, billing and information, financial performance, supply chain/inventory, human resources, and asset management. Additionally, it will provide CUC a more flexible platform for enhancing the customer experience with a new set of customer service and communication tools. Being a cloud-based platform, the new CIS will be continuously updated and maintained.

ERP is a type of business process management software that includes procurement, cash management, and the general ledger in an integrated system. The benefits of the software include improved reporting; increased productivity, efficiency, and integration of information; faster responses to inquiries and better customer satisfaction; standardization and centralization of data

[21] The embedded net investment has been corrected to reflect the January 1, 2025 investment less reserve. There is no change to the Study Workbook.
[22] The cost allocation for the new CIS is based on customer count.
[23] The cost allocation for ERP is based on the Distrigas allocation methodology using revenues, gross plant, and direct labor.

FPSC EXH NO. 3
ADMITTED

that is secure and reliable; reduced processing time; better decision making and higher return on investment; and better communication and increased sharing of information across different departments. Like the new CIS platform, ERP is cloud based and will be continuously updated and maintained.

FCG was authorized by the Florida Public Service Commission to establish a new subaccount 303.20, for the purposes of recording Starnik Customer Information System assets at an annual depreciation rate of 5 percent[24]. CUC proposes that the cost of these systems be recorded in the same account, Account 3032, Miscellaneous Intangible Plant, and amortized over a period of 20 years, based on judgement and discussions with Company personnel. The Company requests that the amortization period for ERP be implemented at its in-service date.

STORAGE PLANT

The storage plant accounts (Accounts 3642, 3643, 3645, and 3646) are associated with a liquefied natural gas (LNG Facility) placed in service in 2023.[25] The assets include truck loading facilities, three 90,000-gallon storage tanks, and vaporization equipment. The combined investment and theoretical restated reserve balances at December 31, 2024 are $60,013,891 and $1,200,277, respectively. Over 99% of the Storage Plant investment is in Account 3646, Compressor Station Equipment.

Depreciation rates and parameters were initially prescribed in the 2017 Depreciation Study with a 50-year average service life and zero net salvage with an S4 curve shape to apply when those assets went into service in 2023. At this time there is insufficient historical data on which to perform statistical analyses. Based on judgment, the type of assets, and intended operations, this Study recommends continued use of a 50-year average service life with the S4 Iowa Curve (dispersion).

This account includes any salvage and removal related to structures and other types of equipment used connection with liquefied natural gas terminaling and processing operations. While it is reasonable to expect cost of removal to exceed salvage, there is no basis at this time to propose such. Continued use of a zero net salvage is proposed at this time and will be evaluated as actual experience is incurred in the future.

DISTRIBUTION PLANT

ACCOUNT 3743: RIGHT-OF-WAY

This account contains the cost of easements and right-of-ways associated with distribution property, mainly mains and services. The investment and theoretical restated reserve as of January

[24] Order No. PSC-2020-0489-PAA-GU, issued December 11, 2020, in Docket No. 20200191-GU, *In re: Petition for approval of amortization rate for Stamik customer information system and other software accounting adjustments, by Florida City Gas.*
[25] The LNG Facility is located in Homestead.

FPSC EXH NO. 3
ADMITTED

1, 2025 are $11,132 and $4,618, respectively. There is currently no life or salvage prescribed for these investments.

Easements and right-of-way usually have no end date and are held in perpetuity or until the underground facilities are abandoned, it is not uncommon to have a very limited level of retirements making the results of statistical analyses for life or salvage meaningless. For these reasons, the life of this account should reflect the longest-lived distribution asset account, Plastic Mains, Account 3761. Based on the type of assets in this account and judgement, this Study proposes an average service life of 75 years with a SQ mortality dispersion. Taken together with an average age of 31 years results in a proposed average remaining life of 44 years.

A 0% net salvage is common for this type investment and is proposed as reasonable for this account.

ACCOUNT 3750: STRUCTURES AND IMPROVEMENTS

This account is comprised of structures and improvements related to gas distribution operations. The investment includes the cost of all buildings and fixtures permanently attached to structures like fencing, paving and small communications buildings rather than larger pre-fab or masonry buildings. The investment and theoretical restated reserve balances at January 1, 2025, are $273,829 and $38,884, respectively. The average service life underlying the current prescribed average remaining life is 33 years with an L0 curve.[26]

There have been no retirements reported during the 2021-2024 period and the retirement rate for the 2004-2024 period averaged 7.73% with only three years, 2009, 2010, and 2017, experiencing any retirements. Other Florida gas utilities estimate average service lives ranging from 33 years to 40 years, averaging 35 years. The 2022 Depreciation Study[27] proposed a 35-year average service life with an R4 curve. That Study found that the statistical analysis indicated a similar service life to that proposed in the 2017 Depreciation Study[28] with a lower mode curve. A 35-year R4 curve was proposed as being a reasonable fit to the historical data once less consideration was given to larger retirements in 2017. Based on the above, this Study proposes that the 35-year R4 curve as proposed in the 2022 Study is reasonable. Using an average age of 4.8 years results in an average remaining life of 30 years.

The currently approved net salvage is 0%. As noted in the 2022 Depreciation Study, there is limited data for this account, and therefore no statistical support for a change in net salvage. Estimates for gas utilities in Florida range from 0% to (5)%, averaging (1)%. At this time, FCG proposes no

[26] Order No. PSC-2023-0177-FOF-GU.
[27] The 2022 Depreciation Study was prepared by Gannett Fleming Valuation and Rate Consultants, LLC in Docket No. 20220069.
[28] See Order No. PSC-2018-0190-GU, issued April 20, 2018, in Docket No. 20170179, *In re: Petition for rate increase by Florida City Gas,* p.36.

FPSC EXH NO. 3
ADMITTED

change to the existing net salvage factor. FCG's next depreciation study will examine future trends in this account.

ACCOUNT 376: MAINS

FCG currently has nearly 1,747 miles of cathodically protected steel mains and 2,133 miles of plastic mains.

ACCOUNT 3761: MAINS – PLASTIC

This account includes the cost of gas distribution plastic mains. Plastic mains are used for pressures of 60 PSI and below. FCG has a program to replace mains running through less assessable parts of customer property (e.g., backyards) with mains located in more accessible areas. The January 1, 2025 investment and theoretical restated reserve balances are $237,376,057 and $41,659,498, respectively.

Regarding the life of plastic pipe, some studies project lives as long as 100 years, but they often do not factor in operational realities. Moreover, the studies do not consider external factors such as soil conditions, system operating pressures, maintenance procedures, street widening, system growth and forces of nature that will impact life expectations. Factoring these things in as well as the replacement of the early vintage plastic pipe and first-generation coated steel pipe, a 75-year average service life for the account remains reasonable.

The average service life and curve shape underlying the currently approved average remaining life are 75 years with an R2 Iowa Curve. The retirement rate for the 2004-2024 period averaged 0.18% with the most recent 2021-2024 period averaging 0.24%. This data indicates a higher mode curve than the underlying R2 curve. FCG proposes retaining the 75-year average service life but changing to an R2.5 curve shape as being in line with the historical miniscule retirements tempered with future retirement expectations of early vintages of plastic pipe and the replacement of mains running through less assessable parts of customer property (e.g., backyards) with mains located in more accessible areas. Using these parameters with a January 1, 2025 average age of 10.6 years results in a proposed average remaining life of 65 years.

Mains are typically retired in place. However, there are costs to retirements due to the need to excavate, cut, cap, and purge gas from the retired pipe. The currently approved net salvage is (33)%. The overall 2004-2024 average net salvage is (70)% with the most recent 2021-2024 period averaging (30)%. FCG proposes (30)% net salvage is in line with recent trends, easier accessibility to retired pipe, and expectations of other Florida gas companies. FCG's next depreciation study will examine future trends in this account.

ACCOUNT 3762: MAINS – STEEL

This account includes the cost of gas distribution steel mains. The January 1, 2025 investment and restated reserve balances are $143,280,076 and $61,968,633, respectively. FCG has a program to replace mains running through less assessable parts of customer property (e.g., backyards) with mains located in more accessible areas. All FCG steel mains are cathodically protected. When a steel main is retired, it is generally replaced with plastic unless the pressure requires steel. Mains are generally retired due to service connections, shallow pipe, or poor lining, as well as external factors such as damage, customer requested relocations, dig-ins, city or State relocations. The Company is replacing early vintage polymer pipe ("Orange Pipe") through the Safety, Access, and Facility Enhancement ("SAFE") Program due to safety concerns.

The average service life underlying the current approved average remaining life is 65 years with an R1.5 curve shape. The retirement rate for the 2004-2024 period 0.26% with the most recent 2021-2024 period averaging 0.49%. This lack of retirement activity makes statistical analysis results meaningless for life and salvage determinations. Other regulated Florida gas utilities have average service life expectancies in the range of 45 years to 65 years, averaging 54 years. Based on Company input and judgement, no change to the existing 65 years average service life is proposed. While historical retirements have been miniscule, recent years indicate an increase in retirement rates. Recognizing future expectations of retiring early vintage orange pipe due to safety concerns as well as the Company's program to replace mains running through less assessable parts of customer property (e.g., backyards) with mains located in more accessible areas, an R2.5 curve shape is proposed. Using the current average age of 21.7 years results in an average remaining life of 45 years.

Mains are typically retired in place. However, there are costs to retire due to the need to excavate, cut, cap, and purge gas from the retired pipe. The currently approved net salvage is (50)%. The overall average net salvage is (146)% with the most recent 2021-2024 period averaging (64)%. Even though removal costs have historically been high, the costs have continually decreased over time. FCG believes these costs should continue to decrease and proposes (40)% net salvage. Other gas companies in Florida have approved net salvage factors ranging from (30)% to (60)%, averaging (40)%. FCG proposes (40)% net salvage in line with recent trends, easier accessibility to retired pipe, and expectations of other Florida gas companies. FCG's next depreciation study will examine future trends in this account.

ACCOUNT 378: MEASURING AND REGULATING STATION EQUIPMENT - GENERAL

This account includes the installed cost of meters, gauges and other equipment used in measuring and regulating gas in connection with distribution system operation other than the measurement of gas deliveries to customers. The January 1, 2025 investment and theoretical restated reserve are $2,556,627 and $492,151, respectively, and represents only 0.4% of the total distribution plant investment.

FCG's regulator stations are above ground stations with most of the equipment typically outside. Stations that are located closer to the coast are more subject to corrosion and may be replaced at

FPSC EXH NO. 3
ADMITTED

earlier ages than stations located more inland. Many of the assets are similar to those in Account 379, Measuring and Regulating Station Equipment – City Gate, although they differ in size.

The current-approved average service life for general measuring and regulating equipment is 40 years with an R1.5 curve shape. The retirement rate during the 2021-2024 period averaged 0.11%. In fact, this account has experienced limited retirements historically. There has only been one retirement during the 2004-2024 period. This makes results of statistical analyses meaningless and reliance on projections of other Florida gas utilities warranted. The existing approved life is in line within industry expectations and FCG proposes no change. However, an S3 curve shape is proposed as a better fit with the historical miniscule retirements. Using the current average age of 7.5 years results in an average remaining life of 33 years.

There has been limited retirement and net salvage data for this account, but some cost of removal has been incurred mostly without any retirements. The existing approved net salvage is (10)%. The overall net salvage has averaged (369)% with the 2021-2024 averaging (175)%. Given that this data is based on a relatively small number of retirements, the Company does not believe it is indicative of future expectations. Net salvage estimates for other gas companies in the State range from (2)% to (20)% averaging (9)%. FCG proposes no change to the current-approved net salvage of (10)%. FCG's next depreciation study will examine future trends in this account.

ACCOUNT 3790: MEASURING AND REGULATING STATION EQUIPMENT – CITY GATE

This account is composed of city gate distribution measuring and regulating station-related piping, regulators, control, odorizers, and other equipment.[29] Assets in this account are at locations where FCG interconnects and takes gas from transmission pipelines. Most equipment is outdoors rather than in buildings. The January 1, 2025 investment and restated theoretical reserve balances are $17,746,190 and $5,075,410, respectively. The average service life underlying the currently approved average remaining life of 40.64 years is 50 years with an R2.5 curve shape. The average age of the surviving investment is 13.8 years.

FCG continues capital improvements rebuilding and renewing existing gate stations. New gate stations should be expected to last longer than the older ones.

The account has experienced limited retirements making the results of statistical analyses meaningless. In fact, during the 2004-2024 period, retirements were incurred in only four years, the largest occurring in 2024. This data makes reliance on industry expectations necessary. Average service life expectations of other gas utilities in the State range from 32 years to 52 years, averaging 40 years. The existing 50-year average service life is within the range of reasonableness. Based on Company input, the type of assets in this account, and judgement, the Study proposes no change to the existing 50-year average service life. A higher mode curve to an R3 is proposed recognizing minimal retirements. The resulting average remaining life is 37 years.

[29] A city gate is the entry point for gas being taken from a transmission system to a distribution system. FCG has more than 25 city gates.

FPSC EXH NO. 3
ADMITTED

The existing approved net salvage for city gate measuring and regulating equipment is (10)%. The high negative net salvage incurred during the 2021-2024 period results from very few retirements and not considered indicative of the future. The Company believes the net salvage for city gate and general station equipment should be similar. Other Florida gas utilities have prescribed net salvage factors ranging from (2)% to (20)%, averaging (9)%. At this time, FCG proposes no change to the existing (10)% net salvage. FCG's next depreciation study will examine future trends in this account.

ACCOUNT 380: SERVICES

FCG currently has 48,943 steel services and 85,724 plastic services. Distribution service lines from the main to the customer's premises. The services investments comprise over 60% of the distribution investments and over 50% of the total plant investments.

ACCOUNT 3801: SERVICES – PLASTIC

Plastic services are more commonly installed than steel services today. Investment and restated theoretical reserve balances as of January 1, 2025 are $128,613,988 and $25,915,719, respectively. The average service life underlying the currently approved average remaining life is 55 years with an R1.5 curve shape.

When a steel service is retired, the replacement is plastic unless pressure requirements dictate steel. When a plastic service is retired, the replacement is plastic. Most plastic retirements are for relocation or inactivity. Some early generation plastic pipe (Aldyl-A pipe) is being replaced with new generation pipe due to safety concerns. FCG has a program to replace mains and services running through less assessable parts of customer property (e.g., backyards) with mains and services located in more accessible areas.

Plastic services are likely to experience life expectancies longer than 50 years. The retirement rate for the account during the 2021-2024 period has averaged less than 1%. In fact, the retirement rate for the 2004-2024 also averaged less than 1%. This activity makes results of statistical analysis for life and salvage factors meaningless. Other gas companies in Florida have estimated average service lives ranging from 40 years to 55 years, averaging 48 years.

Based on the type of assets in this account, and judgement, this Study proposes no change the existing 55-year average service life. However, FCG proposes an R1.5 curve shape as being in line with the expected retirement experience of the account. Using an average age of 10.5 years, results in an average remaining life of 47 years.

The current approved net salvage factor for this account is (68)%. The overall net salvage is (398)% with the most recent 2021-2024 period averaging (132)%. Given the miniscule retirement data, the Company does not believe this activity is indicative of future salvage expectations. Other Florida gas utilities have net salvage factors ranging from (30)% to (75)%, averaging (41)%. At this time, the Company proposes a decrease to (40)% net salvage given easier accessibility to the retired

FPSC EXH NO. 3
ADMITTED

service as well as projections from other Florida gas utilities. The next depreciation study will examine future trends in this account.

SERVICES 380.2: SERVICES – STEEL

This account includes the cost of steel distribution service lines, which run from the distribution main to the customer's premises. The January 1, 2025 investment and reserve are $16,378,776 and $15,969,307, respectively. The average service life underlying the existing approved average remaining life is 52 years with an R0.5 curve shape. The current average age of the surviving investment is 34.5 years.

Services are often replaced when mains are replaced. Steel services are added only if pressure requirements dictate (any system running over 100 psig). As is the case with many of FCG's long-lived accounts, there is insufficient data for meaningful statistical analyses results. Prior to 2013, the FPSC required services inactive for 5 years to be removed. Since 2013, the requirement changed from 5 to 10 years inactive but FCG had to catch up on all earlier removal obligations. Some riser connections were replaced due to corrosion but are less now that service lines are wrapped. Programs such as the replacement of mains running through less accessible parts of customer property (e.g., backyards) will often result in retirements of services as well. Retirements also occur due to identified risk factors (such as service connections, shallow pipe or poor lining) as well as external factors such as damage or customer requested relocations. FCG has no plans for the retirement of its steel service lines.

The retirement rate during the 2021-2024 period averaged 0.06%. In fact, the retirement rate during the 2004-2024 period also averaged less than 1%. This data makes the results of statistical analyses meaningless and reliance on industry parameters necessary. Average service life estimates for other gas companies in Florida range from 48 years to 60 years, averaging 54 years. Based on input from the Company, the type of assets in this account, and judgment, this Study proposes a slight increase in average service life to 60 years. An R1.5 curve is also proposed as being more indicative of future retirements. The resulting average remaining life using the current average age of 34.5 years is 34 years.

Net salvage consists of any salvage and removal cost associated with the retirement of steel services. The currently approved net salvage is (125)%. The overall net salvage 2004-2024 is (365)% with the most recent 2021-2024 period being more than (3,000)%. Other gas companies estimate net salvage ranging from (30)% to (130)%, averaging (85)%. The miniscule retirement activity makes reliance on historical removal costs meaningless for future projections. At this time, FCG proposes no change to the current approved net salvage of (125)% although given easier accessibility to the retired service should have a lowering impact on removal costs. The next depreciation study will examine future trends.

ACCOUNT 3810: METERS

FPSC EXH NO. 3
ADMITTED

This account includes the cost of residential and commercial meters or devices and appurtenances thereto, for use in measuring gas delivered to users whether actually in service or held in reserve and the material cost of other meters in revolving stock. Meters are often replaced when the encoder transmitters equipment ("ERTs") meter modules are replaced. The January 1, 2005 investment and theoretical restated reserve are $24,050,241 and $9,343,519, respectively. The average service life underlying the currently prescribed average remaining life is 19 years with an R2 mortality dispersion.

The accounting treatment for meters is cradle to grave; that is, a meter is capitalized upon purchase and not retired until it is junked. Moving the meter from premise to premise does not result in a retirement. When a meter can no longer be repaired it is junked. Operations report that when a meter is removed from a premise, it is not necessarily retired, but tested and put back into service in accord with the meter sampling program. If the premise is vacant for two years, the meter is required to be removed and the riser is plugged. Other gas companies in the State estimate service lives ranging from 20 years to 28 years, averaging 25 years. The Company does not see a meter older than 20 years in the field and expects the average life for a meter is in the range of 15-20 years. Based on input from Company personnel, the type of assets, and judgement, a slight increase in average service life to 20 years and no change to the existing R2 curve is proposed. Using an average age of 8.8 years results in a proposed average remaining life is 12.6 years.

The currently approved net salvage for this account is 3%. While there is limited net salvage data, the overall net salvage 2004-2024) is (4)% with the most recent 2021-2024 years averaging (13)%. This Study proposes (5)% net salvage consistent with the historical data and judgement. The next Study will examine future trends in this account.

ACCOUNT 381.1: METERS - ERT

This account includes the cost of ERT meter modules. The investment and theoretical restated reserve as of January 1, 2025 are $4,266,834 and $640,025, respectively. ERTs were installed in the 2009 timeframe. The average service life underlying the existing approved average remaining life is 19 years with an R2 curve shape.

When an ERT fails, both the ERT and meter are often retired and replaced. From an operations perspective, ERTs may last up to 20 years with heat being a force of retirement. A 20-year average service life is common for these types of assets, although some utilities have had to replace meter modules sooner due to either new technologies or failures. This Study proposes a 20-year average service life for ERTs. Using an average age of 3.4 years with a 20-year average service life results in a proposed average remaining life of 17 years.

The currently prescribed net salvage estimate for this account is 3%. There is limited net salvage data to analyze with only 3 years of the 2017-2024 period reporting any removal costs from retirements. Both historically and the most recent 4 years have averaged (1)% net salvage. This Study proposes a net salvage of 0%. The next study will examine future trends.

FPSC EXH NO. 3
ADMITTED

ACCOUNT 3820: METER INSTALLATIONS

This account includes the costs associated with the installation and servicing of meters for both residential and commercial. Meter installations are not necessarily retired when meters are retired, although in some circumstances the meter installation may be replaced with the meter (such as if there is corrosion). The investment and theoretical restated reserve as of January 1, 2025 are $6,710,985 and $1,379,107, respectively.

The accounting treatment when a meter, meter loop, or a family of meters are junked or replaced, is a retirement of installation costs. If a meter is replaced, the installation cost of the replacement is capitalized as a new installation. When the year of installation is unknown, the First-In,First-Out[30] ("FIFO") method is used to process the retirement. For every meter set retirement, one unit cost of meter installation and regulator installation is retired. Service retirements may also result in the retirements of meter installations.

The average service life underlying the currently approved average remaining life is 44 years with an R1 curve. The January 1, 2025 average age is 12.2 years. Other Florida gas companies estimate average service lives in the range of 34 years to 45 years, averaging 41 years. The retirement rate during the 2021-2024 period averaged 14.97% with the 2004-2024 averaging 4.27%. Based on historical data, communications with Company personnel, and judgement, this study proposes no change to the existing average service life or curve shape at this time. The resulting average remaining life is 35 years.

The currently approved net salvage for this account is (25)%. The historical data indicates (3)% net salvage with the most recent 4 years being zero. Other gas companies have net salvage estimates in the range of (5)% to (35)%, averaging (23)%. This Study proposes zero net salvage in line with the experience of the account. The next Study will examine future trends in this account.

ACCOUNT 3821: METER INSTALLATIONS – ERT

This account includes the costs associated with the installation of ERTs for both residential and commercial meters. The investment and restated reserve as of January 1, 2025 are $258,204 and $6,171, respectively.

This account has a negative book reserve balance at January 1, 2025 due to an unusually large retirement in 2021 at 6.5 years of age. Over 40% of those retirements were from the 2020 vintage with 70% from the 2009 and 2020 vintages. The Company has proposed a reserve transfer from Account 3762, Steel Mains, to eliminate the negative book reserve balance of ($1,172,264). The book reserves for both accounts have been restated to reflect the theoretical reserve balances.[31]

[30] Utilizing FIFO, asset retirements are recorded to the earliest vintages.
[31] See Workbook Sch E-3 for proposed reserve transfer details.

FPSC EXH NO. 3
ADMITTED

The accounting treatment when a meter, meter loop, or a family of meters are junked or replaced, is a retirement of installation costs. If a meter is replaced, the installation cost of the replacement is capitalized as a new installation. When the year of installation is unknown, the FIFO method is used to process the retirement. For every meter set retirement, one unit cost of meter installation and regulator installation is retired.

The average service life underlying the existing average remaining life is 44 years with an R1 curve, the same as for meter installations. There is limited data for meaningful statistical analysis. Based on communications with Company personnel and judgement, FCG proposes no change to service life or curve parameters. Using an average age of 0.8 years results in an average remaining life of 43 years.

The currently approved net salvage for this account is (25)%. There is limited data for the net salvage analysis. At this time, FCG proposes zero net salvage, the same as for Account 3820. The next Study will examine future trends in this account.

ACCOUNT 3830: HOUSE REGULATORS

This account includes the cost of house regulators. Each customer location typically has a house regulator as FCG does not have a low-pressure system. The January 1, 2025 investment and theoretical restated reserve are $7,527,623 and $1,615,428, respectively. The average service life underlying the current approved average remaining life is 42 years with an S1 curve. The average age of the surviving investment is 11.0 years.

The average retirement rate for the 2021-2024 period is 8.23%. For the 2004-2024 period, the retirement rate averaged 4.31%. The 2022 Depreciation Study[32] noted indications of a longer average service life. Other gas companies in the State estimate service lives for house regulators ranging from 30 years to 42 years, averaging 36 years. Based on the historical data, communications with Company personnel, and judgement, FCG proposes no change to the existing 42-year average service life but a change in the curve shape to an S0. The change in curve shape is more in line with the current and expected retirement pattern of the account. The resulting average remaining life is 33 years.

The currently approved net salvage factor is zero. The overall 2004-2024 net salvage is 0% with the most recent 2021-2024 years also averaging 0%. The proposal is to continue to use the current approved zero net salvage. The next Study will examine future trends in this account.

ACCOUNT 3840: HOUSE REGULATOR INSTALLATIONS

This account includes the costs of installation and servicing of house regulators for both residential and commercial. The January 1, 2025 investment and theoretical restated reserve are $2,065,464

[32] The 2022 Depreciation Study was that prepared by Gannett Fleming Valuation and Rate Consultants, LLC in Docket No. 20220069.

FPSC EXH NO. 3
ADMITTED

and $613,649, respectively. The average service life underlying the currently approved average remaining life is 47 years with an R1 curve shape. The current average age of the surviving investment is 19.9 years.

Retirements have been erratic at best with many years having no recorded retirements. The largest retirement during the 2021-2024 period occurred in 2021. This data does not lend meaningful statistical analysis results. Other gas companies in the State estimate the life of house regulator installations in the range of 34 years to 47 years, averaging 42 years. At this time, FCG proposes no change to the existing 47-year average service life or R1 curve shape. The R1 curve is in line with recent retirement experience.

There has been limited data for net salvage. Of the 21 years of data available, retirements occurred in only 10 years, 4 of which were in the 2021-2024 period. No net salvage was realized in any year. The currently approved net salvage factor is (25)%. The Company believes continuation of this net salvage factor is appropriate. The next Study will examine future trends in this account.

ACCOUNT 3850: INDUSTRIAL MEASURING AND REGULATING STATION EQUIPMENT

The investment in this account includes the costs of industrial measuring and regulating station equipment. The account includes meter sets for larger customers and many of the assets are similar to those in Account 378, Measuring and Regulating Station Equipment. The January 1, 2025 investment and theoretical restated reserve are $3,740,797 and $2,160,310, respectively.

The average service life underlying the current approved average remaining life is 37 years with an R3 curve. It is reasonable to expect similar life characteristics for this account as for Account 378. During the 2021-2024 period, only 2021 incurred any retirements. In fact, over the past 20 years, only one other year incurred small retirements. The retirement rate averaged less than 1%. It is reasonable to expect similar life characteristics for this account as for Account 378. Considering the overall lack of retirements, and continued expectations of similar life characteristics to Account 3780, FCG proposes a slight increase in average service life to 40 years and S3 mortality curve based on history and judgement. Using an average age of 24.2 years and an S3 curve results in an average remaining life of 16.9 years.

The currently approved net salvage factor is (2)%. There is limited account net salvage data, historically averaging 0%. Other gas companies in the State estimate net salvage for this investment in the range of (5)% to zero, averaging (1)%. Most gas companies estimate 0% net salvage. At this time, the Company proposes 0% net salvage. The next Study will examine future trends in this account.

ACCOUNT 3870: OTHER EQUIPMENT

This account includes equipment not included in other distribution accounts such as leak detector, pipe locators, pipe locators, odor meters, pressure gauges, and voltmeters. The investment and theoretical restated reserve as of January 1, 2025 are $2,783,990 and $554,571, respectively. The

FPSC EXH NO. 3
ADMITTED

average service life underlying the current approved average remaining life is 24 years with an L2 curve. The average age of the surviving investment is 7.0 years.

Over the past 21 years, retirements only occurred in two years, 2017 and 2024. One year shows removal cost without any associated retirements. The sparse retirements are insufficient to provide meaningful statistical analyses results. Other gas utilities in the State have service life projections in the range of 14 years to 30 years, averaging 24 years. The 2022 Depreciation Study[33] proposed a 35-year service life and R3 survivor curve as being a good fit of the historical data 1962-2020. With three additional years of data, the Company believes the 35-year service life and R3 curve remains reasonable and is proposed at this time. The resulting average remaining life is 28 years.

There has been limited net salvage data. The current approved net salvage factor is zero. The recommendation is to continue this net salvage parameter.

GENERAL PLANT

GENERAL PLANT AMORTIZATION

As part of FCG's 2017 Depreciation Study[34], adoption of vintage group accounting for certain general plant accounts was proposed and subsequently approved by Order No. PSC-2018-0190-FOF-GU.

With the vintage amortization policy, the tracking of location and retirement of the subject assets is no longer needed. Assets older than the average service life are retired and then the remaining investment in each account are amortized using the amortization rates shown on, Sch D of the attached workbook. As assets reach the average service of each account, the associated original cost is retired from the books and records annually.

Based on discussions with Company personnel, CUC seeks to adopt uniform amortization periods for these accounts across all natural gas distribution business units. If approved, FCG would adopt the same amortization periods as CUC's other natural gas business units. These amortization periods are based on judgement and were approved in the latest depreciation studies for CUC Florida Public Utilities Company's consolidated natural gas division[35] and CUC-Maryland[36]. They have also been proposed in the CUC-Delaware 2024 depreciation study.

[33] The 2022 Depreciation Study was that prepared by Gannett Fleming Valuation and Rate Consultants, LLC in Docket No. 20220069.
[34] Docket No. 20170179-GU
[35] See Order No. PSC-2023-0103-FOF-GU, issued March 15, 2023, in Docket No. 20220067-GU, *In re: Petition for rate increase by Florida Public Utilities Company, Florida Division of Chesapeake Utilities Corporation, Florida Public Utilities Company - Fort Meade, and Florida Public Utilities Company – Indiantown Division.*
[36] See Order No. 91242, issued July 24, 2024, in Case No. 9721, *Chesapeake Utilities Corporation, Sandpiper Energy, Inc. and Elkton Gas Company's Joint Petition for Approval of Changes in their Depreciation Rates.*

FPSC EXH NO. 3
ADMITTED

Accordingly, the assets greater than the average service life of each affected account as of January 1, 2025, were identified and retired. A total of $13,189 is identified as exceeding the average service lives for the affected accounts and designated for retirement. Additionally, the book reserve for each account subject to vintage group amortization was compared to its theoretically correct level to determine any reserve imbalance. The resulting reserve surplus identified was $43,469 and a 2-year amortization period is proposed for recovery.

ACCOUNT 3900: STRUCTURES AND IMPROVEMENTS

This account includes costs associated with general structures and improvements used in connection with general plant. This includes the cost of all buildings, including roofing, plumbing, air conditioning systems, electrical and yard improvements. FCG has service centers in Brevard, Port St. Lucie, and Miami-Dade Counties. A new office building was added in 2024 in Port St. Lucie. The investment and theoretical restated reserve as of January 1, 2025 are $13,115,013 and $2,295,127, respectively.

The average service life underlying the current approved average remaining life is 25 years with an L0 curve shape.[37] The analysis in the 2022 Depreciation Study[38] proposed a service life of 30 years with an S0.5 curve shape.

There have been no retirements since the last depreciation study. In fact, the account has experienced retirements in only three years over the 2004-2024 period. The retirement rate for the 2004-2024 period averaged 2.23% with the most recent five years incurring no retirements. This data makes reliance on industry projections necessary. Other Florida gas utilities project average service lives ranging from 25 years to 40 years, with most at 40 years. This Study proposes an increase in average service life to 40 years as being more in line with other Florida gas company expectations. Using an average age of 7.5 years results in an average remaining life of 33 years. The retirement rate for the 2004- 2024 period averaged 2.23% with the most recent five years incurring no retirements. Based on judgement and discussions with Company personnel, a 40-year average service life and S0.5 curve are proposed. Using these parameters results in a remaining life of 33 years.

The currently approved net salvage factor is zero. The overall average net salvage, 2004-2024, is (5)% with the most recent 2021-2024 averaging 0%. There are years reflecting retirements with no net salvage and years showing removal costs with no retirements. Other gas companies in the State have prescribed net salvage factors ranging from zero to 10%, averaging 3%. Items in this account such as air conditioning systems, water supply systems, roof, paving, and fire protection systems having a replacement cost over $10,000 are likely to incur removal costs upon retirement in the future reducing the gross salvage realized from a building sale and conceivably offsetting

[37] See Order No. PSC-2023-0177-FOF-GU.
[38] The 2022 Depreciation Study was that prepared by Gannett Fleming Valuation and Rate Consultants, LLC in Docket No. 20220069.

