Re: Rule 25-6.065 FAC

Dear Mr. Futrell and Ms. Marr,

The City of Blountstown currently does not have any net metered customers. We are working with the Florida Municipal Electric Association to develop a net metering policy and standardized interconnection agreement for small customer-owned renewable generation. We understand the deadline for adoption of this policy is July 1, 2009.

Please contact me if you have any questions.

Sincerely,

James A. Woods
