Note: The company identified an issue during the development of this report that has been corrected. The issue involved the subset of customers with PV installations in which their meter had been estimated at some point in 2017. The estimations caused the net kWh to bank higher than it should in the company's billing system for these few customers. This issue caused the energy payments reported amount in 2017 to be overstated by \$3,692.71. The billing issues was corrected and the number reported for the cumulative amount since 2008 has been adjusted to correct for this amount.

- (f) The following table starting on the next page below shows for each individual customer-owned renewable generation interconnection: Renewable technology utilized; Gross power rating; Geographic location by county; and Date interconnected.