FPSC EXH NO. 3
ADMITTED

gross salvage all together. At this time, the Company proposes 0% net salvage for this account. The next depreciation study will examine future trends and developments.

ACCOUNT 392X: TRANSPORTATION EQUIPMENT

FCG proposes restatement of its transportation assets based on CUC's other natural gas business units currently approved subaccounts as shown on Schedule I of the attached workbook. The retirement of motor vehicles for each CUC business unit is based on age, mileage, and maintenance costs. The newly proposed subaccounts are:

ACCOUNT 3921: TRANSPORTATION EQUIPMENT – CARS

This account includes the cost of 10 automobiles. The January 1, 2025 investment and theoretical restated reserve are $324,144 and $201,779, respectively. The average service life underlying the current approved average remaining life is 9 years with an L2.5 curve shape. The average age of the surviving investment is 10.6 years. This data suggests a longer average service life is warranted.

While passenger cars tend to have a 5-7 years life, recognizing the current age, FCG's cars appear to be experiencing a longer life. This Study proposes a 12-year average service life recognizing the age of these vehicles and in line with the Company retirement policy of motor vehicles. An S2 curve is proposed as being more indicative of future expectations. The resulting average remaining life is 3.7 years.

The currently prescribed net salvage factor is 11%. It is likely that vehicles retiring at an older age will not realize as much salvage. Based on judgement, a 10% net salvage is proposed. The next depreciation study will examine future trends and developments in this account.

ACCOUNT 3922: TRANSPORTATION EQUIPMENT – LIGHT AND MEDIUM TRUCKS, SUVS AND VANS

The investment and theoretical restated reserve on January 1, 2025 associated with this account are $8,392,837 and $2,516,173, respectively. The average service life underlying the currently approved average remaining life is 10 years with an L3 curve.

Based on historical data and judgement, the Company proposes an increase in average service life to 12 years and an S2 curve. Used with an average age of 4.7 years results in an average remaining life of 7.5 years.

The currently prescribed net salvage factor is 11%. The net salvage realized during the 2021-2024 period averaged 37%. Based on history and judgement, this Study proposes an average net salvage of 20%. The next depreciation study will examine future trends and developments in this account.

ACCOUNT 3923: TRANSPORTATION EQUIPMENT – HEAVY TRUCKS

The January 1, 2025 investment and theoretical restated reserve for Heavy Trucks are $1,040,846 and $554,979, respectively. The average service life underlying the currently approved average remaining life is 12 years with an L2 curve. The average age of the surviving investment is 8.7 years.

The Commission approved use of a 13-year average service life and an L3 mortality dispersion for this account as result of FCG's 2017 Depreciation Study.[39] The 2022 Depreciation Study[40] proposed no change to these parameters.

This Study proposes a 13-year average service life with an L3 curve that is more in line with CUC's motor vehicle retirement policy and other CUC business units. The resulting average remaining life is 5.3years.

The current approved net salvage factor for heavy trucks is 4%. Net salvage has averaged 0% during the 2021-2024 period. However, some salvage should be expected from the retirement of heavy trucks. Based on judgement, the Company proposes 10% net salvage.

ACCOUNT 3924: TRANSPORTATION EQUIPMENT – TRAILERS

The investment and theoretical restated reserve on January 1, 2025 are $174,493 and $88,991, respectively. The average service life underlying the current approved average remaining life is 12 years with an L2 curve. The age of the surviving investment is 13.8 years.

FCG proposes an increase in average service life to 20 years in light of the current age of the vehicles. The L2 curve remains reasonable and no change is proposed. The resulting average remaining life is 9.8 years.

The currently approved net salvage factor is 4%. There have been no retirements or salvage activity during the 2021-2024 period. At this time, FCG proposes 0% net salvage.

ACCOUNT 3941: NATURAL GAS VEHICLE EQUIPMENT

This account consists of various tools and shop equipment used for natural gas charging stations. The January 1, 2025 investment and theoretical restated reserve are $1,564,203 and $ 664,786, respectively. The existing average service life of 20 years with an S4 mortality dispersion and 0% net salvage based on expectations from a subsidiary company, Elizabethtown Gas.

The current investment was placed in service in 2016 with no activity since. This data does not provide meaningful statistical analysis results. FCG proposes no change to the existing average

[39] See Order No. PSC-2018-0190-GU, issued April 20, 2018, in Docket No. 20170179, *In re: Petition for rate increase by Florida City Gas,* p.36.
[40] The 2022 Depreciation Study was that prepared by Gannett Fleming Valuation and Rate Consultants, LLC in Docket No. 20220069.

FPSC EXH NO. 3
ADMITTED

service life, curve shape, or net salvage at this time. The resulting average remaining life is 11.5 years.

ACCOUNT 3960: POWER OPERATED EQUIPMENT

This account includes the cost of non-road power operated equipment such as bulldozers, forklifts, pile drivers, and tractors used in construction or repair work exclusive of equipment includible in other accounts. The January 1, 2025 investment and theoretical restated reserve are $278,349 and $98,536, respectively.

This account was not prescribed a revised depreciation rate per Order No. PSC-2023-0177-FOF-GU. Therefore, the existing depreciation rate and life and salvage parameters are those approved in the Company's 2017 Depreciation Study.[41] The average service life underlying the approved average remaining life is 15 years with an SQ curve.

The retirement rate during the period 2021-2024 averaged 3.80% and 2.51% during the period 2004-2024. The average age of the January 1, 2025 surviving investment is 6.6 years. Assets in the account vary from forklifts with a 20-year life expectancy to backhoes with a 12 to 13-year life expectancy. Discussions with FCG personnel indicate the existing 15-year average service life remains appropriate for the assets. Based on the mix of the account assets, the Company proposes retaining of the existing 15-year average service life. With only two years reporting retirements, the results of statistical analysis are meaningless. Even though retirement activity has been sporadic, an L2 curve is proposed as being more in line with expected retirement activity. The resulting average remaining life is 9.1 years.

The existing prescribed net salvage factor is 10%. Gross salvage can be realized from the retirement of power operated equipment with minimal if any removal cost. Based on judgment, this Study proposes no change to the existing 10% net salvage factor.

[41] See Order No. PSC-2018-0190-GU, issued April 20, 2018, in Docket No. 20170179, *In re: Petition for rate increase by Florida City Gas*, p.36.

GAS PLANT EXCLUDED FROM STUDY			
3020	Franchises And Consents	$241,545	$97,976
3641	Land and Land Rights	$8,373,426	$0
3740	Land and Land Rights	$1,277,569	$13,416
3741	Land	$72,437	$0
3890	Land - General	$2,226,283	$0
3892	Land Rights	$193,945	$0
	TOTAL	$12,385,205	$111,392
	TOTAL GAS PLANT	$709,099,301	$198,024,745

Notes:

(A) Proposed changes to amortization period to streamline operations. All other Chesapeake Natural Gas business units uses these proposed amortization periods.
Rate is computed as follow: Annual Amortization/Depreciation Rate = 100 %/Amortization Period*100

(B) Proposed account number restatement based on Chesapeake's Natural Gas chart of account.
Reclassified Misc. Intangibles from Account 30302 to Account 3031.
Reclassified Steel Mains from Account 3761 to Account 3762 and Plastic Mains from Account 3762 to Account 3761.
Reclassified Steel Services from Account 3801 to Account 3802 and Plastic Services from Account 3802 to Account 3801.
Reclassified ERTs from Meter Account 3811 to Account 3812.

(C) Proposed reserve transfers to correct the negative reserve balance in Acct 3821 and bring the reserve balance to its theoretically correct level.

(D) Proposing same amortization period used for all Chesapeake Natural Gas business units. This adjustment restates intangible and general plant accounts to their theoretical levels using the newly proposed amortization period.

(E) Adjustment to retire amortizable general plant investments with an age greater than proposed ASL.

(F) Theoretical surplus after restating accounts to theoretically correct reserve levels

(G) Adjusted Book Investment with Study Adjustments have been Restated to include retirements of assets with an age greater than the proposed ASL.

(H) Adjusted Book Reserve with Study Adjustments have been restated to include a proposed reserve transfer, retirements of assets with an age greater than the proposed ASL, and a proposed adjustment to bring all accounts to its theoretical reserve balance. See notes (C)-(F) for more details on adjustments.

(I) Proposed restatement of the Office Furniture and Equipment assets based on currently approved subaccounts used for all Chesapeake's Natural Gas business unit's (Sch H).

(J) Proposed restatement of Transportation Assets based on Chesapeake's other natural gas business unit's currently approved subaccounts (Sch I).

(K) The rate for the embedded as well as for new investments will be the same as a result of restating the reserve accounts for intangible and general plant to its theoretically correct levels.

(L) Amortized the Theoretical Reserve surplus and Intangible/General Plant deficit over 2 years

PROPOSED AMORTIZATION/DEPRECIATION RATES - POST RATE CASEAPPROVAL (A)

Notes:

Current parameters are from Table 1 of PSC Order No. PSC-2023-0177-FOF-GU, in Docket No. 20220069-GU. Some accounts were restated to reflect Chesapeake's standard natural gas subaccounts. The depreciation
(A) parameters for LNG assets in Accounts 376X, Power Op Equip in Account 3960, and Amortized General Plant Accounts 391X, 3930, 3940, 3950, 3970, and 3980 were not undated in the last study. These parameters were approved by Order No. PSC-2018-0190-FOF-GU in Docket No. 20170179-GU.

(B) Restated all Office Furniture and Equipment and Software assets based on proposed subaccounts shown on Sch H.

(C) Restated all Transportation assets based on proposed subaccounts shown on Sch I.

Restated account numbers based on Chesapeake's standard chart of account for all natural gas business units. All CHPK's natural gas business units uses the same chart of accounts to streamline operations. Reclassified
(D) Misc. Intangibles from Account 30302 to Account 3031. Reclassified Steel Mains from Account 3761 to newly proposed account 3762. Reclassified Plastic Mains from Account 3762 to newly proposed account 3761. Reclassified Steel Services from Account 3801 to newly proposed account 3802. Reclassified Plastic Services from Account 3802 to newly proposed account 3801. Reclassified ERTs from Meter Account 3811 to newly

Notes:

(A) Restated account numbers based on Chesapeake's standard chart of account for all natural gas business units. All CHPK's natural gas business units uses the same chart of accounts to streamline operations. Reclassified Misc. Intangibles from Account 30302 to Account 3031. Reclassified Steel Mains from Account 3761 to newly proposed account 3762. Reclassified Plastic Mains from Account 3762 to newly proposed account 3761. Reclassified Steel Services from Account 3801 to newly proposed account 3802. Reclassified Plastic Services from Account 3802 to newly proposed account 3801. Reclassified ERTs from Meter Account 3811 to newly proposed account 3812.

(B) Restated all Office Furniture and Equipment and Software assets based on proposed subaccounts shown on

(C) Restated all Transportation assets based on proposed subaccounts shown on Sch I.

PLANT IN SERVICE AND RESERVE SUMMARIES

2021 Notes

Schedule	Column	Account	Amount	Explanation
Reserve	Beg. Bal.	3030	($117)	Account balance negative since last study
Reserve	Beg. Bal.	3980	($190,577)	
Reserve	Beg. Bal.	3750	($43,015)	Cause of negative balance is unkown. Chesapeake acquired FCG Dec 2023.
Reserve	Beg. Bal.	3812	($252,382)	
Reserve	Beg. Bal.	3821	($315,370)	
Reserve	End. Bal.	3820	($25,329)	Prior Owners notes states retirements of more recent assets with higher values were done.
Plant/Reserve	All	3761/3762	Various	Restated account numbers based on Chesapeake's other natural gas chart of account. All CHPK's natural gas business units uses the same chart of accounts to streamline operations. Reclassified Steel Mains from Account 3761 to newly proposed account 3762. Reclassified Plastic Mains from Account 3762 to newly proposed account 3761. Reclassified Steel Services from Account 3801 to newly proposed account 3802. Reclassified Plastic Services from Account 3802 to newly proposed account 3801.

2025 NATURAL GAS DEPRECIATION STUDY

As of 1/1/2025

PLANT IN SERVICE AND RESERVE SUMMARIES

2024 Notes

Schedule	Column	Account	Amount	Explanation
Plant/Reserve	All	3761/3762	Various	Restated account numbers based on Chesapeake's other natural gas chart of account. All CHPK's natural gas business units uses the same chart of accounts to streamline operations. Reclassified Steel Mains from Account 3761 to newly proposed account 3762. Reclassified Plastic Mains from Account 3762 to newly proposed account 3761. Reclassified Steel Services from Account 3801 to newly proposed account 3802. Reclassified Plastic Services from Account 3802 to newly proposed account 3801.
Plant/Reserve	All	3801/3802	Various	
Plant/Reserve	All	3030/30302	Various	Software trasnferred in at acquisition was recorded in account 3030 instead of 30302. Study reclassifies the balance to 3031.

2025 NATURAL GAS DEPRECIATION STUDY

As of 1/1/2025

PRIOR YEARS RESERVE ADJUSTMENTS

ACCT	DESCRIPTION	Adjustments	Adj. Description
3030	Misc Intang Plant	($25,528)	Moved Starnik Software Enhancement from 3030 to Acct 3032
3032	Misc Intang Plant - Software 20 Yrs.	$25,528	
3030	Misc Intang Plant	($313,482)	Software transferred in at acquisition was recorded in account 3030 instead of 30302. Study reclassifies the balance to 3031.
3031	Misc Intang Plant - Software 15 Yrs.	$313,482	
3810	Meters	$4,768	Moved Meter related project costs to Acct 3810 from 392X
3870	Other Eq	$20,773	Moved SCADA tools to Acct 3870 from 392X
3900	Struc&Impr	$6,651	Moved Facility updates to Account 3900 from 391X
3910	Office Equip	($421,005)	Reclassifed assets using CHPK's chart of accounts and moved missclassified assets to the proper FERC account
3911	Computer & Periph	($75,811)	
3912	Computer Hardware	$913,452	
3913	Office Furniture	$447,729	
3915	Personal Computer Equipment	($908,548)	
3920	Transp Equip	$4,210	Excluded from Study - there is no asset with same vintage to offset amount
3923	HD Truck/Bobtail	$56	
3920	Transportation - Equip	($185,479)	Reclassifed assets using CHPK's chart of accounts and moved missclassified assets to the proper FERC account
3921	Transportation - Cars	($848,725)	
3922	Transportation - LT Truck &Van	$697,145	
3923	Transportation - HD Truck/Bobtail	$124,123	
3924	Transportation - Trailers	$100,946	
3920	Transp Equip	($36,417)	Moved the surplus applied from Acct 3920 to Acct 3924.
3924	Transportation - Trailers	$36,417	
3960	Pwr Op Equip	$1,114	Moved Excavator Machine to Acct 3960 from 392X
3980	Misc Equip	$48,189	Moved veh remote tracking equipment and dash cams to Acct 3980 from 392X
3980	Misc Equip	$2,952	Moved Kitchen Equipment to Acct 3980 from 391X
3980	Misc Equip	$34,580	Moved iPad configuration Equipment to Acct 3980 from 391X
3922	LT Truck &Van	($163,062)	Estimated total of Ret'd Vehicles
3922	LT Truck &Van	$12,000	Estimated Salvage on Ret'd Vehicles
3810	Meters	($26,084)	Inadvertently Misclassifed Assets during acquisition
3820	Meter Installations	$13,609	
	Total	**($196,417)**

Restated account numbers based on Chesapeake's standard chart of account for all natural gas business units. All CHPK's natural gas business units uses the same chart of accounts to streamline operations. Reclassified Steel Mains from Account 3761 to newly proposed account 3762. Reclassified Plastic Mains from Account 3762 to newly proposed account 3761. Reclassified Steel Services from Account 3801 to newly proposed account 3802. Reclassified Plastic Services from Account 3802 to newly proposed account 3801. Reclassified ERTs from Meter Account 3811 to newly proposed account 3812.

ADMITTED

and $613,649, respectively. The average service life underlying the currently approved average remaining life is 47 years with an R1 curve shape. The current average age of the surviving investment is 19.9 years.

Retirements have been erratic at best with many years having no recorded retirements. The largest retirement during the 2021-2024 period occurred in 2021. This data does not lend meaningful statistical analysis results. Other gas companies in the State estimate the life of house regulator installations in the range of 34 years to 47 years, averaging 42 years. At this time, FCG proposes no change to the existing 47-year average service life or R1 curve shape. The R1 curve is in line with recent retirement experience.

There has been limited data for net salvage. Of the 21 years of data available, retirements occurred in only 10 years, 4 of which were in the 2021-2024 period. No net salvage was realized in any year. The currently approved net salvage factor is (25)%. ~~The Company believes continuation of this net salvage factor is appropriate. The next Study will examine future trends in this account.~~ The Company proposes a net salvage factor of 0%.

ACCOUNT 3850: INDUSTRIAL MEASURING AND REGULATING STATION EQUIPMENT

The investment in this account includes the costs of industrial measuring and regulating station equipment. The account includes meter sets for larger customers and many of the assets are similar to those in Account 378, Measuring and Regulating Station Equipment. The January 1, 2025 investment and theoretical restated reserve are $3,740,797 and $2,160,310, respectively.

The average service life underlying the current approved average remaining life is 37 years with an R3 curve. It is reasonable to expect similar life characteristics for this account as for Account 378. During the 2021-2024 period, only 2021 incurred any retirements. In fact, over the past 20 years, only one other year incurred small retirements. The retirement rate averaged less than 1%. It is reasonable to expect similar life characteristics for this account as for Account 378. Considering the overall lack of retirements, and continued expectations of similar life characteristics to Account 3780, FCG proposes a slight increase in average service life to 40 years and S3 mortality curve based on history and judgement. Using an average age of 24.2 years and an S3 curve results in an average remaining life of 16.9 years.

The currently approved net salvage factor is (2)%. There is limited account net salvage data, historically averaging 0%. Other gas companies in the State estimate net salvage for this investment in the range of (5)% to zero, averaging (1)%. Most gas companies estimate 0% net salvage. At this time, the Company proposes 0% net salvage. The next Study will examine future trends in this account.

ACCOUNT 3870: OTHER EQUIPMENT

This account includes equipment not included in other distribution accounts such as leak detector, pipe locators, pipe locators, odor meters, pressure gauges, and voltmeters. The investment and

William Dunkel, Consultant
8625 Farmington Cemetery Road
Pleasant Plains, Illinois 62677

Qualifications

William Dunkel is a consultant in utility regulatory proceedings. He has participated in over 300 state regulatory proceedings as listed on the attached Relevant Work Experience. Mr. Dunkel is a member of the Society of Depreciation Professionals.

Mr. Dunkel has provided expert depreciation testimony and other services to state agencies throughout the country in numerous state regulatory proceedings.

Mr. Dunkel made a presentation pertaining to "The Largest Depreciation Issue that is Generally in Dispute in State Utility Depreciation Studies: Net Salvage" at the Society of Depreciation Professionals Conference held in September 2018 in Indianapolis, IN.

Mr. Dunkel made a presentation pertaining to Current Depreciation Issues in State Rate Case Proceedings at the Society of Depreciation Professionals 25th Annual Meeting held September 2011 in Atlanta, GA.

Mr. Dunkel made a presentation pertaining to Video Dial Tone at the NASUCA 1993 Mid-Year Meeting held in St. Louis.

Mr. Dunkel made a presentation to the NARUC Subcommittee on Economics and Finance at the NARUC Summer Meetings held in July 1992. That presentation was entitled "The Reason the Industry Wants to Eliminate Cost Based Regulation--Telecommunications is a Declining Cost Industry."

Mr. Dunkel has testified before the Illinois House of Representatives Subcommittee on Communications, as well as participated in numerous other schools and conferences pertaining to the utility industry.

Mr. Dunkel provides services almost exclusively to public agencies, including the Public Utilities Commission, the Public Counsel, Office of Attorney General, or the State Department of Administration in various states.

William Dunkel currently provides, or in the past has provided, services in state utility regulatory proceedings to the following clients:

The Public Utility Commission or the Staffs in the States of:

Mr. Dunkel graduated from the University of Illinois in February 1970 with a Bachelor of Science Degree in Engineering Physics, with emphasis on economics and other business-related subjects. He has taken several post-graduate courses since graduation.

Mr. Dunkel has taken the AT&T separations school which is normally provided to AT&T personnel.

Mr. Dunkel has taken the General Telephone separations school which is normally provided for training of the General Telephone Company personnel in separations.

Mr. Dunkel has completed an advanced depreciation program entitled “Forecasting Life and Salvage” offered by Depreciation Programs, Inc.

FPSC EXH NO. 6
ADMITTED

From 1970 to 1974, Mr. Dunkel was a design engineer for Sangamo Electric Company (Sangamo was later purchased by Schlumberger) designing electric watt-hour meters used in the electric utility industry. He was granted patent No. 3822400 for a solid state meter pulse initiator which was used in metering.

In April 1974, Mr. Dunkel was employed by the Illinois Commerce Commission in the Electric Section as a Utility Engineer. In November of 1975, he transferred to the Telephone Section of the Illinois Commerce Commission and from that time until July, 1980, he participated in essentially all telephone rate cases and other telephone rate matters that were set for hearing in the State of Illinois. During that period, he testified as an expert witness in numerous rate design cases and tariff filings in the areas of rate design, cost studies and separations. During the period 1975-1980, he was the Separations and Settlements expert for the Staff of the Illinois Commerce Commission.

From July 1977 until July 1980, Mr. Dunkel was a Staff member of the FCC-State Joint Board on Separations, concerning the "Impact of Customer Provision of Terminal Equipment on Jurisdictional Separations" in FCC Docket No. 20981 on behalf of the Illinois Commerce Commission. The FCC-State Joint Board is the national board that specifies the rules for separations in the telephone industry.

Since July 1980, Mr. Dunkel has been regularly employed as an independent consultant in state utility regulatory proceedings across the nation.

Mr. Adam Teitzman, Clerk
Florida Public Service Commission
2540 Shumard Oak Boulevard
Tallahassee, FL 32399-0850

Docket No. 20250035-GU – Petition for approval of 2025 depreciation study and for approval to amortize reserve imbalance, by Florida City Gas.

Dear Mr. Teitzman:

Enclosed for filing, please find Florida City Gas's Responses to Staff's First Set of Data Requests.

As always, thank you for your assistance in connection with this filing. If you have any questions whatsoever, please do not hesitate to let me know.

Sincerely,

Beth Keating

CC:// (certificate of service)

or imply The Company only opines that a short-term amortization of the reserve surplus benefits customers through lower depreciation expenses, corrects the existing misstatement of rate base and is a return to the matching of expenses to consumption. The added benefit is the delay of a rate proceeding. The 2025 depreciation study was conducted on a stand-alone basis, without the consideration of Company earnings. The objective of the surplus amortization was and continues to be the correction of the overstated reserve.

24. Please refer to the FCG's 2025 Depreciation Study, page 6. Here the Company writes "[t]here are numerous cases where the Commission has approved amortization of reserve imbalances over a period shorter than the remaining life." Please provide examples of this amortization where the reserve surplus was used to reduce depreciation expense in support of company earnings rather than flowed directly to, or recovered from, customers. Please limit this response to identifying only instances where the relative issues in the docket were not part of a settlement.

Company Response:

In depreciation studies not accompanied with a rate case proceeding, the resultant expenses of revised depreciation rates, either increases or decreases, have an effect on earnings. Regarding the Settlement cases where a company's earnings were considered in determining the amortization period of a reserve deficit, a Settlement is an agreement considered satisfactory by all parties and approved by the Commission as being in the public interest. If it were not so, the parties would not have agreed and the agreement would not have been approved. Thus, whether the issue of amortizing a reserve surplus is part of a Settlement or not, should not matter. The surplus denotes a misstatement of rate base and should be corrected as soon as practicable, just as a reserve deficit has been.

Even though Order PSC-2019-0076-FOF-GU is not a depreciation order, but related to tax, the circumstances are similar. In that Case FPUC argued that it was projected to be earning at the bottom of its allowable range of return on equity and, in light of this should be allowed to retain the estimated annual amortized amount of the protected excess accumulated deferred income tax (ADIT) balance. FPUC argued that the ability to retain the net tax amount would provide the Company with further opportunity to earn within its

authorized range of return on equity (ROE), while also enabling the Company to provide service at present rates for a longer period, to continue making necessary capital investments, and to delay a costly rate proceeding. The Commission concluded that "it was fair and reasonable to consider the earnings position of the Company in our decision. Reducing the base rates as recommended by OPC would result in a cash flow reduction to the Company, put downward pressure on FPUC's earnings, and would accelerate the need for a full rate case sooner than it would otherwise due to FPUC earning below its authorized range of ROE". The Commission allowed FPUC to retain the estimated amortized deferred tax balance.

For correction of reserve imbalances over a shorter period than the remaining life please see Order PSC-2019-0433-PAA-GU, issued October22, 2019 In re: Petition for approval of 2019 consolidated depreciation study by Florida Public Utilities Company, Florida Public Utilities Company-Indiantown Division, Florida Public Utilities Company-Fort Meade, and Florida Division of Chesapeake Utilities Corporation, page 3. In that case, FPUC adaptation of vintage year accounting for amortizable general plant accounts amounted in ($1.4M) reserve imbalance. The commission authorized a 5-year amortization to bring these accounts to their theoretically correct reserve levels.

Also, Order No. 010699-EI, issued November 19, 2001, In re: Request for approval of implementation date of January 1, 2002, for new depreciation rates for Marianna Electric Division by Florida Public Utilities Company. The Commission stated its policy to recover imbalances "as fast possible, unless such recovery prevents the Company from earning a fair and reasonable return on its investments."

Additionally, see Order No. PSC-10-0131-FOF-EI, issued March 5, 2010, in Docket No. 090079-EI In re: Petition for increase in rates by Progress Energy Florida, Inc.; Docket No. 090144-EI, In re: Petition for limited proceeding to include Bartow repowering project in base rates, by Progress Energy Florida, Inc.; and Docket No. 090145-EI, In re: Petition for expedited approval of the deferral of pension expenses, authorization to charge storm hardening expenses to the storm damage reserve, and variance from or waiver of Rule 25-6.0143(I)(c), (d), and (f), F.A.C., by Progress Energy Florida, Inc, pp. 45-52.

See also, Order No. PSC-10-0153-FOF-EI in Docket Nos. 20080677-EI, issued March 17, 2010 In re: Petition for increase in rates by Florida Power & Light Company and Docket No. 20090130-EI In re: 2009 depreciation and dismantlement study by Florida Power & Light Company, at page 87. The Commission determined that the reserve surplus should be amortized over 4 years.

By Order 19438, issued June 6, 1988, in Docket No. 80868-EI, In re: Request of Tampa Electric Company for a Change in its Depreciation Rates Effective January 1, 1988, where the Commission approved that tax credits associated with the interest synchronization of investment tax credits be applied to decrease the unrecovered cost associated with equipment planned for retirement and amortized over a two-year period. Prospectively, the annual true-up amount would be booked to a non-account specific account and allocated to specific accounts at the time of the next depreciation study. Further, the Commission approved that the reserve remaining from the retirement of certain capacitors be transferred to the reserve associated with transformers slated for near-term retirement.

By Order 18736, issued January 26, 1988, in Docket No. 871269-TL, In re: Request of United Telephone Company of Florida for Acceleration of Amortization Schedules, the Commission approved a one-time charge to depreciation in the amount needed to recover the imbalance associated with certain central office equipment with a remainder of the requested amount to be recorded in a nonspecific reserve account and allocated to specific accounts in the next depreciation study. The Commission found that these actions "comply with our policies of correcting reserve imbalances as rapidly as possible and of accelerating the write-off of plant identified for retirement earlier than projected when these goals can be achieved without adversely affective rates."

By Order 15798, issued November 1986, In re; Implementing Interest Synchronization Refunds Through Depreciation Revenue Adjustments, the Commission determined that monies subject to refund plus interest related to the interest synchronization of investment tax credits be recorded as a one-time jurisdictional adjustment to the depreciation reserve and made account specific at the next depreciation study. Further, on-going monthly jurisdictional adjustments would be booked to the deprecation reserve in the same manner.

By Order PSC-97-1609-FOF_EI Florida Public Utilities Company's Marianna Division was authorized to amortize the net gain associated with the sale of *a* warehouse and associated land over a period of five years. A portion of the sale proceeds to be recorded as gross salvage against the retirement of the warehouse building. The net gain from the sale of a hydro plant was approved to be amortized over four years. Order PSC-98-0451-FOF-EI revised the amortization period for the net gain on the hydro plant to five years.

By Order PSC-2002-1159-PAA-GU approve the application of a portion of the net proceeds from the sale of FPUC's office and warehouse building to the unrecovered cost of the building. The net gain was then amortized over five years.

Further, reserve transfers between accounts, a long-standing Commission-approved practice, are tantamount to amortization of the respective account reserve imbalances.

25. Please refer to the FCG's 2025 Depreciation Study, page 6. In the third paragraph, the Company writes, "FCG has identified a reserve surplus of $27.3 million that it proposes to amortize over the years 2025 and 2026. This action allows a return to the matching principle and correction of intergenerational inequities." Please fully explain the concept of relieving intergenerational inequities by transferring customer value to Company shareholders, which has the direct effect of customers having to pay for that depreciation and return twice no matter the generation of customer base.

Company Response:

The Company objects to the premise that its proposal transfers customer value to FCG's shareholders and results in double recovery. Current customers are effectively subsidizing future customers, referred to as intergenerational inequity. They (and also past customers) have effectively overpaid their fair share of depreciation expense based on the parameters proposed in the 2025 Depreciation Study. The matching concept argues for a short amortization period in order that the ratepayers who may have overpaid have a chance of

INDEPENDENT AUDITOR'S REPORT

Pivotal Utility Holdings, Inc.
700 Universe Blvd.
Juno Beach, FL

Opinion

We have audited the financial statements of Pivotal Utility Holdings, Inc. d/b/a Florida City Gas ("Florida City Gas" or the "Company"), a wholly-owned subsidiary of Florida Power & Light Company, which comprise the balance sheet – regulatory basis as of December 31, 2021, and the related statements of income – regulatory basis, retained earnings – regulatory basis, and cash flows – regulatory basis, for the year then ended, included on pages 10 through 18 of the Company's Annual Report of Natural Gas Utilities, and the related notes to the financial statements (the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the assets, liabilities, and proprietary capital of the Company as of December 31, 2021, and the results of its operations for the year then ended in accordance with the accounting requirements of the Federal Energy Regulatory Commission as set forth in its applicable Uniform System of Accounts and published accounting releases.

Basis for Opinion

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Company, and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Emphasis of Matter - Basis of Accounting

As discussed in Note 1 to the financial statements, these financial statements were prepared in accordance with the accounting requirements of the Federal Energy Regulatory Commission as set forth in its applicable Uniform System of Accounts and published accounting releases, which is a basis of accounting other than accounting principles generally accepted in the United States of America. As a result, the financial statements may not be suitable for another purpose. Our opinion is not modified with respect to this matter.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with the accounting requirements of the Federal Energy Regulatory Commission as set forth in its applicable Uniform System of Accounts and published accounting releases. Management is also responsible for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Company's ability to continue as a going concern for one year after the date that the financial statements are available to be issued.

FPSC EXH NO. 9
ADMITTED

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Company's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Restriction on Use

This report is intended solely for the information and use of the members and management of the Company and for filing with the Florida Public Service Commission and is not intended to be and should not be used by anyone other than these specified parties.

FPSC EXH NO. 10
Docket No. 20250035-GU
ADMITTED

INTERROGATORY NO. 17(a-c)

INTERROGATORIES

17. Depreciation. With regard to Items 1- 4, please answer (a) – (c):

1. In the "FCG Response Attachment A -Revised FCG Depreciation Study Workpapers", "Sch G 2021" shows that $569,979 was the amount of Additions in Account 3780, Measuring and Regulating Equip. - General, in the year 2021. (This same $569,979 amount is also shown on page 63 of Schedule G (page 70 in the PDF) of Attachment A, 2025 Depreciation Study of Florida City Gas).

2. The data in the file "OPC ROG-2-8a Service Life Data (37976850.1)" shows that in the years 2021-2024, no investments have retired in the 2021 vintage in Account 3780, Measuring and Regulating Equip. – General, and there are no transfers in this vintage and account.

