Re: Docket No. 20230000-OT
Florida Power & Light Company
2022 Annual Status Report on Storm Protection Plan Programs and Projects

Dear Mr. Teitzman:

Enclosed for filing is the Florida Power & Light Company 2022 Annual Status Report on its Storm Protection Plan Programs and Projects pursuant to Rule 25-6.030(4), Florida Administrative Code ("F.A.C.").

Thank you for your assistance with this matter. If you or your staff have any questions regarding this filing, please contact me at (561) 691-7144.

Respectfully submitted,

/s Christopher T. Wright

Appendix B - FPL 2023 Project Level Detail

I. EXECUTIVE SUMMARY

Florida Power & Light Company (“FPL”) submits this 2022 Annual Status Report on its Storm Protection Plan (“SPP”) Programs and Projects pursuant to Rule 25-6.030(4), Florida Administrative Code (“F.A.C.”). This Report also provides the results for FPL’s pole inspection programs and joint use pole attachment audit for calendar year 2022. Finally, this Report provides a summary of FPL’s storm preparedness activities and readiness.

On June 27, 2019, the Governor of Florida signed CS/CS/CS/SB 796 addressing Storm Protection Plan cost recovery, which was codified in Section 366.96, F.S. Therein, the Florida Legislature directed each utility to file a ten-year SPP that explains the storm hardening programs and projects the utility will implement to achieve the legislative objectives of reducing restoration costs and outage times associated with extreme weather events and enhancing reliability. *See* Section 366.96(3), F.S. The Florida Legislature also directed the Florida Public Service Commission (“Commission” or “FPSC”) to conduct an annual proceeding to determine the utility’s prudently incurred SPP costs and to allow the utility to recover such costs through a charge separate and apart from its base rates, to be referenced as the Storm Protection Plan Cost Recovery Clause (“SPPCRC”). *See* Section 366.96(7), F.S.

The FPL and former Gulf Power Company (“Gulf”) 2020-2029 SPPs were approved by Commission Order No. PSC-2020-0293-AS-EI issued in Docket Nos. 20200070-EI and 20200071-EI.¹ Effective January 1, 2022, the operations, rates, and tariffs of the former Gulf and FPL were consolidated and unified, all former Gulf customers became FPL customers, and Gulf ceased to exist as a separate regulated entity.² Therefore, this Report for the 2022 SPP programs and projects is provided for consolidated FPL.³

In Commission Order No. PSC-2022-0389-FOF-EI issued in Docket No. 20220051-EI, the Commission approved the consolidated FPL 2023-2032 SPP.⁴ Therefore, this Report for the 2023 SPP programs and projects is based on the consolidated FPL 2023-2032 SPP.

These Commission-approved SPPs are systematic approaches to achieve the legislative objectives of Section 366.96, F.S., to protect and strengthen transmission and distribution (“T&D”) infrastructure from extreme weather conditions, reduce outage times and restoration costs, and improve overall service reliability to customers. The Commission-approved SPPs are largely a continuation and expansion of previously approved storm hardening and storm preparedness

¹ FPL’s 2020-2029 SPP is available at: <https://www.floridapsc.com/pscfiles/library/filings/2020/01913-2020/01913-2020.pdf>. The former Gulf’s 2020-2029 SPP is available at: <https://www.floridapsc.com/pscfiles/library/filings/2020/01914-2020/01914-2020.pdf>.

² *See* Commission Order Nos. PSC-2021-0446-S-EI and PSC-2021-0446A-S-EI issued in Docket No. 20210015-EI.

³ For purposes of implementing consolidated SPP programs and projects during 2022, FPL continued the programs and projects included in both the FPL and Gulf 2020-2029 SPPs approved by Commission Order No. PSC-2020-0293-AS-EI without any modification. Consistent with the Commission-approved consolidated FPL 2022 SPPCRC Factors, the Gulf 2022 SPP programs and projects were additive to or combined with the FPL 2022 SPP programs and projects.

⁴ The FPL 2023-2032 SPP is available at: <https://www.floridapsc.com/pscfiles/library/filings/2022/11240-2022/11240-2022.pdf>.

programs. Detailed explanations of the benefits of the SPPs are provided in the Commission-approved SPPs.

FPL's investments in storm hardening over the years have made a significant difference for FPL's customers. Despite increasingly stronger storms, FPL has experienced less damage to the distribution poles, less transmission structure failures, less substations deenergized, and less time to restore. The success of FPL's storm hardening efforts is demonstrated by the fact that restoration times have decreased as more of FPL's T&D infrastructure has become hardened over the years.

The performance of FPL's T&D system during the 2022 hurricane season demonstrates that the storm hardening programs under FPL's SPP work and will continue to benefit customers through both reductions in restoration costs and customer outage times associated with extreme weather events. For example, preliminary analysis showed significantly better performance of underground laterals compared to overhead laterals, with underground neighborhood lines performing approximately six (6) times better during Hurricane Ian and approximately fifteen (15) times better during Hurricane Nicole. Also illustrative is the fact that FPL did not experience any outages or damage to its hardened transmission lines during Hurricanes Ian and Nicole. For both Hurricanes Ian and Nicole, FPL exceeded the expected time for restoration and significantly improved customer outreach to answer questions for customers and provide timely updates.

While FPL has made significant progress toward strengthening the T&D infrastructure, FPL must continue T&D storm hardening and storm preparedness plans and initiatives. Storms remain a constant threat and Florida is the most hurricane-prone state in the nation. With the significant coast-line exposure of FPL's system, and the fact that many customers are in close proximity to the coast or a major body of water, the SPP programs and projects are critical to maintaining and improving grid resiliency and storm restoration as contemplated by the Legislature in Section 366.96, F.S.

Section II of this Report provides a status report on the SPP programs and projects performed during 2022, including a comparison of the actual costs and rate impacts with the estimated costs and rate impacts. Section II also identifies the SPP programs and projects planned to be performed during 2023, as well as the associated estimated costs and rate impacts.⁵

Section III of this Report provides the results for FPL's pole inspection programs and joint use pole attachment audit for calendar year 2022. Section IV of this Report provides a summary of FPL's storm preparedness activities and readiness.

⁵ All details and data for 2023 SPP projects are based on information known and available as of March 1, 2023.

