Subject: smart meters

Dear Sir,

I am a customer of F.P.L. and have received a notice to install a smart meter at my home of which I have declined to have installed...these meters are direct violation of the Fed and state wire tapping laws and a violation of my 4th amendment rights. We are in dire need of officials such as your self to stand up for our rights and protect our liberties. Please do what u can to stop these smart meters and be a true representative of the people, Thank you for your attention to this matter.
