**Re: Docket No. 20240000
Florida Power & Light Company's Annual Distribution Reliability Report**

Dear Mr. Teitzman:

Pursuant to Rule 25-6-0455, F.A.C., enclosed for filing in the above referenced docket, please find Florida Power & Light Company's Annual Distribution Reliability Report.

Should you have any questions regarding this filing, please contact me at (561) 691-7263.

Sincerely,

s/ David M. Lee

Executive Summary – FPL’s March 1, 2024, Filing

Florida Power & Light Company (“FPL” or the “Company”) herein submits its Annual Reliability Report for the preceding calendar year (2023) pursuant to Rule 25-6.0455, F.A.C. In 2023, FPL once again achieved excellent results in its Transmission and Distribution (“T&D”) System performance based on multiple reliability indices.

Effective January 1, 2022, the rates and tariffs of the former Gulf Power Company (“Gulf”) and FPL were consolidated and unified, all former Gulf customers became FPL customers, and Gulf ceased to exist as a separate regulated entity.¹ Thus, all data provided in this report for calendar year 2022 and 2023 is for the consolidated FPL system with the former Gulf service area integrated into FPL as the Northwest Region. For any data included in this report for calendar years prior to 2022, FPL has provided standalone data for both former FPL and former Gulf.

This report provides all the data and information required by Rule 25-6.0455, F.A.C. Included are multiple Appendices that provide detailed and supporting reliability data for calendar year 2023. In addition, FPL has included Appendix F that provides graphs for key reliability indicators in a similar format utilized in the Public Service Commission’s annual reliability report to the Florida Governor and State Legislature.

¹ Unless the context dictates otherwise, all references to Gulf throughout this report are for pre-consolidated Gulf.

Summary - Reliability

Total FPL System (Distribution and Transmission) - System Average Interruption Duration Index (“SAIDI”) is the most relevant and best overall reliability indicator because it encompasses two other standard industry performance metrics for reliability: System Average Interruption Frequency Index (“SAIFI”) and Customer Average Interruption Duration Index (“CAIDI”). In 2023, FPL continued to provide excellent overall reliability for its customers, achieving a total T&D system adjusted SAIDI of 44.5 minutes, a T&D system adjusted Momentary Average Interruption Frequency Index events (“MAIFle”) of 2.5 momentary events, and a T&D system adjusted SAIFI of 0.71 minutes.

Distribution — FPL’s 2023 overall adjusted distribution reliability results were: SAIDI of 43.2 minutes; a SAIFI of 0.62 interruptions per customer; a CAIDI of 69.4 minutes; and an adjusted MAIFle of 2.0 momentary events.

Transmission — In 2023, FPL’s Transmission/Substation adjusted reliability results were: a SAIDI of 1.3 minutes; a SAIFI of 0.09 interruptions per customer; and a MAIFle of 0.5 momentary events.

Distribution Reliability

GENERAL

1. Discuss overall performance absent adjustments (Form 102).

FPL's overall unadjusted distribution reliability in 2023, as measured by SAIDI, was 80.31 minutes. This unadjusted performance includes approximately 37.02 minutes associated with allowed exclusions (e.g., tornados, named storms/hurricanes, and planned interruptions).

2. Describe the level of detailed reliability data the Company tracks.

FPL tracks the following reliability data associated with each individual interruption: customers affected, minutes interrupted, cause of outage, percentage of customers partially restored, device affected by interruption, and location of the device. All interruption data is compiled to calculate reliability indices, which are tracked throughout the year. The reliability indices that FPL tracks include the following: SAIDI, SAIFI, CAIDI, MAIFI, MAIFle, L-Bar, CEMI-3, CEMI-5, CEMI-8, CEMM-15, CEMM-25, and Customer Momentary Experience ("CME").

