

March 30, 2021

Cayce Hinton  
Director, Office of Industry Development and Market Analysis  
Florida Public Service Commission  
2540 Shumard Oak Boulevard  
Tallahassee, Florida 32399-0850

Dear Ms. Hinton,

The documents accompanying this letter fulfill the 2020 net metering reporting requirements detailed in paragraph 10 of *Rule 25-6.065, F.A.C., Interconnection and Net Metering of Customer-Owned Renewable Generation* for Choctawhatchee Electric Cooperative, Inc. (CHELCO).

Enclosed please find the 2020 Interconnected Renewable Generation Report, and a list of individual customer owned generation interconnections and related information, along with an outline of CHELCO's energy efficiency efforts for this past year.

If any further information is required for CHELCO to fulfill its reporting requirements, please let us know.

Respectfully,

**C. BRYAN GILBERT**  
Manager of Energy Services  
Office: 850.307.1125  
Cell: 850.585-8622

**Choctawhatchee Electric Cooperative, Inc. (CHELCO)**  
**Reporting Requirements under Florida Statutes §366.92(3)**

Florida Statutes §366.92(3) requires the following:

“Each municipal electric utility and rural electric cooperative shall develop standards for the promotion, encouragement, and expansion of the use of renewable energy resources and energy conservation and efficiency measures. On or before April 1, 2009, and annually thereafter, each municipal electric utility and electric cooperative shall submit to the commission a report that identifies such standards.”

This document is intended to fulfill the reporting requirements of **CHELCO** under Florida Statutes §366.92(3) as of April 1, 2019.

**Renewable Energy Resources**

**Choctawhatchee Electric Cooperative, Inc. (CHELCO)** is a member owner of PowerSouth Energy Cooperative (“PowerSouth”) along with nineteen other electric distribution cooperatives and municipalities located in central and south Alabama and northwest Florida. In addition to being a member owner of PowerSouth, CHELCO has entered into a Contract for Wholesale Power Service with PowerSouth which requires that CHELCO purchase all of its electric power and energy from PowerSouth through December 31, 2055. It is the long-standing intent of both CHELCO and PowerSouth that all wholesale power supply responsibilities be placed upon PowerSouth. Those wholesale power supply responsibilities include comprehensive planning to consider and determine appropriate supply and demand resources to meet current and future load requirements within the context of local, state and federal policy goals and objectives.

PowerSouth presently provides the energy requirements of CHELCO and its other member owners through a diverse fleet of generation assets, including hydroelectric, coal-fired and gas-fired production resources located within the state of Alabama. The diversity of PowerSouth’s generation assets is most evident in its 110-megawatt Compressed Air Energy Storage (“CAES”) facility located in McIntosh, Alabama. PowerSouth’s CAES facility captures off-peak energy at night and uses it to force air into an underground salt storage cavern at high pressure. PowerSouth then utilizes the compressed air to generate electricity during intermediate and peak energy demand periods. Energy generated by PowerSouth’s CAES facility produces only approximately one-third of the emissions of a conventional gas-fired turbine.

PowerSouth has also contracted to purchase renewable capacity and energy from a variety of sources including landfill gas, hydroelectric production and solar energy. PowerSouth purchases approximately 200 MW of renewable energy and capacity from hydroelectric projects operated by the Southeastern Power Administration. Within the state of Florida, PowerSouth

purchases and transmits approximately 4.8 MW of renewable energy produced by burning landfill gas at Waste Management's Springhill Landfill in Campbellton, Florida.

