Subject: Smart Meters

Dear Mr. Clemence,

My husband and I are counting on you and the Public Service Commission to protect the public and place an immediate moratorium on the Smart Meters. There are too many unknown risks associated with these meters especially health and possible Identity Theft. There is a lot of information concerning the health issues of these meters and their EMF fields. Also, as a victim of Id theft that occurred in 2001 and has never been resolved, I can attest to the nightmare that is created. All it takes is one mistake.

Please stand up for the public.

Thank you.

Mr. & Mrs. Donald Marcinak
