

## *Organizing For Action*

Climate Change is already impacting Floridians. Impacts include sea level rise and more frequent and severe extreme weather like storms, heavy downpours, flooding, and drought. Carbon pollution standards for power plants will reduce carbon pollution and fight climate change.

I support the EPA carbon pollution standards for power plants and strong action to fight climate change.

## *Organizing For Action*

Climate Change is already impacting Floridians. Impacts include sea level rise and more frequent and severe extreme weather like storms, heavy downpours, flooding, and drought. Carbon pollution standards for power plants will reduce carbon pollution and fight climate change.

I support the EPA carbon pollution standards for power plants and strong action to fight climate change.

## *Organizing For Action*

Climate Change is already impacting Floridians. Impacts include sea level rise and more frequent and severe extreme weather like storms, heavy downpours, flooding, and drought. Carbon pollution standards for power plants will reduce carbon pollution and fight climate change.

I support the EPA carbon pollution standards for power plants and strong action to fight climate change.
