Re: Amended Annual Report on the Interconnection and Net Metering of Customer-Owned Renewable Generation

Dear Ms. Stauffer:

Please find enclosed FPL's Annual Report on the Interconnection and Net Metering of Customer-Owned Renewable Generation, as required by Rule 25-6.065(10), Florida Administrative Code. FPL's report has been amended to include additional information at the request of FPSC Staff.

If there are any questions regarding this filing, please contact me at 561-304-5226.

Sincerely,

s/ Jessica A. Cano

Attn: Mark Futrell
Office of Industry Development and Market Analysis

Amended April 21, 2015

**Florida Power & Light Company Report as Required by
FPSC Rule 25-6.065 Interconnection and Net Metering of Customer-Owned
Renewable Generation as of 12/31/2014**

(a) Total number of customer-owned renewable generation interconnections as of the end of the previous calendar year;

As of December 31, 2014, FPL had 3,241 customer-owned renewable generation interconnections.¹

(b) Total kW capacity of customer-owned renewable generation interconnected as of the end of the previous calendar year;

As of December 31, 2014, the total kW capacity of FPL customer-owned renewable generation interconnections (associated with the 3,241 interconnections provided in response to part (a)) was 33,594 kW (AC Gross Power Rating). This consists of 29,582 kW photovoltaic, 62 kW wind, and 3,950 kW other (biomass).

(c) Total kWh received by interconnected customers from the electric utility, by month and by year for the previous calendar year;

(d) Total kWh of customer-owned renewable generation delivered to the electric utility, by month and by year for the previous calendar year;

	C	D
	Total kWh Received from the Utility	Total kWh Delivered to the Utility
January	33,994,771	675,702
February	34,210,822	866,358
March	33,027,580	1,223,233
April	36,287,544	1,452,483
May	41,427,787	1,562,672
June	41,752,150	1,453,802
July	41,944,532	1,302,080
August	46,009,853	1,295,411
September	50,225,597	1,397,422
October	50,423,074	1,393,241
November	46,584,114	1,605,036
December	44,794,854	1,314,937
2014 Total	500,682,678	15,542,377

¹ Please see the response to part (f), which explains why the number of customers interconnected on December 31, 2014 is lower than the number of customers who were interconnected at any point during 2014.

e) Total energy payments made to interconnected customers for customer-owned renewable generation delivered to the electric utility for the previous calendar year, along with the total payments made since the implementation of this rule.

The total payments made to interconnected customers for customer-owned renewable generation delivered to FPL in 2014 are \$41,458. These payments represent customers' excess generation credits that remained at the end of 2014.

The total payments made to interconnected customers since net metering became effective on October 1, 2008 are \$120,185. These payments represent customers' excess generation credits that remained at the end of each calendar year 2008-2014.

(f) For each individual customer-owned renewable generation interconnection:

1. Renewable technology utilized;
2. Gross power rating;
3. Geographic location by county; and
4. Date interconnected.

Below is a listing showing the requested data for all customers that had a renewable technology interconnected with FPL at any time during the 2014 calendar year. In other words, this listing may include customers who were interconnected at the beginning of the year, or for a few months during the year, who were not still interconnected on December 31, 2014. Additionally, it is possible for a particular premise with a renewable generation system to have more than one customer/occupant during the year, and each customer/occupant would be listed below. For these reasons, this listing of 3,347 customers is greater than the 3,241 interconnections provided in response to part (a) above, which only lists interconnections as of December 31, 2014.

Note: "Other" system types may include one or more of the following fuels or energy sources: hydrogen, biomass, geothermal energy, ocean energy, waste heat, or hydroelectric power. In 2014, FPL's "other" customer-owned renewable generation interconnections consisted of biomass systems.

Customer Reference Number	Renewable Technology Utilized	Gross Power Rating kW	County	Date Interconnected
1	OTHER (biomass)	750	Palm Beach	8/27/2013
2	OTHER (biomass)	1600	Manatee	2/18/2014