II. REPORT ON STORM PROTECTION PLAN PROGRAMS AND PROJECTS

Pursuant to Rule 25-6.030(4), F.A.C., FPL is providing an annual status report on the SPP programs and projects performed or planned to be performed during calendar years 2022 and 2023. This section provides the following information required by the Rule: (a) identification of all SPP projects completed or planned for completion during calendar year 2022; (b) the actual 2022 SPP project costs and rate impacts compared with the estimated 2022 SPP project costs and rate impacts; and (c) the estimated 2023 SPP project costs and rate impacts.

A. DESCRIPTION OF 2022 AND 2023 SPP PROGRAMS AND PROJECTS

1. Distribution Inspection Program

The FPL Distribution Inspection Program was approved as part of FPL's 2020-2029 SPP and 2023-2032 SPP. The Distribution Inspection Program is an eight-year pole inspection cycle for all distribution poles that targets approximately 1/8 of the system annually (the actual number of poles inspected can vary somewhat from year to year). Annually, FPL performs pole inspections of approximately 1/8 of the distribution poles throughout its service area, as well as any remediation necessary as a result of such inspections.

A detailed description of FPL's Distribution Inspection Program is provided in Section IV(A) of the FPL 2023-2032 SPP approved in Docket No. 20220051-EI.

2. Transmission Inspection Program

The FPL Transmission Inspection Program was approved as part of FPL's 2020-2029 SPP and 2023-2032 SPP. Under this program, FPL inspects transmission circuits, substations, and other equipment on a cyclical basis. FPL performs a climbing or bucket truck inspection on a six-year cycle for all wooden transmission poles/structures and on a ten-year cycle for all concrete or steel transmission poles/structures. All of FPL's transmission structures, including substation equipment, are visually inspected each year. Transmission structures that do not pass inspection are designated for repair or replacement.

A detailed description of FPL's Transmission Inspection Program is provided in Section IV(B) of the FPL 2023-2032 SPP approved in Docket No. 20220051-EI.

3. Distribution Feeder Hardening Program

The FPL Distribution Feeder Hardening Program was approved as part of FPL's 2020-2029 SPP and 2023-2032 SPP. Under this program, FPL hardens existing distribution feeders and certain critical distribution poles, as well as designs and constructs new pole lines and major planned work, to meet the National Electrical Safety Code's ("NESC") extreme wind loading criteria ("EWL"). To determine how an existing overhead circuit or critical pole will be hardened, a field survey of the circuit facilities is performed. By capturing detailed information at each pole location (such as pole type, class, span distance, attachments, wire size, and framing) a comprehensive wind-loading analysis can be performed to determine the current wind rating of each pole, and ultimately the circuit itself. This data is then used to identify specific pole locations on the circuit

that do not meet the desired wind rating. For all poles that do not meet the applicable EWL criteria, FPL develops recommendations to increase the allowable wind rating of the pole.

A detailed description of the Distribution Feeder Hardening Program is provided in Section IV(C) of the FPL 2023-2032 SPP approved in Docket No. 20220051-EI.

4. Distribution Lateral Hardening Program

The FPL Distribution Lateral Hardening Program was approved as part of FPL's 2020-2029 SPP and 2023-2032 SPP. Under this program, FPL targets certain overhead laterals that were impacted by recent storms and have a history of vegetation-related outages and other reliability issues for conversion from overhead to underground. The FPL Distribution Lateral Hardening Program also includes protocols for evaluating when laterals may be overhead hardened as opposed to being placed underground.

A detailed description of the FPL Distribution Lateral Hardening Program is provided in Section IV(D) of the FPL 2023-2032 SPP approved in Docket No. 20220051-EI.

5. Transmission Hardening Program

The FPL Transmission Hardening Program was approved as part of FPL's 2020-2029 SPP and 2023-2032 SPP. Under this program, FPL hardens transmission structures, substations, and other equipment to ensure a more storm resilient transmission system. As part of the Transmission Hardening Program, FPL will replace all wood transmission structures with steel or concrete structures throughout its service area.

As of year-end 2022, all wood transmission structures in the former FPL service area were replaced with either steel or concrete structures. However, as a result of the merger and unification of FPL and the former Gulf, there are now a total of approximately 4,100 wood transmission structures to be replaced in the former Gulf service area.

A detailed description of the Transmission Hardening Program is provided in Section IV(E) of the FPL 2023-2032 SPP approved in Docket No. 20220051-EI.

6. Distribution Vegetation Management Program

The FPL Distribution Vegetation Management Program was approved as part of FPL's 2020-2029 SPP and 2023-2032 SPP. This program consists of a system-wide three-year average vegetation maintenance cycle for feeders; mid-cycle targeted vegetation maintenance for certain feeders; six-year average vegetation maintenance cycle for laterals; and continued education of customers through its Right Tree, Right Place initiative.

A detailed description of the FPL Distribution Vegetation Management Program is provided in Section IV(F) of the FPL 2023-2032 SPP approved in Docket No. 20220051-EI.

7. Transmission Vegetation Management Program

The FPL Transmission Vegetation Management Program was approved as part of FPL’s 2020-2029 SPP and 2023-2032 SPP. This program is necessary to comply with the North American Electric Reliability Corporation’s (“NERC”) vegetation management standards and requirements. The Transmission Vegetation Management Program includes visual and aerial inspections of transmission line corridors, Light Detection and Ranging (“LiDAR”) inspections of NERC transmission line corridors, development and execution of annual work plans to address identified vegetation conditions, and identifying and addressing priority and hazard tree conditions prior to and during storm season.

A detailed description of the FPL Transmission Vegetation Management Program is provided in Section IV(G) of the FPL 2023-2032 SPP approved in Docket No. 20220051-EI.

8. Substation Storm Surge/Flood Mitigation Program

FPL’s Substation Storm Surge/Flood Mitigation Program was approved as part of FPL’s 2020-2029 SPP and 2023-2032 SPP. FPL has identified certain substations located in areas throughout its service area that are susceptible to storm surge or flooding during extreme weather events. Under this program, FPL plans to raise the equipment at certain substations above the flood level and/or construct flood protection walls around the substations to prevent/mitigate future damage due to storm surges and flooding.

A detailed description of the FPL Substation Storm Surge/Flood Mitigation Program is provided in Section IV(H) of the FPL 2023-2032 SPP approved in Docket No. 20220051-EI.

B. SPP PROJECTS AND ACTIVITIES PLANNED AND COMPLETED FOR CALENDAR YEARS 2022 AND 2023

The tables below provide the planned and completed SPP projects and associated costs for calendar years 2022 and 2023. The tables are separated by SPP costs recorded to and recovered through the SPPCRC and base rates.

