

TAKE OUR Daughters & Sons TO WORK DAY

On Thursday, May 8, curious and active children filed into the PSC Internal Affairs room, as Commissioner Ronald A. Brisé shared with them the PSC's responsibilities and their parents' vital role, not only for the agency, but for all citizens of Florida. After participating in a mock "rate case," students learned how valuable energy and water are in the "Pay Me Game."

The children were given a certain amount of money and had to "pay" each time they practiced habits that increased energy and water consumption, such as running the water while brushing their teeth, or playing video games for more than 30 minutes.

After a snack break outside, the children learned how vital drinking water is during a water conservation session. The day ended with a recycling box decoration competition that pitted boys against girls. The boys created a "monster" truck, and the girls' box was a tribute to recycling. It was a fun day had by all.

Did You Know....

If you don't unplug your phone charger after your phone is charged, it's still using electricity? That is called "phantom load."

The US and China are the two countries with the largest energy consumption?

Less than one percent of the world's water is available for consumption?

These facts were some of many that children learned while they visited the Florida Public Service Commission (PSC) during an interactive Take Our Daughters and Sons to Work Day.