3. As a result of the numbers discussed in items 1 and 2 above, the Book Cost investment balance in Account 3780, Measuring and Regulating Equip. – General should be $569,979 in the year 2021 vintage at the end of 2024. ($569,979 - $0 = $569,979).

4. However, in the FCG calculation of the "Average Age" of 3780, Measuring and Regulating Equip. – General , FCG used $31,663 as the claimed Book Cost at 1/1/2025, of the 2021 vintage, as shown on tab "Sch J" of "FCG Response Attachment A -Revised FCG Depreciation Study Workpapers".

   a. Please explain why FCG used $31,663 as the claimed Book Cost in the 2021 vintage at January1, 2025 for Account 3780, Measuring and Regulating Equip. – General when calculating "Average Age", when the FCG data from other sources shows that the Book Cost at that time was in excess of $500,000.

   b. Please reconcile the (1) $31,663 shown as the claimed Book Cost at January1, 2025 for Account 3780, Measuring and Regulating Equip. – General (as shown on tab "Sch J" of "FCG Response Attachment A -Revised FCG Depreciation Study Workpapers"), with (2) the $569,979 amount of Additions in 3780, Measuring and Regulating Equip. – General, in the year 2021 (as shown on "FCG Response Attachment A -Revised FCG Depreciation Study

FPSC EXH NO 10
ADMITTED

INTERROGATORY NO. 17(a-c), cont.

Workpapers" "Sch G 2021") adjusted for the later retirements (if any) from the 2021 vintage.

c. If the response to part (b) claims there have been any retirements from the 2021 vintage in Account 3780, Measuring and Regulating Equip. – General, cite the line(s) in the file "OPC ROG-2-8a Service Life Data (37976850.1)" which shows any retirements in the years 2021-2024, in the 2021 vintage in 3780, Measuring and Regulating Equip. – General.

Company Response:

a) The difference between the two schedules for the book cost is timing. The data provided in response OPC ROG-2-8a Service Life Data reflects the information provided on PSL-2 workbook, Schedules G 202X for the years 2021 through 2024. The data for transaction years 2021 through November 2023 were provided by Florida Power and Light (FPL). The G schedules are summarized according to the ledger's posting date and ties to the Annual Status Reports submitted to the Commission. Schedule G's reported additions may include late charges and correcting entries for prior years.

Schedule J reflects investments by vintage regardless of posting date. The data source for Schedule J is FCG's PowerPlan Continuous Property Records (CPR) report, which was provided as response to OPC POD 2-11 Sch J - FCG Plant by Vintage. These records include the asset and retirement details by vintage that were provided by FPL during the acquisition of FCG by Chesapeake Utilities (CHPK) and CHPK's subsequent continuous property records through 2024. FCG believes its CPR records are the best option to provide the appropriate distribution of assets at 1/1/2025 to compute the average age calculation for its accounts.

c) There have been no retirements from the vintage year 2021. See tab 3-17 Corrected SLD Entries of attachment OPC ROG 3-17 Acct 3780 for the revised service life data for transaction years 2021-2024.

Respondent: Pat Lee

C3-537

FPSC EXH NO. 10
ADMITTED

INTERROGATORY NO. 18(a-c)

18. Depreciation. With regard to Items 1- 4, please answer (a) – (c):

1. In the "FCG Response Attachment A -Revised FCG Depreciation Study Workpapers", "Sch G 2021" shows that $5,565,780 was the amount of Additions in Account 3762, Steel Mains, in the year 2021. (This same $5,565,780 amount is also shown on page 63 of Schedule G (page 70 in the PDF) of Attachment A, 2025 Depreciation Study of Florida City Gas).

2. The data in the file "OPC ROG-2-8a Service Life Data (37976850.1)" shows that in the years 2021-2024, no investments have retired in the 2021 vintage in Account 3762, Steel Mains, and there are no transfers in this vintage and account.

3. As a result of the numbers discussed in items 1 and 2 above, the Book Cost investment balance in Account 3762, Steel Mains should be $5,565,780 in the year 2021 vintage, at the end of 2024 ($5,565,780 - $0 = $5,565,780).

4. However, in the FCG calculation of the "Average Age" of Account 3762, Steel Mains, FCG used $546,527 as the claimed Book Cost at 1/1/2025, as shown on tab "Sch J" of "FCG Response Attachment A -Revised FCG Depreciation Study Workpapers".

    a. Please explain why FCG used $546,527 as the claimed Book Cost of the 2021 vintage at 1/1/2025 for Account 3762, Steel Mains when calculating "Average Age", when the FCG data from other sources shows the Book Cost at that time was in excess of $5,000,000.

    b. Please reconcile the (1) $546,527 shown as the claimed Book Cost at 1/1/2025 for Account 3762, Steel Mains (as shown on tab "Sch J" of "FCG Response Attachment A -Revised FCG Depreciation Study Workpapers"), with (2) the $5,565,780 amount of Additions in Account 3762, Steel Mains, in the year 2021 (as shown on "FCG Response Attachment A -Revised FCG Depreciation Study Workpapers" "Sch G 2021") adjusted for the later retirements (if any) from the 2021 vintage.

INTERROGATORY NO. 18(a-c), cont.

c. If the response to part (b) claims there have been any retirements from the 2021 vintage in Account 3762, Steel Mains, cite the line(s) in the file "OPC ROG-2-8a Service Life Data (37976850.1)" which shows any retirements in the years 20212024, in the 2021 vintage in Account 3762, Steel Mains.

Company Response:

a) The difference between the two schedules for the book cost is timing (See response 3-17a above) and erroneously reporting 2022 investments totaling $160K in vintage year 2021 on Schedule J of Composite Exhibit PSL-2 (workbook).

b) See attachment OPC ROG 3-18 Acct 3762 for a reconciliation between Schedules G 2021 and J. On tab 3-18 FPL Additions Rec Sch, FCG has included FPL's reconciliation between its PowerPlan CPR system and the Annual Report filing for 2021 through November 2023 Additions. This schedule was previously provided in Response to OPC POD 2-11 Schs F-G - FCG Plant Adds & Rets 2021-2023 (from FPL) under the Additions & Retirements Summary tab. Supporting entries were not provided by FPL with the reconciliation schedule; and therefore, vintages for the correcting entries cannot be determined by FCG. As a result, FCG continues to have confidence that its CRP records are the best option and swiftest option to provide the appropriate distribution of assets at 1/1/2025 to compute the average age calculation for adjusted accounts.

c) There were no retirements for the 2021 vintage. See tab 3-18 Corrected SLD Entries of attachment OPC ROG 3-18 Acct 3762, for the revised service life data for transaction years 2021-2024. FCG has written unknown in the transaction year for the correcting entries.

Respondent: Pat Lee

INTERROGATORY NO. 19(a-d)

19. Depreciation. Please reference the following observation(s) and answer (a) – (d):

In other accounts and vintages, it appears that there are discrepancies similar to as referenced in Interrogatory Nos. 17 and 18

a. For all vintages 2021 through 2024, and for all accounts, for any number in which: (1) the amount shown on tab "Sch J" of "FCG Response Attachment A Revised FCG Depreciation Study Workpapers" is more than (plus or minus)15% different from (2) the number which is the Addition (as shown on Sch G of "FCG Response Attachment A -Revised FCG Depreciation Study Workpapers" less the retirements in that vintage (as shown the file "OPC ROG-2-8a Service Life Data (37976850.1")), please reconcile the difference between the number discussed as (1) above and the number discussed in (2) above.

b. Please provide the reconciliations requested in part (a) in Excel with the formulas included and working.

c. If any numbers not shown on "FCG Response Attachment A -Revised FCG Depreciation Study Workpapers" are used in the reconciliations requested in part (a), provide the source for those numbers and explain what they are.

d. Provide a revised version of tab "Sch J" of "FCG Response Attachment A -Revised FCG Depreciation Study Workpapers" except using data consistent with the data provided by FCG in the file "OPC ROG-2-8a Service Life Data (37976850.1)".

Company Response:

The difference in the book cost between the two schedules is timing. Please see response to OPC 3-17a above.

a) Please see attachment OPC ROG 3-19 2021-2024 Transaction Periods for a reconciliation between Schedules G 2021-2024 and J for accounts that report a (plus or minus) 15%

FPSC EXH NO. 10
ADMITTED

INTERROGATORY NO. 19(a-d), cont.

variance. All schedules have formulas intact with all source documentation included on a separate tab. Source documents include:

i. FPL's Additions Reconciliation from its CPR to the Annual Status Report filings for Years 2021 through November 2023 (Tab 3-19 FPL Additions Rec Sch).

ii. The combined Plant Summary Schedule, which includes FPL's and CHPK's PowerPlan CPR systems reports for FCG (Tab 2023 FPL CHPK Combined PLT).

iii. FPL and CHPK complete CPR listing in pivot table format, filtered by account for each reconciliation (Tabs 3-19 FPL CPR Pivot and 3-19 CHPK CPR Pivot).

b) See response to 3-19a above.

c) See response to 3-19a above.

d) Please see attachment OPC ROG 3-19d Revised Sch J of Composite Exhibit PSL-2 (workbook) for the updated Sch J, which includes all corrections presently known to FCG as a result of answering OPC 3rd Set of Interrogatories. See also attachment OPC ROG 3-19d Revised Service Life Data for FCG's Revised Service Life Data schedule for transaction years 2021-2024 with additions by vintage. Previously, attachment OPC ROG 2-8a Service Life Data provided additions based on what was stated on the original Sch G 202X which may or may not have been the vintage total for the year.

DECLARATION

I hereby certify and affirm that I sponsored the Company's responses to Citizen's Third Set of Interrogatories to Florida City Gas (Nos. 17 - 19) in Docket No. 20250035-GU. The responses are true and correct to the best of my knowledge. Under penalty of perjury, I declare that I have read the foregoing declaration and the interrogatory responses identified above, and that the facts stated therein are true.

Docket No. 20250035-GU
ADMITTED

INTERROGATORY NO. 16(a-b)

16. **Depreciation**. In response to Staff's First Set of Data Requests, No. 7(d) regarding the net salvage factor of Account 3801, Plastic Services, the FCG response included the following: "The retirement rates of less than 1 % are not reliable for net salvage projections."

a. Please cite which page in *Public Utility Depreciation Practices*, published by NARUC (1996) says that retirement rates (or retirement ratios) of less than 1 % are not reliable.

b. For any citation from *Public Utility Depreciation Practices* provided in response to part (a), provide the citation from *Public Utility Depreciation Practices,* which shows the citation was referring to retirement rates (or retirement ratios) in which the original costs in the denominator were from a **different** average time period than the original costs in the numerator.

Company Response:

a. There is no specific cite from *Public Utility Depreciation Practices*. The statement is based on Ms. Lee's vast depreciation experience. Stated simply, when retirement rates average less the 1%, the results of statistical analysis are considered meaningless for service life or net salvage projections, because there is not a reasonable sample size upon which to conduct the statistical analysis. Additionally, this approach for life and salvage determinations has been accepted by the Commission in previous depreciation studies, such as Docket No. 20220067-GU and Docket No. 20230079-EI.

b. FCG objects to this request as exceeding the scope of discovery in that it is argumentative and seeks information that is not solely in the possession of FCG and therefore equally and publicly available to OPC. With that said, FCG's response is: N/A

Respondent: Patricia Lee and Bety Maitre

Background

On April 4, 2023, Peoples Gas System, Inc. (PGS or Company) filed a petition seeking our approval of a rate increase and associated depreciation rates. PGS is a natural gas distribution company providing sales and transportation of natural gas, and is a public utility subject to our regulatory jurisdiction under Chapter 366, Florida Statutes (F.S.). PGS is a wholly-owned subsidiary of TECO Gas Operations, Inc. and provides service to approximately 470,000 customers in 39 of Florida's 67 counties.

PGS requested an increase of approximately $139.3 million in base rates. Of that amount, about $11.6 million is associated with revenue requirements transferred from the Cast Iron/Base Steel Replacement Rider. The remaining $127.6 million is necessary, according to PGS, for the Company to earn a fair return on its investment. PGS based its request on a 13-month average rate base of $2.4 billion for the projected test year ending December 31, 2024. The requested overall rate of return is 7.42 percent based on a mid-point return on equity (ROE) of 11.00 percent. The Company did not request an interim rate increase.

On December 15, 2022, PGS filed its petition in Docket No. 20220212-GU (RNG Depreciation Docket) seeking approval of a new depreciation rate and subaccount for renewable natural gas facilities leased to others. On December 28, 2022, PGS filed its petition seeking approval of the Company's 2022 Depreciation Study in Docket No. 20220219-GU (Depreciation Study Docket). On April 4, 2023, PGS filed a motion seeking to consolidate the RNG Depreciation Docket, the Depreciation Study Docket, and the rate proceeding in Docket No. 20230023-GU. By Order No. PSC-2023-0128-PCO-GU, issued April 12, 2023, the three dockets were consolidated. In Order No. PSC-2023-0157-PCO-GU, we suspended the proposed permanent increase in rates and charges.

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

In re: Petition for approval of 2021 depreciation study, by Sebring Gas System, Inc.	DOCKET NO. 20210183-GU ORDER NO. PSC-2022-0153-PAA-GU ISSUED: April 22, 2022

The following Commissioners participated in the disposition of this matter:

ANDREW GILES FAY, Chairman
ART GRAHAM
GARY F. CLARK
MIKE LA ROSA
GABRIELLA PASSIDOMO

NOTICE OF PROPOSED AGENCY ACTION
ORDER APPROVING 2021 DEPRECIATION STUDY BY SEBRING GAS SYSTEM, INC.

BY THE COMMISSION:

NOTICE is hereby given by the Florida Public Service Commission (Commission) that the action discussed herein is preliminary in nature and will become final unless a person whose interests are substantially affected files a petition for a formal proceeding, pursuant to Rule 25-22.029, Florida Administrative Code (F.A.C.).

Background

Rule 25-7.045, F.A.C., requires natural gas public utilities to file a comprehensive depreciation study with the Commission for review at least once every five years from the submission date of the previous study or pursuant to Commission order. Sebring Gas System, Inc.'s (Sebring or the Company) last depreciation study was filed on July 20, 2016. The Company's 2021 depreciation study was due to be filed on or before July 20, 2021. Sebring filed its 2021 depreciation study on November 18, 2021. However, no parties were materially impacted as a consequence of the late filing.

Sebring serves approximately 711 customers, and reported 2020 operating revenues of approximately $1,242,000.[1] We conducted a comprehensive review of Sebring's plant depreciation data filed in this docket.

We are vested with jurisdiction over these matters through several provisions of the Florida Statutes (F.S.), including Sections 350.115, 366.05, and 366.06, F.S.

[1] Sebring Gas System's Annual Report of Natural Gas Utilities Form PSC/AFA 20, at December 31, 2020, filed on May 21, 2021.

In re: Petition for approval of 2022 Depreciation Study by St. Joe Natural Gas Company, Inc.	DOCKET NO. 20230022-GU ORDER NO. PSC-2023-0215-PAA-GU ISSUED: July 26, 2023

The following Commissioners participated in the disposition of this matter:

ANDREW GILES FAY, Chairman
ART GRAHAM
GARY F. CLARK
MIKE LA ROSA
GABRIELLA PASSIDOMO

NOTICE OF PROPOSED AGENCY ACTION ORDER APPROVING 2022 DEPRECIATION STUDY BY ST. JOE NATURAL GAS COMPANY, INC.

BY THE COMMISSION:

NOTICE is hereby given by the Florida Public Service Commission that the action discussed herein is preliminary in nature and will become final unless a person whose interests are substantially affected files a petition for a formal proceeding, pursuant to Rule 25-22.029, Florida Administrative Code (F.A.C.).

Background

Rule 25-7.045(4)(a), Florida Administrative Code (F.A.C.), requires natural gas public utilities to file a comprehensive depreciation study with the Florida Public Service Commission (Commission) for review at least once every five years from the submission date of the previous study. St. Joe Natural Gas Company (St. Joe or Company) filed its 2022 Depreciation Study (2022 Study) on January 30, 2023. St. Joe's last depreciation study was filed on December 21, 2017 (2017 Study). St. Joe serves approximately 2,878 customers, and reported 2022 operating revenues of approximately $2,411,370.[1] We have completed our review of St. Joe's current 2022 Study filed in this docket.

We are vested with jurisdiction over these matters through several provisions of the Florida Statutes (F.S.), including Sections 350.115, 366.05, and 366.06, F.S.

[1] St Joe's Annual Report of Natural Gas Utilities, Form PSC/ECR 020-G, at December 31, 2022, filed with the Commission on May 30, 2023.

FPSC EXH NO 12
ADMITTED

INTERROGATORY NO. 6(a-c)

6. **Depreciation**. In response to Staff First Set of Data Requests, No. 7(d) regarding the net salvage factor of Account 3801, Plastic Services, the FCG response included the following:

> "**The retirement rates of less than 1 % are not reliable for net salvage projections**.
>
> To expect that the remaining account investment is likely to experience similar net salvage to that experienced by such historic miniscule retirements, Ms. Lee believes is not appropriate…. Thus, neither the (132)% negative net salvage experience over the 2021-2024 period nor the (398)% experience over the 2004-2024 period are considered representative of future expectations when they both relate **to such few retirements**. Ms. Lee also relied on discussions with Company personnel regarding removal cost associated with retired services (See response 7(a)). The proposed (40)% net salvage factor **is more in line with the projections of other Florida utilities than the currently prescribed net salvage factor.**" (Emphasis added).

On page 30 of FCG's PDF response to Staff First Set of Data Requests, the Company shows the Net Salvage factors for other Florida gas utilities which FCG considered. This FCG document shows Current Prescribed Net Salvage Factors for (1) Saint Joe, (2) Peoples Gas, (3) FPUC, and (4) Sebring Gas.

a. Pertaining to regulated gas customers in Florida, is it correct that Sebring Gas has approximately 1,000 customers, Saint Joe has approximately 5,000 customers, FPUC has approximately 85,000 customers, Florida City Gas has approximately 125,000 customers, and Peoples Gas has approximately 500,000 customers? If this is not a correct statement, please provide the corrected statement, including the number of regulated gas customers in Florida for each of the listed utilities, and provide the support for the corrected numbers.

FPSC EXH NO. 12
Docket No. 20250035-GU
ADMITTED

INTERROGATORY NO. 6(a-c), cont.

b. As quoted above, FCG claims the FCG actual retirement data contains "**such few retirements**" that it allegedly cannot be used. Please explain why it is allegedly reasonable to believe that information pertaining to Saint Joe and Sebring gas, which have only a tiny fraction of the number of customers that FCG has, would be sufficient to rely on in determining the FCG net salvage factors, whereas the much larger amount of data that FCG has, is allegedly "**such few retirements**" that is cannot be used.

c. Does FCG claim that the lives of the small utilities Saint Joe and Sebring Gas were based on actuarial analysis of the aged Saint Joe and Sebring Gas data? If the response is "yes," provide the support for that claim.

Company Response:

a. FCG and FPUC's consolidated natural gas division have approximately 125,000 and 100,000 customers, respectively. FCG does not have access to the customer count of other companies.

b. The fact is that the retirements are insufficient to rely on the results of any statistical analysis for service life or net salvage projections. Additionally, as noted in FCG's responses to Staff's 1st Data Request, Ms. Lee reviewed the statistical analysis performed by Gannett Fleming in Docket No. 20220069-GU and did not believe additional statistical analysis of history was necessary. To expect that embedded investment is likely to experience similar net salvage to that experienced by such historic miniscule retirements, Ms. Lee believes is not appropriate. FCG proposals are based on an interpretation of the data based on Ms. Lee's vast experience along with discussions with Company personnel.

Florida Public Service Commission General Counsel.

FPSC EXH NO. 13
ADMITTED

36% involved quality of service issues. Additionally, 16 billing complaints and 3 service quality complaints appeared to demonstrate a violation of our Rules.

- Indiantown: two complaints, both concerning quality of service issues.

- Chesapeake: 19 complaints. Of those complaints, 1 was transferred to the Company, 13 were related to billing issues, and 5 involved quality of service issues. Additionally, two billing complaints and two service quality complaints appeared to demonstrate a violation of our Rules.

- Fort Meade: one complaint concerning a billing issue. Additionally, one complaint appeared to demonstrate a violation of our Rules.

Pursuant to Rule 25-7.018, Florida Administrative Code (F.A.C.), each utility shall keep a complete record of all interruptions affecting the lesser of 10% or 500 or more of its division meters. Based on the Company's filing, there were no customer interruptions affecting either 10% or 500 meters during the historic test year. Based on a review of all witness and customer testimony and consideration of the information presented above, we find that FPUC's quality of service is adequate.

Depreciation Study

V. Depreciation Parameters

A. Parties' Arguments

FPUC argued in its brief that the appropriate depreciation parameters are those presented in Revised Exhibit PSL-2 to the direct testimony of FPUC witness Lee. Further, the Company stated the depreciation study was conducted in accordance with Rule 25-7.045, F.A.C. (the Depreciation Rule). In keeping with the Depreciation Rule, FPUC explained that witness Lee proposed several changes to certain account life and salvage parameters. These proposed changes in depreciation parameters result in a reduction in depreciation expense of approximately $1.5 million, based on estimated investments and reserves as of January 1, 2023.

The Company also supported witness Lee's reliance on life characteristics for similar plant of other Florida gas companies to make a complete analysis. Witness Lee explained that retirement rates for FPUC averaged less than one percent since the last depreciation study for many accounts, which provided insufficient data to perform any meaningful statistical analyses for life characteristics, which led her to rely on life characteristics for similar plant of other Florida gas companies to make a complete analysis. The Company argued that this is a common and accepted industry practice.

FPUC argued in support of witness Lee's approach for conducting the Depreciation Study. Witness Lee conducted the Depreciation Study with the same approach as the Company's previous studies. This approach did not include statistical analysis in order to produce Iowa

FPSC EXH NO. 13
ADMITTED

Witness Lee does not believe that the three companies in witness Garrett's proxy group from outside of Florida are similar to Florida companies for determining life expectancies. She points out that witness Garrett does not provide any analysis which shows that his out-of-state companies are similar enough to FPUC for comparison purposes. In particular, she points to Florida's meteorological conditions (e.g. hurricane incidence) and subsurface conditions (e.g. karst geology, saltwater intrusion, and corrosion). As witness Lee testifies, the range of ASLs for companies operating in Florida has historically been used by us to test the reasonableness of proposed ASLs.

Witness Lee further explains that the regulatory environment these out-of-state companies operate in could also be different than that of Florida's. These regulatory practices could have an effect on maintenance, retirements, and expensing/capitalization practices. For these reasons, she argued that using companies that operate inside of Florida is more appropriate for comparison purposes. She continues by stating that all of these differences warrant a recommendation of shorter lives than witness Garrett's out-of-state companies. This is evidenced by the approved lives of the two Florida companies in witness Garrett's proxy group that are based on large amounts of company-specific data and statistical analysis.

Witness Lee also testified that the customer sizes of witness Garrett's out-of-state proxy companies make them poor proxies for FPUC. She points out that Liberty has approximately 60,000, NIPSCO has approximately 821,000, and Piedmont Natural Gas has 157,000 customers, while FPUC has approximately 108,000. Witness Lee stated that, "The operational characteristics and demand on assets between these different sized companies can create different accounting and operation process dynamics for each company." Witness Garrett did not provide any analysis showing that his proxy group was comparable to Florida-based utilities.

Based on the foregoing, along with consideration of our practice of using Florida-based companies for comparison purposes,[11] we are persuaded that witness Lee's proxy group is more appropriate for establishing the ASLs for FPUC's assets. We find that both the operating conditions and the regulatory environment in which Florida-based gas companies operate make them more suitable for estimating the depreciation parameters in this case.

Account 378 – M&R - General

The currently-approved ASL for this account is 31 years. Witness Lee proposed increasing the ASL for this account to 40 years. Witness Garrett proposed extending it to 46 years. We find that a 40-year ASL is reasonable because witness Lee's use of a Florida-based proxy group mimics the conditions (meteorological, subsurface, regulatory) more likely to

INTERROGATORY NO. 23(a-f)

23. With regard to the following items, please answer (a.) – (f.):

Regarding Account 3801: Services – Plastic, Composite Exhibit PSL-2 (Narrative), page 15 states the following:

"FCG has a program to replace mains and services running through less assessable parts of customer property (e.g., backyards) with mains and services located in more accessible areas."

(a.) In what year did FCG first replace "mains and services running through less assessable parts of customer property (e.g., backyards) with mains and services located in more accessible areas"?

(b.) Please state "yes" or "no" whether it is correct that the majority of the "mains and services running through less assessable parts of customer property (e.g., backyards)" which were replaced were **steel** mains and service lines? If your response is "no," then please provide the corrected statement and the support for the corrected statement.

(c.) Please state "yes" or "no" whether it is correct that when FCG replaced the "mains and services running through less assessable parts of customer prope1iy (e.g., backyards) with mains and services located in more accessible areas" the majority of the "mains and services located in more accessible areas" were **plastic** mains and services? If your response is "no," then please provide the corrected statement and the support for the corrected statement.

(d.) Please state separately for each of the years 2024, 2023, 2022, and 2021 how many **plastic** service lines FCG retired (for any reason)?

INTERROGATORY NO. 23(a-f)

(e.) Please state separately for each of the years 2024, 2023, 2022, and 2021 how many service lines **which were plastic** and **were in "less assessable parts** of customer property (e.g., backyards)" FCG retired and replaced with "services located in more accessible areas"?

(f.) How many **plastic** service lines did FCG have in service at the end of the year 2024?

Company Response:

a. In 2015, FCG first replaced mains and services running through less accessible parts of customer property with those located in more accessible areas. For clarification, the use of the word "assessable" in the testimony was an inadvertent, typographical error.

b. Yes.

c. Yes, but to be clear, the relocated facilities were not constructed of Orange Pipe plastic, which is subject to expedited replacement under the Company's SAFE plan.

d. FCG is unable to provide information with that level of specificity for the 2021 to 2023 period as the Company was not owned by Chesapeake and no historical data was loaded into Chesapeake's PowerPlan system for any period. During the acquisition, FCG loaded assets for ongoing projects as of December 2023. Based on FCG's records, there were 204 plastic services retired in 2024. FCG does have the information utilized for the SAFE docket, which is attached hereto as ROG 23 – SAFE.

e. FCG is unable to provide information with that level of specificity for 2021 to 2023 period as the Company was not owned by Chesapeake and no historical data was loaded into its PowerPlan system for any period. During the acquisition, FCG loaded assets for ongoing projects as of December 2023. Based on the records provided, there were no plastic services retired in 2024. FCG does have the information utilized for the SAFE docket, which is attached hereto as ROG 23 – SAFE.

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

In re: Petition for Approval of Florida City Gas's 2025 Depreciation Study and for Approval to Amortize Reserve Imbalance.	) Docket No.: 20250035-GU)) Filed: August 20, 2025)

FLORIDA CITY GAS'S RESPONSES AND OBJECTIONS TO CITIZEN'S SECOND SET OF INTERROGATORIES (4-16) AND SECOND REQUESTS FOR PRODUCTION OF DOCUMENTS (NOS. 6-11)

Florida City Gas ("FCG" or "Company") hereby submits its Responses and Objections to Citizen's Second Set of Interrogatories (Nos. 4-16) and Second Request for Production of Documents (Nos. 6-11) served on the Company on July 21, 2025, by the Office of Public Counsel ("OPC").

Respectfully submitted this 20th day of August, 2025.

FPSC EXH NO. 18
Docket No. 20250035-GU
ADMITTED

C3-569

INTERROGATORY NO. 13(a-b)

13. **Depreciation.**

a. Does FCG agree that the change in depreciation rates that was proposed in Florida City Gas in Docket No. 20220069-GU was part of a petition for a base rate increase, which means that the change in the depreciation rates which would be booked would be effective at approximately the same time that the revised prices/tariffs charged to ratepayers would be effective? If this is not a correct statement, please provide the corrected statement and the support for the corrected statement.

b. Does FCG agree that the change in depreciation rates proposed by Florida City Gas in the current proceeding is not part of a petition for a base rate increase, and if accepted, no change to the prices/tariffs charged to ratepayers would be effective at approximately the same time changes to the depreciation rates to be booked would be effective? If this is not a correct statement, please provide the corrected statement and the support for the corrected statement.

Company Response:

a. FCG agrees that, as part of its petition for a base rate increase in Docket No 20220069-GU, an implementation date for revised depreciation rates was requested effective with the date of FCG's new revenue rates. However, FCG's plant and reserve balances were submitted as of December 31, 2022, matching an implementation date for revised depreciation rates of January 1, 2023. PSC Order No. PSC-2023-0177-FOF-GU, page 17, approved a January 1, 2023 effective date for revised depreciation rates comporting with Rule 7.045(4)(d), F.A.C.

FPSC EXH NO. 18
Docket No. 20250035-GU
ADMITTED

INTERROGATORY NO. 13(a-b), cont.

b. Correct. Revised depreciation rates approved in the instant depreciation study, assuming a January 1, 2025 effective date as proposed, will not affect current prices/tariffs charged to ratepayers whether that change results in an increase or a decrease in depreciation expenses. Rule 25-7.045 (4), F.A.C., requires utilities to file depreciation studies at least once every five years. The Rule does not preclude a utility from filing a depreciation study sooner than five years. Moreover, the requirement does not contemplate that a rate case be filed in conjunction with the depreciation study. However, if a utility proposes an effective date for revised depreciation rates coinciding with an expected date of new revenue rates, the depreciation study is required to be filed no later than the filing of the rate case Minimum Filing Requirements.

These curve types have also been presented in subsequent Experiment Station bulletins and in the text, "Engineering Valuation and Depreciation."[1] In 1957, Frank V. B. Couch, Jr., an Iowa State College graduate student, submitted a thesis presenting his development of the fourth family consisting of the four O type survivor curves.

Retirement Rate Method of Analysis

The retirement rate method is an actuarial method of deriving survivor curves using the average rates at which property of each age group is retired. The method relates to property groups for which aged accounting experience is available and is the method used to develop the original stub survivor curves in this study. The method (also known as the annual rate method) is illustrated through the use of an example in the following text and is also explained in several publications including "Statistical Analyses of Industrial Property Retirements,"[2] "Engineering Valuation and Depreciation,"[3] and "Depreciation Systems."[4]

The average rate of retirement used in the calculation of the percent surviving for the survivor curve (life table) requires two sets of data: first, the property retired during a period of observation, identified by the property's age at retirement; and second, the property exposed to retirement at the beginning of the age intervals during the same period. The period of observation is referred to as the experience band. The band of years which represent the installation dates of the property exposed to retirement during the experience band is referred to as the placement band. An example of the calculations used in the development of a life table follows. The example includes schedules of annual aged property transactions, a schedule of plant exposed to retirement, a life table and illustrations of smoothing the stub survivor curve.

accounts for which the survivor curve provided an indication of service life are set forth in the table below.

ACCOUNT		SURVIVOR CURVE
DISTRIBUTION PLANT		
375	Structures and Improvements	35-R4
376.1	Mains - Steel	65-R4
376.2	Mains - Plastic	65-R4
378	Measuring and Regulating Station Equipment - General	35-S3
379	Measuring and Regulating Station Equipment - City Gate	35-S3
380.1	Services - Steel	50-R2.5
380.2	Services - Plastic	50-R2.5
381	Meters	20-S2.5
381.1	Meters - ERT	20-S2.5
382	Meter Installations	35-R3
382.1	Meter Installations - ERT	20-R1.5
383	House Regulators	40-R2.5
384	House Regulator Installations	40-R2.5
385	Industrial Measuring and Regulating Station Equipment	35-S3
387	Other Equipment	35-R3
GENERAL PLANT		
390	Structures and Improvements	30-S0.5
392	Transportation Equipment	10-L2.5
392.1	Transportation Equipment - Autos and Light Trucks	9-S2
392.2	Transportation Equipment - Service Trucks	10-L3
392.3	Transportation Equipment - Heavy Trucks	13-L3
394.1	Natural Gas Vehicle Equipment	20-S4
396	Power Operated Equipment	15-L2.5

The statistical support for the service life estimates is presented in the section beginning on page VII-2. A narrative discussion of the considerations for each service life estimate for distribution and general plant accounts is provided in the section beginning on page X-3.