3. Describe Company efforts to increase critical review of detailed reliability data.

The Company generates and reviews daily reports that provide detailed reliability information, such as the previous day's interruptions by device, month-to-date reliability indices, and year-to-date reliability indices. FPL's management utilizes the information in conducting daily in-depth reviews of key reliability data to identify lessons learned and areas for improvement. This review also includes an assessment

of upcoming weather and potential impacts, operational risks, and a final review of the daily operations plan. FPL's management team also conducts monthly reliability reviews of the programs, objectives, and actual performance vs. the plan. On an annual basis, FPL reviews its reliability performance and outage causes to implement lessons learned and further improve its reliability programs. With the aid of advanced statistical applications, such as Minitab and Six Sigma analysis, FPL performs statistical analyses to identify reliability trends, root causes, and measure program benefits.

4. Describe the process used by your Company to identify and select the level of detailed reliability data.

FPL's reliability data detail has been developed over the years based on industry practices, internal needs, and external requirements (e.g., requirements of regulators).

5. Discuss adjustments.

Generation Events - None.

Transmission Events - See Appendix G.

Distribution Events - See response to Distribution Reliability Item Nos. 11 & 13.

Extreme Weather - See response to Distribution Reliability Item Nos. 7 & 10.

6. Discuss adjusted performance.

Distribution - See the Summary Reliability section above, as well as the response to Item No. 1 above.

EXTREME WEATHER

7. Include in the discussion, the type of weather event, strength (wind speeds/surge-flood levels), locations affected and source of meteorological information.

Extreme Weather Events	**Strength (wind speeds/surge-flood levels)	Landfall Location	Management Regions Affected
Tornado	EF0	North Florida was impacted March 13	Affected: North Florida Supported: Brevard and Central Florida
Tornado	EF0	South Broward and Central Broward were impacted April 12	Affected: South Broward and Central Broward Supported: Boca Raton, Brevard, Central Dade, Central Florida, Naples, North Broward, North Dade, North Florida, South Dade, Treasure Coast, and West Dade
EOC Activation-Weather	N/A	Central Broward, North Broward and South Broward were impacted April 13 to April 18	Affected: Central Broward, North Broward, and South Broward Supported: All management areas except Fort Walton, Pensacola, and Panama City
Tornado	EF0	Brevard was impacted April 26	Affected: Brevard Supported: Boca Raton, Central Florida, North Florida, Treasure Coast and West Palm
Tornado	EF1	Panama City was impacted April 27	Affected: Panama City Supported: Brevard, Fort Walton, Central Florida, North Florida, Pensacola, and Treasure Coast
Tornado	EF0	Boca Raton was impacted April 28	Affected: Boca Raton Supported: West Palm
Tornado	EF2	West Palm was impacted April 29	Affected: West Palm Supported: All management areas except Fort Walton, Pensacola, and Panama City
Tornado	EF1	Toledo Blade was impacted April 30	Affected: Toledo Blade
Tornado	EF0	South Dade was impacted May 25	Affected: South Dade Supported: Boca Raton, Central Broward, Central Dade, Manasota, Naples, North Broward, North Dade, South Broward, Toledo Blade, West Palm, and West Dade
Tropical Storm Arlene	TS	All management areas were impacted June 2 and June 3	Impacted: All management areas

