

March 30, 2022

Daniel Cordell  
Public Utility Supervisor  
Florida Public Service Commission  
2540 Shumard Oak Boulevard  
Tallahassee, Florida 32399-0850

Dear Mr. Cordell,

The documents accompanying this letter fulfill the 2021 net metering reporting requirements detailed in paragraph 10 of *Rule 25-6.065, F.A. C., Interconnection and Net Metering of Customer-Owned Renewable Generation* for Choctawhatchee Electric Cooperative, Inc. (CHELCO).

Enclosed please find the 2021 Interconnected Renewable Generation Report, and a list of individual customer owned generation interconnections and related information, along with an outline of CHELCO's energy efficiency efforts for this past year.

If any further information is required for CHELCO to fulfill its reporting requirements, please let us know.

Respectfully,

**C. BRYAN GILBERT**  
Manager of Marketing  
Office: 850.307.1125  
Cell: 850.585-8622

**Choctawhatchee Electric Cooperative, Inc. (CHELCO)**  
**Reporting Requirements under Florida Statutes §366.92(3)**

Florida Statutes §366.92(3) requires the following:

“Each municipal electric utility and rural electric cooperative shall develop standards for the promotion, encouragement, and expansion of the use of renewable energy resources and energy conservation and efficiency measures. On or before April 1, 2009, and annually thereafter, each municipal electric utility and electric cooperative shall submit to the commission a report that identifies such standards.”

This document is intended to fulfill the reporting requirements of CHELCO under Florida Statutes §366.92(3) as of April 1, 2022.

**Renewable Energy Resources**

**Choctawhatchee Electric Cooperative, Inc. (CHELCO)** is a member owner of PowerSouth Energy Cooperative (“PowerSouth”) along with nineteen other electric distribution cooperatives and municipalities located in central and south Alabama and northwest Florida. In addition to being a member owner of PowerSouth, CHELCO has entered into a Contract for Wholesale Power Service with PowerSouth which requires that CHELCO purchase all of its electric power and energy from PowerSouth through December 31, 2055. It is the long-standing intent of both CHELCO and PowerSouth that all wholesale power supply responsibilities be placed upon PowerSouth. Those wholesale power supply responsibilities include comprehensive planning to consider and determine appropriate supply and demand resources to meet current and future load requirements within the context of local, state and federal policy goals and objectives.

PowerSouth presently provides the energy requirements of CHELCO and its other member owners through a diverse fleet of generation assets, including hydroelectric, coal-fired and gas-fired production resources located within the state of Alabama. The diversity of PowerSouth’s generation assets is most evident in its 110 MW Compressed Air Energy Storage (“CAES”) facility located in McIntosh, Alabama. PowerSouth’s CAES facility captures off-peak energy at night and uses it to force air into an underground salt storage cavern at high pressure. PowerSouth then utilizes the compressed air to generate electricity during intermediate and peak energy demand periods. Energy generated by PowerSouth’s CAES facility produces only approximately one-third of the emissions of a conventional gas-fired turbine.

PowerSouth has also contracted to purchase renewable capacity and energy from a variety of sources including landfill gas, hydroelectric production and solar energy. PowerSouth purchases approximately 200 MW of renewable energy and capacity from hydroelectric projects operated by the Southeastern Power Administration. Within the state of Florida, PowerSouth

purchases and transmits approximately 4.8 MW of renewable energy produced by burning landfill gas at Waste Management's Springhill Landfill in Campbellton, Florida.

In an effort to provide PowerSouth's members and the community with a hands-on educational site for learning about solar energy production, PowerSouth, in conjunction with four of our distribution members, has constructed four solar demonstration projects at the offices of Choctawhatchee Electric Cooperative (CHELCO) in Defuniak Springs, Florida, Escambia River Electric Cooperative (EREC) in Jay, Florida, Central Alabama Electric Cooperative (CAEC) in Prattville, Alabama, and Covington Electric Cooperative (CEC) in Andalusia, Alabama. The CHELCO project consists of a 5.3kW ground-mounted solar array and was constructed in front of CHELCO's Operations Center, and includes an educational kiosk for public information about solar energy. The EREC project consists of a 10.6kW solar array mounted on a parking canopy structure at EREC's headquarters office building. The Florida solar installations were constructed and began operation in the Spring of 2016. The CAEC project consists of a 6.3kW ground-mounted solar array located on the main campus of CAEC in Prattville, Alabama and was constructed and began operation in the Fall of 2016. The CEC project consists of a 9.6kW ground-mounted solar array located on the main campus of CEC in Andalusia, Alabama and was constructed and began operation in May 2019.

CHELCO and PowerSouth have also partnered to develop a community solar project for CHELCO's members who are interested in procuring solar energy. The community solar project allows CHELCO members who are renters, have significant shading or improper orientation of their home to produce solar energy, or simply can't afford the capital expense of an individual solar array to participate in a low-cost solar energy production option. The community solar array has been constructed on the roof of CHELCO's Operations Center in Defuniak Springs, FL and has a total capacity of 125kW-AC. CHELCO members who subscribe for community solar energy (based on a monthly fee) will receive a pro-rata portion of the energy produced from the array. The community solar project construction was completed in March 2018.