FLORIDA CITY GAS

ACCOUNT 376.1: MAINS – STEEL

This account includes the cost of gas distribution steel mains.

GENERAL INFORMATION:

FCG has both plastic and steel mains. Plastic mains are used for pressures of 60 Pounds per Square Inch ("PSI") and below. Steel mains are generally coated and cathodically protected. The Company has a program to replace mains running through less accessible parts of customer property (e.g., backyards) with mains located in more accessible areas. Retirements also occur due to identified risk factors (such as service connections, shallow pipe or poor lining) as well as external factors such as damage or customer requested relocations.

Mains are typically retired in place. However, there are costs to retire due to the need to excavate, cut, cap and purge gas from the retired pipe.

SERVICE LIFE ANALYSIS:

Discussion: Account 376.1, Mains – Steel and Account 376.2, Mains – Plastic, were analyzed together and are expected to have relatively similar life characteristics. The currently approved survivor curve for both accounts is the 55-S3, which is the same estimate as proposed in the 2017 Depreciation Study. The statistical analysis indicates a longer life and somewhat higher mode curve than the approved curve. The best fitting R4 curve has a longer service life than 55 years (around 65 years). The 65-R4 is a reasonable fit of the historical data.

Recommendation: The recommendation is to use a 65-R4 survivor curve.

NET SALVAGE ANALYSIS:

Discussion: The currently approved net salvage estimate is (50) percent. The overall average net salvage is (222) percent and the most recent five-year average is (199) percent. The historical data supports a more negative net salvage estimate.

Recommendation: The recommendation is to use (75) percent net salvage, which is a gradual change when compared to the historical data.

Excerpt of Additions Reconciliation Schedule (CPR to ASR Filing) from Response OPC POD 2-11 Schs F-G - FCG Plant Adds & Rets 2021-2023 (from FPL)
Additions & Retirements Summary Tab

Note:
FPL provided CHPK with FCG's CPR listing of Investments and Retirements as of November 2023. This schedule reconciles the CPR balances to FPL's ASR for years 2021-2023. The reconciliation was performed at a high level, so to determine the accounts adjusted for this Study, The ASR balance was compared to the CPR balances. The Adjustments are noted as FPL's correcting/reconciling adjustments.

Excerpt of Additions Reconciliation Schedule (CPR to ASR Filing) from Response OPC POD 2-11 Schs F-G - FCG Plant Adds & Rets 2021-2023 (from FPL)
Additions & Retirements Summary Tab

Note:
FPL provided CHPK with FCG's CPR listing of Investments and Retirements as of November 2023. This schedule reconciles the CPR balances to FPL's ASR for years 2021-2023. The reconciliation was performed at a high level, so to determine the accounts adjusted for this Study, The ASR balance was compared to the CPR balances. The Adjustments are noted as FPL's correcting/reconciling adjustments.

OPC ROG 3-18
Combined Plant Summary for 2023

Created by CHPK to file 2023 ASR. Includes FPL's balance through November 2023 and CHPK's balances for December 2023. Notes reconciling differences between FPL's ending Balance at Nov 2023 and CHPK's Acquisition Balances
Reclass between CWIP & plant during acquisition were used to reconcile to Sch G 2023 balances.

*from NextEra support folder - FCG 22-24 FKA 13-14 Annual Report - Analysis of Plant in Service Nov 2023_Revised

Excerpt of Additions Reconciliation Schedule (CPR to ASR Filing) from Response OPC POD 2-11 Schs F-G - FCG Plant Adds & Rets 2021-2023 (from FPL)
Additions & Retirements Summary Tab
Data as of November 2023

Note:
FPL provided CHPK with FCG's CPR listing of Investments and Retirements as of November 2023. This schedule reconciles the CPR balances to FPL's ASR for years 2021-2023. The reconciliation was performed at a high level, so to determine the accounts adjusted for this Study, The ASR balance was compared to the CPR balances. The Adjustments are noted as FPL's correcting/reconciling adjustments.

Combined Plant Summary for 2023

Created by CHPK to file 2023 ASR. Includes FPL's balance through November 2023 and CHPK's balances for December 2023. Notes reconciling differences between FPL's ending Balance at Nov 2023 and CHPK's Acquisition Balances
Reclass between CWIP & plant during acquisition were used to reconcile to Sch G 2023 balances.

Docket No. 20250035-GU
FCG's Response to Staff ROG 2-26
Exhibit PSL-6, Page 1 of 4

INTERROGATORY NO. 26

26. Please refer to FCG's 2025 Depreciation Study page 6. Here the Company writes "[t]here are numerous cases where the Commission has approved amortization of reserve imbalances over a period shorter than the remaining life." Please provide examples of this amortization where the reserve surplus was used to reduce depreciation expense in support of company earnings rather than flowed directly to, or recovered from, customers. Please limit this response to identifying only instances where the relative issues in the docket were not part of a settlement.

[Staff's First Data Request, filed April 10, 2025, Question No. 24]

Company Response:

FCG objects to this request to the extent that it is vague, unclear, and seeks examples otherwise not linked to the statement referenced. Moreover, the limitations contained therein are interposed for the apparent improper purpose of restricting the number of examples such that it would appear there are not "numerous cases" that support the statement, which in fact, there are. Notwithstanding and without waiving this objection, FCG states that, in depreciation studies not accompanied with a rate case proceeding, the resultant expenses of revised depreciation rates, either increases or decreases, have an effect on earnings.

For correction of reserve imbalances over a shorter period than the remaining life please see Order PSC-2019-0433-PAA-GU, issued October 22, 2019 In re: Petition for approval of 2019 consolidated depreciation study by Florida Public Utilities Company, Florida

Public Utilities Company-Indiantown Division, Florida Public Utilities Company-Fort Meade, and Florida Division of Chesapeake Utilities Corporation, page 3. In that case, FPUC adaptation of vintage year accounting for amortizable general plant accounts amounted in ($1.4M) reserve imbalance. The commission authorized a 5-year amortization to bring these accounts to their theoretically correct reserve levels.

Also, Order No. 010699-EI, issued November 19, 2001, In re: Request for approval of implementation date of January 1, 2002, for new depreciation rates for Marianna Electric Division by Florida Public Utilities Company. The Commission stated its policy to recover imbalances "as fast possible, unless such recovery prevents the Company from earning a fair and reasonable return on its investments."

Additionally, see Order No. PSC-10-0131-FOF-EI, issued March 5, 2010, in Docket No. 090079-EI In re: Petition for increase in rates by Progress Energy Florida, Inc.; Docket No. 090144-EI, In re: Petition for limited proceeding to include Bartow repowering project in base rates, by Progress Energy Florida, Inc.; and Docket No. 090145-EI, In re: Petition for expedited approval of the deferral of pension expenses, authorization to charge storm hardening expenses to the storm damage reserve, and variance from or waiver of Rule 25-6.0143(I)(c), (d), and (f), F.A.C., by Progress Energy Florida, Inc, pp. 45-52.

INTERROGATORY NO. 26, cont.

Light Company, at page 87. The Commission determined that the reserve surplus should be amortized over 4 years.

By Order 19438, issued June 6, 1988, in Docket No. 80868-EI, In re: Request of Tampa Electric Company for a Change in its Depreciation Rates Effective January 1, 1988, where the Commission approved that tax credits associated with the interest synchronization of investment tax credits be applied to decrease the unrecovered cost associated with equipment planned for retirement and amortized over a two-year period. Prospectively, the annual true-up amount would be booked to a non-account specific account and allocated to specific accounts at the time of the next depreciation study. Further, the Commission approved that the reserve remaining from the retirement of certain capacitors be transferred to the reserve associated with transformers slated for near-term retirement.

By Order 18736, issued January 26, 1988, in Docket No. 871269-TL, In re: Request of United Telephone Company of Florida for Acceleration of Amortization Schedules, the Commission approved a one-time charge to depreciation in the amount needed to recover the imbalance associated with certain central office equipment with a remainder of the requested amount to be recorded in a nonspecific reserve account and allocated to specific accounts in the next depreciation study. The Commission found that these actions "comply with our policies of correcting reserve imbalances as rapidly as possible and of accelerating the write-off of plant identified for retirement earlier than projected when these goals can be achieved without adversely affective rates."

FPSC EXH NO. 25
ADMITTED

INTERROGATORY NO. 26, cont.

By Order 15798, issued November 1986, In re; Implementing Interest Synchronization Refunds Through Depreciation Revenue Adjustments, the Commission determined that monies subject to refund plus interest related to the interest synchronization of investment tax credits be recorded as a one-time jurisdictional adjustment to the depreciation reserve and made account specific at the next depreciation study. Further, on-going monthly jurisdictional adjustments would be booked to the deprecation reserve in the same manner. By Order PSC-97-1609-FOF_EI Florida Public Utilities Company's Marianna Division was authorized to amortize the net gain associated with the sale of *a* warehouse and associated land over a period of five years. A portion of the sale proceeds to be recorded as gross salvage against the retirement of the warehouse building. The net gain from the sale of a hydro plant was approved to be amortized over four years. Order PSC-98-0451-FOF-EI revised the amortization period for the net gain on the hydro plant to five years.

By Order PSC-2002-1159-PAA-GU approve the application of a portion of the net proceeds from the sale of FPUC's office and warehouse building to the unrecovered cost of the building. The net gain was then amortized over five years.

Further, reserve transfers between accounts, a long-standing Commission-approved practice, are tantamount to amortization of the respective account reserve imbalances over a period shorter than the average remaining life.

INTERROGATORY NO. 1 (a-c)

INTERROGATORIES

1. On page 5 lines 6-10 of his Direct Testimony, FCG witness Everngam testified that:

> "[i]t was also important to proceed with this depreciation study to ensure that recent capital investments for new construction by FCG, which has taken place under its new ownership by CUC, are accurately depreciated based upon updated lives and salvage values that align with those of FPUC and other, similarly-situated CUC affiliates."

Please provide the following:

a. Please specify the account number and its description of each depreciation account which is affected by the "recent capital investments for new construction by FCG, which has taken place under its new ownership by CUC."

b. Please identify the dollar amount of the "recent capital investments" plant addition for each depreciation account discussed in FCG's response to Question 1.(a).

c. For each account discussed in response to Question 1.(a), please provide a comparison of the existing depreciation parameters (average service life and net salvage percentage) and the "updated lives and salvage values" that were referred to by witness Everngam.

Company Response:

a. See attachment Staff ROG 1-1 for the list of capital investments per account number and its description of each depreciation account after the acquisition of FCG by CUC.

b. See attachment Staff ROG 1-1, column J.

c. See attachment Staff ROG 1-1, columns C to F.

INTERROGATORY NO. 2 (a-d)

2. On page 6 lines 10-12 of his Direct Testimony, FCG witness Everngam testified that:

> For instance, any amortization of the excess reserve included in the Company's historic test year in its next base rate case would put downward pressure on interim rates resulting from the amortization.

a. Please define the meaning of "amortization of the excess reserve included in the Company's historic test year in its next base rate case."

b. Please explain how the "excess reserve included in the Company's historic test year in its next base rate case" would be amortized.

c. Has FCG determined its "historic test year in its next case?" If so, please identify the year. If not, explain how the Company has determined that an "excess reserve" will exist in an unknown future year.

d. Please explain what is meant by "put[ting] downward pressure on interim rates resulting from the amortization

Company Response:

a. If the Company's proposal for the amortization of excess reserve was approved, then the amortization will be over two years beginning January 1, 2025 and finishing December 2026. If the Company files a rate case utilizing one of those two years (2025 or 2026) as its historic test year then, the annual amortization of the excess reserve will be a reduction in the overall annual depreciation expense included in the Company's historic test year.

FPSC EXH NO. 26
ADMITTED

INTERROGATORY NO. 2 (a-d), cont.

b. See response to a.

c. As evidenced by the Company's most recently filed twelve months ended June 2025 earnings surveillance report and its 2025 forecasted earnings surveillance report, FCG's earnings currently fall below the minimum range of its approved ROE band. Therefore, while the Company has not definitively determined its "historic test year in its next case" it is likely to be needed in the near future. If the Company files a rate case in 2026, the historic test year would likely be 2025. If the Company files a rate case in 2027, the historic test year would likely be 2026. Under the Company's proposal, a 2-year amortization would be captured in either of those historic test years.

d. Amortization of the excess reserve would reduce overall depreciation expense, thereby reducing the amount of under-earnings the Company would experience in a historic test year of either 2025 or 2026. Since interim rates are set based on the Company's under-earnings in the historic test year, the impact of the 2-year amortization of the excess reserve would result in a lower revenue requirement for interim rates.

Respondent: Matthew Everngam

INTERROGATORY NO. 3 (a-c)

3. Please refer to witness Everngam's Direct Testimony, page 6 lines 12-15. With respect to FCG's current depreciation study and proposed 2-year amortization of the reserve imbalance, the witness testified that:

> any depreciation expense reduction, consistent with that reflected in FCG's study, would put downward pressure on both interim and final rates in the next rate case. Current FCG customers would benefit in both instances.

a. Please specify how a 2-year amortization of the reserve imbalance, starting January 1, 2025, as FCG requested in its current depreciation study, "would put downward pressure on interim rates in the next rate case" and benefit current FCG customers.

b. Please specify how a 2-year amortization of the reserve imbalance, starting January 1, 2025, as FGG requested in its current depreciation study, "would put downward pressure on final rates in the next rate case" and benefit current FCG customers.

c. Please refer to FCG's response to Staff's Second Data Request of June 11, 2025, No. 15, where FCG stated:

> Correction of the reserve imbalance over the proposed 2-year period compared to correction through the remaining life rate design, would result in an increase rate base and depreciation expenses in FCG's next rate case proceeding. In a vacuum, this would increase customer rates.

FPSC EXH NO. 26
ADMITTED

INTERROGATORY NO. 3 (a-c), cont.

Witness Everngam's testimony appears to contradict FCG's Data Request Response. Please explain.

Company Response:

a. Please see the Company's response to ROG question #2.

b. Witness Everngam's statement with regard to putting "downward pressure on interim ***and final*** rates in the next rate case" was related to a reduction in current deprecation expenses stemming from the lives and resulting depreciation rates proposed in the depreciation study. Not including the amortization of the reserve surplus, these proposed lives and rates lead to a reduction in depreciation expense of approximately $1 million compared to existing depreciation rates based on January 1, 2025 investments. This reduction, if approved as of January 1, 2025 as the Company has requested, would reduce interim rates and final rates.

c. There is no contradiction. Staff's Second Data Request No. 15 asked about a hypothetical scenario that focused solely on amortization of the surplus in a vacuum without accounting for the changes in depreciation expense. In contrast, Mr. Everngam's testimony addressed the impact of the amortization of the surplus on interim rates and the impact of reduced depreciation expense on rates. The new study results in lower depreciation rates and thus a reduction in the depreciation expense included in final rates.

FCG's Response to Staff's 2nd ROGs, Nos. 4-46

INTERROGATORY NO. 4 (a-c)

INTERROGATORIES

4. Please refer to page 2 of Florida City Gas's Response In Opposition To Citizen's Motion To Hold Proceedings In Abeyance (Abeyance Response). Referring to Florida City Gas's (FCG) 2025 Depreciation Study, filed February 24, 2025 (2025 Depreciation Study), FCG states, "The depreciation expert responsible for this Study has made the appropriate adjustments to accounts and service lives consistent with depreciation studies submitted for other entities under the Chesapeake Utilities Corporation corporate umbrella, both here in Florida and in other states."

   a. Please identify the depreciation expert referenced who prepared FCG's 2025 Depreciation Study. Please also include the depreciation experts' previous work experience preparing gas utility depreciation studies.

   b. Please list all entities under the Chesapeake umbrella that were utilized to develop the adjustments to accounts and service lives in FCG's 2025 Depreciation Study.

   c. Explain what is meant in this FCG statement by "consistent" and "appropriate" adjustments to accounts and service lives between the FCG study in this case and depreciation studies performed for other Chesapeake entities.

   [Staff's First Data Request, filed April 10, 2025, Question No. 1]

Company Response:

a. The depreciation expert who prepared FCG's 2025 Study is Patricia Lee. Her Curriculum Vitae and List of Utility Proceedings in which she participated has been filed in this Docket on October 3, 2025, as her Exhibit PSL-1.

b. For all account activity adjustments, only FCG records were used as detailed in the depreciation study workbook. As discussed on page 21 of the 2025 Depreciation Study,

INTERROGATORY NO. 4 (a-c), cont.

CUC is seeking to adopt uniform amortization periods for amortizable general plant accounts across all business units. These are based on judgement and have been approved by the respective state regulatory commissions in the most recent depreciation studies for CUC Florida Public Utilities Company's consolidated natural gas divisions, CUC-Maryland, and CUC-Delaware. For all other accounts, the analysis began with the average service life and curve shape underlying the currently approved average remaining life. A review of the retirement data since that time, discussions with Company personnel, judgement, as well as consideration of the average service lives of other Florida gas companies were considered in determining whether the existing life/curve shape needs adjusting.

c. In conducting the 2025 depreciation rate review, CUC utilized the same methodology previously applied to FPUC-Natural Gas depreciation studies, which encompasses a review of the books, asking operational and accounting questions, and adjusting the specific entity's data as necessary. Additionally, given that FCG has a similar operating and regulatory environment as other Florida gas utilities, comparisons of the average service lives underlying the currently Commission approved average remaining lives and net salvage factors are considered. The proposed average remaining lives for each account are based on the average age of FCG's assets and curve shapes that are indicative of the expected retirement pattern.

Respondent: Patricia Lee

FPSC EXH NO 27
ADMITTED

INTERROGATORY NO. 5 (a-c)

5. FCG's 2025 Depreciation Study Narrative, at Page 3, states, "The retirement rate for many FCG accounts is minimal, rendering statistical analysis results meaningless for life or salvage projections. These factors make it necessary to rely on prescribed life and salvage factors of other gas companies." FCG's most recent base rate case (Dkt. 20220069-GU), Gannett Fleming Valuation and Rate Consultants, LLC prepared a depreciation study (2022 Depreciation Study) for FCG's gas plant as of December 31, 2022 using FCG's own assets, based on recorded plant transactions from 2005 through 2020 (witness Allis direct testimony, page 14, lines 21-22).

   a. Please refer to FCG's 2022 Depreciation Study, Exhibit NWA-1, pages 52-104, which contains retirement data and statistics used to determine average service lives and Iowa curve shapes for each account. Similarly, did FCG consider placement/experience bands in its 2025 Depreciation Study to determine the appropriate Iowa Curve for the accounts with low retirements? If not, please explain why not.

   b. In FCG's 2022 Depreciation Study, Exhibit NWA-1, page 15, FCG witness Allis stated that FCG maintains aged accounting data allowing use of the retirement rate method. Please identify the reasons witness Allis could perform the statistical life analysis with existing retirement rates using FCG's own assets in the Company's 2022 Depreciation Study but FCG states it cannot do so now in the instant case. Please provide examples.

   c. Please explain why FCG elected not to perform its life analysis for all accounts based on the retirement activity of FCG's own assets in the instant case given that FCG maintains aged accounting data. **[Staff's First Data Request, filed April 10, 2025, Question No. 2]**

INTERROGATORY NO. 5 (a-c), cont.

Company Response:

a. FCG objects to this request to the extent that it is misleading, because the service lives approved by the Commission in Docket No. 20220069-GU are not those reflected in Mr. Allis's NWA-1. Notwithstanding the objection, and without waiving, FCG states as follows:

FCG did not consider placement/experience bands for curve shape consideration. Ms. Lee reviewed the average service life/curve shape combination underlying the currently prescribed average remaining life for each account along with account activity since the last study as well as company input, and, based upon her extensive experience in this field, Ms. Lee determined there is a need to revise life projections.

b. FCG objects to this request in that it makes an assumption that is not accurate. Notwithstanding and without waiving this objection, FCG states that Ms. Lee did not state statistical analysis could not be performed with existing mortality and salvage data. In addition to the company's data, determining the average service life and net salvage of assets also requires judgment and an understanding of FCG's operations and capital planning. Rule 25-7.045(5), F.A.C details the required information for a depreciation study and does not mandate any specific method to project life and salvage factors.

c. FCG objects to this request to the extent that it includes an inaccurate and misleading assumption. Notwithstanding and without waiving this objection, Ms. Lee did base her life

FPSC EXH NO 27
ADMITTED

and salvage proposals on FCG's own assets. All schedules in the FCG depreciation study workbook are based on FCG's assets as of December 31, 2024. Statistical analyses will only, at best, indicate how the plant has lived in the past. In estimating future forward looking lives, historical indications must be tempered with future life projections based on Company input as well as other company views. The 2025 Depreciation Study reflects actual plant and reserve activity through 2024. Ms. Lee did review the statistical analyses provided in the 2022 Gannett Fleming Depreciation Study, which is available on the Commission's website, and did not believe conducting additional statistical analysis of history was necessary. The 2025 Depreciation Study does, however, provide historical as well as recent retirement rates for each account.

Respondent: Patricia Lee

INTERROGATORY NO. 6

6. Please refer to Florida PSC Rule 25-7.045, subsection 5(h), which states:

"The mortality and salvage data used by the company in the depreciation rate design must agree with activity booked by the utility."

Please explain whether FCG believes that this rule requires FCG's calculation of its proposed average service lives and net salvage for all accounts to be based upon activity booked by the utility, including retirements, and whether the utility's 2025 Depreciation Study is in compliance with the rule. As an example, please show how Account 3762-Mains-Steel complies with the rule.

[Staff's First Data Request, filed April 10, 2025, Question No. 3]

Company Response:

FCG objects to this request to the extent that it does not provide the full language of the referenced rule and therefore, as posed, is misleading. Notwithstanding this objection and without waiving, FCG provides as follows. Rule 25-7.045, 5(h), also states that "Unusual transactions not included in life or salvage studies, e.g., sales or extraordinary retirements, must be specifically enumerated and explained."

FCG's life and salvage proposals do comply with Florida PSC Rule 25-7.045, subsection 5(h). Please refer to the Account Analysis and Proposals section of the 2025 Depreciation Study Narrative for each account as well as the study workbook schedules contained in amended Exhibit PSL-2. The updated exhibit includes all changes made as the result of responding to OPC's Third set of Interrogatories and other miscellaneous

corrections as noted in the amended testimony of Witness Lee. All data contained in the workbook schedules are FCG-specific and is the basis of the 2025 Study. The starting point for this study is the currently prescribed life and salvage factors from the 2022 proceeding.

FCG refers to pages 12 and 13 of the 2025 Study Narrative, amended Exhibit PSL-2, for specifics with respect to the proposed life and salvage proposals for Account 3762: Mains-Steel. The average service life underlying the current Commission-prescribed average remaining life is 65 years with an R1.5 curve shape. This is the starting point of the review. The retirement rate for the 2004-2024 period averaged 0.26% with the most recent 2021-2024 period averaging 0.49%. Retirement activity averaging less than 1% means that statistical analysis results are meaningless making reliance on the life and salvage expectations of other Florida gas utilities necessary. While historical retirements have been miniscule, recent years indicate an increase. Recognizing future expectations of retiring early vintage orange pipe due to safety concerns as well as FCG's program to replace mains running through less accessible parts of customer property with mains located in more accessible areas, the scant retirement data is, however, indicative of a higher mode curve. The average age of FCG's plant for steel mains is 21.7 years. The 65-year R1.5 life table underlying the currently prescribed average remaining life, indicates survivors at age 21.7 years of 91.969%. On the other hand, the proposed 65-year R2.5 life table indicates 96.2388% surviving at age 21.7 years. The R2.5 curve shape is more indicative of the expected pattern of retirements for steel mains. The age of FCG's plant as of December 31, 2024, taken with an average service life based on history,

FPSC EXH NO 27
ADMITTED

INTERROGATORY NO. 6, cont.

Company input, and expectations of other Florida companies and a curve shape that depicts how the plant is expected to live, results in the average remaining life proposed. Life tables for R1.5/65 years and R2.5/65 year are included in attachment PSC ROG 2-6 Life Tables.

FPSC EXH NO 27
ADMITTED

INTERROGATORY NO. 7

7. In FCG's 2025 Depreciation Study Narrative, Page 1, FCG states, "Depreciation rates should be revised when the need arises. A review of the January 1, 2025 plant investments, reserve, and account activity data indicate there is a need to revise rates now." Please elaborate on what was discovered in FCG's review of plant investment, reserve, and account activity that necessitated the need for revised rates.

[Staff's First Data Request, filed April 10, 2025, Question No. 4]

Company Response:

In 2022, when the last depreciation review was conducted, FCG was owned by FPL. The 2023 purchase of FCG by Chesapeake is a major change since the last case. Investment has grown 14% since the last depreciation review with the reserve decreasing 3%. Moreover, FCG is now operating in a different corporate environment, using the same operational and accounting procedures as other Chesapeake business units. As one would expect, the capital strategy going forward has also changed since the Company's acquisition by Chesapeake, which renders certain aspects of the prior study moot.

Respondent: Patricia Lee

INTERROGATORY NO. 8

8. Please refer to FCG's 2025 Depreciation Study Narrative, Page 12, Account 3761: Mains – Plastic. FCG proposes a (30)% net salvage factor in the instant case, an increase from the currently approved (33)% net salvage factor. FCG states the 2004-2024 average net salvage factor for the account is (70)%, while the most recent 2021-2024 period averaged (30)%. In FCG's 2022 Depreciation Study, FCG witness Allis recommended a (60)% net salvage factor for the account (Exhibit NWA-1, Page 157 of 179). Please explain the reason(s) why FCG elected to give more credence to the short-term net salvage trend ((30)%) verses the longer term trend ((70)%) and the previous recommendation of witness Allis ((60)%).

[Staff's First Data Request, filed April 10, 2025, Question No. 5]

Company Response:

FCG objects to this interrogatory to the extent it relies upon and restates recommendations that were not approved by the Commission and are not supported by a witness in this proceeding. Notwithstanding this objection and without waiving, FCG states as follows:

In Order No. 2023-0177-FOF-GU, the Commission ultimately approved a net salvage factor of (33)%. Moreover, it is evident from his recommendation that he also found that historical retirements and net salvage experience of more than negative 100% were not reliable for future expectations. Page 12 of the 2025 Depreciation Study Narrative, amended Exhibit PSL-2, discusses that Plastic Mains have experienced a retirement rate averaging less than 1% for the recent 2021-2024 period, as well as for the historical 2004-2024 period. As also noted for the life discussion, such retirement data is insufficient to rely on in making future salvage projections. Based on comparisons to other gas utilities in Florida, Ms. Lee believes it is unreasonable to expect that the remaining account

INTERROGATORY NO. 8, cont.

investment is likely to experience similar net salvage consistent with such historic miniscule retirements. Other gas utilities in Florida have Commission-approved net salvage factors ranging from (25)% to (30)%, averaging (31)%. Witness Allis' 2022 proposed (60)% net salvage is outside this range of reasonableness as evidenced by the Commission approved net salvage of (33)%. Additionally, as shown on Sch Q of the 2025 amended Study Workbook, negative net salvage is trending less negative. Statements in Mr. Allis's Exhibit NWA-1, at page 157, indicate that he believed the historical salvage data he reviewed in 2022 supported a more negative net salvage estimate from the then approved (40)% net salvage. With additional data now available, negative net salvage continues to be less negative and there is no indication this will not continue. Thus, given updated information and applying her expertise and experience, Ms. Lee reached a different conclusion than did Mr. Allis.

Respondent: Patricia Lee

INTERROGATORY NO. 9 (a-b)

9. Please refer to FCG's 2025 Depreciation Study Narrative, Pages 12-13, Account 3762: Mains – Steel. FCG proposes a (40)% net salvage factor in the instant case, an increase from the currently approved (50)% net salvage factor. FCG claims the reason behind this proposed increase is that removal costs "…should continue to decrease…" FCG states that the 2004-2024 average net salvage for the account is (146)% and the most recent 2021-2024 period averaged (64)% which is consistent with FCG's 2022 Depreciation Study, in which FCG witness Allis recommended a (75)% net salvage for the account (Exhibit NWA-1, Page 155-156 of 179). Please provide:

a. The rationale behind FCG's claim that removal costs should continue to decrease.

b. An explanation for why there exists a 35% difference in the net salvage estimates for this account between FCG's 2022 and 2025 Depreciation studies, despite less than 3 years of elapsed time between studies.

[Staff's First Data Request, filed April 10, 2025, Question Nos. 6.a. and 6.d.]

Company Response:

FCG objects to this request to the extent it is that it seeks a comparison to a prior depreciation study that was not approved, and as such, has no bearing on the current depreciation study before the Commission and is unlikely to lead to the discovery of admissible evidence in this proceeding. Notwithstanding and without waiving this objection, FCG allows for the following:

a. Please refer to pages 12 and 13 of the 2025 Depreciation Study for an analysis of the life and salvage expectations for the Steel Mains account. As can be seen on Sch Q of the amended Study Workbook, negative net salvage has been trending less negative from (135)% over the last 10 years to (73)% over the last 5 years, and

FPSC EXH NO. 27
ADMITTED

steadily decreasing since 2021. Given the scant retirement rate, averaging less than 1% since 2004, reliance on net salvage projections of other Florida gas utilities is necessary.

As Ms. Lee has stated at page 13 of amended Exhibit PSL-2, "Even though removal costs have historically been high, the costs have continually decreased over¬ time. FCG believes these costs should continue to be less negative and proposes (40)% net salvage. Other gas companies in Florida have approved net salvage factors ranging from (30)% to (60)%, averaging (40)%. FCG proposes (40)% net salvage in line with recent trends, easier accessibility to retired pipe, and expectations of other Florida gas companies." See Exhibit PSL-4 for prescribed net salvage factors for Florida gas companies.

b. The Commission approved a net salvage of (50)% in the previous case representing a 20% difference between the current approved and the 2025 Study proposed. The difference in net salvage estimates is due to recent data as well as the experience of Ms. Lee. It is not uncommon to rely on recent activity in estimating the future expectations. As it relates to the 2022 study, it was based on projected test year date through December 31, 2022, while the 2025 Study is based on actual FCG-specific plant and reserve balances at December 31, 2024. Ms. Lee noted as well that Mr. Allis indicated in that study that the application of his proposed rates

FPSC EXH NO. 27
ADMITTED

to future balances could be reasonable for most accounts for as little as 3 years. See, NWA-1, at page 44.

Respondent: Patricia Lee

FPSC EXH NO. 27
ADMITTED

INTERROGATORY NO. 10 (a-b)

10. Please refer to FCG's 2025 Depreciation Study Narrative, Page 15, Account 3801: Services – Plastic. FCG proposes (40)% net salvage factor in the instant case, an increase from the currently approved (68)% net salvage factor. FCG claims the reason behind this proposed increase is "easier accessibility to the retired service as well as projections from other Florida gas utilities." However, FCG states the 2004-2024 average net salvage factor for the account is (398)% and the most recent 2021-2024 period averaging (132)%. In addition, in FCG's 2022 Depreciation Study, FCG witness Allis recommended a (60)% net salvage factor for the account (Exhibit NWA-1, Page 162 of 179). Please provide:

a. An explanation of how the retired services are more easily accessible now compared to the past.

b. An explanation for why FCG is recommending an increase to the approved (68)% net salvage factor given the (132)% average net salvage factor experienced over the 2021-2024 period and (398)% average net salvage factor experienced over the 2004-2024 period.

[Staff's First Data Request, filed April 10, 2025, Question No. 7.a. and 7.d.]

Company Response:

FCG objects to this question to the extent that it is misleading in that it restates and draws comparisons to a previous recommendation by a witness in a prior docket without noting that said recommendation was not approved by the Commission in that proceeding. Notwithstanding this objection and without waiving, FCG responds as follows:

a. Consistent with the Company's SAFE program, services are being relocated to the front of the customer's property making them easier to access therefore, on

retirement, less labor intensive to cut and cap. Ms. Lee made this assessment based on review of the SAFE program activity and discussions with Company personnel.

b. Please refer to pages 15-16 of the 2025 Depreciation Study Narrative and Schedules F-1 and P of the Study Workbook in amended Exhibit PSL-2. The retirement rates of less than 1% are not reliable for net salvage projections. To expect that the remaining account investment is likely to experience similar net salvage to that experienced by such historic miniscule retirements, Ms. Lee believes is not appropriate. Thus, neither the (132)% negative net salvage experience over the 2021-2024 period nor the (398)% experience over the 2004-2024 period are considered representative of future expectations when they both relate to such miniscule retirement rates averaging less than 1%. Ms. Lee also relied on discussions with Company personnel regarding removal cost associated with retired services. The proposed (40)% net salvage factor is more in line with the projections of other Florida utilities than the currently prescribed net salvage factor of (68)% and is also more in line with FCG's net salvage factor for this account from the prior, 2017 Depreciation Study, which was (45)%. Thus, Ms. Lee considered the range of net salvage projections of other Florida gas utilities, discussions with company personnel, and applied her professional judgement, which is based on Ms. Lee's over 35 years' depreciation experience, to develop her recommendations.