All of FPL’s storm hardening projects and activities are included in its SPP and recovered through the SPPCRC. There are no “base rate” SPP projects included in FPL’s Commission approved SPP. However, because the original non-hardened asset was recorded to and recovered through base rates, FPL currently records and recovers the costs of removal and retirements associated with the SPP projects and programs for assets existing prior to 2021 through base rates. Accordingly, the costs shown in the table below for “base rates only” are limited to the costs of removal associated with the SPP projects planned or completed during the applicable calendar year.

Project level detail for the actual 2022 SPP projects is provided in Appendix A, and project level detail for the estimated 2023 SPP projects is provided in Appendix B.⁶

FPL SPP Projects & Activities Planned & Completed for 2022 – 2023 (SPPCRC Only)

Program Name	Projects/ Activities Planned 2022	Estimated Cost 2022 (Millions)^(a)	Projects/ Activities Completed 2022	Actual Cost 2022 (Millions)^(a)	Projects/ Activities Planned 2023	Estimated Cost 2023 (Millions)^(a)
Distribution Inspection	180,000	\$39.3	190,275	\$39.4	180,000	\$40.4
Transmission Inspection	81,000	\$30.1	82,768	\$43.3	84,000	\$62.6
Distribution Feeder Hardening	347	\$629.2	324	\$706.5	447	\$594.5
Distribution Lateral Hardening	630	\$342.1	608	\$355.2	746	\$486.5
Transmission Hardening (structures)	1271	\$70.2	900	\$56.5	469	30.2
Distribution Vegetation Management (miles)	16,690	\$67.0	19,283	\$71.0	16,690	\$73.0
Transmission Vegetation Management (miles)	9,062	\$11.8	9,303	\$15.8	9,350	\$11.8
Substation Storm Surge/Flood Mitigation	3	\$9.6	0	\$4.7	3	\$8.0
Totals^(b)		\$1,199.3		\$1,292.4		\$1,307.1

^(a) Excludes costs of removal associated with the SPP projects, which are recorded to and recovered through base rates. See table below.

^(b) Totals may not agree due to rounding.

⁶ The 2022 and 2023 SPP project level detail is consistent with FPL’s May 2, 2023 SPPCRC filing in Docket No. 20230010-EI.

FPL SPP Projects & Activities Planned & Completed for 2022 – 2023 (Base Rates Only)

Program Name	Projects/ Activities Planned 2022^(a)	Estimated Cost 2022 (Millions)^(b)	Projects/ Activities Completed 2022^(a)	Actual Cost 2022 (Millions)^(b)	Projects/ Activities Planned 2023^(a)	Estimated Cost 2023 (Millions)^(b)
Distribution Inspection	N/A	\$21.6	N/A	\$23.7	N/A	\$22.3
Transmission Inspection	N/A	\$2.8	N/A	\$12.3	N/A	\$13.3
Distribution Feeder Hardening	N/A	\$98.9	N/A	\$139.5	N/A	\$94.5
Distribution Lateral Hardening	N/A	\$26.1	N/A	\$21.8	N/A	\$36.6
Transmission Hardening (structures)	N/A	\$10.9	N/A	\$12.0	N/A	\$5.4
Distribution Vegetation Management (miles)	N/A	\$0.0	N/A	\$0.0	N/A	\$0.0
Transmission Vegetation Management (miles)	N/A	\$0.0	N/A	\$0.0	N/A	\$0.0
Substation Storm Surge/Flood Mitigation	N/A	\$0.4	N/A	(\$0.1)	N/A	\$0.0
Totals^(c)	N/A	\$160.7	N/A	\$209.2	N/A	\$172.0

- ^(a) There are no “base rate” SPP projects included in FPL’s Commission approved SPP.
^(b) Limited to the costs of removal associated with the SPP projects planned or completed during the applicable calendar year.
^(c) Totals may not add due to rounding.

C. ACTUAL AND PROJECTED BILL IMPACTS FOR CALENDAR YEARS 2022 AND 2023

The tables below provide the total actual and estimated SPP expenditures to be incurred during the applicable year, and the associated actual and estimated rate impacts for FPL’s typical residential, commercial, and industrial customers. The rate impacts shown below are based on the total estimated and actual SPP expenditures incurred only during the applicable calendar years, irrespective of whether those costs were recovered in the SPPCRC or through base rates.

Total Estimated/Actual SPP Costs (SPPCRC + Base Rates)

Year	SPPCRC (millions)	Base Rates (millions)	Total (millions)
2022 Estimated	\$1,199.3	\$160.7	\$1,360.0
2022 Actual	\$1,292.4	\$209.2	\$1,501.6
2023 Estimated	\$1,307.1	\$172.0	\$1,479.1

Note: Totals may not add due to rounding.

Actual/Projected Bill Impacts (SPPCRC + Base Rates)⁷

Customer Class	2022 Estimated	2022 Actuals	2023 Estimated
Residential (RS-1)	\$0.00148/kWh	\$0.00164/kWh	\$0.00179/kWh
Commercial (GSD-1)	\$0.44/kW	\$0.49/kW	\$0.33/kW
Industrial (GSLDT-3)	\$0.05/kW	\$0.07/kW	\$0.05/kW

⁷ For purposes of estimating the rate impacts for the estimated and actual SPP expenditures incurred during a calendar year, FPL assumed 50% of the expenditures are placed in-service during the applicable calendar year.

III. POLE INSPECTIONS AND JOINT USE AUDITS

This Section provides the results for FPL’s pole inspection programs and joint use pole attachment audit for calendar year 2022.

A. POLE INSPECTIONS

1. Distribution

a. Description of the Pole Inspection Program

See Section II(A)(1) of this Report.

b. 2022 Accomplishments

See Sections II(B).

c. 2023 Plan

See Sections II(B).

d. NESC Compliance for Strength and Structural Integrity

The following methods are used by FPL’s vendor to determine NESC compliance for strength and structural integrity of FPL’s poles.

Strength Assessment

On wood distribution poles, a strength assessment is performed to determine compliance with the NESC standards for strength. The strength assessment is based on a comparison of measured circumference versus the original circumference of the pole. The effective circumference is measured and data collected to ensure that the actual condition of the pole meets NESC Grade B requirements as outlined in Table 261-1 of the NESC. If the pole does not meet the Grade B NESC requirements, the pole will be reinforced or replaced.

