NOTES:

The total number of interconnections, 23,799, is the active customer count as of December 31, 2020.

Tables 2 and 3 include all customers that had a customer-owned renewable technology interconnected with FPL at any time during the 2020 calendar year, including some customers that did not have an interconnected system at the end of the year. Additionally, it is possible for a particular premise with a renewable generation system to have more than one customer/occupant during the year, and each customer/occupant would be listed in those tables. For these reasons, this listing of 24,713 customers in Tables 2 and 3 is greater than 23,799 interconnections indicated in the report summary.
