Subject: Smart Meters

Mr. Clemence:

I live in Port Orange and we recently had FPL come through and install Smart Meters. I researched the dangers of Smart Meters and EMFS and feel that we should have the right to decline or opt out of having them installed. This is an attachment to our home that could cause health problems and invade our privacy. Our we going to depend on "big business" to make the right decisions about our health and privacy-I don't think so, when it involves huge profits for them. I think that Smart Meters should be prohibited entirely, but at the very least, we should be given the opportunity thorough out the state to opt out.
