

SPECIAL REPORT

MAY 2000 NO. 11

Application for Increase in Water Rates in Orange County by **Wedgfield Utilities, Inc.**

On February 29, 2000, Wedgfield Utilities, Inc. (Wedgfield or utility) officially filed an application for an increase in its water rates with the Florida Public Service Commission (PSC or Commission). Wedgfield provides water and wastewater service to approximately 840 customers in Orange County.

In its application, the utility states that it is not generating enough revenue to provide any return on its investment. The utility also states that it is necessary to request an increase in water rates because of major water plant improvements in recent months. The improvements include the replacement of an underground diesel fuel storage tank, modification of the water softeners, and the acquisition of a parcel of land for the current water treatment plant which will benefit customers of the utility.

Rate base was last established for Wedgfield in 1998, subsequent to a transfer of certificates from Econ Utilities Corporation. The Commission approved the transfer of ownership to Wedgfield in an order issued on October 7, 1996, and ordered the utility to maintain the rates and charges approved in Econ's tariff.

The utility has requested an interim increase in water rates pending the Commission's final decision in this case. By an order, issued on May 8, 2000, the Commission approved interim revenues of \$362,654 on an annual basis. This represents an increase of \$103,394 or 39.88%. The interim rates were effective for service rendered as of May 12, 2000. These rates are subject to refund with interest if the Commission ultimately determines that interim rates were excessive. The utility has not requested an increase in its wastewater rates in this docket.

In its 1998 annual report, the utility reported operating revenues of \$252,903 for water, and a net operating income of \$4,603. In its filing, the utility is using a historical test year ending June 30, 1999. A "test year" is a 12-month operating period the PSC uses in a utility rate case to evaluate the cost of service and the adequacy of the rates a utility is charging or proposing to charge its customers.

The current rate case is being processed under the PSC's "Proposed Agency Action" (PAA) procedure. Under the PAA process, the case will not be set for a formal Commission hearing unless a timely protest to the Commission's proposed action is filed.

The customer meeting listed on the right side of this report is being conducted in the utility's service area to hear and respond to customer comments on quality of service, rate structure and the utility's proposed rate increase. In accordance with Florida Statutes, the PSC will consider the utility's quality of service and other matters in this case.

PSC staff is scheduled to make a recommendation to the Commission on June 29, 2000, and the Commission vote is scheduled for the July 11, 2000, Agenda Conference.