Respondent: Patricia Lee

INTERROGATORY NO. 11

11. Please refer to FCG's 2025 Depreciation Study Narrative, Pages 15-16, Account 3802: Services – Steel. FCG states, "Average service life estimates for other gas companies in Florida range from 48 years to 60 years, averaging 54 years. Based on input from the Company, the type of assets in this account, and judgment, this Study proposes a slight increase in average service life to 60 years." With a current service life of 52 years (Study, Page 15), please explain how FCG determined a 60 year average service life is appropriate for this account, and how that proposed service life may be reflective of changes (please specify) since FCG's 2022 Depreciation Study, wherein witness Allis recommended a 50 year average service life (Exhibit NWA-1, Page 160 of 179).
[Staff's First Data Request, filed April 10, 2025, Question No. 8]

Company Response:

FCG objects to this question to the extent that it is misleading in that it restates portions of and draws a comparison to a previous recommendation by a witness in a prior docket without noting that said recommendation was not approved by the Commission in that proceeding. Notwithstanding this objection and without waiving, FCG responds as follows:

The forces of retirement of steel services are corrosion, dig-ins, and relocations. Some steel mains are being replaced in response to concerns regarding aging infrastructure reliability and safety. Once replacement is completed, steel services should be expected to experience life expectancies longer than 50 years. The continued decrease in the retirement rate since 2022 is also indicative of increased life indications. See Schedule F-1 and P of the 2025 amended Depreciation Workbook for average retirement rates. Recognizing the average age of the January 1, 2025 surviving investment is 34.5 years, and considering the average service life underlying the currently prescribed average remaining life is 52 years, along with the above, a 60-year average service life is reflective of future expectations. FCG

FPSC EXH NO. 27
ADMITTED

INTERROGATORY NO. 11, cont.

notes that the 50-year average service life proposed by Mr. Allis in the Gannett Fleming submitted 2022 depreciation study was for the combined steel and plastic services accounts rather than for just the steel services account.

Respondent: Patricia Lee

FPSC EXH NO. 27
ADMITTED

INTERROGATORY NO. 12

12. Please refer to FCG's 2025 Depreciation Study Narrative, Pages 17-18, Account 3820: Meter Installations. FCG states "The retirement rate during the 2021-2024 period averaged 14.97% with the 2004-2024 averaging 4.27%." In addition, in FCG's 2022 Depreciation Study, witness Allis recommended a 35-year average service life for the account (Exhibit NWA-1, Page 165 of 179). Please explain why FCG does not recommend any change to the 44-year average service life or curve shape.

[Staff's First Data Request, filed April 10, 2025, Question No. 9]

Company Response:

FCG objects to this question to the extent that it is misleading in that it restates and specifically draws comparisons to a previous recommendation by a witness in a prior docket without noting that said recommendation was not approved by the Commission in that proceeding. Notwithstanding this objection and without waiving, FCG responds as follows:

Please refer to page 18 of amended Exhibit PSL-2, for an analysis of the meter installations account. In addition, based on responses to OPC's Third Set of Interrogatories, the average age recalculated to 12.2 years. The existing 44-year average service life with an R1 curve and 12.2-year average age of FCG's surviving investment approximates the average retirement rate. A 35-year average service life with an R3 curve, as proposed in the 2022 filed Gannett Fleming study, indicates fewer retirements at age 12.2. See attachment PSC-ROG 2-12 for R1/44-year and R3/35-year life tables.

FPSC EXH NO. 27
ADMITTED

INTERROGATORY NO. 13

13. Please refer to FCG's 2025 Depreciation Study Narrative, Pages 18-19, Account 3821: Meter Installations –ERT. please explain the reasons why FCG is proposing to increase net salvage for this account from (25)% to 0%.

[Staff's First Data Request, filed April 10, 2025, Question No. 10]

Company Response:

Please refer to page 19 of the Depreciation Study Narrative and Sch Q of the study workbook in amended Exhibit PSL-2. There is limited retirement data, only since 2018, and no incurred removal costs or salvage realized on those retirements. Based on discussions with FCG personnel and Ms. Lee's 35-year utility depreciation experience, net salvage for this account should be similar to that for Account 3820, Meter Installations.

Respondent: Patricia Lee

FPSC EXH NO. 27
ADMITTED

INTERROGATORY NO. 14

14. Please refer to FCG's 2025 Depreciation Study Narrative, Page 21-22, Account 3900: Structures and Improvements. FCG is proposing to extend the Average Service Life (ASL) of this account from 25 years to 40 years, an increase of 60%. Why did FCG propose to increase the service life to 40 years in a single ASL adjustment rather than in stages under the concept of Gradualism?

[Staff's First Data Request, filed April 10, 2025, Question No. 11]

Company Response:

The purpose of a depreciation study is to determine the appropriate life, salvage, and reserve parameters for each account based on the information available. Gradualism is not a depreciation concept and should not enter into the proposals, although it sometimes does. See response to Question No. 30.

Respondent: Patricia Lee

FPSC EXH NO 27
ADMITTED

INTERROGATORY NO. 15

15. Please refer to FCG's 2025 Depreciation Study, page 7, "Account Analysis and Proposals" section. For many accounts the study references the support of other Florida gas utilities for service life and/or net salvage values. For each such reference, by account, please provide the data, calculations, associated time periods of the data, and source of all such data.

[Staff's First Data Request, filed April 10, 2025, Question No. 12]

Company Response:

The 2025 Depreciation Study references reliance on the life and salvage projections of other Florida gas utilities. This reliance, as in past depreciation studies, relates to the average service lives underlying the currently Commission-prescribed factors for each utility (See Exhibit PSL-4). These factors have all been vetted as being appropriate. Companies operating in a similar environment and regulations should be considered to have life expectancies within a reasonable range.

Respondent: Patricia Lee

INTERROGATORY NO. 16

16. In the Company's last base rate case (Dkt 20220069-GU), FCG witness Campbell stated in his direct testimony (DN 03278-2022), "The Company is proposing a Reserve Amount of $25 million to be available for use in the RSAM as described above for the 2023-2026 period, which will enable FCG to avoid another base rate increase until at least the end of 2026 while continuing to earn a reasonable rate of return." (Page 28, Lines 15-18) Ultimately, the Commission approved FCG's four-year rate plan in conjunction with approval of its use of the RSAM in Order No. PSC-2023-0177-FOF-GU, issued June 9, 2023. Please explain the changes and events within the Company since its last rate case that have resulted in FCG's petition to amortize an additional proposed reserve surplus of $27.3 million over the next two years in order to avoid a rate proceeding (2025 Depreciation Study, Pages 4 and 5).

[Staff's First Data Request, filed April 10, 2025, Question No. 14]

Company Response:

FCG objects to this interrogatory to the extent is does not refer to the 2025 Depreciation Study submitted on October 3, 2025 or the amended version. To be clear, FCG does not know all of the factors that went into Witness Campbell's assessment – Witness Campbell was not then, and is not now, an employee of Florida City Gas.

While the Company's petition noted that the results of the study and two-year amortization of may allow the Company to further delay its next rate case for up to 24 months, this was not the purpose or design for the depreciation study. As the study neared completion, it became apparent that a surplus reserve imbalance of some magnitude would likely be the

result of the study. As such, we discussed different options with Ms. Lee for addressing the surplus. A 2-year amortization of the surplus was determined to be the most appropriate timeframe and methodology to resolve the reserve imbalance.

With that said, at the time of the depreciation study filing, there had been several notable changes since the FCG rate case.

First, Net Operating Income decreased by $4.1M in 2024 versus approved rate case. Per Mark Campbell's testimony on CPI, he stated "The cumulative increase from 2021 through the end of FCG's proposed four-year rate plan (2026) was projected to be 11.0 percent." (line 21 on page 1055 of document 00068-2023) The actual cumulative inflation from 2021 through 2024 is 15.8%. This inflation increase is a significant driver of the increased costs impacting NOI. Other significant increases of costs include a $2.5M (pre-tax) change of taxes other than income due to a significant increase in property taxes and an insurance expense increase of $0.8M (pre-tax).

Additionally, FCG had invested $16.0M of additional rate base above the rate base approved in the 2023 rate case. This additional investment requires an additional $1.2M of earnings at the midpoint.

Due to the changes discussed above, FCG had fully utilized $25M of the RSAM reserve by the end of 2024. See attached reserve report (PSC ROG 2-16) included with Revised Year End 2024 Earnings Surveillance Report. In the final order PSC-2023-0177-FOF-GU the Commission concludes "For these reasons, we acknowledge FCG's commitment while also noting that approval of FCG's plan, either in part or its entirety, would not prohibit future proceedings on these matters over the next four years."

INTERROGATORY NO. 17

17. Please refer to FCG's Earnings Surveillance Report (ESR) for the 12 month period ending December 31, 2024, and FCG's Forecasted ESR for the 12 months ending December 31, 2024, filed with the Commission on March 28, 2025, and March 15, 2024, respectively.

a. In FCG's ESR for 12 month period ending December 31, 2024, for each of the instances from May 31, 2023 to date where FCG has amortized a portion of the Commission-approved $25 million reserve surplus, please explain in detail FCG's process for deciding how much of the aforementioned reserve surplus needed to be amortized.

b. In FCG's Forecasted ESR for the 12 months ending December 31, 2024, filed March 15, 2024, FCG projected $6,879,538 of the aforementioned Commission-approved $25 million reserve surplus to remain through December 31, 2024. However, according to FCG's ESR for the 12 month period ending December 31, 2024, only $2.00 of the $25 million reserve surplus remained as of December 31, 2024. Please explain the changes and events within the Company since its March 15, 2024 Forecasted ESR filing, that have resulted in FCG amortizing $6,879,536 more than what was projected in 2024.

[Staff's First Data Request, filed April 10, 2025, Question No. 15]

Company Response:

a. Since June of 2023, FCG has filed quarterly surveillance reports with RSAM reflected at various levels from 9.5% to 10.5%, as allowed by the RSAM mechanism approved by the Commission. The midpoint of 9.5% was set by the Commission taking into consideration the use of the RSAM mechanism.

The amount booked in 2023 was the estimated amount needed to get to a year end return of 9.5%. FCG would have otherwise reported returns under the lower 8.5%, in violation of the provisions of the RSAM Mechanism approved by the Commission. The 2024 year end return was below the 9.5% midpoint.

b. There were significant changes, many outside of FCG's control, that differed from the forecast originally used to estimate the 2024 RSAM usage. These included, but were not limited to greater than anticipated rates of inflations impacting many segments of our business, significant increases in property taxes, insurance expense increases, lower revenues and additional capital investments.

Respondent: Matt Everngam

INTERROGATORY NO. 18

18. Please refer to FCG's ESR for the 12 month period ending September 30, 2024, filed December 13, 2024. According to Schedule 1 of this filing, FCG's return on equity (ROE) was 10.50 percent, which is at the top of FCG's currently authorized ROE range by Order No. PSC-2023-0177-FOF-GU. This filing also states that FCG amortized $3,182,574 of the $25 million reserve surplus in September 2024 (Attachment 1).

a. Please explain why FCG elected to amortize $3,182,574 of the reserve surplus in September 2024, thereby earning at the top of its authorized ROE range for the 12 month period.

b. Given the Company's previous commitment to the four-year plan proffered by FCG witness Campbell in FCG's 2022 rate case (DN 03278-2022, Page 28, Lines 15-18), please explain why FCG did not elect to amortize a lesser amount of the reserve surplus, resulting in an ROE closer to the midpoint (9.5%) of FCG's authorized ROE range.

[Staff's First Data Request, filed April 10, 2025, Question No. 16]

Company Response:

a. FCG objects to this request in that it posits an incorrect assumption with regard to the Company's year-end 2024 earnings posture. Notwithstanding and without waiving this objection, FCG hereby responds as follows. The reserve amount booked in the general ledger in 2024, including the $3,182,574 in September 2024, was based on the forecasted 2024 amounts with a full 13-month average capital structure, rate base, and net operating income. The amount of RSAM used was in compliance with the RSAM mechanism

FPSC EXH NO. 27
ADMITTED

approved by the Commission. The final 2024 year-end return was 9.28%, below the mid-point of 9.5% and well below the top of FCG's authorized range.

b. To be clear, Ms. Lee is not fully aware of the assumptions that went into the Company's prior 4-year plan, as Witness Campbell was not then, and is not now, an employee of FCG. With that said, Ms. Lee's understanding based on a limited review of documents in Docket No. 20220069-GU, the plan was a projected forecast of the utilization of the reserve. It was, in other words, an estimate based on what was known at the time of the filing. A variety of factors, like the increased rate of inflation, resulted in actual results differing from the assumptions used in the forecast.

The year end 2023 return was at the 9.50% midpoint, and the 2024 return was at 9.28%, lower than the 9.50% midpoint. The total amount of RSAM utilized in both annual periods was necessary to get at or below 9.50%.

Respondent: Patricia Lee and Matt Everngam

INTERROGATORY NO. 19

19. Please refer to page 4 of the Abeyance Response. FCG states, "In fact, as will be evidenced in FCG's forecasted earnings surveillance report, which is anticipated to be filed soon, an extended delay in the processing of FCG's Study will necessitate that FCG file a base rate case, which FCG believes is not in the best interest of its customers or FCG at this time." Is FCG asserting that it is projected to be earning below its authorized ROE range in 2025?

[Staff's First Data Request, filed April 10, 2025, Question No. 17.a.]

Company Response:

FCG assumes that this question refers to FCG's response filed March 6, 2025 to OPC's Motion to Hold Proceedings in Abeyance. As stated in Witness Everngam's testimony filed October 3, 2025, (See, Everngam, page 7, lines 2-11) FCG is currently operating well below the bottom of its allowable range. Additionally, please see the Company's response to Interrogatory No. 44.a. detailing the Company's forecasted earnings surveillance report for 2025.

Respondent: Matt Everngam

INTERROGATORY NO. 20

20. Does FCG believe that a consideration of its earnings should be part of the Commission's standard review and processing of depreciation studies? Please explain.

[Staff's First Data Request, filed April 10, 2025, Question No. 18]

Company Response:

No, nor is that FCG's request in this proceeding. Rather, as Witness Everngam addresses in his Direct Testimony, the depreciation study stands on its own, but to the extent Ms. Lee's depreciation study reflects a reserve surplus, the outcome of the study may also impact the Company's returns and future rate case considerations beyond the potential to support FCG's earnings pending the filing of the rate case. Any amortization of the excess reserve included in the Company's historic test year in its next base rate case would put downward pressure on interim rates resulting from the amortization. Additionally, any depreciation expense reduction, consistent with that reflected in FCG's study, would put downward pressure on both interim and final rates in the next rate case. Current FCG customers would benefit in both instances. And, consistent with the "matching principle," returning the surplus to ratepayers sooner, rather than over the remaining life of the assets, with ensure that the ratepayers who may have overpaid would have a chance of benefitting, particularly given the likelihood that FCG will be consolidated with FPUC in the relatively near future.

Respondent: Patricia Lee and Matt Everngam

INTERROGATORY NO. 22

22. If FCG's 2025 Depreciation Study and requested 2-year amortization of the proposed $27.3 million surplus is approved as filed, please explain if:

a. an amortization of any portion or all of FCG's proposed $27.3 million surplus would result in a requested rate base increase by the same amount and such increase reflected in the requested revenue requirements of the Company the next time FCG petitions the Commission for a base rate increase. Please explain.

b. an amortization of such surplus amount to support earnings would result in FCG double recovering the cost of plant from its customers beginning with base rate recovery amounts following the next rate case? Please explain.

[Staff's First Data Request, filed April 10, 2025, Question No. 20]

Company Response:

FCG objects to this extent this interrogatory refers to a prior iteration of Ms. Lee's Exhibit that is not the version sponsored by her for purposes of hearing. Notwithstanding and without waiving this objection, FCG states:

a. As the Commission is aware, certain errors were identified through the process of discovery and data requests. The amended Exhibit PSL-2 is the study sponsored by FCG and its witness Patricia Lee for purposes of the hearing in this proceeding. As set forth at page 5 of that exhibit, the net reserve surplus is approximately $19 million. With that clarification, the amortization of a reserve imbalance, which in the FCG case is a surplus, is an approved method for addressing the impact of the depreciation life and salvage value. As noted in Order No. 1997-1609-PAA-EI, issued in Docket No. 97537-EI, at page 3, stating,

INTERROGATORY NO. 22, cont.

"Reserve imbalances are primarily a matter of differences in current and past projections. We believe that such deficiencies should be recovered as fast as possible, unless such recovery prevents the company from earning a fair and reasonable return on its investments." This method does result in an increased rate base, when updated depreciation life and salvage values are taken into account.

b. FCG objects to this request as vague as it is unclear how the suggested "double recovery" could occur. Notwithstanding and without waiving this objection, FCG states that its amortization of the reserve surplus is not proposed "to support earnings" although that is an ancillary result. First and foremost, amortization of the reserve surplus in the manner that FCG is proposing in this case, ensures a return to the matching principle as quickly as possible allowing the excess reserve to benefit the current customers. If FCG's proposal is accepted, the Company's assets will more accurately reflect the appropriate rate base to support future customers.

Respondent: Patricia Lee

INTERROGATORY NO. 23

23. Please refer to FCG's 2025 Depreciation Study, page 4 for the following question. Here the Company writes "[c]orrection of the reserve imbalance over a short period will result in a return to the matching principle as opposed to returning it over the remaining life." In this docket, who would the Company be returning the surplus to if it was amortized over the remaining life, i.e., customers or shareholders?

[Staff's First Data Request, filed April 10, 2025, Question No. 21]

Company Response:

FCG objects to this interrogatory to the extent it does not refer to the current iteration of Exhibit PSL-2, which is the depreciation study Ms. Lee is sponsoring for FCG in this proceeding. The following similar statement is found at page 5 of amended Exhibit PSL-2: "Allowing FCG to amortize its reserve imbalance over two years will result in a return to the matching principle as quickly as the Company is able to do so." Notwithstanding and without waiving this objection, correction of the surplus over the remaining life or over a shorter period of time benefits both the customers and the shareholders. It's a matter of timing. The point of the quoted statement is that correcting the imbalance over a period shorter than the average remaining life has a better chance of benefiting customers who overpaid for services by reducing depreciation expenses now through lower depreciation rates. A by-product of the shorter amortization, of course, is a resulting higher net income that would allow the Company to get closer to reaching a fair rate of return for shareholders, which the Company had hoped, early on, would enable it to delay its next rate case.

Respondent: Patricia Lee

FPSC EXH NO. 27
ADMITTED

INTERROGATORY NO. 24

24. Please refer to FCG's 2025 Depreciation Study, pages 5-6. Here the Company writes "[t]his will have the effect of reducing depreciation expenses for the amortization period resulting in the added benefit of delaying a rate proceeding now." Has the Company quantified the difference of a potential near-term rate case and its impact on customer rates, relative to the future "re-collection" of the $27.3 million in future depreciation expenses (including the return on the newly created unamortized balance/rate base)? If so, please provide the results of that analysis.

[Staff's First Data Request, filed April 10, 2025, Question No. 22]

Company Response:

FCG objects to this interrogatory to the extent it does not refer to the current version of Exhibit PSL-2, which is the depreciation study Ms. Lee is sponsoring for FCG in this proceeding. As noted in the Direct Testimony of Witness Everngam, the amortization will no longer enable the Company to delay a rate proceeding. Moreover, FCG objects to the extent this interrogatory uses a vague and undefined term, "re-collection" which may be subject to varying interpretations and applications. Notwithstanding and without waiving this objection, FCG states as follows: No.

Respondent: Patricia Lee and Matt Everngam

FPSC EXH NO. 27
ADMITTED

INTERROGATORY NO. 25

25. Does the Company allege that its current proposal, reducing depreciation expense by $27.3 million over two years, which includes the associated/follow-on effects of that proposal, i.e., "re-collection" of depreciation and additional return, is the "lower cost" option to its customers relative to a near-term rate case?

[Staff's First Data Request, filed April 10, 2025, Question No. 23]

Company Response:

FCG objects to this interrogatory to the extent it does not refer to the current iteration of Exhibit PSL-2, which is the depreciation study Ms. Lee is sponsoring for FCG in this proceeding. As noted in the Direct Testimony of Witness Everngam, the amortization will no longer enable the Company to delay a rate proceeding. Moreover, FCG objects to the extent this interrogatory uses a vague and undefined term, "re-collection" which may be subject to varying interpretations and applications and is otherwise unclear and makes assumptions that are not clear, not defined, and confusing. Notwithstanding and without waiving these objections, FCG states as follows:

At the time of the preparation of the Company's depreciation study, FCG anticipated a prompt resolution of the study and felt if amortization was approved beginning 1/1/25, it would likely have allowed a delay in the rate case filing. In fact, based on projections from early 2025, amortization of one year in 2025 would have placed the earnings in a range that would have likely allowed a delay in the filing. The short-term amortization of the reserve surplus benefits customers through lower depreciation expenses, corrects the existing misstatement of rate base and is a return to the matching of expenses to consumption. The objective of the surplus amortization was and continues to be the correction of the overstated reserve.

Respondent: Patricia Lee and Matt Everngam

FPSC EXH NO. 27
ADMITTED

INTERROGATORY NO. 26

26. Please refer to FCG's 2025 Depreciation Study page 6. Here the Company writes "[t]here are numerous cases where the Commission has approved amortization of reserve imbalances over a period shorter than the remaining life." Please provide examples of this amortization where the reserve surplus was used to reduce depreciation expense in support of company earnings rather than flowed directly to, or recovered from, customers. Please limit this response to identifying only instances where the relative issues in the docket were not part of a settlement.

[Staff's First Data Request, filed April 10, 2025, Question No. 24]

Company Response:

FCG objects to this request to the extent that it is vague, unclear, and seeks examples otherwise not linked to the statement referenced. Moreover, the limitations contained therein are interposed for the apparent improper purpose of restricting the number of examples such that it would appear there are not "numerous cases" that support the statement, which in fact, there are. Notwithstanding and without waiving this objection, FCG states that, in depreciation studies not accompanied with a rate case proceeding, the resultant expenses of revised depreciation rates, either increases or decreases, have an effect on earnings.

For correction of reserve imbalances over a shorter period than the remaining life please see Order PSC-2019-0433-PAA-GU, issued October 22, 2019 In re: Petition for approval of 2019 consolidated depreciation study by Florida Public Utilities Company, Florida

Public Utilities Company-Indiantown Division, Florida Public Utilities Company-Fort Meade, and Florida Division of Chesapeake Utilities Corporation, page 3. In that case, FPUC adaptation of vintage year accounting for amortizable general plant accounts amounted in ($1.4M) reserve imbalance. The commission authorized a 5-year amortization to bring these accounts to their theoretically correct reserve levels.

Also, Order No. 010699-EI, issued November 19, 2001, In re: Request for approval of implementation date of January 1, 2002, for new depreciation rates for Marianna Electric Division by Florida Public Utilities Company. The Commission stated its policy to recover imbalances "as fast possible, unless such recovery prevents the Company from earning a fair and reasonable return on its investments."

Additionally, see Order No. PSC-10-0131-FOF-EI, issued March 5, 2010, in Docket No. 090079-EI In re: Petition for increase in rates by Progress Energy Florida, Inc.; Docket No. 090144-EI, In re: Petition for limited proceeding to include Bartow repowering project in base rates, by Progress Energy Florida, Inc.; and Docket No. 090145-EI, In re: Petition for expedited approval of the deferral of pension expenses, authorization to charge storm hardening expenses to the storm damage reserve, and variance from or waiver of Rule 25-6.0143(I)(c), (d), and (f), F.A.C., by Progress Energy Florida, Inc, pp. 45-52.
See also, Order No. PSC-10-0153-FOF-EI in Docket Nos. 20080677-EI, issued March 17, 2010 In re: Petition for increase in rates by Florida Power & Light Company and Docket No. 20090130-EI In re: 2009 depreciation and dismantlement study by Florida Power &

FPSC EXH NO. 27
ADMITTED

INTERROGATORY NO. 26, cont.

Light Company, at page 87. The Commission determined that the reserve surplus should be amortized over 4 years.

By Order 19438, issued June 6, 1988, in Docket No. 80868-EI, In re: Request of Tampa Electric Company for a Change in its Depreciation Rates Effective January 1, 1988, where the Commission approved that tax credits associated with the interest synchronization of investment tax credits be applied to decrease the unrecovered cost associated with equipment planned for retirement and amortized over a two-year period. Prospectively, the annual true-up amount would be booked to a non-account specific account and allocated to specific accounts at the time of the next depreciation study. Further, the Commission approved that the reserve remaining from the retirement of certain capacitors be transferred to the reserve associated with transformers slated for near-term retirement.

By Order 18736, issued January 26, 1988, in Docket No. 871269-TL, In re: Request of United Telephone Company of Florida for Acceleration of Amortization Schedules, the Commission approved a one-time charge to depreciation in the amount needed to recover the imbalance associated with certain central office equipment with a remainder of the requested amount to be recorded in a nonspecific reserve account and allocated to specific accounts in the next depreciation study. The Commission found that these actions "comply with our policies of correcting reserve imbalances as rapidly as possible and of accelerating the write-off of plant identified for retirement earlier than projected when these goals can be achieved without adversely affective rates."

INTERROGATORY NO. 26, cont.

By Order 15798, issued November 1986, In re; Implementing Interest Synchronization Refunds Through Depreciation Revenue Adjustments, the Commission determined that monies subject to refund plus interest related to the interest synchronization of investment tax credits be recorded as a one-time jurisdictional adjustment to the depreciation reserve and made account specific at the next depreciation study. Further, on-going monthly jurisdictional adjustments would be booked to the deprecation reserve in the same manner. By Order PSC-97-1609-FOF_EI Florida Public Utilities Company's Marianna Division was authorized to amortize the net gain associated with the sale of *a* warehouse and associated land over a period of five years. A portion of the sale proceeds to be recorded as gross salvage against the retirement of the warehouse building. The net gain from the sale of a hydro plant was approved to be amortized over four years. Order PSC-98-0451-FOF-EI revised the amortization period for the net gain on the hydro plant to five years.

By Order PSC-2002-1159-PAA-GU approve the application of a portion of the net proceeds from the sale of FPUC's office and warehouse building to the unrecovered cost of the building. The net gain was then amortized over five years.

Further, reserve transfers between accounts, a long-standing Commission-approved practice, are tantamount to amortization of the respective account reserve imbalances over a period shorter than the average remaining life.

Respondent: Patricia Lee

INTERROGATORY NO. 27

27. Please refer to FCG's 2025 Depreciation Study, page 6. In the third paragraph, the Company writes, "FCG has identified a reserve surplus of $27.3 million that it proposes to amortize over the years 2025 and 2026. This action allows a return to the matching principle and correction of intergenerational inequities." concept of relieving intergenerational inequities by transferring customer value to Company shareholders, which has the direct effect of customers having to pay for that depreciation and return twice no matter the generation of customer base.

[Staff's First Data Request, filed April 10, 2025, Question No. 25]

Company Response:

FCG objects to this interrogatory to the extent it does not refer to the current iteration of Exhibit PSL-2, which is the depreciation study Ms. Lee is sponsoring for FCG in this proceeding. The Company further objects to the extent that there is no question posed by this interrogatory, which instead offers a statement that is not supported by testimony filed in this proceeding.

Respondent: Patricia Lee

INTERROGATORY NO. 28

28. In FCG's 2022 Deprecation Study, the Company identified an approximate $52.1 million of reserve surplus. Of that $52.1 million, $27.1 million remained - as proposed - in accumulated depreciation following the disposition of the rate case. Please explain the company's position that the $27.3 million reserve surplus as calculated in the 2025 Study indicates an intergenerational inequity which needs to be corrected but a similar amount did not need such a correction in 2022.

[Staff's First Data Request, filed April 10, 2025, Question No. 26]

Company Response:

FCG objects to this interrogatory to the extent it does not refer to the current iteration of Exhibit PSL-2, which is the depreciation study Ms. Lee is sponsoring for FCG in this proceeding. The Company further objects to the extent the question would require the Company to make assumptions that cannot be gleaned from the information publicly available in Docket No. 20220069-GU or otherwise available to the Company under its new ownership. Notwithstanding this objection and without waiving, FCG states that neither it nor its parent company are in a position to answer the question posed. The 2022 Depreciation Study was conducted by a different consultant at a time when the Company was a subsidiary of Florida Power and Light Company. Ms. Lee reviewed the 2022 filed depreciation study as well as the Commission approved depreciation parameters and rates. Ms. Lee cannot address why a similar amount was not addressed in 2022 except to say that the surplus quantified in 2022 of $52.1 million was based on life and salvage parameters deemed appropriate at that time.

FPSC EXH NO. 27
ADMITTED

INTERROGATORY NO. 28, cont.

In the 2025 Study, some lives and salvage factors have changed based on retirement and salvage activity, discussions with Company personnel, and Ms. Lee's over 35-year utility depreciation experience.

INTERROGATORY NO. 29

29. Please refer to FCG's Depreciation Study Narrative, Pages 13-14.

For Account 3762: Mains - Steel, FCG states,

> "The currently approved net salvage is (50)%. The overall average net salvage is (146)% with the most recent 2021-2024 period averaging (64)%. Even though removal costs have historically been high, the costs have continually decreased over time…. FCG proposes (40)% net salvage in line with recent trends…"

For Account 3801: Services – Plastic, FCG states,

> "The current approved net salvage factor for this account is (68)%. The overall net salvage is (398)% with the most recent 2021-2024 period averaging (132)%. Given the miniscule retirement data, the Company does not believe this activity is indicative of future salvage expectations….At this time, the Company proposes a decrease to (40)% net salvage…"

FCG indicates it relied on recent net salvage trends in the case of Account 3762, but it did not do so for Account 3801. Please explain why.

[Staff's Second Data Request, filed May 23, 2025, Question No. 1]

Company Response:

FCG objects to this interrogatory to the extent it does not refer to the current iteration of Exhibit PSL-2, which is the depreciation study Ms. Lee is sponsoring for FCG in this proceeding. With regard to Account 3762, the statement leaves out key language. The full statement is: "Even though

FPSC EXH NO. 27
ADMITTED

INTERROGATORY NO. 29, cont.

removal costs have historically been high, **the costs have continually decreased over time.** FCG believes these costs should continue to decrease and proposes (40)% net salvage." See amended Exhibit PSL-2, at page 13. The Company would like to point out that while the trend in removal costs for plastic services is not as prominent as seen in plastic mains, there is a downward turn. In both instances, the overall and most recent 4-year average net salvage factors are higher than the currently approved factor. Ms. Lee reviewed both the historical and the current trends for these accounts, and based on her expertise, discussions with Company personnel, and considering the approved parameters of other Florida gas utilities, a (40)% net salvage is proposed for each account.

The historical net salvage for Account 3762, Steel Mains, is (146)% with the 2020-2024 period averaging (73)%. As pointed out in the 2025 Depreciation Study narrative, removal costs for steel mains have continually decreased over time as shown on Sch Q of the study workbook. Steel mains require welding labor and fittings to cut connections. All disturbed areas are restored to the original condition per permit requirements. Restoration costs include concrete/sidewalks and curbs, asphalt/paving streets and patching, sod, etc. That said, FCG is replacing mains running through less accessible parts of customer property (e.g., backyards) with mains located in more accessible areas. Therefore, when a main is retired, the labor required to excavate and access the main to cut and cap is expected to continue to decrease. The miniscule retirement rate does not lend credibility for reliance on historical net salvage costs in projecting future expectations. Other

INTERROGATORY NO. 29, cont.

