Subject: Net metering and renewable energy
Diane,

Per your voicemail message, Gulf Coast Electric Cooperative does not have any net metering customers to report to be in compliance with the PSC's requirements. We do have a member that has a system installed, but we are waiting on the PSC's approval of our Rate Rider and also our Net Metering Agreement to allow the member to interconnect. I appreciate you looking for the net metering information and renewable energy information I sent in some time back. As mentioned, I sent the net metering information in and there was some questions, so it was revised and resent. I have yet to hear anything and the renewable standards was sent in around the same time and I haven't heard anything about it either. If you could let me know the status I would appreciate it.

Thanks,

Michael E. White