In an effort to provide PowerSouth's members and the community with a hands-on educational site for learning about solar energy production, PowerSouth, in conjunction with four of our distribution members, has constructed four solar demonstration projects at the offices of Choctawhatchee Electric Cooperative (CHELCO) in Defuniak Springs, Florida, Escambia River Electric Cooperative (EREC) in Jay, Florida, Central Alabama Electric Cooperative (CAEC) in Prattville, Alabama, and Covington Electric Cooperative (CEC) in Andalusia, Alabama. The CHELCO project consists of a 5.3kW ground-mounted solar array and was constructed in front of CHELCO's Operations Center, and includes an educational kiosk for public information about solar energy. The EREC project consists of a 10.6kW solar array mounted on a parking canopy structure at EREC's headquarters office building. The Florida solar installations were constructed and began operation in the Spring of 2016. The CAEC project consists of a 6.3kW ground-mounted solar array located on the main campus of CAEC in Prattville, Alabama and was constructed and began operation in the Fall of 2016. The CEC project consists of a 9.6kW ground-mounted solar array located on the main campus of CEC in Andalusia, Alabama and was constructed and began operation in May 2019.

CHELCO and PowerSouth have also partnered to develop a community solar project for CHELCO's members who are interested in procuring solar energy. The community solar project allows CHELCO members who are renters, have significant shading or improper orientation of their home to produce solar energy, or simply can't afford the capital expense of an individual solar array to participate in a low-cost solar energy production option. The community solar array has been constructed on the roof of CHELCO's Operations Center in Defuniak Springs, FL and has a total capacity of 120kW-AC. CHELCO members who subscribe for community solar energy (based on a monthly fee) will receive a pro-rata portion of the energy produced from the array. The community solar project construction was completed in March 2018.

PowerSouth has also entered into an agreement to purchase the energy from an 80MW utility-scale solar power plant to be located in Covington County, Alabama. This facility will begin commercial operation in the 4<sup>th</sup> quarter of 2022 and is expected to provide PowerSouth's members with approximately 185,000,000 kilowatt-hours of solar powered energy per year. This facility is currently in the engineering design and permitting phase of construction.

In addition, PowerSouth is a charter member of the National Renewable Cooperative Organization (the "NRCO"). The NRCO was established in 2008 to promote and facilitate the development of renewable energy resources for its members. As of December 2019, the NRCO consisted of 22 member cooperatives serving more than 20 states. The functions of the NRCO include: serving as a clearinghouse for renewable resources development opportunities available to cooperatives; packaging development opportunities for evaluation by members; and aggregating renewable energy requests for proposals for its members.

A. Promotion and Encouragement of Renewable Energy Resources

**CHELCO** is required by the Contract for Wholesale Power Service between **CHELCO** and PowerSouth to purchase all of its electric power and energy from PowerSouth until December 31, 2055. However, the Board of Trustees of PowerSouth, which includes two representatives from **CHELCO**, has enacted Policy No. 303-B, *Consumer-Owned Generation*, which allows PowerSouth member owners including **CHELCO** to purchase energy produced by consumer-owned generation less than 25kW. Policy No. 303-B, *Consumer-Owned Generation*, includes the following definition:

Consumer-Owned Generation shall be defined as follows: An electrical generating system or device located on a consumer's premises that is primarily intended to offset part or all of the consumer's electricity requirements with renewable energy or self-generated energy, with any surplus energy produced therefrom being placed onto the distribution grid.

Policy No. 303-B, *Consumer-Owned Generation* further provides that PowerSouth will process consumer-owned generation of any size which a member system desires.

**CHELCO** and PowerSouth will continue to promote and encourage the expansion of their renewable energy resources. **CHELCO** through its participation in PowerSouth has established a long term goal to pursue opportunities to participate in financially feasible renewable energy projects.

B. Expansion of Renewable Energy Resources

**CHELCO** through its participation in PowerSouth provides for the possible expansion of renewable energy resources. **CHELCO** through its participation in PowerSouth will:

- Maintain active participation in the National Renewable Cooperative Organization; and
- Continue to pursue opportunities to participate in and/or purchase capacity and/or energy from alternative energy projects, both renewable and carbon free, with a preference for projects within PowerSouth's service territory.