Florida gas utilities estimate net salvage for steel mains in the range of (30)% to (60)%. The proposed (40)% net salvage is in line with the future expectations of a continued reduction in removal costs and a move more in the range of other Florida utility estimates.

The historical net salvage for Account 3801, Plastic Services, is (398)% with the 2020-2024 period averaging (132)%. The retirement rate has averaged less than 1% making reliance on estimates of other Florida utilities necessary. As with mains, services are being relocated from customer backyards and becoming more accessible. Thus, a reduction in labor costs associated with the abandonment of the retired service is expected. Net salvage estimates of other Florida gas utilities range from (30)% to (75)%, averaging (41)%, with several companies projecting (30)% net salvage. The proposed (40)% net salvage is in line with the future expectations of a continued reduction in removal costs and a move more in the range of other Florida utility estimates. As stated at pages 15-16 of amended Exhibit PSL-2, "At this time, the Company proposes a decrease to (40)% net salvage given easier accessibility to the retired service as well as projections from other Florida gas utilities."

Respondent: Patricia Lee

INTERROGATORY NO. 30

30. Please refer to FCG's response to Staff's 1st Data Request, No. 11. FCG proposes to increase the ASL for Account 3900: Structures and Improvements from 25 to 40 years (a 60 percent increase). Please explain whether FCG considered a reduced percent increase in this adjustment, to be revisited in a later study, in recognition of the depreciation concept of Gradualism. If not, please explain why not.

[Staff's Second Data Request, filed May 23, 2025, Question No. 2]

Company Response:

Gradualism is not a depreciation concept, but when applied in the depreciation context, it emphasizes incremental changes to depreciation parameters over time rather than all at once.

Gradualism was not considered in the proposed average service life for Account 390. The future life expectancy for general plant office buildings is typically 40 years as indicated in the average service life projections of other Florida gas companies. The account investment includes a 2024 office building not considered in the previous Gannett Fleming submitted depreciation study. The retirement rate for the 2004-2024 period averaged 2.2% with the 2021-2024 period averaging 0%. In fact, during the 2004-2024 period, retirements only occurred in 4 years. Other Florida utilities project average service life factors ranging from 25 years to 40 years. Only one company estimates a 25-year life expectancy for general plant structures. It is the expert opinion of Ms. Lee that a 25-year average service life may be appropriate for leasehold improvements but not for office buildings.

Respondent: Patricia Lee

FPSC EXH NO. 27
ADMITTED

INTERROGATORY NO. 31(a-b)

31. Please refer to FCG's Depreciation Study Narrative, Page 15, as well as FCG's response to Staff's 1st Data Request, No. 7. FCG is proposing to increase the net salvage factor for Account 3801: Services – Plastic from (68)% to (40)%.

a. Please explain the basis for proposing an increase to net salvage when both the overall net salvage of (398)% and most recent net salvage of (132)% experienced for the account are both significantly higher than the currently approved net salvage factor (68)%.

b. Did FCG consider requesting a lower net salvage percentage for this account based on the depreciation concept of Gradualism, especially given the recent higher trend in net salvage of (132)% compared to the currently approved (68)%? Is so, please explain. If not, please explain why not.

[Staff's Second Data Request, filed May 23, 2025, Question No. 3.a. and 3.b.]

Company Response:

a. As stated at pages 15-16 of amended Exhibit PSL-2, "At this time, the Company proposes a decrease to (40)% net salvage given easier accessibility to the retired service as well as projections from other Florida gas utilities." Given the miniscule retirement data, the Company does not believe the overall net salvage and recent net salvage activity are indicative of future salvage expectations. Otherwise, one would be making the assumption that the net salvage experienced by retirements relating to less than 1% of the account is an accurate projection for what the

INTERROGATORY NO. 31(a-b), cont.

future retirement of the surviving investment will experience. Ms. Lee does not think that the activity of less than 1% of the account is an accurate indicator. Furthermore, the proposed (40)% net salvage is in line with the future expectations of a continued reduction in removal costs and a move more in the range of other Florida gas utility estimates.

b. Gradualism is not a depreciation concept. It is a concept that emphasizes incremental changes to depreciation parameters over time rather than all at once. Gradualism was not considered in the proposed net salvage percentage for Account 3801.

Based on conversations with FCG, the relocation of services to the front of the customer's property should reduce future removal costs because the service will be more easily accessible.

Respondent: Patricia Lee

32. Please refer to FCG's Depreciation Study Narrative, Page 18. FCG is proposing to increase the net salvage factor for Account 3820: Meter Installations from (25)% to 0%.

a. Was the concept of gradualism considered when FCG proposed to increase the net salvage factor for Account 3820: Meter Installations from (25)% to 0% in a single adjustment? If so, please explain. If not, please explain why not.

b. FCG states, "Other gas companies have net salvage estimates in the range of (5)% to (35)%, averaging (23)%." Please explain why FCG's proposed a net salvage factor of 0%, which is outside the band of its peer gas companies.

[Staff's Second Data Request, filed May 23, 2025, Question No. 4]

Company Response:

a. Gradualism is not a depreciation concept. It was not considered in the proposed 0% net salvage because there has been no net salvage incurred over the past 10 years and the future expectations are that little, if any, net salvage will be incurred upon retirement.

b. Historical net salvage (2004-2024) averaged (3)% with no net salvage experienced over the past 10 years. As stated at page 18 of amended Exhibit PSL-2, "The historical data indicates (3)% net salvage with the most recent 4 years being zero." With this activity, a 0% net salvage is proposed as being appropriate even though it is outside the range of other Florida gas companies as the range offered by other Florida gas companies varies widely and does not sync with FCG's historical

FPSC EXH NO. 27
ADMITTED

experience. The study parameters are based on Ms. Lee's expertise and Company input.

Respondent: Patricia Lee

INTERROGATORY NO. 33

33. Please refer to FCG's Depreciation Study Narrative, Pages 16-17. Regarding Account 3810: Meters, FCG states, "The Company does not see a meter older than 20 years in the field and expects the average life for a meter is in the range of 15-20 years." However, FCG is proposing to increase the ASL for this account from 19 years to 20 years. Please explain why FCG is proposing a 20 year ASL for this account rather than an ASL representing the mid-range, given the Company's statement that there is no "meter older than 20 years in the field."

[Staff's Second Data Request, filed May 23, 2025, Question No. 5]

Company Response:

Based on discussions with FCG personnel, when a meter is removed from a premise, it is not necessarily retired, but tested and put back into service in accord with the meter sampling program. As such, depreciation for these assets is "cradle to grave." While a 20-year average service life for meters is expected, 10% of the surviving investment is more than 20 years old (Sch J of the amended study workbook). Under group depreciation, some items will experience a life shorter than the average while others will experience a life longer than the average service life. Also, as noted in amended Exhibit PSL-2, page 17, "Other gas companies in the State estimate service lives ranging from 20 years to 28 years, averaging 25 years." As such, the 20-year ASL proposed by Ms. Lee is reasonable.

Respondent: Patricia Lee

FPSC EXH NO. 27
ADMITTED

INTERROGATORY NO. 34

34. Please refer to FCG's Depreciation Study Narrative, Pages 18-19. Regarding Account 3821: Meter Installations- ERT, FCG states that there is limited data for the net salvage analysis. Please explain why FCG is proposing a significant change to the net salvage factor (from (25)% to 0%) for this account, given the Company's representation that there is limited data for analysis.

[Staff's Second Data Request, filed May 23, 2025, Question No. 6]

Company Response:

The Study narrative states "At this time, FCG proposes zero net salvage, the same as for Account 3820. The next Study will examine future trends in this account."

For Account 3820-Meter Installations, the historical data indicated (3)% net salvage with the most recent 4 years being zero. This Study proposes zero net salvage for Account 3820, which is in line with the recent experience of the account. At present, with minimal data available, a net salvage that aligns with Account 3820 is reasonable. Moreover, it is worth noting that zero net salvage is the same net salvage as the proposed net salvage in the submitted 2022 Gannett Fleming Study.

Respondent: Patricia Lee

FPSC EXH NO. 27
ADMITTED

INTERROGATORY NO. 35

35. Please refer to FCG's Depreciation Study Narrative, Pages 19-20, FCG states in its narrative that the currently approved net salvage factor is zero for Account 3840: House Regulators Installations, while the currently approved net salvage factor for the account is (25)% (Order No. PSC-2023-0177-FOF-GU). Does this information change the Company's proposed net salvage percentage since its stated position is a continuation of the currently approved net salvage factor? Please explain.

[Staff's Second Data Request, filed May 23, 2025, Question No. 7]

Company Response:

Exhibit PSL-2 at page 20 incorrectly stated that the currently prescribed net salvage factor is 0%. It is (25)%. Also, Exhibit PSL-2 incorrectly stated that retirements only occurred in 8 years. However, of the 21 years of data available, retirements occurred in only 10 years, 4 of which were in the 2021-2024 period. No net salvage was realized in any year. The analysis remains the same. FCG proposes a 0% net salvage factor. See amended Exhibit PSL-2 for all corrections.

Respondent: Patricia Lee

INTERROGATORY NO. 36

36. Please refer to FCG's attachment to its response to Staff's 1st Data Request, No. 12, as well as the table below.

Average Service Life (years)						
Account	St. Joe	Peoples Gas	FPUC	Sebring Gas	**Florida Average**	**FCG Proposed**
3761: Mains - Plastic	40	75	75	45	59	**75**
3762: Mains-Steel	40	65	65	45	54	**65**
3801: Services – Plastic	42	55	55	40	48	**55**
3802: Services – Other/Steel	55	52	60	48	54	**60**

Please provide an explanation of what accounts for the wide variability between the four peer gas companies ASL estimates. For example, why does St. Joe and Sebring estimate a 45 year ASL for Account 3761 while FPUC and Peoples Gas estimate a 75 year ASL for the same account, a difference of 30 years?

[Staff's Second Data Request, filed May 23, 2025, Question No. 8]

Company Response:

FCG cannot explain the variability between the average service lives of St. Joe, Sebring, or Peoples Gas other than that found in the Commission orders of the associated last depreciation represcriptions. See also response to Interrogatory 37.

Respondent: Patricia Lee

INTERROGATORY NO. 37

37. Please refer to FCG's attachment to its response to Staff's 1st Data Request, Nos. 12 and 13, as well as the table below.

Average Service Life (Years)				
Account	FCG Currently Approved	FCG 2022 Study	Florida Average	**FCG 2025 Proposed**
3761: Mains – Plastic	75	65	59	**75**
3762: Mains-Steel	65	65	54	**65**
3801: Services – Plastic	55	50	48	**55**
3802: Services – Other/Steel	52	50	54	**60**

Given the Company's reliance on its peer gas companies for its ASL projections for many accounts, please explain why, for the above-referenced accounts, FCG is proposing and ASL that is higher than the Florida Average ASL among the peer utility group.

[Staff's Second Data Request, filed May 23, 2025, Question No. 9.a.]

Company Response:

FCG objects to the Interrogatory in that it restates and draws comparisons to the 2022 Depreciation Study, which was not approved nor is a witness in this proceeding supporting that prior study. Notwithstanding and without waiving this objection, FCG responds as follows:

a. In general, FCG relied on the range of average service lives of the peer Florida gas utilities, not the average. The beginning point in any depreciation review is the average

service life underlying the currently approved average remaining life. Depending on the retirement experience, movement within the range of industry average lives is considered within the range of reasonableness.

For Accounts 3761 and 3762, the average service lives underlying the current approved average remaining lives are 75 and 65 years, respectively. The current study recommends no change to those average service lives but does recommend a change in the mortality dispersion that better depicts the expected retirement pattern. The existing curves imply more retirements than are expected to be experienced in the future. The existing average service lives may be outside the average but 1) are currently approved thereby being reasonable, and 2) are within the range of average service lives of other Florida gas companies, and 3) are considered to continue to be in line with Company current life expectations.

For Account 3801, the average service life underlying the current approved average remaining life is 55 years. No change is proposed to the existing average service life or current curve shape at this time. The average service life may be outside the average of other Florida gas companies but 1) is currently approved thereby being reasonable, 2) within the range of average service lives of other Florida gas companies, and 3) is considered to continue to be in line with current life expectations.

For Account 3802, the average service life underlying the current approved average remaining life is 52 years. A slight increase in average service life to 60 years with a modification to the current curve shape are proposed as being in line with discussions with Company personnel and future expectations. The proposed life may be outside the

FPSC EXH NO. 27
ADMITTED

INTERROGATORY NO. 37, cont.

average but the range of lives is guiding. Any service life within the range should be considered reasonable. Additionally, given the current age of 34.5 years and no planning for the retirement of steel service lines, a slight increase in average service life is reasonable.

The Company is not however recommending any change to the average service life underlying the currently approved average remaining life of Account 3761. A 75-year service life was approved in the last proceeding and is proposed in this 2025 Study. Additionally, FPUC, another Chesapeake gas utility, also estimates a 75-year average service life for plastic pipe.

Respondent: Patricia Lee

FPSC EXH NO. 27
ADMITTED

INTERROGATORY NO. 38

38. Please refer to FCG's response to Staff's 1st data request, No. 2.a. FCG states, "FCG did not consider placement/experience bands for curve shape considerations." Please explain why FCG elected not to utilize placement/experience bands in the instant case, as was done in FCG's last depreciation study.

[Staff's Second Data Request, filed May 23, 2025, Question No. 10]

Company Response:

FCG objects to this request to the extent that it draws comparison to and restates by reference a component of the 2022 Depreciation Study, which was not approved by the Commission in Docket No. 20220069-GU nor is any witness in this proceeding sponsoring that study. Notwithstanding the objection, and without waiving, FCG states as follows:

There is no Commission requirement for utilizing placement/experience bands in a Company's depreciation study. The instant 2025 Study reviewed the average service life and curve shape underlying the currently prescribed average remaining life for each account along with the current average age, short term and historic retirement rates, company input, and then Ms. Lee applied her substantial depreciation experience. The purpose of the depreciation study is to estimate forward looking average lives, salvage values, reserve position, and resulting depreciation rates. See also response to Interrogatory 39a below.

Respondent: Patricia Lee

INTERROGATORY NO. 39

39. Please refer to Page 4 of FCG's 2025 Depreciation Study Narrative. FCG indicates that a review of the existing survivor curve for each account was performed to determine if a modification to the average service life is warranted based on the average age and actual or expected retirement experience.

a. Explain each element of FCG's process of analyzing average age distribution and aged retirement data to assess average service life selection in this case. Provide an example and any documentation showing how this process was completed.

b. For each account, did FCG prepare updated Original Life Tables of FCG's assets and application of percent surviving at each age interval to create graphical and/or mathematical Iowa curve analyses in support of average service life determinations? If not, explain why not.

[Staff's Second Data Request, filed May 23, 2025, Question Nos. 11.a. and 11.b.]

Company Response:

a) As noted in the 2025 Depreciation Study narrative, amended Exhibit PSL-2, page 7, FCG's continuing property record ("CPR") system is the basis for the average age of surviving investments for each account (Sch H, I, and J of the 2025 Depreciation Study Workbook). First, annual data for the 2021–2024 period, as well as the General Ledger, Fixed Asset System, and near-term planning were compiled. This data was reviewed and compared for accuracy and followed-up on all

discrepancies with Company personnel having knowledge of the property being studied and/or Company practices.

Each account's average retirement rate over the historic 2004-2024 period and recent 2021-2024 period along with the curve shape underlying the currently prescribed average remaining life were reviewed. This data, along with the January 1, 2025 calculated average age of the account's surviving investments, indicated whether a need for some modification to the curve shape underlying the currently approved average remaining life was needed. Retirement activity averaging less than 1% provides insufficient data to perform any meaningful statistical analyses results for life or salvage characteristics; therefore, it was necessary to rely on life characteristics for similar plant of other Florida gas utilities to make a complete analysis. The assumption is that the same type of plant, located in the same environment is likely to follow similar life patterns unless otherwise warranted by specific company planning. Average retirement rates were calculated for each account and compared to those implied retirements at the January 1, 2025 average age of the underlying account curve shape to determine if any modifications were warranted. If the proportion surviving at the current age implied more or less retirements than those experienced under the current curve, a change in curve shape was not necessarily proposed if the curve was considered indicative of future expectations.

The recommended average service life (projection life) and the January 1, 2025 average age for each account were used with the selected Iowa Curve life table to determine the average remaining life. The Life Tables used in the remaining life expectancy

FPSC EXH NO 27
ADMITTED

determinations were obtained from GTE-INC.[1] These are standard Iowa Curve tables that can also be replicated from other sources.[2] An example of the remaining life calculation is found in Ms. Lee's testimony, pages 33-34.

b) No. See response to Interrogatory 39a above.

Respondent: Patricia Lee

[1] The life tables obtained from GTE-INC are comprised of two volumes, each consisting of 646 pages, to voluminous to copy and attach.

INTERROGATORY NO. 40

40. Absent statistical or visual analysis of the data described in Question 11 above, please explain how FCG determined the appropriate ASL/survivor curve shapes for each account in the instant case. Please provide an example.

[Staff's Second Data Request, filed May 23, 2025, Question No. 12]

Company Response:

The Company presumes that this interrogatory is intended to refer to Interrogatory 39 above. As such, for this Interrogatory, the Company refers to the response to Interrogatory 39a.

Respondent: Patricia Lee

FPSC EXH NO. 27
ADMITTED

INTERROGATORY NO. 41

41. The 2025 Depreciation Study Narrative indicates that, for several accounts (Accounts 3762, 378, 3790, 3801, 380.2) low retirement rates from 2004 through 2024 (averaging less than one percent) makes statistical analysis of life and salvage factors meaningless and/or reliance on industry expectations necessary. Yet, in FCG's 2022 Depreciation Study, the utility did provide statistical analysis of both life and salvage factors and used such analysis, along with other information, to establish depreciation parameters. Please explain why long term low retirement rates makes such statistical analysis meaningless in 2025 but not so in 2022. **[Staff's Second Data Request, filed May 23, 2025, Question No. 13]**

Company Response:

FCG objects to the extent this interrogatory would require the Company to make assumptions about the analysis and rationale of the prior study that is not available in the public record of Docket No. 20220069-GU, is not otherwise available to FCG since its acquisition by CUC, and to the extent said study is not sponsored by any witness in this proceeding and was not otherwise approved by the Commission in the prior proceeding. FCG further objects to the extent that the 2025 Depreciation Study Narrative, amended Exhibit PSL-2, does not state that statistical analysis cannot be performed where there are miniscule retirement rates, just that the results of that analysis are not considered meaningful for life and salvage determinations. Statistical analysis only indicates how the account has lived in the past. If that history represents a minor retirement pattern, relying on those results as a projection to the future retirement of the surviving investments is meaningless. Other information including Company input and projections of other Florida gas utilities is necessary.

INTERROGATORY NO. 41, cont.

For Account 3762, the 2022 Depreciation Study conducted by Gannett Fleming and sponsored by Witness Allis included a statistical analysis on the combined steel and plastic mains accounts. There was however no information as to why the accounts were combined. According to that study, the data supported a longer life expectancy implying that the statistical analysis results were not relied on.

A similar situation exists with Account 378 which was combined with Account 379. The recommendation made by Witness Allis was for a longer service life based on reliance on industry life estimates. Ms. Lee has determined that the reasonable implication from this is that the statistical analysis results were not reliable.

In the 2022 Study sponsored by Witness Allis, Accounts 3801 and 3802 were also studied together and that study acknowledged increased life estimates. There was no information as to why the accounts were studied together other than an increase in life estimates was indicated, but that study indicates that there was a reliance on industry estimates, which Ms. Lee has reasonably interpreted to suggest that the statistical analysis was not meaningful.

INTERROGATORY NO. 42

42. Please provide an overview of the differences in methodology in the various components of FCG's proposed 2025 Depreciation Study and the 2022 Depreciation Study approved by the Commission in 2023.

[Staff's Second Data Request, filed May 23, 2025, Question No. 14]

Company Response:

FCG objects to the Interrogatory in its entirety. The 2022 Depreciation Study was not approved by the Commission nor is it sponsored by any witness in this proceeding.

Respondent: Patricia Lee

INTERROGATORY NO. 43

43. Assuming all other things equal (i.e. no new depreciation study), would the requested two-year amortization of the $27.3 million surplus lead to a higher depreciation expense and higher customer rates in FCG's next rate case than if the surplus were corrected using the remaining life technique? Please explain your answer.

[Staff's Second Data Request, filed May 23, 2025, Question No. 15]

Company Response:

FCG objects to this interrogatory to the extent it does not refer to the current iteration of Exhibit PSL-2, which is the depreciation study Ms. Lee is sponsoring for FCG in this proceeding. Amended Exhibit PSL-2, states the net reserve surplus is approximately $19 million. FCG further objects to the extent that the Interrogatory, as stated, requires the Company to apply an assumption that is not consistent with the facts in this case. Notwithstanding these objections and without waiving these objections, FCG agrees that correction of the reserve imbalance over the proposed 2-year period compared to correction through the remaining life rate design could, in a vacuum, result in an increased rate base and depreciation expenses (as compared to expenses during the two-year amortization period) in FCG's next rate case proceeding.

However, correction of the reserve imbalance through remaining life depreciation rates would take about 44 years, the composite remaining life of all FCG accounts. Correcting the reserve balance over a period shorter than the average remaining life provides a better chance of benefiting customers who previously overpaid for services by reducing depreciation expenses now through lower depreciation rates.

Respondent: Patricia Lee and Matt Everngam

FPSC EXH NO. 27
ADMITTED

INTERROGATORY NO. 44

44. Please provide an estimate, quantified in dollars, of the benefits customers would receive from the two-year amortization of the $27.3 million surplus (compared to remaining life technique), including:

a. An estimate of the difference between existing customer rates and the increased rates FCG would request without the amortization;

b. An estimate of the rate case expense for the near-term rate case FCG projects would be required absent the amortization;

c. Any other quantifiable benefit FCG believes customers would receive as a result of the two-year amortization.

[Staff's Second Data Request, filed May 23, 2025, Question No. 16]

Company Response:

FCG objects to this interrogatory to the extent it does not refer to the current iteration of Exhibit PSL-2, which is the depreciation study Ms. Lee is sponsoring for FCG in this proceeding. Amended Exhibit PSL-2, states the net reserve surplus is approximately $19 million.

a) Without completion of MFRs for the next rate case, FCG is unable to provide a reasonable estimate of the rates for its customer classes in the next rate case. However, FCG filed in March 2025 its 2025 forecasted earnings surveillance report. FCG's 2025 forecasted return on equity was 4.07% which was below the required midpoint return on equity of 9.50%.

INTERROGATORY NO. 44, cont.

b) A preliminary estimate of rate case expenses if FCG had to file a rate proceeding now is approximately $3.5 million. This estimate is preliminary and will vary depending upon the cost to retain experts and the length of the rate case proceeding.

c) As described by Witness Everngam, any depreciation expense reduction, consistent with that reflected in FCG's study, would put downward pressure on both interim and final rates in the next rate case. Current FCG customers would benefit in both instances. To the extent that any amortization of the reserve imbalance brings FCG's earnings back up into its authorized ROR range, that amortization would be acting as a bridge to provide FCG the ability to earn at or nearer its approved ROR until the required rate case documentation can be prepared for filing with the Commission. While, as previously discussed, this would not allow FCG to stay out for an extended period of time, it may still provide some delay to FCG's next case filing and the associated rate increase impacts to customers.

Furthermore, as the Commission has stated previously "the matching principle argues for a quick correction of any surplus; the quicker the better so that the ratepayers who may have overpaid would have a chance of benefitting". As there is a potential for future consolidation of FCG and FPU, it is advantageous in this case to proceed with a 2-year amortization period so that current FCG customers receive the benefit. This would avoid potential future intergenerational or intercompany inequities. See, Direct Testimony of Matt Everngam, at pages 6-7.

Respondent: Patricia Lee and Matt Everngam

FPSC EXH NO 27
ADMITTED

INTERROGATORY NO. 45

45. Please provide an estimate of the total cost of FCG's petition for approval of the 2025 Depreciation Study in the present docket. Does FCG intend to request recovery of that expense in connection with its next petition for rate increase?

[Staff's Second Data Request, filed May 23, 2025, Question No. 17]

Company Response:

The original cost of FCG's petition for approval of the depreciation study was $100,000. With the extended delays, discovery, and the now scheduled hearing, the projected cost is expected to exceed $500,000. FCG has not made a final determination as to whether it will request recovery of such costs in its next rate case.

Respondent: Matt Everngam

INTERROGATORY NO. 46

46. Please refer to Schedule B (marked as Exhibit PSL-2 in workbook) of FCG's 2025 Depreciation Study, specifically Account 3762: Mains-Steel. The following parameters for the account are proposed by FCG:

- Average Service Life = 65 years
- Average Age = 21.5 years
- Curve Shape = R4
- Average Remaining Life = 48 years

FCG provided the R4/65 life table as an attachment to its response to Staff's First Data Request, Question No. 3. At an average account age of 21.5 years, the R4/65 life table estimates an average remaining life of 43.69 years, yet FCG proposes an average remaining life of 48 years in the instant study. Please explain.

[Staff's Third Data Request, filed June 18, 2025, Question No. 1]

Company Response:

FCG objects to this interrogatory to the extent it does not reflect what is contained in in the current iteration of Exhibit PSL-2, which is the depreciation study Ms. Lee is sponsoring for FCG in this proceeding. Exhibit PSL-2, reflects a Curve Shape of R2.5. As a result of responding to OPC's Third Set of Interrogatories, corrections were made to the Average Age and Remaining Life of this account. The resultant Average Age and Remaining Life for Account 3762 are 21.7 years and 45 years, respectively. See attachment PSC ROG 2-6 for the R2.5-65 Life Table.

FCG's Response to Staff's 3rd ROGs, Nos. 47-57

(with attachments)

GENERAL OBJECTIONS

1. FCG objects to the extent that certain requests are vague. FCG has made a good-faith and reasonable attempt to ascertain the meaning of such requests and provide a response based on such attempt, but FCG responds without waiving its objection to the vagueness of the request.

2. FCG does not waive any objections it may have as to admissibility, authenticity, or relevancy of the information provided in response to these Interrogatories.

3. Finally, FCG objects to the use of numerous subparts for several of the interrogatories. To the extent that a discovery limitation may be set for this proceeding, the Company will consider each subpart to be a separate interrogatory where appropriate.

SPECIFIC OBJECTIONS

The General Objections set forth above are adopted and incorporated by reference in each specific objection included in the responses outlined below.

INTERROGATORY NO. 47

INTERROGATORIES

47. In the event the Commission approves FCG's request for the 2-year amortization of its calculated $22.4 million reserve surplus, please explain if the 2-year amortization would occur on a monthly, quarterly, or annual basis on FCG's books.

Company Response:

In the event the Commission approves FCG's request for the 2-year amortization of its calculated $19.2 million reserve surplus from the amended Exhibit PSL-2, the 2-year amortization would occur on a monthly basis on FCG's books retroactive to January 1, 2025.

Company Respondent: Matt Everngam

INTERROGATORY NO. 48 (a-c)

48. For the months of January – April 2025, assuming FCG's request for the 2-year amortization of its calculated $22.4 million reserve surplus is approved as filed, please provide:

a. The accounting entries (by month) that show the depreciation expense booked to each account.

b. The accounting entries (by month) that detail the amortization of the reserve surplus.

c. The total ending reserve balance (by month) once all accounting entries are complete.

Company Response:

a. The accounting entries (by month) that show the depreciation expense booked to each account is the normal accounting entry to book depreciation expense which is debit to depreciation expense and credit to accumulated depreciation by FERC account. See attachment "Staff ROG 3-48 and 49," tab 48a for details by FERC account based on currently approved depreciation rates.

b. The accounting entries (by month) that detail the amortization of the $19.2 million reserve surplus from the amended Exhibit PSL-2 is the normal accounting entry to book amortization of reserve surplus which is debit to accumulated depreciation by FERC account and credit depreciation expense. See attached See attachment "Staff ROG 3-48 and 49," tab 48b for details by FERC account

c. See attachment "Staff ROG 3-48 and 49," tab 48c.

INTERROGATORY NO. 49(a-b)

49. For the months of January – April 2025, assuming FCG's request for the 2-year amortization of its calculated $22.4 million reserve surplus is NOT approved, and the remaining life technique is used instead of the proposed 2-year amortization, please provide:

a. The accounting entries (by month) that show the depreciation expense booked to each account.

b. The total ending reserve balance (by month) once all accounting entries are complete.

Company Response:

a. See attached "Staff ROG 3-48 and 49" tab 49a.

b. See attached "Staff ROG 3-48 and 49" tab 49b.

Company Respondent: **Matt Everngam**

INTERROGATORY NO. 50

50. Please refer to FCG's response, filed 4/30/2025, to Staff's First Data Request, No. 23. The Company states that customers will benefit from a short-term amortization through lower depreciation expenses. Please explain if there will be any direct impact on FCG's current customer base rates if the 2-year amortization of FCG's calculated reserve surplus is approved (or denied).

Company Response:

As any changes to customer base rates would need to be approved in a rate case, current customer base rates will not be impacted whether or not the proposed amortization of FCG's calculated reserve surplus is approved. The approval or denial of any amortization period would have an impact on rates in a future rate case.

Company Respondents: **Patricia Lee and Matt Everngam**

INTERROGATORY NO. 51

51. Please refer to FCG's response filed 6/11/2025 to Staff's Second Data Request, No. 15. FCG states that a 2-year amortization of the reserve surplus would result in an increase to rate base and depreciation expenses, and ultimately, customer rates in FCG's next base rate proceeding.

a. Has FCG estimated the impact the proposed 2-year amortization will have on customer's rates in FCG's next base rate case?

b. If not, please explain why not.

Company Response: Please see Company's responses to Interrogatories Nos. 43-44 of Staff's Second Set of Interrogatories.

Company Respondent: Matt Everngam

INTERROGATORY NO. 52

52. Please refer to witness Everngam's direct testimony, page 7, lines 12-21. Witness Everngam states that an approval of a 2-year amortization would not allow FCG to delay a rate case for "an extended period of time," however it "may still provide some delay to FCG's next rate case filing and the associated rate increase impacts to customers." If the requested 2-year amortization of FCG's calculated reserve surplus is approved, does the Company have an estimation of when FCG will file its next base rate case?

Company Response:

The Company anticipates the need to file its next base rate case within the next year.

Company Respondent: Matt Everngam

INTERROGATORY NO. 53

53. If the 2-year amortization of FCG's calculated reserve surplus is approved as filed, please explain whether the customer benefit from a potential delay of a rate case as indicated by witness Everngam could possibly be outweighed by the higher depreciation expense and higher customer rates in FCG's next base rate case due to the increased rate base as a result of the amortization, as the Company has stated in its response to Staff's Second Data Request, No. 15?

Company Response:

Please see the Company's response to Interrogatory No. 43 of Staff's Second Set of Interrogatories. Additionally, as noted in Witness Everngam's testimony, amortization of excess reserve that is included in the Company's historic test year would put downward pressure on interim rates, benefiting current customers in a more direct manner than remaining life technique

Company Respondent: Patricia Lee and Matt Everngam

INTERROGATORY NO. 54

54. Does FCG agree that the current amortization of investment tax credits (ITCs) and any flow back of excess deferred income taxes (EDITs) should be revised to reflect the depreciation rates and amortization schedules ultimately approved by the Commission in this docket?

Company Response:

Yes, the flow back of excess deferred income taxes must be revised to reflect the depreciation rates and amortization schedules ultimately approved by the commission in this proceeding. At the time of filing, FCG does not have any investment tax credits.

Company Respondent: Matt Everngam and Rochelle Brown

INTERROGATORY NO. 55(a-d)

55. Does FCG recognize and agree with the following statements:

a. Revising a utility's book depreciation lives generally result in a change in its rate of ITC amortization and flow back of EDITs in order to comply with the normalization requirements of the Internal Revenue Code (IRC or Code) set forth in Federal Tax Regulations under the Code sections, Sections 168(f)(2) and (i)(9), former IRC Sections 167(l), and 46(f), and Section 203(e) of the Tax Reform Act of 1986 (the Act).

b. Former IRC Section 46(f)(6) of the Code indicate that the amortization of ITC should be determined by the period of time actually used in computing depreciation expense for ratemaking purposes and on the regulated books of the utility.

c. While Section 46(f)(6) was repealed, under IRC Section 50(d)(2), the terms of former IRC Section 46(f)(6) remain applicable to public utility property for which a regulated utility previously claimed ITCs.

d. If the Company changes the remaining lives of depreciable property, it is also important to change the amortization of ITCs and EDITs to avoid violation of the provisions of IRC Section 50(d)(2) for ITCs, and IRC Section 168(i)(9), former section 167(l), and section 13001(d) of the Tax Change and Jobs Act for EDITs, and their underlying Treasury Regulations.

