

COMMISSIONER DONALD POLMANN

## *Engages Professional Engineers*

Commissioner Donald Polmann spoke to Florida's elite engineers on February 6 at the 2019 Professional Engineer Legislative Days in Tallahassee. With more than 150 attendees, this is the leading legislative conference for Florida's engineering industry.

Highlighting the PSC's regulatory role, Commissioner Polmann covered energy efficiency goals, 10-year-site plans, net-metering and more. He also encouraged attendees to keep engineering careers attractive for those entering the field.

*"Engineers are essential to keep the energy industry innovative and inventive," Commissioner Polmann said. "It's up to us – seasoned Professional Engineers – to continue to build on our successes for students who are contemplating a career path."*

The event is hosted by the Florida Engineering Society (FES) and American Council of Engineering Companies of Florida (ACEC). FES, an association of Professional Engineers with over 3,000 members, supports engineering education, advocates licensure, promotes the ethical and competent practice of engineering and enhances the image and well-being of all engineers in Florida. ACEC represents over 350 consulting engineering companies engaged in the development of transportation, environmental, industrial, commercial, residential, and other infrastructure in Florida.