Loading Assessment

On all distribution poles, a loading assessment is also performed and includes a combination of field measurements, span length, attachment heights (including third-party attachments), and wire sizes based on FPL construction standards. If NESC requirements are not met, the pole will be reinforced, replaced, or the attachments will be relocated. Consistent with Order No. PSC-14-0594-PAA-EI, any pole that had less than 80% of full load at the prior eight-year inspection cycle will continue to be exempt from the loading assessment during the next eight-year inspection cycle, and Chromium Copper Arsenate (“CCA”) poles will only be excavated if they are older than 28 years. To ensure that these exceptions to the standard eight-year inspection cycle do not compromise existing safety and storm hardening programs, FPL conducts annual testing on 1% of the exempted poles. This exemption was approved and continued as part of FPL’s 2023-2032 SPP.

e. Summary Data and Results of 2022 Distribution Pole Inspections

Florida Power and Light Annual Wood Pole Inspection Report (Reporting Year 2022) (Cycle Year 1 of 8)												
a	b	c	d	e	f	g	h	i	j	k	l	m
Total # of Wooden Poles in the Company Inventory	# of Wood Pole Inspections Planned this Reporting Year	# of Wood Poles Actually Inspected this Reporting Year	# of Wood Poles Failing Inspection this Reporting Year	Wood Pole Failure Rate (%) this Reporting Year	# of Wood Poles Designated for Replacement this Reporting Year	Total # of Poles Replaced this Reporting Year	# of Wood Poles Requiring Minor Follow-up this Reporting Year	# of Wood Poles Overloaded this Reporting Year	Method(s) V = Visual E = Excavation P = Prod S = Sound B = Bore R = Resistograph	# of Wooden Pole Inspections Planned for Next Reporting Year	Total # of Wood Poles Inspected (Cumulative-to-Date) in the Current 8-Year Cycle	% of Wooden Poles Inspected (Cumulative-to-Date) in the Current 8-Year Cycle
1,256,416 (1)	154,800	172,378	Grade B & C 10,788	6.3	Grade B & C 5,478	Grade B & C 3,238	5,310	6,706	V, E, S, B	154,800	172,378 (1)	14 (1)
If b - c > 0, provide explanation	N/A											
If d - g > 0, provide explanation	Grade B & C poles failing > poles replaced due to: - Of the 10,788 wood poles failing inspection in the 2022, 5,310 are reinforcement (not replacement) candidates. 2,800 poles were reinforced in 2022, Remaining reinforcement candidates from the 2022 Inspection Cycle will be reinforced during 2023. - 3,238 poles, including concrete, were replaced in 2022. Replacement candidates identified during the 2022 Inspection Cycle will be replaced during 2023.											
Description of selection criteria for inspections	Poles to be inspected annually are selected/prioritized throughout FPL's service area based on the last cycle's inspection dates, to ensure that poles are compliant with FPL's established eight-year cycle. As such, approximately 1/8 of the distribution poles are inspected annually.											
(1) FPL began its third 8-year inspection cycle in January 2022, at which time there were approx. 1,418,948 total distribution poles in the system, 1,256,416 of which were wood. FPL continues to inspect approx. 1/8 of the total population in each year of the cycle.												

Remediation

As previously discussed, poles are remediated if they do not meet the higher NESC Grade B requirement. Remediation is categorized into two groups (Level 1 and Level 2) in order to allow for more effective scheduling and resource allocation.

Level 1 – This group of remediation requires more immediate attention. Urgent needs are addressed immediately.

Level 2 - Remediation that does not require immediate attention.

The following table provides a summary of the wood pole inspection findings for the poles identified as poles requiring remediation.

Inspection Type	Remediation Type	NESC Min. (Grade C)	FPL Requirement (Grade B - Higher Standard)	Total Wood Remediation	Primary Cause(s)	Remediation Options
Visual	Restorable	0	n/a	0	N/A	Pole to be strengthened by installing C-Truss
	Non-Restorable	118	n/a	118	Decayed/Split Top, Cracks, Woodpecker Holes	Pole to be replaced with new pole.
Strength	Restorable	152	2,262	2,414	Shell Rot, Decay, Insects	Pole to be strengthened by installing C-Truss
	Non-Restorable	68	1,482	1,550	Decayed/Split Top, Woodpecker Holes, Shell Rot	Pole to be replaced with new pole.
Loading	Restorable	0	2,896	2,896	Overloaded	Pole to be strengthened by installing ET Truss
	Non-Restorable	632	3,178	3,810	Overloaded	Pole will be evaluated to determine the most cost effective method to address the overloading. Options are: 1. Install intermediate pole(s). 2. Replace pole with a stronger class pole.

2. Transmission

a. Description of Pole Inspection Program

See Section II(A)(2).

b. 2022 Accomplishments

See Sections II(B).

c. 2023 Plan

See Sections II(B).

d. NESC Compliance for Strength and Structural Integrity

The following methods are used during pole/structure inspections for determining NESC strength and structural integrity compliance:

Strength Assessment

For wood transmission poles/structures, the strength assessment is based upon a comparison of measured circumference versus the original circumference of the pole. If the effective circumference is measured and the actual condition of the pole does not meet NESC requirements as outlined in Table 261-1 of the NESC, the pole is designated for reinforcement or replacement with concrete or steel transmission pole/structure.

Loading Assessment

FPL performs a loading assessment on wood transmission poles/structures with third-party attachments. This assessment is based on a combination of pole/structure length, framing configuration, span length, attachment heights (including third-party attachments) and conductor

size. If the loading does not meet NESC requirements, the pole is designated for reinforcement, replacement, or relocation of the third-party attachments.

e. Summary Data and Results of 2022 Transmission Pole Inspections

Summarized in the following sections are the 2022 inspection results and causes by transmission pole/structure materials:

Wood Transmission Poles/Structures

FPL’s 2022 results from its six-year cyclical wood transmission pole/structure inspections are in the table below. In addition, FPL performed its annual ground level visual inspections on 100% of its wood poles/structures.

Florida Power & Light Company Annual Wood Pole Inspection Report (Reporting Year 2022)										
a	b	c	d	e	f	g	h	i	j	k

If b - c > 0, provide explanation										
If d - g > 0, provide explanation										
Description of selection criteria for inspections		FPL prioritizes its inspections based on factors such as: framing configuration (structural loading), transmission components, system importance, customer count, and inspection history for a transmission line section. Other economic efficiencies, such as multiple transmission line sections within the same corridor, are also considered.								