Table continued the next page

Continued from previous page

Extreme Weather Events	**Strength (wind speeds/surge-flood levels)	Landfall Location	Management Regions Affected
Tornado	EF1	Brevard was impacted June 7	Affected: Brevard Supported: Boca Raton, Central Florida, Manasota, Naples, Toledo Blade, Treasure Coast, and West Palm
Tornado	EF2	Pensacola was impacted June 15	Affected: Pensacola Supported: Brevard, Central Dade, Central Florida, Fort Walton, Manasota, Naples, North Dade, North Florida, South Dade, Toledo Blade, Treasure Coast, and West Dade
EOC Activation-Weather	N/A	Pensacola was impacted June 16 to June 18	Affected: Pensacola. Supported: All management areas
Tornado	EF1	Fort Walton was impacted June 19	Affected: Fort Walton Supported: Boca Raton, Brevard, Central Florida, Manasota, Naples, North Florida, Panama City, Pensacola, Toledo Blade, Treasure Coast, and West Palm
Tornado	EF0	Naples was impacted August 24	Affected: Naples
Hurricane Idalia	M*	All management areas were impacted August 29 to September 2	Affected: All management areas
EOC Activation-Weather	N/A	Manasota was impacted September 1 and September 2	Affected: Manasota
Tropical Storm Ophelia	TS	Boca Raton, Brevard, Central Dade, Central Florida, North Broward, North Dade, South Broward, South Dade, Treasure Coast, West Palm, and West Dade were impacted. September 22	Affected: Boca Raton, Brevard, Central Dade, Central Florida, North Broward, North Dade, South Broward, South Dade, Treasure Coast, West Palm, and West Dade
Tornado	EF2	Central Florida was impacted October 12	Affected: Central Florida Supported: Brevard, North Florida, and Treasure Coast
EOC Activation-Weather	N/A	Central Broward was impacted November 15 to November 18	Affected: Central Broward Supported: All management areas except Panama City
EOC Activation-Weather	N/A	All Management areas except Fort Walton, Panama City and Pensacola were impacted. December 16 to 18	Affected: All Management areas except Fort Walton, Panama City and Pensacola Supported: Fort Walton, Panama City and Pensacola

Data Source: <http://www.spc.noaa.gov/climo/reports> and <http://www.nhc.noaa.gov>

*Idalia offshore was Cat 4, made landfall as Cat 3. Final classification from the National Hurricane Center is still pending.

** Utilizing the Saffir-Simpson Hurricane Wind Scale from the National Hurricane Center for a tropical cyclone, the strength/wind speeds have been broken into the following categories:

- Tropical Depression ("TD") with sustained wind speed of 38 mph or less;
- Tropical Storm ("TS") with sustained wind speed of 39-73 mph;
- Hurricane ("H") with sustained wind speed of 74-110 mph; and
- Major Hurricane ("M") with sustained wind speed of 111-157 mph or higher.

8. Describe the Company's efforts to avoid or minimize, in terms of costs incurred and outage duration, any similar events in the future.

FPL maintains a philosophy of continuous improvement. As a part of that philosophy, we gather information and lessons learned from each extreme weather event, maintain awareness of challenges that may be on the horizon, and seek opportunities to leverage relationships and technology to continue to minimize the cost and duration of restoration events that may affect the Company's system. Some examples of this include:

- Expanding the use of drones and our new fixed-winged drone to assist with patrols and infrastructure assessments immediately after the weather has cleared.
- Analyzing our processes and system performance during and after events to identify opportunities to enhance our response and further strengthen the grid to withstand severe weather impacts.
- Continued technology improvements including implementing a new application to streamline resource management and communications during an event.
- Coordinating with strategic partners to ensure resources are available to respond immediately after the weather has cleared to minimize restoration times.
- Annual review of contracts and rates to ensure the most cost-effective resources are available prior to storm season.
- Implementing FPL's Storm Protection Plan ("SPP") as a systematic approach to achieve the legislative objectives of Section 366.96, F.S., to protect and strengthen T&D infrastructure from extreme weather conditions, reduce outage times and restoration costs, and improve overall service reliability to customers.

9. If the method of deriving the weather exclusion is different from the method used for 2022, please explain the changes and provide the Customer Minutes Interrupted (CMI) and Customers Interruptions (CI) for 2023 using the prior method.

No changes were made to FPL's exclusion methodology.

10. Provide the 2023 service reliability data for each extreme weather outage event that is excluded from your Company's 2023 Annual Distribution Reliability Report pursuant to Rule 25-6.0455.

The following data is provided in Appendix G:

- A) Causation
- B) Date
- C) CI
- D) CMI
- E) L-Bar

OTHER DISTRIBUTION ADJUSTMENTS

11. Discuss the causation of each type of distribution event that resulted in customer outages.

Causation	# of Outages	CI	CMI	LBAR
Planned Interruptions	22,463	235,488	20,247,926	115

12. Describe the Company's efforts to avoid or minimize any similar events in the future in terms of the level of costs incurred and outage duration.

FPL continually evaluates the need for planned crew and customer-requested outages by determining if there are alternative work methods that could minimize or prevent such an outage. If an outage is not preventable, FPL works with customers to schedule necessary outages during times that are more convenient for them (e.g., nights and weekends).

