Re: New Reporting Requirements - Section 180.192, Florida Statutes

Dear Sir or Madam:

On June 11, 2026, Governor DeSantis signed into law House Bill 1451 addressing municipal utility service providers. As a result, [Section 180.192\(1\), Florida Statutes](#) (F.S.), requires municipalities that provide electric, natural gas, water, or sewer utility service to customers outside their municipal boundaries to report data to the Florida Public Service Commission by January 1, 2027, and annually thereafter. Municipalities are any city, town, or village duly incorporated under the laws of the state, as defined by Section 180.01, F.S.

Specifically, municipalities subject to the statute must provide the number and percentage of customers served outside municipal boundaries; the volume, percentage, and gross revenues generated from such sales; whether rates, fees, and charges are different from those within the municipality, and if so, the amount and percentage of the differential; the percentage of revenues generated from utility services used to fund nonutility government functions; and the percentage of the nonutility budget funded by such revenues. If a municipal utility service is not provided outside the municipal boundaries, you are not required to file a report.

The Florida Public Service Commission is required to compile this information and submit a report to the Governor, the President of the Senate, and the Speaker of the House of Representatives by March 31, 2027, and annually thereafter. To help facilitate this new reporting requirement, we have created the attached Excel spreadsheet to record your information. Our preference is for the data to be submitted using the attached Excel spreadsheet, however, a Word version of the form is available upon request. Directions for submitting the information can be found in the first tab of the Excel spreadsheet and on the first page of the PDF or Word file.

Please contact me if you have any questions at MunicipalUtilityServiceReport@psc.state.fl.us.

Thank you,

/s/