- (1) Inclusive of SPP and Non-SPP work, such as work inspection, relocations, proactive rebuilds and system expansion.
- (2) The planned inspections for this cycle includes the wood poles from the merger with Gulf Power.

Concrete and Steel Transmission Structures

In 2022, FPL completed visual inspections on 100% of its transmission poles/structures and bucket truck inspections were completed on approximately 1/10 of its concrete and steel poles/structures. The following table provides FPL’s 2022 concrete and steel transmission pole/structure inspection results.

POLE INSPECTION REPORT			
Company: Florida Power & Light			
Summary of Concrete & Steel Transmission Pole Inspections			
Period: January 2022 thru December 2022			
Type of Inspection:	Concrete & Steel Transmission Structures Visual / Bucket		
Type of Pole:			
	Average Class:	Varies	
	Materials	Concrete & Steel	
	Average Vintage	2004	
	Installed Population as of 01/01/2022	76,902	
		% Planned	% Completed
Percent Inspections Planned & Percent Completed:		100%	100%
Reason for Variance/Plan to Address Backlog:			
No. of inspected poles addressing a prior backlog		0	0%
		No. of Structures	% of Inspection
No. of structures identified for reinforcement:		0	0%
No. of poles identified for replacement:		658	0.8%
No. of structures identified for a change inspection cycle:		n/a	n/a
No. of structures that required no change in inspection cycle or remediation		76,244	99.1%
No. of structures identified as overloaded		0	0%

Remediation

To help prioritize and to better plan for future years, FPL has established the following priority levels of inspection reporting:

Level 1 Priority - Identified as approaching the minimum NESC requirements for Grade B construction with the potential to fall below the minimum before the end of the current year. These poles/structures are incorporated into current year work plans for reinforcement, remediation, or replacement with concrete or steel transmission pole/structure. The timeframe for completion is typically driven by customer provided access to the facilities and the coordination of a scheduled outage with other facility clearances scheduled on the grid.

Level 2 Priority - Identified as approaching the minimum NESC requirements for Grade B construction but will not fall below the minimum prior to the end of the following year. These poles/structures are identified for reinforcement, remediation, or replacement with

concrete or steel transmission pole/structure as planned work by the end of the calendar year following inspection.

Non-priority – Identified as having reduction in capacity, but still above the minimum NESC requirements. When reported, these structures are documented but do not require specific action until the next inspection.

Wood Transmission Structures

Wood Transmission Structures					
Inspection Item	Level 1	Level 2	Non-Priority	Primary Cause(s)	Remediation
Ground-Line	0	27	0	Decay, Rot, Insects, Voids	Level 1 - Reinforce, Remediate, or Replace in year found
Above Ground-Line	0	1	0	Wood-Pecker Holes, Decay, Insects	
Overload (3 rd Party)	0	0	0	3rd Party Attachments	Level 2 - Reinforce, Remediate, or Replace the following year
Total	0	28	0	Refer to the Above	Non-Priority – No action required

Concrete & Steel Transmission Structures

Concrete & Steel Transmission Structures				
Inspection Item	Level 1	Level 2	Non-Priority	Primary Cause(s)
Base of Pole (Identified for Replacement)	0	658	284	Corrosion/ Cracks
Base of Pole (Identified for Repair)	0	0	0	Cracks
Total	0	658	284	Refer to the Above

B. JOINT USE POLE ATTACHMENT AUDITS

1. FPL Overview

FPL administers annual audits of joint use facilities and attachments to its poles (cable tv and telecommunication attachments). Approximately 20% of FPL's service area is audited annually through its joint use surveys in order to determine the number and ownership of jointly used poles and associated attachments.

Additionally, joint use poles are inspected as part of FPL's Distribution Inspection Program. This is described more fully in FPL's pole inspection reporting requirements response.

2. Extent and Results of the Joint Use Pole Attachment Audit

In addition to FPL's Distribution Inspection Program, NESC safety audits are conducted by the Commission. Apparent NESC variances are identified and recorded by Commission auditors. FPL investigates the identified NESC variances and makes corrections where necessary. Additionally, as part of FPL's daily work activities (*e.g.*, construction, maintenance, reliability initiatives, and etc.), NESC safety issues may be identified and corrected. While the Commission-identified variances are tracked, FPL does not specifically track corrective activities completed as part of its daily work activities.

Percent of system audited.

Feeders: Approximately 20% annually.

Laterals: Approximately 20% annually.

FPL does not specifically maintain/track its joint use audits at this level of detail. See FPL's overview above.

Date Audit Conducted

Ongoing – See FPL's overview above.

Date of Previous Audit

Ongoing – See FPL's overview above.

List of Audits Conducted Annually

Joint use poles, attachments, strength/loading tests – see FPL's overview above and FPL's pole inspection reporting requirement response.

JOINT USE AUDITS	
(A) Number of company owned distribution poles. (FPL owned poles at 12/31/22)	1,418,948
(B) Number of company distribution poles leased. (Non-FPL owned poles)	269,149
(C) Number of owned distribution pole attachments. (FPL owned poles w/attachments)	1,073,339
(D) Number of leased distribution pole attachments. (Non-FPL owned poles w/attachments)	269,149
(E) Number of authorized attachments.	1,792,663
(F) Number of unauthorized attachments.	4,559
POLE INSPECTIONS – JOINT USE POLES	
G) Number of distribution poles strength tested.	93,130
(H) Number of distribution poles passing strength test. ⁽¹⁾	Grade B&C 87,119
(I) Number of distribution poles failing strength test (overloaded). ⁽¹⁾	Grade B&C – 4,119
J) Number of distribution poles failing strength-test (other reasons). ⁽²⁾	Grade B&C 1,892
(K) Number of distribution poles corrected (strength failure).	N/A ⁽²⁾
(L) Number of distribution poles corrected (other reasons).	N/A ⁽²⁾
(M) Number of distribution poles replaced.	N/A ⁽²⁾
1. FPSC SAFETY AUDITS	
(N) Number of apparent NESC violations involving electric infrastructure.	232
(O) Number of apparent NESC violations involving third-party facilities.	10
Suggested Alternatives:	None

⁽¹⁾ NESC required standard = Grade C; FPL Higher Standard =Grade B

⁽²⁾ K, L, M not tracked at the joint use level

3. Suggested Alternatives:

None.

