

Florida Public Utilities Co., (FPUC)

RE: Renewable Portfolio Standard

Dear Karen Web,

In response to your data request requiring that all Electric Investor Owned Utilities (IOUs) complete and return RPS Data forms 1-6, Florida Public Utilities Co., is unable to fully process this request. Enclosed is an email correspondence between FPUC and the PSC inquiring as to how non-generating electric utilities are to respond to the data requests as well as the response received back from the PSC. Unfortunately, FPUC is unable to accurately respond to RPS data since we do not have access to the electricity generation data required in the data request.

As a non-generating utility who primarily serves as an electric distributor, FPUC purchases it's electricity from two electric companies, JEA and Gulf Power. Please defer to the JEA's data request submission for electric generation data for our customers in Nassau County, and defer to Gulf Power's data request submission for electric generation data for our customers in Jackson, Liberty & Calhoun Counties.

If there is any other way FPUC can provide additional information that will prove to be helpful in developing a Renewable Portfolio Standard for the State of Florida, FPUC will be to be happy to be of assistance.

Please contact me directly if FPUC's response to the RPS data request generates any questions.

Sincerely

A handwritten signature in black ink, appearing to read "Joe Eysie".

Subject: Renewable Portfolio Standard for Non-Generating Utilities

Kathy,

Thank you for taking my call this morning regarding the participation requirements for Non-Generating Utilities as it relates to the Renewable Portfolio Standard (RPS). I also thank you for inquiring about the applicability of Non-Generating utilities and look forward to hearing the response you receive back from PSC Staffers. Once you receive clarification on this issue, please feel free contact me any of the numbers listed below or by simply replying to this email.

Thanks Again for your help,

All RPS Rulemaking Participants

Re: Renewable Portfolio Standard (RPS) Data Collection

Dear Participant:

As discussed during the July 11, 2008 workshop on the development of a renewable portfolio standard (RPS), Section 366.92(3) directs the Commission to evaluate the cost and technical potential of renewable energy generation methods in Florida through the year 2020. Enclosed are RPS Data Collection forms developed by the Commission staff to obtain this information for analysis. Instructions for completing the forms are also enclosed.

Regulated electric utility participants should complete and return all data forms (RPS Data Forms 1-6) on all technologies listed. Other participants may choose which technologies, if any, they wish to provide information on.

Please complete and return the forms to Karen Webb at kwebb@psc.state.fl.us by 5:00 p.m. July 21, 2008. Should you have any questions about how to complete the forms, please contact Kathy Lewis (850-413-6594) or Phillip Ellis (850-413-6626). Thank you for your assistance.

Sincerely,
