Mareddy/Ann,

It is unfortunate when the very people you need to help you i.e., the governor chose's to take a trip to Spain with his wife, one of his aids, Haridopolos and approx.. 65 business men and women from around the state to try and drum up more business for Florida by using the EB-5 allowing permanent status (green card) citizens if they invest at least \$1M in the country.

These are the very same people who have invited the Communist Chinese into our state and have allowed them to invest \$30M with much more to come into our Education system. With back door tactics such as this in order to make the voting public think they are doing a great job creating jobs for Florida & actually using foreigners to do so – do you really think they give a damn about us?

They are all so in bed with the “green” lie and do not have the backbone to support the taxpayers and their rights. I was hoping Florida would get rid of a good share of our legislators this time since they all had to run. They have put us in this position with all their “green” lies and at the same time investing in the same themselves. Look what the PSC did to your committee when you went to Tally. Absolutely no respect for the citizens of this state and this is what is happening all over America. Too bad Volusia does not have an upstanding press!

Remember the RPOF told the legislators of Florida they do not need the Tea Party groups to get elected or stay in office. I guess their point is we work for them rather than the other way around!

Sad – Sad – Sad state of affairs in America!

Blessings, 

Diane

Dear Ann:

10/17/2012

I am referring this incident to the PSC Counsel, Mr. Walter Clemence. There are several resolutions indicating the will of the people in several counties and we have a county resolution and a city resolution (even though we are not in the city of Port Orange, we are surrounded by it).

You can see the resolutions at www.MicrowaveChasm.org These resolutions are not being respected by the power companies. In a free country, like the United States, this is a disgrace. The PSC needs to step in and put an end to the abuse. The PSC was established to represent and protect the consumer.

Mr. Clemence and Public Service Commissioners, please do your job or Governor Scott, please appoint people who will do theirs.

Governor Scott, Representative Hukill, Senator Lynn, Mr Dave Hood (if elected). It would be very much appreciated if you would write legislation that will protect the rights of the consumer. This abuse needs to stop. You are our legislators, we voted you in to represent us.

Smart Meters are bad because:

- 1. They have the potential to catch on fire, the American Academy of Environmental Medicine does not recommend them because of their ill effects on people.*
- 2. Their surveillance illegal nature. They transmit data of our lives inside our homes violating the IV amendment of the Constitution.*
- 3. Their unfair and punitive "dynamic pricing". Power that is very expensive during the day when people most need it, specially the retired old, and the stay home mothers and their young children.*

We need to hear from you on this important issue ASAP. Governor Scott, Ms.Hukill, I have contacted you several times before and still have not heard from you. I realize you are busy with the election, but so are we helping you get votes as we canvass our districts. We are under assault by the "deployment" of the Smart Meters. Our good and safe analogs are being taken away and are probably being destroyed.

I will convey your message to the different groups being affected by this unconstitutional, and strange event. We have done our homework and research and we can help you write the needed legislation that will put an end to this abuse before people start getting sick or worse. Thank you and I am looking foward to your reply.

Subject: Smart meter installation in our neighborhood

To: Maredy Hanford <sprucecreekpatriots@gmail.com>

Hi, Maredy....Ann here:

Our neighbor was out of town and they installed a Smart Meter on their residence.

She called and told them she did not authorize it and to take it off.

Their reply was: We will NOT take it off and you have no say. We are the power company and we will do what we want, besides EVERYBODY is going to get them, even the neighbor that refused it. (That would be us)

My question is, have you come across anything that will help our neighbor: contacts at FPL or anyone else she can contact.

I know! Too little, too late....some people won't listen until too late. But this neighbor was going through too much to even sit down and talk about it.

Both of our houses are up for sale, so we didn't think this would be a problem. But no sales of either house yet.

Any help you can give would be appreciated.

Call if you want.

Thanks again,

Ann