4. Joint Use Pole Rents and Revenues

“Pole rent” revenues are jurisdictional. There are no lost revenues because all back-billings for joint use pole ownership true-ups, as well as unauthorized attachments, are made back to the date of the previous audit/true-up

IV. STORM PREPAREDNESS ACTIVITIES AND READINESS

A. SYSTEM HARDENING

See Section II(A)(3) of this Report for details regarding Distribution Feeder Hardening Program, Section II(A)(4) of this Report for details regarding Distribution Lateral Hardening Program, and Section II(A)(5) of this Report for details regarding Transmission Hardening Program. See Section II(B) of this Report for 2022 actual costs and Section II(C) of this Report for 2023 estimated costs.

1. Distribution

a. Storm Hardening Activity During 2022

See Appendix A –FPL 2022 Project Level Detail.

b. Method of Selection for Feeder Hardening and Lateral Undergrounding Projects

Feeder Hardening: The remaining feeders were identified and prioritized by our Operations and Reliability teams by the difficulty to restore, the overall performance of the feeders, as well as coordination with other internal and external projects (e.g., vegetation management, system expansion, road relocation projects, etc.). See Section IV(C)(5) of FPL’s 2023-2032 SPP for a detailed description of the criteria used to select and prioritize the Distribution Feeder Hardening Program.

Lateral Undergrounding: During 2022, the priority for undergrounding was targeted for feeders that have the greatest number of laterals that experienced an outage during Hurricanes Matthew, Irma, and/or Michael and that have a history of vegetation outages or overall reliability issues. See Section IV(D)(5) of FPL’s 2023-2032 SPP for a detailed description of the criteria used to select and prioritize the Distribution Lateral Hardening Program.

c. 2022 Costs Incurred and Expected Benefits

See Section II(B) of this Report for 2022 actual costs for the Distribution Feeder Hardening Program and Distribution Lateral Hardening Program.

See Section IV(C)(1) of FPL’s 2023-2032 SPP for a description of the Distribution Feeder Hardening Program and benefits. See Section IV(D)(1) of FPL’s 2023-2032 SPP for a description of the Distribution Lateral Hardening Program and benefits.

d. 2023 Projected Activities and Budgets

See Appendix B – FPL 2023 Project Level Detail. See Section II(C) for 2023 projected costs for the Distribution Feeder Hardening Program and Distribution Lateral Hardening Program.

2. Transmission

a. Description of Hardening Programs

See Section II(A)(5) for details regarding Transmission Hardening Program.

b. Method of Selection

Transmission Hardening Program: The annual prioritization/selection criteria for the wood structures to be replaced includes proximity to high wind areas, system importance, customer counts, and coordination with other storm initiatives. See Section IV(E)(5) of FPL’s 2023-2032 SPP for a detailed description of the criteria used to select and prioritize the Transmission Hardening Program.

c. 2022 Accomplishments

See Section II(A)(5) for details regarding Transmission Hardening Program. See Appendix A – FPL 2022 Project Level Detail. See Section II(B) of this Report for 2022 actual costs.

d. 2023 Plans

See Appendix B – FPL 2023 Project Level Detail. See Section II(C) of this Report for 2023 projected costs.

B. COORDINATION WITH LOCAL GOVERNMENTS

1. Overview

FPL’s External Affairs (“EA”) organization consists of manager-level employees who are dedicated to meeting the information and communication needs of local governments and communities every day. These individuals interface with members of local governments and community leaders to identify and resolve issues of common concern to the company and the communities it serves. EA is engaged with local governments on critical infrastructure functions, line clearing, storm readiness, joint use of public rights-of-way, fuel/rate adjustments, undergrounding and other day-to-day issues.

FPL’s Account Managers assigned to governmental accounts provide customer service to government accounts and are available to assist with many of the issues that affect local governments, including storm readiness, restoration, and recovery. They are also especially helpful to local governments on account issues such as billing, fuel costs, construction, and service reliability.

FPL’s Customer Service (“CS”) organization conducts meetings with county emergency operations managers to discuss critical infrastructure facility (“CIF”) locations in each jurisdiction and to allow local Emergency Operations Centers (“EOCs”) to designate CIFs specific to the respective communities, within certain limits. Agreed-upon locations are factored into FPL’s storm restoration and capacity shortage plans.

FPL invites local, state, and federal emergency response personnel to participate in its annual storm dry-run. This exercise provides FPL the opportunity to share its plans to improve service reliability

and storm communications and solicit input on how FPL and government agencies can better collaborate in emergency situations.

FPL maintains an Emergency Operations Center Team that consists of trained representatives who assist EA in meeting the needs of local governments in times of emergency. This team consists of more than 100 employees that staff the county EOCs and interface with local officials throughout the FPL service area. By staffing EOCs, FPL is physically present to provide company updates to county and city officials, as well as obtain information from the EOC to help FPL's restoration efforts.

2. Tree Maintenance and Underground Conversion Projects

FPL meets with all counties and municipalities requesting information on vegetation management and underground conversions. This includes working with local governments to establish language in applicable ordinances that encourages citizens to plant the right tree in the right place to avoid interference with overhead facilities. FPL also attends and participates in meetings and workshops with cities interested in initiating overhead to underground conversions at their cost. Discussions have also included special considerations such as using public rights-of-way and the use of underground switch cabinets. Additionally, FPL meets with local governments to explain its efforts to enhance service reliability and provide information on SPP projects within their jurisdiction. FPL's External Affairs managers assist in coordinating the necessary permits and easements that are needed for the placement of equipment and routing of new underground lines that are being constructed as part of FPL's Distribution Lateral Hardening Program undergrounding projects that occur within municipal property and public rights of way.

Separately, FPL meets with local governments who express interest in converting overhead facilities to underground service as part of FPL's Overhead to Underground Conversion Program (FPL Electric Tariff sheets 6.300 – 6.330). FPL also continued to promote overhead-to-underground conversions in 2022. In 2022, ten municipalities signed undergrounding agreements and moved forward with twelve projects, as previously reported in FPL's Annual Reliability Report filed on March 1, 2023.