Company Response:

FCG objects to these requests to the extent that they are framed as requests for admissions but posed as Interrogatories. Furthermore, pursuant to Rule 1.370, FRCP, to the extent a request for admission asks for statements or opinions of fact or the application of law to fact, including the

INTERROGATORY NO. 5 (a-d), cont.

genuineness of any documents described in the request, copies of such documents are to be provided with the request. Copies of the referenced former rules were not provided. FCG further objects to the extent each subsection asks a question about provisions of the IRC that are no longer in effect and therefore, any response to such questions is not likely to lead to the discovery of admissible evidence in this proceeding. Notwithstanding and without waiving this objection, FCG states as follows:

a. Yes, admit.

b. Yes, it did. However, 26 U.S.C. 46 (f)(6) has been repealed. Furthermore, at the time of the filing, FCG does not have any investment tax credits.

c. Yes, however at the time of the filing, FCG does not have any investment tax credits.

d. Yes.

Company Respondent: Matt Everngam and Rochelle Brown

INTERROGATORY NO. 56

56. Has FCG performed a year-end 2025 estimate of its earnings? If so, please provide that result including calculation.

Company Response:

FCG filed in March 2025 its 2025 forecasted earnings surveillance report. FCG's 2025 forecasted return on equity was 4.07% which was below the required midpoint return on equity of 9.50%.

Company Respondent: **Matt Everngam**

FPSC EXH NO. 28
ADMITTED

INTERROGATORY NO. 57(a-c)

57. Please refer to FCG witness Lee's Direct Testimony, page 3, for the questions below:

a. During her tenure at the Florida Public Service Commission,

(i) Please provide an estimate of the number of depreciation studies that the witness reviewed or supervised the review of since 1994?

(ii) Please provide an estimate of how many times the witness or PSC employees under her supervision recommended using remaining life approach to treat the depreciation imbalance identified in these studies discussed in Question 56(a)(i)?

(iii) Please provide an estimate of how many times the witness or PSC employees under her supervision recommend using a short-period amortization approach to treat the deprecation imbalance identified in these studies discussed in Question 56(a)(i)?

b. Among all the depreciation studies the witness prepared subsequent to February 2012,

(i) How many depreciation studies has the witness prepared?

(ii) How many times did the witness recommend using remaining life approach to treat the depreciation imbalance identified in these studies discussed in Question 56(b)(i)?

FPSC EXH NO. 28
ADMITTED

(iii) How many times has the witness recommended using a short-period amortization approach to treat the depreciation imbalance identified in these studies discussed in Question 56(b)(i)?

c. What is the most common method used to address reserve imbalances (surplus or deficit) in Florida since 1994 for gas utilities under the PSC's jurisdiction (i.e. remaining life technique, amortization, etc.)?

Company Response:

57a(i) Please refer to Revised Exhibit PSL-1 attached to the witness' testimony. Also, attachment Staff ROG 3-57a(i) is a list of dockets witness Lee participated, reviewed, or supervised the review of depreciation related issues.

57(a)(ii) Remaining life rates amortize an account reserve imbalance whether surplus or deficit over the remaining life of the given account. The issue is whether a reserve imbalance should be amortized over a period shorter than the remaining life of the given account. The remaining life rate design has been used in Florida since the late 70s.

Assuming staff is seeking information as to how many times the witness has recommended an approach to addressing a reserve imbalance similar to the approach recommended here, the answer is not that simple. First, it would be unduly burdensome for the witness to revisit some 30+ years of several employees subject to her supervision and then review every case in which those employees were charged with handling a depreciation study that resulted in a reserve imbalance. Moreover, recommendations of staff under her supervision is not likely to lead to the discovery of admissible evidence without also taking into consideration that Ms. Lee herself reported to a

FPSC EXH NO. 28
ADMITTED

supervisor, Mr. David Dowds, who one might expect had influence of ultimate recommendations submitted in proceedings.

As for Ms. Lee specifically, it is important to note that every depreciation study is different and not all depreciation studies result in a reserve imbalance of such significance. For instance, consider the 2011 Sebring Depreciation Study, which took place in Ms. Lee's last year at the Commission when she was supervising the depreciation group. That study was a "staff assisted" study. The results were that Sebring's book reserve was greater than its theoretical reserve. In that case, Commission staff recommended that: "When negative or positive imbalances occur, corrective transfers among accounts should be made as quickly as possible, unless this action prevents the Company from earning a fair and reasonable return on its investments." (Docket No. 20110233-GU, Staff Recommendation, page 5.) The imbalance in that case was, however, approximately $100,000 or so, so the imbalance could be addressed by transfers between accounts. To be clear, reserve transfers between accounts **are** an amortization of a surplus in one account and amortization of a deficit in another by the same amount. The amortization is shorter than the average remaining life. On the other hand, there were cases where Ms. Lee did recommend amortization over the remaining life, given the circumstances of a case. For instance, consider the 2009 Progress (now Duke) rate case and repowering project limited proceeding. In that case, Ms. Lee recommended use of the remaining life approach for a significant imbalance. (Interestingly enough, in that same case, OPC asked for amortization of the $721M over 4 years.) Ultimately, that case resulted in a settlement approved by the Commission. Order No. PSC-2010-0398-S-EI. Then, there is the FPUC-Marianna depreciation study, Docket No. 19930453-EI, which the Commission noted: "Our Staff's review indicates that there a number of reserve imbalances existing which result primarily from differences in current and past projections. According to our

Staff such deficiencies should be recovered as fast as possible, unless such recovery prevents the Company from earning a fair and reasonable return on its investments." Order No. 1993-1389-FOF- EI, at page 1. Transfers between accounts were able to address the imbalance in that case for the most part. Then, there is the 2009 FPL rate case, Docket 20080677-EI. That case was ultimately resolved by a settlement agreement, but before a settlement was filed, staff had prepared both a post-hearing recommendation and a subsequent recommendation on a motion for reconsideration. In the first recommendation, which was the post-hearing recommendation filed December 23, 2009, staff recommended as follows for Issue 19F:

> Staff recommends that each account's book reserve be brought to its calculated theoretically correct level. Staff recommends that $314.2 million of the bottom line reserve surplus of $1,208.8 million be used to offset the unrecovered costs associated with the capital recovery schedules of near-term retiring investments recommended in Issue 19A. **For the remaining reserve surplus of $894.6 million, staff recommends that $500 million be amortized over a 4-year period, with the remaining $394.6 million amortized over the remaining life of the embedded investments of 22 years.** Such actions result in an annual depreciation expense credit of $142.9 million and debit to the bottom line reserve surplus. As part of FPL's next depreciation study, to be filed no later than March 16, 2013, FPL's reserve position will be reviewed and assessed for any other action. (P. Lee, Maurey)

In the latter staff recommendation, issued July 27, 2010, staff (including Ms. Lee) had recommended the following at pages 16-17:

> If the Commission agrees with each of staff's recommendations in Issues 2 through 6, there will be a net increase in FPL's revenue requirements, which could result in a base rate increase to be paid by consumers beginning in 2010. FPL's proposal to use the reserve surplus to offset a change in revenue requirements would mean that customers would not see a base rate increase. However, using the reserve surplus to offset the increased revenue requirements could more rapidly increase rate base, potentially

FPSC EXH NO. 28
ADMITTED

> resulting in a larger base rate increase in the future. Staff agrees with the approaches of FPL, FIPUG and OPC to offset the change in revenue requirements against the reserve surplus. **In staff's opinion, the stability of rates for FPL customers and the stability of revenue to FPL are beneficial to both customers and to the Company in this case.** (emphasis added).

In sum, over the course of Ms. Lee's 37-year career, she has recommended what she believed to be the correct approach in different cases given the circumstances presented and record established. Thus, an estimate of how many times Ms. Lee recommended a particular approach is relatively meaningless in that it does not take into account the scenarios and facts presented. That said, in the 50+ depreciation studies or depreciation-related issues that Ms. Lee worked on while at the PSC, she likely recommended utilization of the remaining life amortization approach in something like 95+% of the cases. Additionally, the majority of the depreciation studies involved recommending corrective reserve transfers between accounts that, as discussed above, are an immediate amortization of reserve imbalances rather than amortization over the remaining life of the given account(s). For cases since Ms. Lee left the Commission, there have been few with a reserve imbalance of significance; thus, she's recommended using amortization over less than the remaining life only once.

57(a)(iii) See response 57(a)(ii).

57b(i) See response 57(a)(i).

57b(ii) See response to 57(b)(ii).

57b(iii) See response 57(b)(ii).

FPSC EXH NO. 28
ADMITTED

INTERROGATORY NO. 57, cont.

57(c) The most common method the Commission has used in addressing reserve imbalances in Florida since 1994 is a combination of remaining life depreciation rate design and amortization. Reserve transfers between accounts, an established policy of the Commission, are a form of amortization. Reserve imbalances associated with the amortization of the general plant accounts have been approved to be recovered over a period of time shorter than the associated remaining life. Whether for gas or electric companies, the policy should be the same. For instance, electric companies frequently have capital recovery schedules in which unrecovered costs, inclusive of any reserve imbalance, is recovered over a period shorter than the average remaining life.

FCG Response to Staff's 4th ROGs, Nos. 58-68

(with attachment)

INTERROGATORY NO. 58

INTERROGATORIES

58. Not including reserve transfers between individual accounts, what is the most common method used to address **net total** reserve imbalances (surplus or deficit) since 1994 for gas utilities under the Florida PSC's jurisdiction (i.e. remaining life technique, amortization, etc.)?

Company Response:

To Ms. Lee's knowledge, there have been relatively few times since 1994 in which the Commission has addressed the net total reserve imbalance for gas utilities under its jurisdiction. The Commission often uses reserve transfers and, in some cases, a mix of remaining life and amortization to address more significant imbalances. Most recently, in Docket No. 20230023-GU, the Commission used remaining life technique to address a reserve surplus for Peoples Gas. In Docket No. 20220069-GU, the Commission approved an RSAM mechanism for FCG, which, in simplified terms, amortized approximately half of a reserve surplus over an estimated 4-years subject to adjustments by the Company. This amortization, based on the RSAM mechanism actually resulted in a two-year amortization period for that reserve surplus. In Docket No. 20220067-GU, the Commission directed the following combination of corrective measures:

> We approve using the remaining life technique for correcting the reserve imbalance of $19.7 million identified in Section VI for FPUC's Distribution and non-amortizable General Plant accounts. We find that amortizing the $1,444,096 reserve deficit associated with the amortizable accounts (vintage accounting) over a 5-year period is appropriate. Starting on January 1, 2023, this results in an annual amortization expense to customers of $288,819 associated with the vintage group accounts over a five-year period.

INTERROGATORY NO. 58, cont.

Order No. 2023-0103-FOF-GU, at page 26.

Prior to 1994, the Commission did address a reserve deficit for Miller Gas in 1984. That deficit was $19,024 and the Commission directed amortization of $15,881 over a 20-year period and $3,143 over a 5-yar period. See Order No. 13528, issued in Docket No. 19830582-GU.

What corrective measures are appropriate is, and should be, less about a specific policy, but what is appropriate under the circumstances presented in a case.

There is no question that remaining life depreciation rates will recover or allocate any reserve imbalance over the remaining life. When there is a substantial reserve imbalance, action in addition to the use of remaining life depreciation rates is called for. In this case, current customers are effectively subsidizing future customers. This is because the reserve imbalance has been accrued at higher rates than necessary under the parameters proposed by FCG. If no separate action is taken, the reserve surplus will be allocated over approximately 43 years. This time period is too long in my opinion.

Company Respondent: Patricia Lee

INTERROGATORY NO. 59

59. Please refer to FCG witness Lee's Amended Direct Testimony of November 4, 2025, page 30, lines 19-21. Witness Lee states, "Commission Order No. PSC-2019-0433-PAA-GU found that when a significant imbalance is observed, reserve transfers or amortization may be necessary due to magnitude." In the witness' opinion, please identify what the magnitude (as a percent of theoretical reserve) a reserve surplus must be that would warrant an amortization.

Company Response:
Witness Lee does not believe that there is one clear answer where an amount of a reserve imbalance "must" warrant amortization. Some Public Advocates have opined that the imbalance should be 10% of the theoretical reserve for amortization to be considered. NARUC states that if a "material" imbalance exists, amortization or remaining life are two common options for consideration. The term "material" is an accounting term. Ms. Lee is not an accountant and does not claim to be one.

In Florida, the Commission has directed a regulated entity to amortize an amount as small as $43,553, which represented a portion of a reserve surplus. See, Order No. 13495, issued in Docket 19830577.

Company Respondent: **Patricia Lee**

INTERROGATORY NO. 60

60. Does FCG agree that the two year amortization-related surplus amount taken out of the depreciation reserve will increase depreciation rates (and the resulting expense) in FCG's next depreciation study, compared with what the depreciation rates (and the resulting expense) would be if the surplus amount is not removed from the depreciation reserve? If not, please explain your response.

Company Response:
Yes, however with any depreciation study, lives and salvage values are revised, so the extent of any increase in resulting depreciation rates, if there are any, is unknown. The customers have received the benefit of the reversal of depreciation expense through amortization of the excess, and the delay of the need for a rate increase. The customers are back to zero after the amortization of excess reserve and accordingly will not be paying for depreciation expense twice.

Company Respondent: Patricia Lee and Matt Everngam

INTERROGATORY NO. 61 (a-b)

61. Please refer to Staff's 3rd set of Interrogatories, No. 50. FCG states, "As any changes to customer base rates would need to be approved in a rate case, current customer base rates will not be impacted whether or not the proposed amortization of FCG's calculated reserve surplus is approved." [emphasis added]

a. Does the Company agree that the reserve amount is comprised of depreciation expense already paid by customers?

b. Absent a corresponding change (reduction) to customer rates, and all other things being equal, please show by order of math, how any surplus amount removed from the reserve via amortization would not have to be recovered again from FCG's customers in the future through higher depreciation rates.

Company Response:

a. The Company generally agrees that the existence of a reserve surplus is an indication that depreciation rates are currently or historically have been too high based on life and salvage factors now viewed as being appropriate. As explained in Witness Everngam's rebuttal testimony, depreciation expense is one component in the overall revenue requirement. When a Company recovers less than its revenue requirement for its cost to serve, as FCG currently is as shown in its recent surveillance reports, revenues are not necessarily enough to cover the expenses accrued and booked.

In a theoretical example, if depreciation was recovered initially in base rates, then the excess reserve amortization is returned to customers through the avoidance or

delay of the rate increase and reduced depreciation expenses. Customers are then made whole and have essentially not paid for that depreciation expense. After the amortization of the excess is completed, the customers are back to zero and will not have paid for depreciation twice when it is ultimately expensed in the future at the appropriate depreciation rate.

b. FCG's calculated perceived reserve surplus is based on the lives and salvage values it proposes as being appropriate at this time. It is the accumulated amount of depreciation expenses that depreciation rates, both current and in the past, have produced. If this amount is reduced, depreciation rates will more than likely increase because the numerator in the depreciation rate formula (net plant) will have decreased indicating more is needed to be depreciated. However, depreciation expense is only one component in the Company's cost to serve customers. If the Company has received recovery of depreciation expense through base rates, the customers then get the benefit of the reversal of depreciation expense through amortization of the excess and the delay in the need to raise customers rates. Customers have then not paid for the depreciation expense. See also the response to (a) above.

For example, assume the following:

Depreciation expense recovered in base rates $500,000

Amortization of excess depreciation expense, avoidance of a base rate increase ($500,000)

INTERROGATORY NO. 61 (a-b), cont.

Rate base is now corrected, and future depreciation over some period of time will be $500,000, but customers have only paid for it once. During the time that the excess depreciation existed, the Company did not earn a return on rate base, because it was understated at the time rates were set. There is no mechanism to recover that period of time, so the shorter the excess is amortized, the sooner the rate base will return to the level that it should be. It also ensures that more likely the customers who paid for the excess depreciation, are the ones that receive the benefit of the amortization or avoidance of a rate increase.

Company Respondents: Patricia Lee and Matt Everngam

INTERROGATORY NO. 62

62. Please refer to Staff's 3rd set of Interrogatories, No. 52, where the Company indicated that it is expected to file its next rate case "within the next year." Does the Company intend to file a new depreciation study as part of its up coming rate case?

Company Response:
If the Company's current depreciation study is approved by the Commission, the Company would not intend to file a new depreciation study. If the depreciation study is not approved or approved under altered terms, the Company would then reevaluate whether or not there is a need for a new depreciation study.

Company Respondent: **Matt Everngam**

INTERROGATORY NO. 63

63. Please refer to FCG's Amended 2025 Depreciation Study of November 4 2025, page 7. In the third paragraph the Company writes, "FCG has identified a reserve surplus of $19.2 million that it proposes to amortize over the years 2025 and 2026. This action allows a return to the matching principle and correction of intergenerational inequities." Please fully explain the concept of relieving intergenerational inequities by transferring customer value (depreciation expense that customers have already paid) to Company shareholders, which has the direct effect of customers having to pay for that depreciation and return twice no matter the generation of customer base.

Company Response:

A reserve imbalance, whether a surplus or a deficit, represents a violation of the matching principle and creates intergenerational inequities among customers. In the case of a surplus, depreciation expense for past and current customers, has been overstated relative to the actual service lives and salvage values of the assets. If this imbalance is not corrected, future customers will benefit from artificially low depreciation rates, effectively being subsidized by prior generations of customers.

The proposed amortization of the $19.2 million reserve surplus over 2025 and 2026 corrects the reserve to the appropriate level based on updated life and salvage estimates. This adjustment ensures that depreciation expense is properly aligned with asset usage, restoring compliance with the matching principle and reducing inequities across customer generations.

See also response to Interrogatory 61.

Company Respondent: Patricia Lee and Matt Everngam

INTERROGATORY NO. 64 (a-c)

64. Please refer to Commission staff witness Kunkler's Direct Testimony, Exhibit EAK-4, where the witness provided two options to address the reserve surplus that he identified: Proposal (RL) and Proposal (AMORT).

a. In the event that Proposal (RL) is approved by the Commission, please identify the following:

i) The benefits, if any, to the Company.

ii) The detriments, if any, to the Company.

iii) The benefits, if any, to the customers.

iv) The detriments, if any, to the customers.

b. In the event that Proposal (AMORT) is approved by the Commission, please identify the following potential impacts:

i) The benefits, if any, to the Company.

ii) The detriments, if any, to the Company.

iii) The benefits, if any, to the customers.

iv) The detriments, if any, to the customers.

c. Given that FCG anticipates to file its next base rate case within the next year (see FCG's Response to Staff's 3rd Set of Interrogatories, No. 52), if Proposal (AMORT) is approved by the Commission, how many months would this decision possibly defer FCG's filing of its next rate case?

Company Response:

a. If the Commission approves the Remaining Life proposal:

INTERROGATORY NO. 64 (a-c), cont.

i) There are no benefits to the Company under this proposal.

ii) The detriments to the Company include the correction of a reserve imbalance over a 40-year period, intergenerational inequities between customers, an understated rate base and the Company's ability to earn a fair return on the appropriate rate base, and continued inability to earn within its authorized rate of return for 2025 and 2026.

iii) The benefits to the customers would be artificially low depreciation rates, effectively subsidizing future generations of customers. Not paying for a return on the appropriate level of rate base to the Company.

iv) The detriments to the customers include not paying their fair share of depreciation expenses, which perpetuates intergeneration inequities through revenues. Depreciation expense has been over accrued for past customers; while future customers get the benefit.

b. If the Commission approves the AMORT proposal:

i) The benefits to the company include return to the matching principle, reduction of intergenerational inequities between customers, timely correction of the reserve imbalance, and reduction in depreciation expenses for 2 years. The Company is able to earn its fair return on its investments going forward. It is able to delay a final rate increase to customers until 2027.

ii) There are no detriments to the Company.

iii) The benefits to the customers have included a postponed rate case as this depreciation case has played out and associated costs reduced intergenerational inequity going forward, and timely correction of the reserve imbalance.

iv) The detriments to customers would be minimized. Although depreciation expense has been incurred at an excess level, by amortizing that excess as quickly as possible, current customers who paid for the excess would be provided the return of that excess through lower depreciation rates.

c. FCG is currently evaluating when the Company will file its next rate case. Pursuant to Rule 25-7.140, Florida Administrative Code, the Company will notify the Commission in writing at least 60 days prior to filing its petition for a general rate increase.

Company Respondent: Patricia Lee and Matt Everngam

INTERROGATORY NO. 65

65. Please refer to FCG's Amended 2025 Depreciation Study.

a. On Page 1 of this Study, FCG recommended an implementation date of January 1, 2025 for the revised depreciation rates set forth in the study. Please identify the following if an implementation date of January 1, 2026 is utilized:

i) The benefits, if any, to the Company.

ii) The detriments, if any, to the Company.

iii) The benefits, if any, to the customers.

iv) The detriments, if any, to the customers.

b. Please identify the following if the instant docket is deferred and consolidated with FCG's filing of its next base rate case:

i) The benefits, if any, to the Company.

ii) The detriments, if any, to the Company.

iii) The benefits, if any, to the customers.

iv) The detriments, if any, to the customers.

Company Response:

a. If an implementation date of January 1, 2026 is utilized:

i. There are no benefits to the Company.

ii. A January 1, 2026 implementation date would delay the appropriate depreciation expense treatment to plant which was reviewed in the current depreciation study. The reserve imbalance may continue to grow during this time and a delay in implementing lower deprecation rates and delayed amortization of the reserve imbalance may likely

increase interim rates that will be requested in the next rate case to customers. A new implementation date would necessitate an update of FCG's depreciation study, including investment, reserve, net salvage, activity for each account. Moreover, the Company would determine the necessary changes, if any, to its proposed average remaining lives or net salvage values. Also, there would be an additional cost to prepare the updated study.

iii. Customers would continue to receive the benefit of not paying a return on the appropriate level of rate base, plus future customers may get a benefit of not paying for their appropriate level of depreciation expense, because current customers would continue to pay for a higher level of depreciation expense.

iv. The reserve imbalance would continue to grow during this time and a delay in implementing lower deprecation rates and delayed correction of the reserve imbalance would likely increase interim rates that will be requested in the next rate case to customers. The further delay to correct these intergenerational inequities, the more future rate payers will pay.

b. If the instant docket is deferred and consolidated with FCG's filing of its next base rate case:

i. There are no benefits to the Company.

INTERROGATORY NO. 65, cont.

ii. Deferring and consolidating a depreciation study with the next rate case would necessitate an update of FCG's depreciation study, including investment, reserve, net salvage activity for each account. Moreover, the Company would determine changes, if any, that information resulted in changes to its proposed average remaining lives or net salvage values. Also, there would be an additional cost to prepare the updated study.

iii. Customers would continue to receive the benefit of not paying a return on the appropriate level of rate base, plus future customers may get a benefit of not paying for their appropriate level of depreciation expense, because current customers would continue to pay for a higher level of depreciation expense through existing base rates.

iv. The reserve imbalance would continue to grow during this time and a delay in implementing lower deprecation rates and delayed correction of the reserve imbalance would likely increase interim rates that will be requested in the next rate case to customers. The further delay to correct these intergenerational inequities, the more future rate payers will pay.

Company Respondent: Patricia Lee and Matt Everngam

INTERROGATORY NO. 66(a)

66. Please refer to OPC witness Dunkel's Direct Testimony, pages 9, lines 9-11 and page 10, lines 1-6 for the following questions. Witness Dunkel states:

> "In a rate case, the dollar amount of the Required Net Operating Income is calculated by multiplying the Commission-approved rate of return times the amount of the Net Rate base. If the Net Rate base is higher, the dollar amount of the Required Net Operating Income is higher. To see the approximate impact of taking $22,391,064 out of the Depreciation Reserve, the calculation below uses the rate of return and Expansion Factor [for income tax] approved in the prior FCG case, Docket No. 20220069-GU."

This is Figure 2 from page 10 of the Dunkel Direct testimony
Adjusted for the FCG November 4, 2025 Revised Filing

Supplemental Figure 2

	Hypothetical Utility Normal	Deduct $19.2 Million From Reserve		Difference
Utility Plant In Service	700,000,000		700,000,000	
Depreciation Reserve	200,000,000	- 19,244,380	180,755,620	
Net Utility Plant	500,000,000		519,244,380	19,244,380
	Rate of Return			6.44%
	Required Net Operating Income			$ 1,239,338
	Revenue Expansion Factor [For Income Taxes]			1.3527
	Increase from removing $22.3 M from Reserve			$ 1,676,453

*Figure obtained from OPC Witness Dunkel's revised calculation to Figure 2 on Page 10 of his November 5, 2025 testimony. (DN 15040-2025)

a. Does FCG agree that, all other things equal, a full amortization of the Company's calculated $19.2 million surplus would increase FCG's rate base by the same amount? If not, please explain why not.

INTERROGATORY NO. 66(a), cont.

b. Assuming a (future) approved rate of return of 6.44% (similar to what was approved in FCG's last rate case), and all other things being equal, does FCG agree with the statement below? If not, please provide calculations showing why not.

FCG's required net operating income would be approximately $1.2 million higher per year ($19.2 million X 6.44% = $1.2 million) if a 2-year amortization is utilized to address the $19.2 million reserve surplus instead of the remaining life technique.

c. Assuming a (future) approved revenue expansion factor of 1.3527 (similar to what was approved in FCG's last rate case) and all other things being equal, does FCG agree with the statement below? If not, please provide calculations showing why not.

FCG's rates charged to customers would be approximately $1.7 million higher per year ($1.2 million X 1.3527 = $1.7 million) if a 2-year amortization is utilized to address the $19.2 million reserve surplus instead of the remaining life technique.

Company Response:

The responses to a, b and c, need to be looked at differently rather than with just these scenarios because responses to each question can be misleading in terms of all facts that should be looked at when making a determination of what is appropriate in this depreciation study. However, in response to a., yes rate base would increase to the appropriate level of rate base. Prior rate base has been understated. In response to b. and c. Yes, the NOI would be appropriately higher because

INTERROGATORY NO. 66(a), cont.

the Company would be entitled to earn its return on the appropriate level of rate base and the resulting impact to rate relief on that same rate base would be higher. Customers will not have paid for depreciation expense twice, and will not have earned a return on the rate base twice, or at a level that is not appropriate. FCG's understanding is that correcting the reserve imbalance based on results from this depreciation study represents the action necessary to recognize an accurate depreciation reserve and rate base on the Company's books. Based on the logic of OPC witness Dunkel's Direct Testimony stated in the question, the chart below illustrates an actual current underpayment in rates from customers due to a net rate base that is currently understated by the reserve imbalance surplus.

Current Net Plant per 6/30/2025 ESR	
Plant in Service	$ 685,672,614
Accum Depr & Amort	$ (212,749,295)
Net Plant in Service	$ 472,923,319
Proforma Net Plant Adjusted for Excess Amortization	
Plant in Service	$ 685,672,614
Accum Depr & Amort	$ (212,749,295)
Reserve Surplus	$ 19,244,380
Net Plant in Service	$ 492,167,699
Excess Reserve Adjustment	**$ (19,244,380)**
Rate of Return	6.44%
Required NOI	$ (1,239,338)
Revenue Expansion Factor	1.3527
Annual Revenue Requirement Deficiency	**$ (1,676,453)**

The Company's annual under-earning of $10.81 million as noted in Witness Everngam's rebuttal testimony, based on 06/30/2025, is based on a rate base that has not been corrected for the reserve

INTERROGATORY NO. 66(a), cont.

imbalance. The additional revenue requirement, using Mr. Dunkel's logic, that the Company is not recovering its fair rate of return on the actual understated rate base is approximately $1.67 million annually. Thus, the overall current benefit to customers on an annual basis is approximately $12.48 million. See table below:

Annual Under-Recovery as of 6/30/2025		
Earnings Below Mid-Point	Earnings on Rate Base Understatement	Total
$ (10,806,345)	$ (1,676,453)	$ (12,482,798)

Company Respondent: **Matt Everngam**

INTERROGATORY NO. 67

67. Please refer to OPC witness Dunkel's Direct Testimony, page 58, lines 16 -18. In the event that OPC witness's recommendations are approved by the Commission, please identify the following:

i) The benefits, if any, to the Company.

ii) The detriments, if any, to the Company.

iii) The benefits, if any, to the customers.

iv) The detriments, if any, to the customers.

Company Response:

(i) There are no benefits to the Company if OPC witness Dunkel's recommendations are approved.

(ii) The detriments to FCG include 1) continuing overstated depreciation rates until a new depreciation study is completed 2) not earning within its authorized rate of return range, and 3) additional costs of preparing a new depreciation study.

(iii) The benefits to FCG customers include continuing rates which include an overstated reserve and an understated rate base.

(iv) The detriment to customers is the additional cost of preparing an additional new depreciation study and possible continued growth of the reserve surplus.

Company Respondent: Patricia Lee and Matt Everngam

INTERROGATORY NO. 68

68. Please refer to FCG's 2024 Annual Depreciation Status Report, specifically the FCG-Only portion shown in Tab "13-16 FCG" of the file titled "FCG 2024 FERC Plant Pages.xlsx" provided to the Commission on August 4, 2025 (2024 ADSR). Please also refer to page 27 of 258 of FCG's Amended 2025 Depreciation Study (2025 Study) filed on November 4, 2025. For each of the discrepancies shown in Table 1 below, please provide a reconciliation with corresponding explanations.

****The assets in the reclass column are assets that were included in FERC 376P during acquisition. A reclass was done in 2024 to move the assets to the correct FERC, 3762. A reserve transfer was not completed during the asset transfer process due to the use of the CPR Asset Loader. This method involves a template that removes the assets from the CPR and another template that reloads the assets with the preferred details for how they should appear in the Power Plan. The templates do not include a reserve option. We will transfer the A/D in 2025 to correct change between the two accounts.**

FCG Response to Staff's 5th ROGs, No.69-77

(with attachments)

INTERROGATORY NO. 69 (a-c)

INTERROGATORIES

69. Please refer to FCG witness Lee's Rebuttal Testimony, page 19, where the witness testified:

> From conversations with FCG, its program to relocate mains from the customer's back yard to more accessible areas as well as the program to retire orange pipe due to safety concerns has led to increased future retirement expectations, and a mortality dispersion (curve shape) recognizing more early retirements.

a. Please identify the respective year in which the "program to relocate mains" and "program to retire orange pipe due to safety concerns" was approved by the commission for FCG.

b. Please identify FCG's annual retirement amounts associated with the two programs discussed in Question 69(a) beginning with the year the programs commenced to 2024.

c. Please provide FCG's estimated/projected annual retirement amount associated with the two programs discussed in Question 69(a) for 2025 - 2029.

Company Response:

INTERROGATORY NO. 69 (a-c), cont.

a. The program to relocate mains and the program to replace orange pipe commenced in 2014 and 2023, respectively.

b. Attached files beginning with the title "PSC ROG 69b" provides the actual and forecasted retirements for the SAFE program. Project descriptions for project years 2024-2026 are also included.

c. See response to 69b above.

Company Respondent: Patricia Lee

SAFE Program
Overview of SAFE, Orange and Problematic Pipe Replacement Projects

I. **SAFE Replacement Projects** – General overviews of the actual, estimated, and projected SAFE replacement projects undertaken or to be undertaken by Florida City Gas during calendar years 2024, 2025, and 2026 are provided below.

Actual Projects for Calendar Year 2024:

1. The Miami SAFE 45 project will be located in unincorporated Miami-Dade County, FL. The project provided the installation of 47,798 feet of mains and 398 services. The Miami SAFE 45 project retired 38,739 feet of rear easement mains in 2024.

2. The Miami SAFE 38 project will be located in Miami Lakes, FL. The project provided the installation of 17,604 feet of mains and 212 services. The Miami SAFE 38 project retired 24,805 feet of rear easement mains in 2024.