PowerSouth has also entered into an agreement to purchase the energy from an 80 MW utility-scale solar power plant to be located in Covington County, Alabama. This facility is scheduled to begin commercial operation in the 4<sup>th</sup> quarter of 2022 and is expected to provide PowerSouth's members with approximately 185,000,000 kilowatt-hours of solar powered energy per year. This facility is currently in the land preparation phase of construction.

In addition, PowerSouth is a charter member of the National Renewable Cooperative Organization (the "NRCO"). The NRCO was established in 2008 to promote and facilitate the development of renewable energy resources for its members. As of October 2021, the NRCO consisted of 23 member cooperatives serving more than 20 states. The functions of the NRCO include: serving as a clearinghouse for renewable resources development opportunities available to cooperatives; packaging development opportunities for evaluation by members; and aggregating renewable energy requests for proposals for its members.

A. Promotion and Encouragement of Renewable Energy Resources

CHELCO is required by the Contract for Wholesale Power Service between CHELCO and PowerSouth to purchase all of its electric power and energy from PowerSouth until December 31, 2055. However, the Board of Trustees of PowerSouth, which includes two representatives from CHELCO, has enacted Policy No. 303-B, *Consumer-Owned Generation*, which allows PowerSouth member owners including CHELCO to purchase energy produced by consumer-owned generation less than 25kW. Policy No. 303-B, *Consumer-Owned Generation*, includes the following definition:

Consumer-Owned Generation shall be defined as follows: An electrical generating system or device located on a consumer's premises that is primarily intended to offset part or all of the consumer's electricity requirements with renewable energy or self-generated energy, with any surplus energy produced therefrom being placed onto the distribution grid.

Policy No. 303-B, *Consumer-Owned Generation* further provides that PowerSouth will process consumer-owned generation of any size which a member system desires.

CHELCO and PowerSouth will continue to promote and encourage the expansion of their renewable energy resources. CHELCO through its participation in PowerSouth has established a long-term goal to pursue opportunities to participate in financially feasible renewable energy projects.

#### B. Expansion of Renewable Energy Resources

CHELCO through its participation in PowerSouth provides for the possible expansion of renewable energy resources. CHELCO through its participation in PowerSouth will:

- Maintain active participation in the National Renewable Cooperative Organization; and
- Continue to pursue opportunities to participate in and/or purchase capacity and/or energy from alternative energy projects, both renewable and carbon free, with a preference for projects within PowerSouth's service territory.

### **Energy Conservation and Efficiency Measures**

#### A. Promotion and Encouragement of Energy Conservation and Efficiency

CHELCO purchases capacity and energy from PowerSouth under a wholesale electric rate which provides price signals to encourage the promotion of demand management and energy efficiency. PowerSouth's rate includes an on-peak and off-peak demand component which encourages off-peak usage and greater efficiency. In addition, the Board of Trustees of PowerSouth, which includes two representatives from CHELCO, has enacted Policy No. 301-B, *Demand Side Management (DSM)*, which allows and encourages PowerSouth member owners,

including CHELCO, to utilize demand side management programs to conserve energy and control costs.

CHELCO responds to such rate signals by making policies and implementing demand side programs that encourage energy conservation and efficiency among its consumers. Those policies and programs include:

**Load Management Program:** Under the Load Management Program, PowerSouth’s member owners may install direct control load management systems (such as hot water heater switches under the H2O Plus Program and thermostat control switches under the HVAC Load Control Program, both described later in this report) for the purpose of reducing coincident peak demand. PowerSouth activates those load control devices during high load conditions to reduce overall demand. Additionally, CHELCO utilizes the direct load control equipment to control and reduce non-coincident peaks and employs voltage reduction and voluntary member load curtailment strategies to further reduce and control overall peaks. Reductions in PowerSouth’s coincident peak demand will reduce PowerSouth’s system generating requirements and associated reserves and benefit CHELCO and PowerSouth’s other members whether or not they participate in the program. Reductions in CHELCO’s non-coincident peak demand will reduce PowerSouth’s ratchet demand requirements and associated fees and benefit CHELCO’s membership.

**Residential Energy Efficiency Rebate Program:** On February 24, 2012, PowerSouth’s Board of Trustees established PowerSouth’s Residential Energy Efficiency Rebate Program. Pursuant to this Rebate Program, CHELCO and PowerSouth’s other member owners offer rebates to encourage residential consumers to purchase and install high efficiency air -source heat pumps, dual fuel heat pumps, mini-split heat pumps and geothermal heat pumps. The program has been designed to allow the dollar value of rebates to increase as the efficiency rating of the qualifying heat pump increases. The higher efficiency heat pumps installed under the program will permit PowerSouth to reduce its demand during PowerSouth’s winter coincidental peak times. In 2018, the program was modified to discontinue rebates for standard air-source heat pumps, except when installed in manufactured housing. Also, rebates for geothermal heat pumps have been discontinued. As of December 31, 2021 the cumulative demand savings pursuant to this program are as follows:

