Subject: Solar Energy in Florida – Request for Comments
Date: Tuesday, June 23, 2015 4:12:37 PM

Dear Lee Eng Tan, Senior Attorney, Office of the General Counsel, FPSC:

Florida's premier energy center, Florida Solar Energy Center (FSEC)—a research institute of the University of Central Florida—recognizes that both demand-side and supply-side solar energy systems are necessary in order to enhance the development of solar technologies in Florida. FSEC offers its technical expertise to those who assist with policy and decision making responsibilities as the Commission formulates its plan.

Jim Fenton