13. Provide the 2023 service reliability data for each distribution outage event that is excluded from your Company's 2023 Annual Distribution Reliability Report pursuant to Rule 25-6.0455.

The following data is provided in Appendix G:

- A) Causation
- B) Date
- C) CMI
- D) CI
- E) L-Bar

2023 ADJUSTED RELIABILITY CAUSES OF OUTAGE EVENTS

14. Five-year patterns/trends in outage causation for each of the top causes of outage events, including the frequency, duration, restoration time, cost incurred to restore service, remediation programs, and remediation program costs.

Consolidated FPL (2022-2023)

Rank	PSC Cause Group	System Avg. Interruption (SAIDI)					Frequency (SAIFI)					Duration (CAIDI)				
		2019	2020	2021	2022	2023	2019	2020	2021	2022	2023	2019	2020	2021	2022	2023

**For comparison with former FPL, the former Gulf cause "Other" has been placed into its own category and removed from "All Other Causes". The combined total of the former Gulf causes "Other" and "All Other Causes" is equal to the original values of "All Other Causes" previously reported for the former Gulf metrics.*

See remediation programs/budget levels in FPL's response to Distribution Reliability Item No. 16. Costs incurred to restore service by cause are not specifically tracked.

15. The process used to identify and select the actions to improve the performance in each of the top causes of outages.

Annually, FPL evaluates its current reliability remediation programs and verifies the programs' needs. In addition, if necessary, FPL proposes new reliability remediation programs to improve its reliability performance, concentrating on the highest cause codes and those cause codes that have shown trends needing attention.

16. 2024 activities and budget levels addressing each of the top causes of service outages (programs > \$1.0 Million).

Program	Program Description	Impact on which Cause Codes	2024 Budget \$MM
Distribution Automation/ Smart Grid	Install and maintain Distribution Automation Devices. This Program includes Automated Feeder Switches, Automated Lateral Switches and Fault Current Indicators. These devices will help mitigate the effects of feeder and lateral interruption by clearing temporary faults, decreasing voltage sags, decreasing field visits for replacing blown fuses, isolating problematic areas and decreasing restoration time, making it a more reliable system.	All	\$41.3
System Expansion	Provide the necessary feeder capacity to serve all customers during normal and emergency periods and install the infrastructure necessary to support system contingency.	All	\$39.7
Handhole Inspections / Pad-mounted Transformers	Inspection/Remediation of non-compliant conditions. The purpose of this program is to maintain pad-mount transformer security.	Equipment Failure	\$8.7
Cable Lateral	Reduce the number of direct buried lateral cable failures and reduce customer interruptions.	Equipment Failure	\$8.7
Submarine Cable	Reduce the number of Submarine feeder cable failures and reduce customer interruptions.	Equipment Failure	\$3.8
VAR Management (installations and maintenance)	Install, relocate, maintain, and control distribution capacitor banks. This program will help maintain or improve power factor performance, improve system efficiency, reliability, and quality of service voltage to our customers.	Remaining Causes	\$3.5
Frequency Feeder Repairs	Target overhead/hybrid feeders with the highest customer interruptions, and conduct thermo and visual assessment to identify what equipment and other findings need to be repaired.	All	\$3.2
Switch Cabinet Replacements and Auto Tx	Inspection/Remediation/Replacement of deteriorating Switch Cabinet conditions (rust, etc.).	Animal, Unknown, Vegetation, Weather	\$3.0
Customer Impact	Projects targeted to improve reliability for specific customers or geographic areas.	Equipment Failure	\$2.5
RA Switch Replacement	This program will proactively replace RA switches in order to enhance system operations and reliability.	Equipment Failure	\$2.5
Auto TX Switch (ATS)	Reduce the number of permanent outages caused by temporary faults on overhead transformer equipment.	Animal, Unknown, Vegetation, Weather	\$1.6
CEMI Program	Conducts trigger based post outage investigations on feeders meeting the program criteria and conducts thermo and visual assessments to identify what equipment and other findings need to be repaired.	All	\$1.1
Reliability -Capital Projects	Capital intensive projects to increase overall reliability.	All	\$1.1

THREE-PERCENT FEEDER LIST

- 17. Identify whether any feeders appearing on the three-percent list more than once within a consecutive five-year period and any actions implemented to improve feeder performance.**

See FPL's three-percent list in the Transmission Reliability Question No. 6 and FPL's responses to Distribution Reliability Question Nos. 16 and 18 for actions that FPL has taken to address these feeders.