3. Storm Response Tests and Dry Run

In addition to its annual corporate-wide storm dry-run and individual business unit-driven dry-run exercises, FPL takes every opportunity to test its storm preparation and restoration plans to be ready for a potential event. Additionally, depending on the forecasted track of an actual storm, this may include the activation of FPL's storm command center and the mobilization and positioning of employees and equipment for rapid restoration. These activities provide opportunities to evaluate plans, systems, and communications in order to be even better prepared for the next event. FPL representatives also take part in city and/or county sponsored drills and exercises upon request and invite key government stakeholders and emergency managers to our annual corporate-wide storm dry run event.

4. Status of Local Coordination Programs

ONGOING PROGRAMS

(a) Number of city/county liaisons initiated.

EA and Government Account (“GA”) Managers routinely interface with city and county government officials to discuss storm-readiness and other issues of concern. The quantity of these interfaces and the unique situational dynamics of each issue make it administratively burdensome and non-productive to capture on an ongoing basis. FPL does keep track of official meetings and the number of EOCs that are contacted, as well as the number that are staffed with company representatives.

(b) Number of periodic communications initiated with cities/counties.

EA provides quarterly e-mail communications to city and county governments. FPL also established an online Government Portal website that allows government officials to obtain the latest media releases and information on customer outages, estimated restoration times, FPL crew resources, outage maps and other information. GA Managers also communicate with cities and counties through monthly newsletters that address topics from energy conservation to storm preparation.

(c) Number of restoration training and assistance programs conducted.

EA, CS and other FPL representatives meet with local governments to discuss critical infrastructure function locations and provide training on subjects such as how to address/report on downed power lines.

(d) Number of city/county problem resolution plans.

EA and GA Managers interface with city and county governments routinely to discuss storm readiness and other issues of concern. The quantity of these interfaces and the unique situational dynamics of each storm make it administratively burdensome and nonproductive to capture on an ongoing basis.

STORM PREPARATION

(a) Number of communication links and contingency plans established.

FPL is prepared to support all 36 county EOCs and nine satellite EOCs, should these locations be impacted by an emergency situation. FPL is able to report on the number of direct links with EOCs activated during emergency conditions. FPL representatives are also available to meet one-on-one with emergency managers, and city and county government officials as needed.

(b) Number of operational contingency plans developed for emergency services.

FPL meets with personnel from all county EOC locations to obtain input on critical infrastructure function locations within their jurisdiction and other facilities designated by the respective EOCs as CIFs. This critical infrastructure information is then factored into FPL's restoration and capacity shortfall plans. In addition, assigned FPL EOC representatives work with the counties to assist with emergency priorities and EA Managers have open communications with counties and cities to address necessary contingencies. Tracking the number of contingency plans is administratively burdensome and non-productive and does not provide meaningful information.

(c) Number of public communications plans developed prior to, during and after the storm.

FPL develops communication plans for the media and all news/media releases are shared with local governments. The number of communication plans is not meaningful but counting the number of releases to local governments can be accomplished.

(d) Number of city/county mitigation guidelines prepared and distributed.

See response to subpart (b), above.

STORM RESTORATION

(a) Number of emergency communication links maintained.

FPL is prepared to support all 36 county EOCs and nine satellite EOCs if impacted by an emergency situation. Also, an online Government Portal Website allows government officials to obtain the latest news releases and information, including customer outages, estimated restoration times, and FPL crew resource information.

(b) Number of priority emergency services restored.

FPL can report on critical infrastructure locations restored on a daily basis and provides this information through its Government Portal website.

(c) For each tropical storm, hurricane and other emergency event impacting the utilities service area, what community coordination actions does the utility pursue not otherwise in (a) and (b), above.

In addition to outgoing communications and information provided by FPL EOC representatives, FPL EA Managers are made available to interface with public officials to address their concerns.

ONGOING INITIATIVES

Communications Programs

FPL's EA managers made presentations to educate communities served by FPL on topics of interest including service reliability, energy conservation, storm readiness, RTRP and power generation. These presentations help address the informational needs of local community-based organizations. EA managers provided over 1,000 community presentations in 2022.

Government/Community Communications

FPL's email network to local elected officials continues to be utilized to share breaking news and important updates to local state and federal public officials in a timely and consistent manner.

Government Outreach

EA and GA Managers contact government officials prior to storm season through written correspondence and meetings.

Government Portal Website

FPL's EA organization implements a dedicated Government Portal website, which is customized with the types of information that government leaders rely on to help with their recovery efforts. The site contains company-wide and county-specific information that includes:

- New alerts and releases
- Customer outage information and outage maps
- CIF information
- Estimated Time to Restore ("ETR") information
- FPL staging site locations and available personnel resources

C. 2023 STORM SEASON READINESS

On May 23, 2023, FPL presented at the Commission's 2023 Hurricane Preparedness Workshop. FPL's comprehensive storm plan focuses on readiness, restoration, and recovery in order to respond safely and as quickly as possible in the event the electrical infrastructure is damaged by a storm. FPL is well-prepared for the 2023 storm season and continues to train and hone its storm preparedness and response capabilities.

In addition to the initiatives to strengthen its system and improve storm preparedness discussed previously, FPL will complete the following additional storm preparedness activities for the 2023 storm season:

- Extensive storm restoration training based on employees' storm roles including Incident Management Team Workshops;
- Annual company-wide hurricane dry run in April;
- Management workshops throughout the storm season to keep focus on key storm restoration policies/processes;
- Plans for and review of mutual assistance agreements to ensure they are adequate and ready;
- Continue to focus on improving outage communications and estimated restoration times to customers;
- Clear vegetation from all feeder circuits serving critical infrastructure functions (*e.g.*, CIF hospitals, 911 centers, police and fire stations, etc.) prior to the peak of hurricane season;
- Continue development and utilization of new technology to be utilized by storm damage assessors to improve damage assessment collection/analysis capabilities, including the use of drones to perform equipment assessments in difficult to access facilities; and
- Participate in industry conferences to share best practices from the previous storm seasons across utility companies.

Appendix A – FPL 2022 Project Level Detail

Appendix A – FPL 2022 Project Level Detail
Distribution Feeder Hardening Program - Capital Expenditures

Region	Substation	Feeder	2022 Actual/Estimated Start Year ⁽¹⁾	Actual Start Year	2022 Actual/Estimated Completion Year ⁽²⁾	Updated Completion Year	2022 Actual/Estimated Costs ⁽³⁾	2022 Actual Costs

Notes:

(1) Start date reflects the projected and revised estimated/actual year when initial project costs will begin to accrue (e.g., preliminary engineering/design, site preparations, or customer outreach, if applicable).

