I am totally opposed to the proposed water rate hike. I only received a 2.8 % increase in my social security this year and still have trouble meeting my utility bills. This increase would put me under water (pardon the pun). I am sure there are many more people in this community that are in the same financial situation and would be hurt extensively by this proposal. Please reconsider this rate hike. I think this commission is totally out of reach with reality with this proposal. It seems you think everyone are as well off as the commission members and can afford such an outrageous proposal you should be ashamed of yourselves.