- 18. Process used to identify and select the actions to improve the performance of feeders on the three-percent feeder list, if any.**

FPL evaluates feeder performance daily and has addressed feeders on this list through its "Frequency Feeder" program and one or more of its other reliability programs.

The objective of FPL's Frequency Feeder program is to reduce the number of customers experiencing multiple interruptions and multiple momentary interruptions by identifying and correcting feeders experiencing the highest number of events and/or customers interrupted. The initiative may strengthen feeders up to and including extreme wind loading standards for additional overall reliability improvement.

- 19. 2023 activities and budget levels directed at improving feeder performance.**

See response to Distribution Reliability Item No. 16.

REGIONAL RELIABILITY INDICES

20. Five-Year patterns/trends in each region's reliability for each index and on any overall basis.

Annual SAIDI performance for the Distribution unit and its regions

Data	Region	2019	2020	2021	2022	2023

21. The process used to identify and select actions to improve the regional reliability trends.

See FPL's response to Distribution Reliability Item No. 3.

22. Discuss any 2023 projected activities and budget levels directed at improving regional reliability performance.

See FPL's response to Distribution Reliability Item No. 16. Each program listed addresses equipment and devices at the management area level.

OVERHEAD - UNDERGROUND RELIABILITY

23. Describe the five-year patterns/trends in reliability performance of underground systems vs. overhead systems.

The majority of FPL's customers are fed from circuits that are a hybrid of both overhead ("OH") and underground ("UG") systems. The methodology used to classify a customer as OH is defined as those customers served by a feeder with combined feeder and lateral OH miles greater than or equal to 95% of the total primary miles. Then, to classify a customer as UG, customers must be served by a feeder with combined feeder and lateral UG miles greater than or equal to 95% of the total primary miles. The balance of customers is classified as Hybrid. According to this methodology, FPL has 124 OH feeders, 625 UG feeders, with the remaining 3,146 feeders classified as hybrid. This methodology was applied for FPL's responses to Distribution Reliability Question Nos. 23 and 26.

Five years reliability performance of UG, hybrid and OH systems

	2020	109	123	100	112
	2021	98	101	0	98

The SAIDI performance of FPL's UG system has been better than its OH system, primarily driven by a better SAIFI. Also, the CAIDI associated with UG has generally performed better than OH due to FPL's looped UG system, which generally provides more opportunities for sectionalizing.

24. Describe Company efforts to separately track the reliability of overhead and underground systems.

FPL continually monitors each feeder interruption with a designation of either OH, UG, or hybrid system. FPL analyzes the types of equipment that fail in order to determine the performance of its OH and UG systems. For example, FPL has equipment codes that relate specifically to its OH system (disconnect switches, insulators, jumpers, wire) and UG system (cable, switch cabinets, elbow, and terminators).

After storm events, if feasible, FPL performs forensic analyses/activities to compare OH vs. UG infrastructure performance.

25. Describe the process used by your company to identify and select the actions to promote underground distribution systems.

URD Tariff - FPL supports all customer requests to convert OH facilities to UG or install new facilities UG. FPL's staff works to ensure timely and helpful responses to all inquiries for costs and requirements. In 2023, 5 municipalities signed undergrounding agreements and moved forward with 8 projects. FPL's Commission approved URD tariff provides incentives for new UG construction and OH to UG conversions for qualified projects.

Local Community Presentations - FPL conducts numerous presentations with local community groups who are interested in exploring OH to UG conversions.