3. The Miami SAFE 47 project will be located in unincorporated Miami-Dade County, FL. The project provided the installation of 20,277 feet of mains and 264 services. The Miami SAFE 47 project retired approximately 24,816 feet of rear easement mains in 2024.

4. The Miami SAFE 49 project will be located in unincorporated Miami-Dade County, FL. The project provided the installation of 22,572 feet of mains and 236 services. The Miami SAFE 49 project retired approximately 22,024 feet of rear easement mains in 2024.

5. The Brevard SAFE 7 project will be located in Brevard County. The project provided the installation of 11,478 feet of mains and 241 services. The Brevard SAFE 7 project retired 21,073 feet of rear easement mains in Q1 2025.

6. The Miami SAFE 48 project will be located in unincorporated Miami-Dade County, FL. The project provided the installation of 24,914 feet of mains and 206 services. The Miami SAFE 48 project is forecasted to retire 24,140 feet of rear easement mains in 2025.

Actual/Estimated Projects for Calendar Year 2025:

1. The Miami SAFE 55 project is located in unincorporated Miami-Dade County, FL. The project provided the installation of 15,125 feet of mains and 80 services. The Miami SAFE 55 project retired approximately 17,256 feet of rear easement mains in 2025.

FPSC EXH NO. 30
ADMITTED

2. The Miami SAFE 54 project is located in North Miami, FL. The project provided the installation of 24,175 feet of mains and 196 services. The Miami SAFE 54 project retired approximately 28,515 feet of rear easement mains in 2025.

3. The Miami SAFE 52 project is located in Kendall, FL. The project provided the installation of 19,014 feet of mains and 160 services. The Miami SAFE 52 project is forecasted to retire 19,613 feet of rear easement mains by Q3 2025.

4. The Miami SAFE 51 project is located in unincorporated Miami-Dade County, FL. The project provided the installation of 15,939 feet of mains and 55 services. The Miami SAFE 51 is forecasted to retire 15,505 feet of rear easement mains by Q3 2025.

5. The Brevard SAFE 8 project is located in Melbourne, FL. It is forecasted that by year-end 2025, the project will provide the installation of 47,056 feet of mains and 395 services. The Brevard SAFE 8 project is forecasted to retire 41,334 feet of rear easement mains in Q1 2026.

6. The Miami SAFE Greenglades project is located in unincorporated Miami-Dade County, FL. The project is forecasted that by the end of Q3 2025, the project will provide the installation of 1,899 feet of mains and 29 services. The Miami SAFE Greenglades project is forecasted to retire 2,030 feet of rear easement mains by year-end 2025.

7. The Miami SAFE 53 project is located in unincorporated Miami-Dade County, FL. The project is forecasted that by Q4 2025, the project will provide the installation of 7,430 feet of mains and 89 services. The Miami SAFE 53 project is forecasted to retire 6,330 feet of rear easement mains in Q1 2026.

8. The Miami SAFE 57 project is located in unincorporated Miami-Dade County, FL. The project is forecasted that by Q4 2025, the project will provide the installation of 6,000 feet of mains and 33 services. The Miami SAFE 57 project is forecasted to retire 4,710 feet of rear easement mains Q1 2026.

Projected Projects for Calendar Year 2026:

1. The Miami SAFE 56 project will be located in Miramar, FL. It is forecasted that by Q1 2026 the project will provide the installation of 9,350 feet of mains and 215 services. The Miami SAFE 56 project is forecasted to retire 14,889 feet of rear easement mains by Q2 2026.

2. The Miami SAFE 58 project will be located in Hialeah, FL. It is forecasted that by Q1 2026, the project will provide the installation of 17,913 feet of mains and 224 services. The Miami SAFE 58 project is forecasted to retire 17,381 feet of rear easement mains by Q3 2026.

FPSC EXH NO. 30
ADMITTED

3. The Miami SAFE 61 project will be located in Cutler Bay, FL. It is forecasted that by Q3 2026, the project will provide the installation of 32,998 feet of mains and 327 services. The Miami SAFE 61 project is forecasted to retire 25,010 feet of rear easement mains by year-end 2026.

4. The Brevard SAFE 9 (phase 1) project will be located in Melbourne, FL. It is forecasted that by Q3 2026, the project will provide the installation of 43,109 feet of mains and 472 services. The Brevard SAFE 9 (phase 1) project is forecasted to retire 42,150 feet of rear easement mains by year-end 2026.

5. The Miami SAFE 65 project will be located in unincorporated Miami-Dade County, FL. It is forecasted that by Q4 2026, the project will provide the installation of 11,623 feet of mains and 43 services. The Miami SAFE 65 project is forecasted to retire 9,282 feet of rear easement mains by Q1 2027.

II. **<u>Orange Pipe Replacement Projects</u>** – General overviews of the actual, estimated, and projected orange pipe replacement projects undertaken or to be undertaken by Florida City Gas during calendar years 2024, 2025, and 2026 are provided below.

Actual Projects for Calendar Year 2024:

1. The Miami ORANGE 4 project is located in unincorporated Miami-Dade County, FL. The project provided installation of 29,469 feet of mains and 378 services. The Miami ORANGE 4 project retired approximately 36,130 feet of vintage plastic mains in Q1 2025.

Actual/Estimated Projects for Calendar Year 2025:

1. The Miami ORANGE 1 project is located in unincorporated Miami-Dade County, FL. The project provided installation of 14,610 feet of mains and 236 services. The Miami ORANGE 1 project retired 22,879 feet of vintage plastic mains in Q2 2025.

2. The Brevard ORANGE 1 project is located in Titusville, FL. The project provided installation of 5,331 feet of mains and 104 services. The Brevard Orange 1 project retired 2,226 feet of vintage plastic mains in Q1 2025.

3. The Brevard ORANGE 2 project is located in Melbourne, FL. It is forecasted that by Q3 2025, the project will provide the installation of 40,753 feet of mains and 262 services. The Brevard ORANGE 2 project is forecasted to retire 30,336 feet of vintage plastic mains by year 2025.

4. The Brevard ORANGE 3 project will be located in Melbourne, FL. It is forecasted that by year-end 2025, the project will provide the installation of 13,460 feet of

FPSC EXH NO. 30
ADMITTED

mains and 148 services. The Brevard ORANGE 2 project is forecasted to retire 13,068 feet of vintage plastic mains by year-end 2025.

5. The Miami ORANGE 5 project will be located in unincorporated Miami-Dade County, FL. It is forecasted that by year-end 2025, the project will provide the installation of 20,520 feet of mains and 435 services. The Miami ORANGE 5 project is forecasted to retire 32,670 feet of vintage plastic mains in Q1 2026.

Projected Projects for Calendar Year 2026:

1. The Miami ORANGE 6 project will be located in unincorporated Miami-Dade County, FL. It is forecasted that by Q3 2026, the project will provide the installation of 23,453 feet of mains and 428 services. The Miami ORANGE 6 project is forecasted to retire 38,274 feet of vintage plastic mains by year-end 2026.

2. The Miami ORANGE 2 project will be located in unincorporated Miami-Dade County, FL. It is forecasted that by Q3 2026, the project will provide the installation of 20,979 feet of mains and 275 services. The Miami ORANGE 2 project is forecasted to retire 32,105 feet of vintage plastic mains by year-end 2026.

3. The Brevard ORANGE 4 project will be located in Brevard County, FL. It is forecasted that by Q1 2026, the project will provide the installation of 14,467 feet of mains and 266 services. The Brevard ORANGE 4 project is forecasted to retire 42,150 feet of vintage plastic mains by Q2 2026.

III. **<u>Problematic Replacement Projects</u>** – General overviews of the actual, estimated, and projected orange pipe replacement projects undertaken or to be undertaken by Florida City Gas during calendar years 2024, 2025, and 2026 are provided below.

Actual Projects for Calendar Year 2024:

1. The Miami Problematic – Xtrubed Area 2 project will be located in Miami Lakes, FL. The Miami Problematic - Xtrubed Area 2 project retired approximately 29,430 feet of rear easement mains in 2024.

Actual/Estimated Projects for Calendar Year 2025:

1. The SR-520 8-inch Replacement project is located in Cocoa Beach, FL. The project provided the installation of 5,704 feet of mains and 0 services. The SR-520 project 8-inch Replacement project is forecasted to retired 6,115 feet of problematic mains Q2 2025.

2. The Miami PROBLEMATIC 1 – (Xtrubed Area 3) project is located in Miami Lakes, FL. It is forecasted that by end of Q3 2025, the project will provide the

FPSC EXH NO. 30
ADMITTED

installation of 26,749 feet of mains and 264 services. The Miami Problematic – (Xtrubed Area 3) project is forecasted to retire 26,131 feet of problematic mains by year-end 2025.

Projected Projects for Calendar Year 2026:

1. The Miami Span 1 project will be located in unincorporated Miami-Dade County, FL. It is forecasted that by Q1 2026, the project will provide the installation of 450 feet of mains. The Miami Span 1 project is forecasted to retire 420 feet of problematic mains by Q2 2026.

2. The Miami Span 2 project will be located in West Park, FL. It is forecasted that by Q2 2026, the project will provide the installation of 350 feet of mains. The Miami Span 2 project is forecasted to retire 335 feet of problematic mains by Q2 2026.

3. The Miami Span 3 project will be located in unincorporated Miami-Dade County, FL. It is forecasted that by Q2 2026, the project will provide the installation of 560 feet of mains. The Miami Span 3 project is forecasted to retire 540 feet of problematic mains by Q2 2026.

4. The PSL Span 4 project will be located in Port St. Lucie County, FL. It is forecasted that by Q2 2026, the project will provide the installation of 1,310 feet of mains. The Miami Span 2 project is forecasted to retire 1,300 feet of problematic mains by Q3 2026.

5. The Eau Gallie Gate Station Renewal project will be located in Melbourne, FL. It is forecasted that by Q2 2026 the project will provide the installation of 167 feet of mains, fittings, and other renewed station infrastructure. The Eau Gallie Gate Station renewal project is forecasted to retire 215 feet of problematic mains and outdated station infrastructure by Q3 2026.

6. The Ryder 106 Station Renewal project will be located in unincorporated Miami-Dade County, FL. It is forecasted that by Q1 2026 the project will provide the installation of 650 feet of mains, fittings, and other renewed station infrastructure. The Ryder 106 Station renewal project is forecasted to retire 150 feet of problematic mains and outdated station infrastructure by Q2 2026.

INTERROGATORY NO. 70 (a-c)

70. Please refer to witness Lee's Rebuttal Testimony, page 21, for the questions below:

a. Lines 1 - 2 of page 21 reads "FCG has changed ownership since 2022 and will not be subject to the same historical retirement patterns and net salvage practices and procedures." Please identify and describe all the changes in the "retirement patterns and net salvage practices and procedures" pertaining to Account 3762: Main-Steel and Account 3801: Services-Plastics resulting from the FCG's ownership change in 2022.

b. Please quantify the changes in retirements (increases or decreases) for Account 3762: Mains-Steel and Account 3801: Services-Plastics resulting from FCG's ownership change in 2022.

c. Referring to lines 13 - 16 of page 21, is FCG's retirement rate calculation in Schedule F of witness Lee's amended direct testimony based on the age interval (i.e., for each age interval, the retirement rate is calculated using the retirements and exposures for a same age interval 15 years)? If not, please explain why not.

Company Response:

a. Retirements are delayed because operations require newly installed mains and services to be fully operational before retiring the old ones. This delay also impacts net salvage. Additionally, the problematic pipes, which were approved as a

INTERROGATORY NO. 70 (a-c), cont.

component of the SAFE project in 2024, has expanded the program, which has increased the forecasted retirements for FCG.

b. With the inclusion of the problematic pipes to the SAFE project, the retirements are expected to increase since the acquisition of FCG by CUC. Attachment PSC ROG 70b includes the projected problematic pipe retirements. In addition, a visual comparison of the pre- and post-forecasted retirements for FCG SAFE project mains and services reports a lag in completion of project goals, as shown in attachment PSC ROG 69b.

c. Schedule F is not a retirement rate calculation. It is the calculated weighted average age of the dollars retired for each account for each year, 2021-2024. Schedules F-1 Amended and P Amended are the average retirement rate calculations for each year as well as for a 4-year, 5-year, and 20-year period.

The average retirement rate for each year is calculated by dividing the retirements in a given year by the sum of the retirements and end-of-year plant balance for that year. The average retirement rate for 4 years is calculated by dividing the sum of the retirements for the 4 years (or a group of years) by the sum of the retirements and end-of-year plant balances for the 4 years (or group of years).

INTERROGATORY NO. 71 (a-b)

71. Please refer to witness Lee's Rebuttal Testimony, page 24, line 2-3, for the questions below regarding Account 3762: Mains-Steel:

a. Please provide actual, estimated and projected total miles of the Account 3762: Mains-Steel pipe retired/to be retired beginning with the year the SAFE program commenced to 2029.

b. Please provide actual, estimated and projected annual dollar amounts associated with the Account 3762: Mains-Steel pipe retired/to be retired beginning with the year the SAFE program commenced to 2029.

Company Response:

a. See response to Interrogatory 69b.

b. Attachment PSC ROG 71b reflects the actual retirement dollars associated with the Steel mains SAFE project that were retired 2021-2025. The Company does not have the historical retirement records prior to 2021 to determine Steel Mains retirements under the SAFE program for prior years.

Company Respondent: Patricia Lee

INTERROGATORY NO. 72

72. Please refer to witness Lee's Rebuttal Testimony, page 25, lines 20-22. Please detail all of the input witness Lee received from Company personnel regarding anticipated changes for Account 3762, also detailing how and when such input was conveyed to witness Lee.

Company Response:

Input witness Lee received from Company personnel regarding Account 3762, Steel Mains, as well as other accounts, was ongoing throughout the depreciation study process. Specifically, such information included the following:

- There are no plans for the retirement of all steel mains;
- FCG steel mains are all cathodically protected;
- The existing 65-year life is still appropriate;
- Replacement for steel is plastic unless the pressure requires steel;
- Forces of retirement include service connections, shallow pipe or poor lining, as well as external factors such as damage, customer requested relocations, dig-ins, city or State required relocations;
- Problematic pipes are being replaced through SAFE due to safety concerns;
- Retired mains are abandoned in place once all sources of gas have been cut and capped;
- Surface restoration costs include concrete/sidewalks and curbs, asphalt/paving streets and patching, sod, etc.
- Some counties are now requiring pipes to be grouted before abandonment.

Company Respondent: **Patricia Lee**

INTERROGATORY NO. 73 (a-f)

73. Please refer to witness Lee's Rebuttal Testimony, page 28, lines 9-12 for the questions below:

a. Please explain the nature of "improved accessibility to retired pipe" pertaining to Acct. 3762: Mains-Steel, including the first year this improvement is/was observed by the Company SMEs.

b. Please quantify FCG's improved accessibility to retired pipe pertaining to Acct. 3762 Mains-Steel, by year.

c. When FCG's Account 3762: Mains-Steel pipe is retired, is it usually excavated and removed, or is it buried on-site?

d. Please explain the nature of "improved accessibility to retired pipe" pertaining to Acct. 3801.2: Services-Plastics, including the first year this improvement is/was observed by the Company SMEs.

e. Please quantify FCG's improved accessibility to retired pipe pertaining to Acct. 3801: Services-Plastics, by year.

f. When FCG's Account 3801: Services-Plastics pipe is retired, is it usually excavated and removed, or is it buried on-site?

Company Response:

a. The nature of improved accessibility to retired pipes will make it easier for field personnel to cut and cap and abandon mains. The Company would have experience improved accessibility when the relocated mains (mains installed since 2016) were retired and abandoned. The first observance could have taken placed under either previous ownership and CUC would not be able to provide that information.

b. Sch F reports total retirements by vintage. The Company does not distinguish between SAFE project related retirements and regular retirements for mains.

c. When steel mains are retired, they are usually permanently physically disconnected from all sources of gas and abandoned in place. Some counties are now requiring concrete to be poured in the retired pipe as an extra measure of safety.

d. The nature of improved accessibility to retired pipes will make it easier for field personnel to cut and cap and abandon service lines. The Company would have experience improved accessibility when the relocated service lines (services installed since 2015) were retired and abandoned. The first observance could have taken placed under either previous ownership and CUC would not be able to provide that information.

e. Sch F reports total retirements by vintage. The Company does not distinguish between SAFE project related retirements and regular retirements for services.

f. Plastic services, when retired, are cut and capped at the main and abandoned in place. There are costs associated to accessing the line, disconnecting it from all sources of gas, valves are locked to prevent gas flow, as well as any surface restoration.

Company Respondent: Patricia Lee

INTERROGATORY NO. 74

74. Please refer to witness Lee's Rebuttal Testimony, page 28, line 18, and provide a comparison of "Chesapeake's removal practices" and FCG's removal practices before FCG's ownership change.

Company Response:
The Company continues to utilize the services of the same vendor and best practices to conduct the removal processes to minimize both customer impact and restoration costs. Retirements must go through a rigorous documentation process before assets are physically retired. The main difference is the amount of paperwork involved due to system changes. Company personnel has noted an ease with CUC's current work flow processes.

Company Respondent: **Patricia Lee**

INTERROGATORY NO. 75

75. Please refer to witness Lee's Rebuttal Testimony, Exhibit No. PSL-6. For all the cases listed in the exhibit, please identify those in which the Commission has addressed the treatment of **net total** reserve imbalances through amortization periods shorter than the remaining life.

Company Response:
Order No. PSC-10-0131-FOF-EI

Order No. PSC-10-0153-FOF-EI

Additionally, Order No. PSC-2023-0103-FOF-GU (Florida City Gas), and Order No. 13528 (Miller Gas) should be added to Exhibit No. PSL-6.

Company Respondent: Patricia Lee

INTERROGATORY NO. 76 (a)

76. Please refer to FCG's response to Staff's 3rd Set of Interrogatories, No. 52, filed on November 5, 2025. The Company indicated that it "anticipates the need to file its next base rate case within the next year."

a. Has FCG's management decided a more specific date for filing its next base rate case, and if so, when?

Company Response:

See response to Staff Fourth Set of Interrogatory number 64c. In addition, whether approved or not, the ultimate result of this case is that FCG's rate case has been deferred. Approval of the Company's proposal will not enable additional delay, but will provide relief for the period of delay that has already occurred. As for the precise filing date, the Company is continuing to work through the MFRs and anticipates that, regardless of the outcome of this case, the MFR development will be impacted. As such, FCG is unable to provide a specific date for the filing of its rate case, but thinks it likely to occur before the third quarter of 2026.

INTERROGATORY NO. 76 (b)

b. If the response to Question 76(a) is affirmative, please provide responses to the following questions:

(i) When will be the Company's proposed implementation date for the new customer rates?

(ii) Does FCG intend to file a new, or an updated Depreciation Study with its rate case petition? Please explain your response.

Company Response:

(i) See response to 76a.

(ii) See Company response to Staff Fourth Set of Interrogatory number 62.

Company Respondent: Matt Everngam

INTERROGATORY NO. 77

77. For all FCG personnel meetings with witness Lee, called for the purpose of conveying such personnel's FCG operational insights and asset knowledge to Ms. Lee, please provide all meeting dates and times, locations, specific subject matter discussed, names and positions of all such personnel. Include also the years each employee has worked for FCG in positions that require knowledge of future asset lives and net salvage values.

Company Response:

As stated in POD 13, no formal meetings were held between Ms. Lee and the Company. The field personnel with whom Ms. Lee conversed are all actively engaged in running the company. As such, scheduling in person, formal meetings is impractical, if not impossible. Ms. Lee was able to gather all the information she needed through phone discussions and emails. Therefore, meeting dates and times and locations cannot be provided. Ms. Lee conversed with the following Company personnel during FCG's Study:

Employee	Position	FCG Years of Service
Kendall, James	Reg Mgr Operations	34
Clark, Walter	Gas Operations Supv	34
Sandridge, Ronald	Gas Operations Supv	31
Blake-Lawrence, Danielle	Project Manager II	5
Aguilar, Yuliya	Mgr, Fixed Assets	4
Morgan, Latisha	Accountant III	4
Haffecke, William	AVP, Florida Operations	2
Adams, Bill	Procurement Manager	2
Messina, Vince	Mgr, Project Control	2
Wiley, Michael	Assistant Controller	2
Truitt, Lauren	Accountant IV	2
McCloskey, Solomon	AVP, Operations Services	2

Company Respondent: **Patricia Lee**

FCG's Response to Staff's 1st POD Nos.1-8

REQUESTS FOR PRODUCTION OF DOCUMENTS

1. Please refer to FCG's 2025 Depreciation Study, filed February 24, 2025 (2025 Depreciation Study), Narrative, Pages 12-13, Account 3762: Mains – Steel. FCG proposes a (40)% net salvage factor in the instant case, an increase from the currently approved (50)% net salvage factor. FCG claims the reason behind this proposed increase is that removal costs "…should continue to decrease…" FCG states that the 2004-2024 average net salvage for the account is (146)% and the most recent 2021-2024 period averaged (64)% which is consistent with FCG's 2022 Depreciation Study, in which FCG witness Allis recommended a (75)% net salvage for the account (Exhibit NWA-1, Page 155-156 of 179). Please provide:
   a. Summary support, as well as any additional documentation (e.g. industry reviews) FCG relied upon in its answer to Interrogatory No. 9.a.
   b. Calculations, if any, supporting FCG's proposed (40)% net salvage estimate.

   [Staff's First Data Request, filed April 10, 2025, Question Nos. 6.b. and 6.c.]

Company Response:

FCG objects to this Request to the extent it does not refer to Exhibit PSL-2, which is the depreciation study Ms. Lee is sponsoring for FCG in this proceeding. Notwithstanding this objection and without waiving the objection, Ms. Lee relied in part on Exhibit PSL-4.

2. Please refer to FCG's 2025 Depreciation Study Narrative, Page 15, Account 3801: Services – Plastic. FCG proposes (40)% net salvage factor in the instant case, an increase from the currently approved (68)% net salvage factor. FCG claims the reason behind this proposed increase is "easier accessibility to the retired service as well as projections from other Florida gas utilities." However, FCG states the 2004-2024 average net salvage factor for the account is (398)% and the most recent 2021-2024 period averaging (132)%. In addition, in FCG's 2022 Depreciation Study, FCG witness Allis recommended a (60)% net salvage factor for the account (Exhibit NWA-1, Page 162 of 179). Please provide:

   a. Summary support, as well as any additional documentation (e.g. industry reviews) FCG relied upon in its answer to 10.a.

   b. Calculations, if any, supporting FCG's proposed (40)% net salvage estimate.

   [Staff's First Data Request, filed April 10, 2025, Question Nos. 7.b. and 7.c.]

Company Response:

FCG objects to this Request to the extent that the Request includes reference to documents not in this record of this proceeding that were sponsored by a witness that is not testifying in this proceeding, and which, ultimately, were not approved by the Commission for application to FCG. FCG's witness in this proceeding does not sponsor the referenced exhibit nor does any witness in this proceeding support or sponsor the statement above that begins "However. . . " Notwithstanding and without waiving this objection, FCG states:

a. Ms. Lee relied on discussions with Company personnel. There is no additional documentation.

b. Ms. Lee relied on the range of net salvage projections of other Florida gas utilities,

discussions with company personnel, and professional judgement based on Ms. Lee's over 35 years' depreciation experience. Documentation of the net salvage projections is found in Exhibit PSL-4 of Ms. Lee's testimony.

3. Please provide a side-by-side chart comparing FCG's 2022 Depreciation Study parameters to FCG's 2025 Depreciation study parameters. In the comparison chart, please include all depreciation parameters proposed in each study (Average Service Life, Average Remaining Life, Net Salvage, Iowa Curve Shape, Age, and where appropriate, amortization periods) for all accounts.

   [Staff's First Data Request, filed April 10, 2025, Question No. 13]

Company Response:

Schedule B of the depreciation workbook is a comparison of the current approved parameters (Average Service Life, Average Remaining Life, Net Salvage, Iowa Curve Shape, Age, and where appropriate, amortization periods) for all accounts. Florida's rules of discovery do not require a respondent to create a document otherwise not in existence.[3]

[3] To the extent that FCG provided a document in response to a prior data request, that document is not responsive in that the comparison therein was not to the depreciation study reflected in Exhibit PSL-2.

4. If the answer to Interrogatory No. 19 is affirmative, please provide all workpapers, documents, and calculations that support FCG's claim.

   [Staff's First Data Request, filed April 10, 2025, Question No. 17.b.]

Company Response:

The Company is providing with this response FCG's Earning Surveillance Report, GU602-2025-FCST-ESR filed to this Commission. See PSC POD 1-4 FCG Projected 2025 ESR.

5. Please refer to FCG's Depreciation Study Narrative, Page 15, as well as FCG's response to Staff's 1st Data Request, No. 7. FCG is proposing to increase the net salvage factor for Account 3801: Services – Plastic from (68)% to (40)%. FCG's claims that relocation of the services to the front of the customer's property will serve to reduce retirement costs. Please also provide any quantitative impact/calculations the utility relied upon that supports increasing the net salvage factor of the account from (68)% to (40)%.

   [Staff's Second Data Request, filed May 23, 2025, Question No. 3.c.]

Company Response:

There are no responsive documents.

6. Specifically for Account 3761: Mains – Plastic, FCG is proposing a 75 year ASL, which is 16 years longer than the Florida Average and 10 years longer than FCG's 2022 Depreciation Study. FCG's last depreciation study's proposed 65 year ASL relied on a mathematical fit of FCG's retirement data to a 65-R4 survivor curve (FCG 2022 Depreciation Study, Exhibit NWA-1, page 157 of 179) Please provide any calculations supporting FCG's proposal in the instant case to extend the average service life of this account to 75 years.

[Staff's Second Data Request, filed May 23, 2025, Question No. 9.b.]

Company Response:

FCG objects to this request in that it assumes that the depreciation study filed in Docket No. 20220069 by Witness Allis was approved, which is incorrect. FCG's witness in this proceeding does not sponsor the referenced 2022 depreciation study nor does any witness in this proceeding support or sponsor the parameters associated with the 2022 recommendations. Notwithstanding and without waiving said objection, FCG states that the premise of the question is incorrect entirely, because the current, approved ASL for the Account Mains-Plastic is 75 years. Order No. PSC-2023-0177-FOF-GU at page 14.

7. If the Company's answer to Interrogatory No. 39.b. is in the affirmative, please provide all related analysis, computations, and graphical representations.

[Staff's Second Data Request, filed May 23, 2025, Question No. 11.b.]

Company Response:

There are no responsive documents.

8. Please refer to Schedule B (marked as Exhibit PSL-2 in workbook) of FCG's 2025 Depreciation Study, specifically Account 3922: Transportation – Light –Med. Trucks, SUVs & Vans. The following parameters for the account are proposed by FCG:

   - Average Service Life = 12 years
   - Average Age = 4.7 years
   - Curve Shape = S2

   Please provide the life tables that show the estimated average remaining life, based on the above parameters, and explain how FCG calculated a remaining life of 5.4 years for this account.

   [Staff's Third Data Request, filed June 18, 2025, Question No. 2]

Company Response:

FCG objects to the extent this production request does not reflect what is contained in Exhibit PSL-2, which is the depreciation study Ms. Lee is sponsoring for FCG in this proceeding. Exhibit PSL-2 reflects a remaining life of 7.5 years for this account. See attachment PSC POD 1-8 for the S2-12 Life Table.

FCG's Response to Staff's 2nd PODs Nos.9-10

DOCUMENTS REQUESTED

9. In the same manner as was provided in FCG's last depreciation study (Docket No. 20220069-GU), for the following accounts, please provide the aged retirement data detailing the age interval, exposures (in dollar amounts) at the beginning of each age interval, and the retirements (in dollar amounts) during each age interval. Please include data from 1963 though the most recent year for which data is available.

    a. Account 376.10: Mains-Plastic

    b. Account 376.20: Mains-Steel

Company Response: Please see attached document POD-9, which is the information from Docket No. 20220069-GU beginning with data from the year 1963, which is the only document in the Company's possession reflecting the data in this format through the most recent year available.

10. Please refer to witness Lee's direct testimony, page 22, lines 20-23, and page 23, line 1. Witness Lee states, "In this Study, the "Proposed" curve shapes shown in the workbook on Exhibit PSL-2, Schedule B, are based on existing curve shapes underlying the currently prescribed average remaining life for each account, a review of the curve shapes proposed in the 2022 Gannett Fleming Depreciation Study, actual retirement experience over the 2020-2024 period as well as historical retirements, and the current average age." Please provide the 2022 Gannett Fleming Depreciation Study.

Company Response: FCG objects to this request for two reasons. First, the request is unclear in that Ms. Lee's statement in her testimony does not logically lead to the requested document. Ms. Lee merely reviewed the curve shapes in the 2022 Gannett Fleming

Depreciation Study, which are available on-line in Docket No. 20220069-GU. The Company also objects to the extent the request is unduly burdensome in that the requested document is already available to Commission staff online on the Commission's website under Docket No. 20220069-GU. The Company does not have possession or control of that study in other form than what is reflected on the Commission's website. Moreover, requiring the Company to print, BATEs label, and provide a 170+ page depreciation study that: a. it is not offering for consideration in this docket; b. was not relied upon by Ms. Lee in conducting her depreciation study; and c. Commission staff has in its possession is a quantifiable level of burdensomeness.

FCG's Resp to Staff's 3rd PODs Nos. 11-12

(with attachments)

REQUESTS FOR PRODUCTION OF DOCUMENTS

11. Please provide a copy (in electronic version in Excel format) of FCG's 2024 Annual Deprecation Status Report (FCG-Only portion shown in Tab "13-16 FCG" of the file titled "FCG 2024 FERC Plant Pages.xlsx" provided to the Commission on August 4, 2025).

Company Response:

Please see the response to Staff's 4th Set of Interrogatories, No. 68.

12. Please provide copies of FCG's December 2024 (Revised), March 2025 (Revised), June 2025 (Revised), and September 2025 Earnings Surveillance Reports.

Company Response:

Please see POD 3-12a for December 2024 (Revised) ESR

Please see POD 3-12b for March 2025 (Revised) ESR

Please see POD 3-12c for June 2025 (Revised) ESR

The Company has not yet filed the September 2025 ESR and is expected to file by December 15, 2025.

RATE OF RETURN REPORT SUMMARY
For the 12 Months Ending June 30, 2025

SCHEDULE 1
REVISED 10/2/2025

I. AVERAGE RATE OF RETURN (JURISDICTIONAL)	(1) ACTUAL PER BOOKS	(2) FPSC ADJUSTMENTS	(3) FPSC ADJUSTED	(4) PRO FORMA ADJUSTMENTS	(5) PRO FORMA ADJUSTED
NET OPERATING INCOME	$ 41,248,178	$ (11,866,138)	$ 29,382,040	$ -	$ 29,382,040
AVERAGE RATE BASE	$ 1,042,236,368	$ (516,898,000)	$ 525,338,368	$ -	$ 525,338,368
AVERAGE RATE OF RETURN	3.96%		5.59%		5.59%

II. REQUIRED RATES OF RETURN
AVERAGE CAPITAL STRUCTURE
(FPSC ADJUSTED BASIS)

LOW	7.18%
MIDPOINT	7.65%
HIGH	8.12%

III. EARNED RETURN ON EQUITY
(FPSC ADJUSTED BASIS) 5.12%

I am aware that Section 837.06, Florida Statutes, provides:

Whoever knowingly makes a false statement in writing with the intent to mislead a public servant in the performance of his official duty shall be guilty of a misdemeanor of the second degree punishable as provided in s. 775.082, s. 775.083. or s. 775.084.

FCG's Resp to Staff's 4th PODs No.13

(with attachments)

Requests for Production of Documents

13. Please provide all documents provided to witness Lee (including witness Lee's meeting notes) by FCG reflecting FCG personnel's asset knowledge and operational insight as referenced in her rebuttal testimony at Page 21, Lines 1-8, that was subsequently used by witness Lee to prepare her direct testimony regarding future lives and net salvage values in this case.

Company Response:

Ms. Lee held no formal meetings were held with the Company. As questions arose, she exchanged emails and held informal discussions with Company personnel. No notes were taken. Emails including attachments are provided as PSC POD 13.