(2) Completion year reflects the projected and revised estimated/actual date when project will be completed.

(3) Amounts reflect SPP totals which include clause spend.

Notes:

- (1) Start year reflects year when initial project costs will begin to accrue (e.g., preliminary engineering/design, site preparations, or customer outreach, if applicable)
- (2) Completion year reflects the estimated/actual date when project will be completed.
- (3) Amounts reflect SPP totals which include clause spend.

LAGUNA BEACH-WEST BAY RADIAL 115KV [1555] : WEST BAY-MILLERS FERRY (Phase 2 of 4)	0	3	-	2022	-	2024	\$ -	\$ 150,000
LAGUNA BEACH-WEST BAY RADIAL 115KV [1555] : WEST BAY-MILLERS FERRY (Phase 3 of 4)	0	20	-	2022	-	2023	\$ -	\$ 2,800,000
LAGUNA BEACH-WEST BAY RADIAL 115KV [1555] : WEST BAY-MILLERS FERRY (Phase 4 of 4)	0	20	-	2022	-	2023	\$ -	\$ 1,850,000
SINAI-GASKIN (PS) 115KV [1560] : ALTA-GASKIN (PS) (Phase 5 of 9)	0	20	-	2022	-	2023	\$ -	\$ 2,700,000
SINAI-GASKIN (PS) 115KV [1560] : ALTA-GASKIN (PS) (Phase 6 of 9)	0	20	-	2022	-	2023	\$ -	\$ 3,350,000
SINAI-GASKIN (PS) 115KV [1560] : ALTA-GASKIN (PS) (Phase 7 of 9)	0	20	-	2022	-	2023	\$ -	\$ 3,350,000
SINAI-GASKIN (PS) 115KV [1560] : ALTA-GASKIN (PS) (Phase 8 of 9)	0	20	-	2022	-	2024	\$ -	\$ 300,000
SINAI-GASKIN (PS) 115KV [1560] : ALTA-GASKIN (PS) (Phase 9 of 9)	0	17	-	2022	-	2023	\$ -	\$ 2,400,000
HOLMES CREEK-DE FUNIAK (PS) 115KV : HOLMES CREEK-CHIPLEY TAP (Phase 1 of 3)	0	5	-	2022	-	2024	\$ -	\$ 250,000
HOLMES CREEK-DE FUNIAK (PS) 115KV : HOLMES CREEK-CHIPLEY TAP (Phase 3 of 3)	0	2	-	2022	-	2023	\$ -	\$ 100,000
SINAI-GASKIN (PS) 115KV [1560] : SINAI-ALTA (Phase 1 of 6)	0	7	-	2022	-	2023	\$ -	\$ 300,000
SINAI-GASKIN (PS) 115KV [1560] : SINAI-ALTA (Phase 2 of 6)	0	10	-	2022	-	2024	\$ -	\$ 500,000
SINAI-GASKIN (PS) 115KV [1560] : SINAI-ALTA (Phase 3 of 6)	0	19	-	2022	-	2024	\$ -	\$ 1,200,000
SINAI-GASKIN (PS) 115KV [1560] : SINAI-ALTA (Phase 4 of 6)	0	2	-	2022	-	2024	\$ -	\$ 100,000
SINAI-GASKIN (PS) 115KV [1560] : ALTA-GASKIN (PS) (Phase 1 of 9)	0	20	-	2022	-	2023	\$ -	\$ 3,800,000
SINAI-GASKIN (PS) 115KV [1560] : ALTA-GASKIN (PS) (Phase 2 of 9)	0	7	-	2022	-	2023	\$ -	\$ 300,000
SINAI-GASKIN (PS) 115KV [1560] : ALTA-GASKIN (PS) (Phase 3 of 9)	0	20	-	2022	-	2023	\$ -	\$ 2,800,000
SINAI-GASKIN (PS) 115KV [1560] : ALTA-GASKIN (PS) (Phase 4 of 9)	0	20	-	2022	-	2023	\$ -	\$ 1,900,000
Total		469					\$ 34,970,000	\$ 34,970,000

Notes:

- (1) Start year reflects the year when initial project costs will begin to accrue (e.g., preliminary engineering /design, site preparations, or customer outreach, if applicable).
- (2) Completion year reflects the year when the project will be completed.
- (3) Amounts reflect SPP totals which include clause spend.

APPENDIX B – FPL 2023 Project Level Detail
Substation Storm Surge / Flood Mitigation Program - Capital Expenditures

County	Substation	Substation Type	Projected Start Year ⁽¹⁾	Actual/Estimated Start Year ⁽¹⁾	Projected Completion Year ⁽²⁾	Actual/Estimated Completion Year ⁽²⁾	Projected 2023 Costs ⁽³⁾	Actual/Estimated 2023 Costs ⁽³⁾
St. Johns	St. Augustine	Distribution	-	2020	-	2023	\$ -	\$ 3,200,000
St. Johns	Lewis	Distribution	2021	2021	2024	2024	\$ 2,201,000	\$ -
Volusia	South Daytona	Distribution	-	2020	-	2023	\$ -	\$ 3,000,000
Indian River	Chambers	Distribution	2020	2020	2023	2024	\$ 3,094,000	\$ -
Indian River	Gracewood	Distribution	2020	2020	2023	2024	\$ 2,555,000	\$ 1,000,000
Collier	Pine Ridge	Distribution	-	2020	-	2023	\$ -	\$ 800,000
Dade	Dumfoundling	Distribution	2022	2024	2024	-	\$ 150,000	\$ -
Total						3	\$ 8,000,000	\$ 8,000,000

- Notes:**
(1) Start year reflects the year when initial project costs will begin to accrue (e.g., preliminary engineering/design, site preparations, or customer outreach, if applicable).
(2) Completion year reflects the year when the project will be completed.
(3) Amounts reflect SPP totals which include clause spend.

APPENDIX B - 2023 Project Level Detail
2023 Program Estimated O&M

2023 SPP PROGRAMS	Estimated Costs (\$ in millions)
Distribution Inspection Program	\$ 3.8
Transmission Inspection Program	\$ 1.4
Distribution Feeder Hardening Program	\$ -
Distribution Lateral Hardening Program	\$ 0.2
Transmission Hardening Program	\$ 0.6
Distribution Vegetation Management Program	\$ 68.2
Transmission Vegetation Management Program	\$ 11.8
Substation Storm Surge	\$ -
Total	\$ 86.0
