I am writing regarding the proposed increase of water rates anywhere from 70 to 180%. I have some reasons as to why I do not feel any increase should be placed upon us at this time.

We already have incurred a significant lot lease increase and pass through tax increase in the past few years causing hardship for many.

My husband and I work very hard on keeping our yard maintained and looking nice. Unfortunately, with this proposed water increase we would no longer be able to do this. I know that many yards in the community with also suffer because many residents will no longer be able to afford the water. This will cause the community appearance to decline.

I believe that approximately 28% of our water usage is unaccounted for the increase seems to due to a lack of maintenance. We have had a significant amount of water main breaks since I moved here in 2023.

I am asking the commission deny any water rate increase.

Sincerely,
Danny Logan