Local Ordinances - There currently are local ordinances in multiple counties within FPL's service area that require new facilities to be installed as UG facilities. In addition, several municipalities require the customer to convert existing OH lines on or adjacent to their property when a major renovation is performed.

Distribution Lateral Hardening Program - FPL's commission approved Distribution Lateral Hardening Program as part of the SPP targets certain overhead laterals that were impacted by recent storms and have a history of vegetation-related outages and other reliability issues for conversion from OH to UG.

26. Provide Overhead and Underground Metrics

See FPL's response to Distribution Reliability Item No. 23 for classification criteria. CEMI-5 is not available by OH and UG. The miles below include only primary circuits (Feeders and Laterals).

2023 OH:

Number of miles = 4,575

Number of customers = 152,195

Number of Customer Minutes Interrupted (CMI) = 11,591,722

Number of Customers Interruptions (CI) = 148,601

L-Bar = $\frac{\text{Minutes of Interruption}}{\text{Total Number of Outages}} = \frac{978,143}{5,677} = 172$

Total Number of Outages = 5,677

2023 HYBRID:

Number of miles = 70,700

Number of customers = 5,245,080

Number of Customer Minutes Interrupted (CMI) = 230,904,444

Number of Customers Interruptions (CI) = 3,343,335

L-Bar = $\frac{\text{Minutes of Interruption}}{\text{Total Number of Outages}} = \frac{15,964,870}{84,903} = 188$

Total Number of Outages = 84,903

2023 UG:

Number of miles = 5,129

Number of customers = 470,080

Number of Customer Minutes Interrupted (CMI) = 11,505,549

Number of Customers Interruptions (CI) = 167,371

L-Bar = $\frac{\text{Minutes of Interruption}}{\text{Total Number of Outages}} = \frac{410,332}{251} = 1,629$

Total Number of Outages = 1,629

Consolidated FPL (2022-2023)

0	3	0		

* As defined by the FPSC.

28. Describe Company efforts to correlate reliability-related complaints with reliability indices for applicable feeder, lateral, and sub region.

FPL responds to and addresses reliability complaints on a case-by-case basis. Lessons learned from issues and resolutions identified may be incorporated into our practices, if deemed appropriate. FPL also utilizes certain reliability programs, e.g., Customer Impact and Frequency Feeders, to address customer complaints.

29. Describe the process used by your company to identify and select systemic actions to improve reliability due to customer complaints. If no such program exists explain why.

See response to Distribution Reliability Item No. 28.

Transmission Reliability

1. Reliability Adjustments Events (Transmission).

See Appendix G.

2. Localized Versus System-Wide Events.

No system-wide events.

3. Description of Reliability Programs.

The transmission and substation reliability initiative is a two-fold program. The first part consists of on-going assessments and inspections of the transmission and substation system conditions and the associated mitigation work as required. The second part consists of the following targeted reliability areas:

Animals - Program to prevent and mitigate the effects of animal-related events to the transmission and substation system. Animals include, but are not limited to, various birds, squirrels, and raccoons.

Equipment - Proactive replacement of both transmission and substation equipment reaching end of life. Items include, but are not limited to, insulators, overhead ground wires ("OHGW"), distribution breakers, transmission breakers, switches, and substation regulators.

Lightning - Items include bonding, grounding, and arrester installations.

Foreign Interference - Outreach and awareness safety program to minimize the impact of foreign interference (e.g., cranes, balloons, diggers, sailboats, etc.) into electrical lines.

4. Five-Year Reliability Performance

Consolidated FPL (2022-2023)

Transmission/Substation 12 Months ending December 31

*Transmission level MAIFI indicators are not available for Northwest Region (formally Gulf Power) prior to 2022. Transmission level MAIFle was not tracked by Gulf Power prior to 2019.

5. Description of Company's Tracking

FPL's Transmission/Substation group investigates all transmission and substation outages to identify the root cause(s) and develop solutions. Reliability performance is tracked using SAIDI, SAIFI, MAIFI, and MAIFle.

6. Method of Program Selections

For program selection, FPL's Transmission/Substation group utilizes historical reliability performance, trends, condition assessments, and risk ranking.
