Subject: Support Solar Development in Florida
Date: Friday, June 19, 2015 6:13:55 PM

It is time for Florida to join the other states in recognizing the economic development potential of solar energy. Please protect net metering, maintain and increase solar incentive programs and require utilities to increase solar both in their own operations and among their customers. This is not a partisan issue. It will open up job opportunities for Florida's contractors, manufacturers and energy sectors while also saving money for customers. Please think about the future of Florida's economy and support policies that increase solar in the sunshine state.

Thank you
Lee Hayes Byron
