Subject: Support Solar Development in Florida
Date: Friday, June 19, 2015 9:13:19 AM

My wife and I have gotten most of our electricity from solar. We enjoy net metering and gladly increase our arrays if it is encouraged and a safe investment. Of all alternative sources, net metering is the least toxic polluting, and most efficient. It is like having a 'victory garden' for fresh vegetables and deserves incentives and protection.
