DOCKET #20250088-WU

Sent from my iPhone

When I first moved in here my water bills ran around \$10 a month. Then all of a sudden 2 years in my bill was \$60 for no reason. The office couldn't explain it. I asked them to print out my usages for me, they made no sense. I had no leak. I talked to my neighbors they said theirs was higher too. The 90 year old across the street from me said his was \$100. No way. People across the park were also experiencing the sporadic higher water bills with no change in use. Just this past month my water bill was \$210. Down to the office I go again. Same thing no one knows. They say I must have a leak, call a plumber. No i don't have a leak. I had maintenance come to check the water meter in the ground. He ran a couple of tests and showed no leaks.

We also experience many water main breaks through out the park. I feel that you need to send someone qualified from your office should come here to personally go over these records. There is a problem! No one in the office has the ability to understand it to figure it out.

The price hike they are suggesting is absolutely outrageous. If the infrastructure needs to be upgraded we should not be the ones paying for it.

I really hope you can help us with this problem.