### **Energy Conservation and Efficiency Measures**

A. Promotion and Encouragement of Energy Conservation and Efficiency

**CHELCO** purchases capacity and energy from PowerSouth under a wholesale electric rate which provides price signals to encourage the promotion of demand management and energy efficiency. PowerSouth's rate includes an on-peak and off-peak demand component which encourages off-peak usage and greater efficiency. In addition, the Board of Trustees of

PowerSouth, which includes two representatives from **CHELCO**, has enacted Policy No. 301-B, *Demand Side Management (DSM)*, which allows and encourages PowerSouth member owners, including **CHELCO**, to utilize demand side management programs to conserve energy and control costs.

**CHELCO** responds to such rate signals by making policies and implementing demand side programs that encourage energy conservation and efficiency among its consumers. Those policies and programs include:

**Load Management Program:** Under the Load Management Program, PowerSouth’s member owners may install direct control load management systems (such as hot water heater switches under the H2O Plus Program and thermostat control switches under the HVAC Load Control Program, both described later in this report) for the purpose of reducing coincident peak demand. PowerSouth activates those load control devices during high load conditions to reduce overall demand. Any reductions in PowerSouth’s coincident peak demand will reduce PowerSouth’s system generating requirements and associated reserves and benefit **CHELCO** and PowerSouth’s other members whether or not they participate in the program.

**Residential Energy Efficiency Rebate Program:** On February 24, 2012, PowerSouth’s Board of Trustees established PowerSouth’s Residential Energy Efficiency Rebate Program. Pursuant to this Rebate Program, **CHELCO** and PowerSouth’s other member owners offer rebates to encourage residential consumers to purchase and install high efficiency air source heat pumps, dual fuel heat pumps, mini-split heat pumps and geothermal heat pumps. The program has been designed to allow the dollar value of rebates to increase as the efficiency rating of the qualifying heat pump increases. The higher efficiency heat pumps installed under the program will permit PowerSouth to reduce its demand during PowerSouth’s winter coincidental peak times. In 2018, the program was modified to discontinue rebates for standard air-source heat pumps, except when installed in manufactured housing. Also, rebates for geothermal heat pumps have been discontinued. As of December 31, 2020 the cumulative demand savings pursuant to this program are as follows:

Total	Total	Total kWh	Total Demand Savings	
Rebates	Dollars Rebated	Savings	Winter, kW	Summer, kW
8,260	\$ 6,297,121	19,782,107	16,963	3,156

**Touchstone Energy Home Program:** **CHELCO** and PowerSouth’s other member owners have jointly implemented various energy conservation programs which continue to reduce PowerSouth’s total energy requirements. One such program is the *Touchstone Energy Home* Program and its predecessor, the *Good Cents Home* program. Since 1986, **CHELCO** and the other participating PowerSouth member owners have offered rebates and incentives for the installation of air-to-air heat pumps certified through the program. Each *Touchstone Energy* certified home experiences an average annual savings of 2,772 kilowatt hours as compared to a conventional home.

	Number of Homes Certified	Estimated Annual Energy Savings Per Home	Total Annual Energy Savings
<i>Good Cents Homes</i>	6,054	2,772 kwh*	16,782 mwh
<i>Touchstone Energy Homes</i>	8,574	2,772 kwh*	23,767 mwh
Totals	14,628	2,772 kwh*	40,549 mwh

\*PowerSouth Load Research Study: Monitored and collected 15 minute interval data on *Touchstone Energy Homes*, conventional homes, manufactured homes, water heating, HVAC, condos, dual fuel homes and geothermal homes from 2003-2005.

Through participation in the *Good Cents* and *Touchstone Energy Home* Programs, **CHELCO** and PowerSouth's other member owners jointly conserved over 487,149 MWH from program inception through December 31, 2019. While the homes that participated in the *Touchstone Energy Home* Programs remain a part of the PowerSouth system, this program is no longer available and this section of our report will not be included in our filing for 2021.