<b>Total Rebates</b>	<b>Total Dollars Rebated</b>	<b>Total kWh Savings</b>	<b>Total Demand Savings</b>	
			<b>Winter, kW</b>	<b>Summer, kW</b>
8,765	\$ 6,911,021	21,726,076	19,079	3,219

CHELCO through its participation in PowerSouth emphasizes demand side management, energy conservation and efficiency. CHELCO’s goals for its expanded demand side management and conservation programs include:

B. Expansion of Energy Conservation and Efficiency Measures

CHELCO and PowerSouth’s other member owners will continue to promote and encourage the expansion of their respective demand management, energy conservation and energy efficiency programs. CHELCO through its participation in PowerSouth emphasizes demand side management, energy conservation and efficiency. CHELCO through its participation in PowerSouth will:

- Continue to evaluate the long-term cost/benefits of expanding the DSM program.
- Provide the education and training necessary to fully implement the DSM program.
- Continue to exhaustively research and conduct detailed cost/benefit evaluations and analysis of the effectiveness of current and future demand management and energy efficiency programs. GDS Associates, Inc., a recognized leader in the energy efficiency and DSM program evaluation field, has developed a modeling tool for PowerSouth to provide in-depth analysis of the viability and effectiveness of its and CHELCO’s current and future demand management and energy efficiency programs.

CHELCO and PowerSouth’s other member owners have developed and offer several demand management, energy conservation and energy efficiency programs:

- On-Site Energy Audit/Survey provides on-site energy audits and surveys through the *Touchstone Energy Home* Program to assist consumers with energy conservation.
- On-Line Energy Audit/Survey provides an interactive website through the *Touchstone Energy Home* Program which aids consumers in making decisions related to energy efficiency and conservation.
- Poultry LED Lighting Program promotes the bulk purchase of LED lighting for poultry houses and the education of poultry growers as to the energy efficiency benefits associated with the utilization of LED lighting. As of December 31, 2021, the total demand savings pursuant to this program are as follows:

<b>Total Poultry LEDs Installed</b>	<b>Total Savings</b>	
	<b>Total kWh Saved</b>	<b>Total kW Demand Savings</b>
336	39,312	8.7

- Light Emitting Diode (LED) Lighting Program promotes the bulk purchase of LEDs and the education of consumers on the energy efficiency and savings associated with the implementation and use of such lighting applications. As of December 31, 2021, the cumulative demand savings pursuant to the LED Program are as follows:

<b>Total Energy Savings (kWh)</b>	<b>Total Demand Savings (Winter, kW)</b>
1,171,655	106

- H2O Plus Program is designed to lessen coincident peak demand by installing smart switches on electric water heaters to help control energy usage during periods of peak demand. As of December 31, 2021, the total demand savings pursuant to this program are as follows:

<b>Total Devices Installed</b>	<b>Total Demand Savings</b>	
	<b>Winter, kW (15 min)</b>	<b>Winter, kW (Hourly)</b>
20,948	25,284	18,078

- Commercial/Industrial Accounts Program allows CHELCO and the other member owners of PowerSouth to partner with both Intelligent Building Solutions, Inc. to provide support and audit services necessary to improve energy efficiency and conservation among industrial consumers.
- School Education Program promotes the implementation and development of various energy efficiency and conservation educational programs for school-aged children.
- Empower Energy Education Workshop provides educators with supplemental curriculum about electrical energy. PowerSouth partnered with the National Energy Education Development (NEED) Project to develop the program, as well as the hands-on activities and curriculum provided to attendees. PowerSouth was required to cancel the Empower Energy Education Workshop for 2020 and 2021 due to the Covid-19 Pandemic, however, the 2022 Workshop is scheduled for June 26-29, 2022.
- Together We Save Program promotes the education of consumers on the savings associated with residential energy efficiency improvements and techniques.
- Generating Plant Efficiency: CHELCO and PowerSouth's other member owners continue efforts to improve plant heat rates.

- **Generating Plant Modifications:** CHELCO and PowerSouth's other member owners continue efforts to achieve greater plant efficiencies through physical modifications.
- **Electric Vehicle (EV) Education:** CHELCO and PowerSouth, and PowerSouth's other member owners are offering educational platforms for EVs to promote EV usage. CHELCO provides its members with a digital toolkit on its website that includes EV model comparisons, EV FAQs, a public charger finder, and calculators for customers to compare gas versus electric vehicle costs.
- **Electric Vehicle (EV) Registration Rebate Program:** PowerSouth and its member owners are implementing an EV Registration Rebate Program set to commence in 2022. The EV Registration Rebate Program will allow residential customers to register their EV and apply for a rebate. The program will allow CHELCO to compile a database of EV saturation in its territory to assist in establishing other EV programs.
- **Electric Vehicle (EV) Residential Level 2 Charger Program:** PowerSouth and its member owners are implementing a EV Residential Level 2 Charger Program in 2022. Through this Program, 100 EV level 2 chargers will be disbursed across PowerSouth and its member owners territory. Participating customers will allow access to EV charging data in exchange for the charger. The data provided through the program will assist PowerSouth and its member owners in understanding the grid impacts and load shape impacts of EVs to the system.