**CHELCO** through its participation in PowerSouth emphasizes demand side management, energy conservation and efficiency. **CHELCO**'s goals for its expanded demand side management and conservation programs include:

B. Expansion of Energy Conservation and Efficiency Measures

**CHELCO** and PowerSouth's other member owners will continue to promote and encourage the expansion of their respective demand management, energy conservation and energy efficiency programs. **CHELCO** through its participation in PowerSouth emphasizes demand side management, energy conservation and efficiency. **CHELCO** through its participation in PowerSouth will:

- Continue to evaluate the long-term cost/benefits of expanding the DSM program.
- Provide the education and training necessary to fully implement the DSM program.
- Continue to exhaustively research and conduct detailed cost/benefit evaluations and analysis of the effectiveness of current and future demand management and energy efficiency programs. GDS Associates, Inc., a recognized leader in the energy efficiency and DSM program evaluation field, has developed a modeling tool for Power South to provide in-depth analysis of the viability and effectiveness of its and **CHELCO**'s current and future demand management and energy efficiency programs.

**CHELCO** and PowerSouth's other member owners have developed and offer several demand management, energy conservation and energy efficiency programs:

- Residential Energy Efficiency Financing Program is a lending program which permits **CHELCO** 's qualified residential consumers to secure financing through Regions Bank (“Regions”) for the purpose of purchasing and installing certain residential energy efficiency upgrades, measures and improvements. As of December 31, 2020, two hundred, eighty-one (281) loans have been closed under the program, with a total value of more than \$1,817,818.00.
- On-Site Energy Audit/Survey provides on-site energy audits and surveys through the *Touchstone Energy Home* Program to assist consumers with energy conservation.
- On-Line Energy Audit/Survey provides an interactive website through the *Touchstone Energy Home* Program which aids consumers in making decisions related to energy efficiency and conservation.
- Poultry LED Lighting Program promotes the bulk purchase of LED lighting for poultry houses and the education of poultry growers as to the energy efficiency benefits associated with the utilization of LED lighting. As of December 31, 2020, the total demand savings pursuant to this program are as follows:

<b>Total Poultry LEDs Installed</b>	<b>Total Savings</b>	
	<b>Total kWh Saved</b>	<b>Total kW Demand Savings</b>
336	39,312	8.7

- Light Emitting Diode (LED) Lighting Program promotes the bulk purchase of LEDs and the education of consumers on the energy efficiency and savings associated with the implementation and use of such lighting applications. As of December 31, 2020, the cumulative demand savings pursuant to the LED Program are as follows:

<b>Total Energy Savings (kWh)</b>	<b>Total Demand Savings (Winter, kW)</b>
1,169,800	106

- H2O Plus Program is designed to lessen coincident peak demand by installing smart switches on electric water heaters to help control energy usage during periods of peak demand. As of December 31, 2020, the total demand savings pursuant to this program are as follows:

<b>Total Devices Installed</b>	<b>Total Demand Savings</b>	
	<b>Winter, kW (15 min)</b>	<b>Winter, kW (Hourly)</b>
20,734	25,019	17,901

- Commercial/Industrial Accounts Program allows **CHELCO** ] and the other member owners of PowerSouth to partner with both Intelligent Building Solutions, Inc. to provide support and audit services necessary to improve energy efficiency and conservation among industrial consumers.
- School Education Program promotes the implementation and development of various energy efficiency and conservation educational programs for school-aged children.
- Empower Energy Education Workshop provides educators with supplemental curriculum about electrical energy. PowerSouth partnered with the National Energy Education Development (NEED) Project to develop the program, as well as the hands-on activities and curriculum provided to attendees. PowerSouth was required to cancel the Empower Energy Education Workshop for 2020 and 2021 due to the Covid-19 Pandemic, but plans to continue to host the event as soon as it is safe to do so.
- Together We Save Program promotes the education of consumers on the savings associated with residential energy efficiency improvements and techniques.
- Generating Plant Efficiency: **CHELCO** and PowerSouth's other member owners continue efforts to improve plant heat rates.
- Generating Plant Modifications: **CHELCO** and PowerSouth's other member owners continue efforts to achieve greater plant efficiencies through physical modifications.
